☞ We would call the attention of our readers to the advertisement of Messrs. MAYNARD & TIEMANN in another column. Mr. Tiemann has just returned from the mining regions of California and Nevada, where he has been for the last eight months, and purposes for the present remaining in this city, supervising personally the Labratory and Assay office. Mr. Maynard is at present in Colorado, but we understand it is his intention to return in the fall on account of his health.

The Rome, Watertown and Ogdensburg Railroad Company has declared a semi-annual dividend of 5 per cent., payable July 16th.

Atlantic Cable.

On the 22d of May about 900 miles of the new cable had been stowed away in the tanks on board the Great Eastern, and about 60 miles of the cable are stowed away every twenty-four hours. Notwithstanding the vast stowage capibilities of the Great Eastern, it is found that she will not be able to receive the enormous bulk required, and the Atlantic Telegraph Construction and Maintenance have chartered the Medway, a screw steamer, to take a portion on board, and arrangements are made for reshipping about 500 miles of the old cable from the main tank of the former ship to a tank prepared for its reception on board the latter. Another screw steamer, the Albany, has also been engaged to assist in the enterprise, and Government have again granted the services of the ship Terrible to attend on the expedition. According to present arrangements, advantage will be taken of the spring tide on the 28th June to get the Great Eastern out of the harbor. In a day or two afterwards she will start for Beerhaven, and remain there for about a fortnight, when she will start to lay the cable.

☞ The Pottsville *Miners' Journal* learns from a reliable source, that the stock of the Manufacturers and Consumers' Railroad, leading from Philadelphia through Schuylkill County to Sunbury, has been taken by heavy capitalists, and arrangements are now making to place corps of engineers on the route to locate the road.

Commerce of New York.

The officers elected were John Newell, President, L. D. Rucker, Superintendent, and William F. Stanton, Secretary and Treasurer.

☞ The Central Railroad Company of New Jersey have completed the first of a series of wharves for shipping coal at Bergen Point. It is calculated to accommodate six large shippers receiving coal from the Lehigh Valley road, a capacity for double the amount heretofore received from that road, in addition to the shipments that will continue at Elizabethport, until more wharves are built.

☞ The New Haven, Hartford and Springfield Railroad Company recently made an experimental trip from Hartford to Springfield, using for fuel peat of their own manufacture, from beds recently purchased on the line of the road. The whole distance to Springfield and return consumed but about twelve hundred weight of peat. The facility with which steam is generated, and the absence of smoke or cinders, are among the reasons given for pronouncing peat a perfect success.

☞ The resolution appropriating $10,000 to repair the Potomac Bridge has been passed.

☞ The Houghton *Gazette* furnishes some interesting particulars about the operations of the Calumet Mine. From January to the breaking up of the roads in April, a little more than three months, the amount of rock taken out was 516,044 pounds, yielding in ingot copper 73,711 pounds, exclusive of 26 tons of slags. A trial gave the following result:—87,523 pounds of rock smelted without stamping or washing, produced 19,506 pounds af ingot copper. The *Gazette* figures out a balance in favor of the smelting process of $7 per ton.

☞ Books of subscription to the capital stock of the Pequest and Wallkill Railroad Company have been opened at Andover, Sussex Co., N. J. This road is designed to form a link between Newburg and the Lackawanna and Lehigh coal regions. The road is now constructed from Newburg to Warwick, near the New Jersey State line. The new part to be built will intersect the Sussex Railroad at Andover.

☞ According to the new postal law just approved by the President, prepaid and free letters are to be forwarded, at the request of the party addressed, from one postoffice to another without additional postage charge, and dead letters are to be returned to the writers thereof free of postage.

☞ The product of the Clift Copper Mine for five months ending with April, was 515 tons, 1,839 pounds—the product for April being over 122 tons, on a mining expenditure of $18,000.

☞ John D. Prince, of the firm of Prince & Dauchy, has been elected a member of the Stock Exchange.

New York, Saturday, June 30, 1866.

Beers' Semi-Tubular Rail.

We take pleasure in calling attention to an important improvement in railroad rails; *See advertisement on the opposite page.*

Mr. Beers is an Engineer of extensive experience and research in that department both in the United States and Europe.

This improvement secures an important reduction in weight, or first cost, of fully twenty per cent. in Iron Rails, and from 30 to 40 in Steel; while adding also materially to their strength by the adoption of a semi-tubular, or curvillineal form.

By this form of shank, a *lateral resistance* is introduced, and an amount of force equal to the whole strength of the head of the rail edgewise, and also of the shank for several feet along the rail must be expended before any sensible strain is thrown across the base; where the whole strain is concentrated at once in all other forms of rail; therefore breakage by concussion is far less likely than in the common form.

And in the case of steel rails this principle is doubly valuable, as that metal is appropriately used as a spring, instead of an anvil; thereby saving a very large proportion in weight and cost, lessening abrasion on all wearing surfaces, and adding materially to the durability of the equipment by interposing this principle of relief between the concussion, and consequent recoil upon the train which must inevitably follow, on a rail with vertical shank.

The peculiar shape of this shank, forming a brace in the direction of the thrust of the engine, will avoid the direct purchase of the vertical shank, by which force the inside spikes are so soon started.

With reference to iron rails—the principle is highly important notwithstanding the proportions are heavier than in steel; the weight is materially reduced, and the strength enhanced.

The above principle of economy in first cost of rails and wear of equipment will be found on computation to be more than sufficient to double the dividends on our roads if strictly applied; either, or each, of the above considerations would seem to be sufficient to command the attention of the railroad interest.

Union Pacific Railroad.

We have received from Springer Harbaugh Esq., Government Director of the Union Pacific railroad company, a copy of his Report to the Hon. James Harlan, Secretary of the Interior. It is dated Pittsburgh, May 17, 1866, and says:

At the request of the Vice President I accompanied him to Omaha, Nebraska, arriving there Saturday, April 28th, and spent eleven days on the line of operations in a personal examination of everything that would tend to give me an intelligent idea touching the condition, management, and progress of the work. On our reaching the initial point at Omaha, I found the Burnettizing buildings, temporary car house and saw mill, considerable construction material, and the low river base of the company's operations submerged by the overflowing waters of the Missouri to an average depth of say from one to three feet. The general business of the Company was interrupted for about two weeks, say from the 23d of April until the 7th of May. By the active management and exertions of Samuel B. Reed, Esq., General Superintendent, his assistants, and employees, the Company's moveable property was, to a great extent removed and secured, so that it was supposed the absolute loss to the contracting company will not be very great, yet at a considerable cost of time and money. I am pleased to be able to report the Company's permanent brick machine and workshops are situated on more elevated grounds further from the river, and not in the least damaged. I think it would have taken from four to five feet more of a rise in the waters to have materially affected them. I was informed that the greatest floods known by any of the present inhabitants were in April, 1857, and in June, 1862. The flood of this year was, according to their data and recollections, within about seven inches as high as that of 1857, and within twelve to eighteen inches as high as the flood of 1862.

To provide against loss and interruption to the business of the road by a recurrence of these overflows, should receive the early attention of the Board of Managers of the Company.

The machine and workshops, engine house, and turn-tables of the Company at Omaha, erected, as I was informed, in the unprecedented short time of sixty-five days, during last fall and winter, which contain one million one hundred thousand (1,100,000) well burned brick, good stone foundations, and metallic roofs, are of the most permanent character, and conveniently arranged. The machinery in the same is sufficient for the present wants of the Company, and of the latest and most approved construction.

On the 3d inst. I accompanied the Vice President and Consulting Engineer of the Company over the line of completed road to a point near Shell Creek, a distance of seventy-five miles.

We found the line in good condition, and it will compare favorably with any newly constructed Western road. At this point the track-layers under the superintendency of General J. Casement, were energetically pushing the work at the rate of three-quarters of a mile to one mile per day; additional boarding cars, sleeping cars, and tents were being provided, so as to increase the track laying force, which, I since learn by telegraph has been done, and the work is now progressing at the rate of about seven thousand feet per day.

I confidently believe that the first one hundred miles will be completed by the first day of June, whereby the act of incorporation requiring one hundred miles of road to be built will be fully complied with. The energetic contractors informed me, that they contemplated providing artificial lights, to expedite the work, by night as well as by day, and if possible, complete one mile and a half to two miles every twenty-four hours.

From Shell Creek I accompanied Col. S. Seymour, Consulting Engineer, to the "Loup Fork," and over a portion of the grading on the second one hundred miles. I am pleased to be able to report that the temporary bridge over this river is completed, and ready for the track layers. The energy displayed by Messrs. Dort and Butterfield, the contractors on this work, as well as by Mr. Reed, General Superintendent, and Messrs. Case

and Hurd, Division Engineers, deserves honorable mention. The first pile was driven March 22d, and the last one May 2d. The bridge is fifteen hundred feet long, with fifty-seven bents, three piles each, and thirty-seven bents, four piles each, in all three hundred and nineteen piles. The permanent bridge which is intended to take the place of the temporary one, is being pushed forward with vigor, five pier pile foundations, and two pile abutments are driven. The masonry of this structure will most likely be lime stone, transported from the quarries of the Pappillor.

I am informed no stone has yet been found between the Elkhorn and a point on the bluffs about one hundred and ten miles beyond Fort Kearney, where it is supposed a good quality can be procured. The only bridging of any importance between Loup Fork river and Fort Kearney, is one of one hundred feet span, over Wood river, about seventy-five miles west of Loup Fork.

The grading on the second one hundred miles, can and I think will be completed on the 15th of June. A corps of engineers have been sent out to definitely locate the third one hundred miles.

Returning to Omaha I spent several days with the consulting engineer, examining the river banks, and the effect of the overflow of the river bottoms for several miles up and down the Iowa and Nebraska sides of the Missouri. The proper site for a bridge crossing of the river, is a subject of momentous importance, not only to this Company, but to the country, and to the various railways pointing to connections with it, and it should be definitely settled at an early day, for the benefit of the various interests involved. Surveys and soundings have been made; the maps and profiles are being prepared so that it is hoped intelligent conclusions may be arrived at.

Of equipment, I find there are five locomotives now on the line of road, four more in transit, which, at this time, I presume, have reached the line of road—an additional seven, contracted for, to be delivered by the 10th of June, two first class passenger coaches on line of road, one more in transit, and two additional ones to be delivered in June; 119 box and platform cars on line of road and in transit between Hannibal and St. Joseph.

CONSTRUCTION MATERIAL.

The Vice President informs me that the railroad iron chairs and spikes delivered, in transit and provided for, will be sufficient to reach a little beyond the 100th meridian, say 250 miles from Omaha.

The General Superintendent informed me that the ties on hand and paid for, from

Omaha to Grand Island numbered	116,900
Under contract from points on the Missouri, above and below Omaha	134,000
Under contract on line of road, first 100 miles	35,000
Under contract on line of road, second 100 miles	80,000
Under contract on line of road, third 100 miles, being red cedar, to be delivered by January 1st, 1867	100,000
Estimated to be delivered under verbal contract	15,000
Estimated to be delivered from contractors' hands, at three different points	170,000
Total	650,000

Being sufficient ties for the construction of over 250 miles of road.

The company is still put to serious inconvenience for want of railway connections to and from the East. I am pleased to be able to report that these difficulties will certainly be obviated next year. Most of the railroads through Iowa, pointing to connections with the Union Pacific, are making more or less progress, whilst some are pushing ahead with commendable vigor. The Cedar Rapids and Missouri River Railroad Company, under the active management of John T. Blair, Esq., of New Jersey, have put their entire work from Boonsboro' (its present terminus) to the Missouri River, under contract. A force of 1,500 men, with sufficient teams, is now employed upon the work. All of the grading on the first forty miles west of Boonsboro' will be completed by the 10th of July. This embraces some of the heaviest work on the line.

The bridge over the Des Moines River, 840 feet, and including its approaches 1,000 feet in length, is completed, and the track is laid five and a half miles west of Boonsboro'; 520,000 ties contracted for, and being delivered; and 8,800 tons of iron, sufficient for 120 miles of road and bridges, on hand at the Des Moines River and in transit.

For this intelligence I am under obligations to W. W. Walker, Esq., Chief Engineer. I confidently believe that this work, with its energetic management and its abundance of means, can reach the initial point of the Union Pacific within the next twelve months.

The Mississippi and Missouri Railroad is about passing into new hands, who have the ability, and whose interest will manifestly be to reach the Missouri River at the earliest day possible.

The Burlington and Missouri River Railroad Company, I am informed, have a large force at work, constructing westward. I am also informed that the Des Moines Valley Railroad is making rapid progress, and confidently expect to reach the city of Des Moines within a few months. The American Central Railway, recently organized, or rather re-organized, is, I am informed, under contract from Fort Wayne, Indiana, to the Missouri River, to be completed to New Boston, on the Mississippi River, in three years from the first of January, 1866; and from thence to the Missouri River within two years thereafter.

I am informed by Willis Phelps, Esq., who with his associates, are constructing the Council Bluffs and St. Joseph Railroad, that they expect to be able to complete their road within this year, if some of the legal difficulties on the Missouri portion of the line can be overcome within a short time. The ties for the entire road are provided, and one-fifth of the iron is in transit.

I could not learn of much progress being made westward on the Dubuque and Sioux City Railroad. I herewith append a small map showing the probable connections, at an early day, of the several lines, through the State of Iowa, with the Union Pacific Railroad. These lines will be feeders as well as receivers of a trade and business of no ordinary magnitude.

I think the question of the future business of the road merits our earnest consideration. The entire nation has a substantial interest and investment in it; every section completed opens up new fields for improvement, and from whence new sources of revenue may be derived. It has been assumed that the tonnage westward will be largely in excess of the tonnage eastward.

This theory, I am convinced, will not be practically sustained after the great through line is fairly opened for business and in successful operation. The cheap iron ores of Lake Superior, costing at the mines say three dollars and fifty cents per gross ton, are transported by rail to the lake; thence by water say 600 miles, and by rail say 200 miles (in all about 800 miles,) costing, on an average, ten dollars per ton, including everything at points for extracting and working the same, feeding a great number of blast furnaces, yielding 66 ⅔ per cent. of pure pig iron, worth at this time say forty-two dollars per ton, supplying more than one-half of the metal consumed by all the rolling mills of Northeastern Ohio and Western Pennsylvania, and all of this trade has been created since 1858 or 1859.

I am informed that the copper mines of New Mexico are now being successfully worked. The ores are smelted, the cost of mining and smelting being about five cents per pound. The copper taken to Guaymas, Sonora, a distance of about 500 miles of land carriage, at a cost of seven cents per pound. Thence to our eastern seaboard of Europe at a cost of one cent per pound, thus making the actual cost of the refined copper, at the consuming points, about thirteen cents per pound, when the net cost of the Lake Superior refined copper delivered at Pittsburg or New York, will now average from twenty-two to twenty-four cents per pound.

I am also informed that silver ore is being transported by wagons from Nevada to San Francisco, a distance of about 250 miles, and thence is shipped to England for smelting.

It is therefore no great stretch of the imagination to believe that the tonnage of this great national highway will, at no distant day, consist largely of the precious ores, (including copper) from the mineral districts of our Western States and territories to the Eastern States, where cheap fuel, cheap labor and improved machinery will be used for their smelting and refining.

The completion of this gigantic inter-oceanic enterprise within the time designated by the act of incorporation, begins to assume a decided probability.

It is worthy the efforts of the nation. We can now contemplate the early connection of the distant parts of our Union, the development of our rich mineral and agricultural domain, and the great benefits that must inure to the nation, borne down by new responsibilities.

I am informed by the Vice President that a geological examination of the country for the first one hundred miles on the company's land is now being made by Professor Eggleson and his assistants.

In closing this report, I desire to express my obligations to the consulting engineer, and the several officers of the company on the line of road, for their uniform courtesy and the information they promptly furnished me with. I also desire to acknowledge the kind and gentlemanly treatment I received from Thomas C. Durant, Esq., Vice President, whom I accompanied to Omaha, whose heart, mind and money have been devoted to the enterprise from its inception. The public spirited gentlemen who are contributing so largely of their means in the prosecution of this work, which is destined to conduct a traffic of extraordinary magnitude, merit substantial returns on their investments.

Inter-State Railroad Bill.

The President has signed the act to facilitate commercial, postal and military communication among the several States, the passage of which was so bitterly and persistently opposed by several leading railroad companies. A copy of this bill was published in our issue of the 16th inst.

New York and New Haven Railroad.

The income of this company for the years ending March 31, 1865 and 1866, have been as follows:

	1865.	1866.
From passengers	$1,500,333 74	$1,548,580 18
" freight	263,904 80	340,017 79
" mails, expresses, extra baggage, etc.	83,053 77	93,614 75
	$1,847,291 81	$1,982,212 72
Expenses, viz:		
Transp. expenses	$485,452 68	$469,689 31
Repairs of road, etc.	220,915 10	385,485 84
" equipment.	226,296 16	221,712 39
Fuel, oil and waste	214,902 27	194,143 39
Haulage by horse-power	77,128 75	78,692 30
	$1,224,694 96	$1,349,723 49
Leaving as earnings on transporation	$622,596 85	$632,489 25

The resources for the year and their disposal have been as follows:

RESOURCES.

Cash on hand, April 1, 1865	$166,445 42
Materials	362,321 98
Proceeds of allotted stock	1,001,025 00
Earnings as above	632,489 25
	$2,162,281 65

PAYMENTS.

Coupons for the year	$129,120 00
Loss, operating canal road	44,799 97
Dividends paid during the year	144,852 00
Materials for the coming season	338,998 41
Reduction of accounts payable	82,411 55
Fractional shares on allotment	7,190 00
Equipment, viz.: 2 new locomotives, and our proportion (about one third,) of 2 new passenger cars for the Boston line; less 1 old locomotive, and our share of 8 old Boston line passenger cars sold	37,855 22
Schuyler Fraud, paid judgments against the company on the spurious stock	970,002 70
Cash on hand, April 1st, 1866	407,051 80
	$2,162,281 65

The results of the years operations have been as follows:

Earnings		$1,982,212 72
Expenses of transp	$1,349,723 47	
Renewals of equipment	37,855 22	
Loss operating canal road	44,799 97	
Coupons for the year.	129,120 00	
		1,561,498 66
Leaving applicable to dividends		$420,714 06

A dividend was paid in July last, free of Government tax, of 4 per cent. on the stock then outstanding ($3,621,300 00,) amounting to $144,852 00; and another is to be paid on the 18th day of May, free of Government Tax, of 5 per cent., on the present full Capital of Five Millions Dollars, being $250,000 00.

In our report to you last year, it was stated that appeals had been taken from the Supreme Court to the Court of Appeals on all the adjudicated cases arising from the Schuyler Fraud which were argued at length before the Court at Albany in June last, and in the month of December the Court rendered a decision against the company on all the cases before it, with the exception of that of Messrs. Ketchum, Rogers & Bement, which was ordered back for a new trial. The balance have been settled, as well as a number of claims not included in the appeal, and the aggregate, up to this period, on account of these frauds, amounts to $1,599,202 70.

In the item of expenses is found an amount of $125,000 00 taxes, national and state, paid during the year. The general expenses of railroad management do not lessen very materially; the prices of supplies being somewhat reduced from those at this period of last year, but labor, however, is without any change of moment. Our supply of materials, on hand and paid for, will be found to be on a liberal scale, and insure to the travelling public a safe and satisfactory road for the current year, when considered in connection with the large amount expended during the past year in putting both road and equipment in a good and safe condition. The report of the General Superintendent, James H. Hoyt, Esq., to the Board of Directors, will be found annexed, giving a careful review of the Transportation Department, to which your attention is invited; and it again affords us much satisfaction in being able to convey the satisfactory manner in which the duties of this department, as well as all others of the company, have been performed during the past year.

For the purpose of paying the judgments confirmed by the Court of Appeals, the most equitable plan appeared to be that adopted to wit: the issue of new shares and filling up the capital to Five Millions of Dollars, the amount authorized; of these shares, 439 remain as yet undisposed of, the property of the company.

The number of miles run by passenger trains during the year was 535,126; by freight trains, 101,340; by service trains 36,110—total 672,576. Number of passengers carried, 1,849,915; do., carried one mile, 66,709,592. Tons of freight moved 119,742; do., moved one mile, 6,737,444. Of the passengers carried 1,352,381 were local, and 497,534 to and from other roads; 699,420 wese passengers over Harlem road; 375,841 commuters over do., and 774,654 passengers beyond do. Of the freight moved 56,022 tons were local and 63,709 to and from other roads.

The equipment consists of 34 locomotives, 77 passenger, 21 mail and baggage, and 391 freight cars—of which 6 locomotives, 6 passenger, 3 baggage and mail, and 150 freight cars are used to operate the Canal Road.

CONDENSED BALANCE SHEET.

Railroad; including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station houses, shops, fixtures, furniture, machinery, engineering, agencies, interest, discount on bonds		$4,656,302 46
Loss by the Schuyler fraud (nearly all now settled)		1,599,202 70
Equipment, locomotives, cars, etc		970,220 41
Real estate, (including leases) in the cities of New York and New Haven		65,505 66
Forfeited stock, allotments not taken		43,900 00
Materials, iron, lumber, fuel, etc		338,998 41
Cash, on special deposit, in banks and offices		407,051 80
		$8,081,181 44
Capital stock		$5,000,000 00
Bonds; due Dec. 1, 1866, with interest coupons of 7 per cent. payable on the first days of June and Dec. in each year		912,000 00
Bonds; secured by mortgage, due Oct. 1, 1875, with interest coupons of 6 per cent., payable on the first days of April and Oct. in each yr.		1,088,000 00
Profit and loss; being the surplus of earnings not paid out in dividends, (but of which there has been expended $333,131 23 on additional second track, new bridges, depots, and other buildings, equipments, retiring bonds, &c., less 25 per cent., discount made on the shares allotted to stockholders and payments for fractional shares		940,396 18
Accounts payable; being coupons due April 1st, 1866, March payrolls, and balances due other roads		140,785 26
		$8,081,181 44

Officers of the corporation chosen May 18th, 1865:

President.—GEO. B. CARHART.

Directors.—George B. Carhart, George N. Miller, Abraham R. Van Nest, James J. Roosevelt, Wilson G. Hunt, John Bradley, E. C. Scranton, John W. Leeds, Jonathan Godfrey.

Superintendent.—JAMES H. HOYT.

Treasurer.—WILLIAM BEMENT.

Secretary.—E. S. ABERNETHY.

☞ The Secretary of the Treasury, upon a question submitted to him, has decided that iron, whether imported or domestic, to be used in the construction of steam-boilers for vessels, must be stamped in the manner required by law, otherwise the makers or users will be subject to a penalty.

☞ Additional rails have been laid on the Bellefontaine Railway line, so that the cars of the Atlantic and Great Western Railway now pass from Salamanaca to Indianapolis. Through passengers make but one change of cars on this route between New York and Indianapolis.

Milwaukee and St. Paul Railway.

At the annual meeting of the shareholders of the Milwaukee and St. Paul Railway, held June 16, 1866, the following gentlemen were unanimously elected directors for the year ensuing: Alexander Mitchell, President; Russell Sage, Selah Chamberlain, N. A. Cowdrey, Fred. P. James, Washington Hunt, Walter S. Gurnee, John W. Cary, S. S. Merrill, E. B. Wesley, Julius Wadsworth, H. C. Stimson, Isaac Scott.

At the annual meeting of the shareholders of the Milwaukee and Prairie du Chien Railway, held June 14, 1866, the following gentlemen were elected by a majority of more than 16,000 shares: Alexander Mitchell, President; H. C. Stimson, Russell Sage, Fred. P. James, N. A. Cowdrey, Walter S. Gurnee, S. S. Merrill, Hans Crocker, Joseph Rudd.

At the adnual meeting of the shareholders of the Minnesota Central Railway, held June 21, 1866, the following gentlemen were unanimously elected directors for the year ensuing: Selah Chamberlain, Alexander Mitchell, Russell Sage, E. B. Wesley, Walter S. Gurnee, R. T. Baldwin, E. H. Goodrich, Daniel L. Wells.

The number of miles of railway now controlled by the Milwaukee and St. Paul Railway Company is—

	Miles.
Milwaukee and St. Paul line	275
Milwaukee and Prairie du Chien	235
McGregor Western	50
	560
To be added within a short time—	
Eastern division of the La Crosse	95
La Crosse and Winona	30
Winona and St. Peter	80
Minnesota Central	70
	835

—now or soon to be under control of the Milwaukee and St. Paul Railway Company.

Wicomico and Pocomoke Railroad.

At a meeting of the stockholders of this company held in Worcester county, Md., on the 4th inst., the following gentlemen were elected directors: Lemuel Showell, Henry B. Johnson, Cyrus L. Williams, B. Jones Taylor John Bishop, John R. Purnell, Littleton P. Franklin, Robert J. Henry, James Whaley, Jno. S. Timmons, Ritchie Fooks and Purnell Toadvine. The meeting resolved that the road should connect with the Delaware railroad and continue by the Eastern Shore Railroad at Salisbury, and from thence by Dirickson's Cross Roads, Whaleyville, and Fassett's Corner to the town of Berlin, with stations or depots at each place.

☞ The earnings of the Philadelphia and Reading Railroad in April, 1866 were $861,603, against $932,282 in April, 1865—a decrease of $70,679. The net profit for the month was $326,807, against $404,055 for the same month last year—a decrease of $77,248. For the first five months of the fiscal year the net profit has been $1,201,897, against $1,528,315 in the corresponding period of the preceding year—a decrease of $326,418.

☞ The Delaware railroad has been completed within 4½ miles of Somers' Cove. It is expected that it will be open for southern travel by the first of August.

Journal of Railroad Law.

LIABILITY FOR RUNNING OVER CATTLE ON THE HIGHWAY.

The case of Dunnigan *vs.* the Chicago and Northwestern Railway Company, decides that where a railroad company permits the cattle guards to remain filled with snow, so that cattle which have gotten upon the highway without any negligence on the part of the owner, pass over the guards, and in consequence of being thus upon the track are injured by a train, the company is liable for damages.

By the Court, COLE, J.—The Circuit Court gave without qualification or amendment, the several instructions asked for by the appellant on the trial. Those instructions embraced many propositions defining the duties, rights and liabilities of the parties. Among other things, the jury were told that if the evidence showed that the injury to the cattle was occasioned by the mutual negligence of the plaintiff and defendant; or if the wrongful act of the plaintiff co-operated with the misconduct of the defendant to produce the result; or if the owner permitted his cattle to run at large in the highway or other place where they could pass at pleasure upon the railroad track, he was guilty of gross and culpable negligence; and in neither of the above supposed cases was the company liable for the damages sustained by the killing of the cattle. The Court then further instructed the jury that if they should be satisfied from the evidence that the cattle guards on each side of the highway crossing the railroad of the defendant were filled with snow and allowed so to remain, and that the cattle of the plaintiff which were injured were running at large on such highway, having escaped thereon through the opening in the fence along such highway, without the knowledge of the plaintiff and being there passed upon such railroad, and over such cattle guards on to the track of such railroad, and the injury complained of occurred, and that the negligence of the defendant consisted solely in permitting such cattle guards so to become and remain filled with snow, then the plaintiff would be entitled to recover.

The only exception taken in the case was to this instruction. We are of opinion that it was strictly pertinent to the facts proven on the trial, and is sound in principle. The essence of the instruction is, that it was the duty of the company to keep its cattle guards open, and not suffer them to remain filled with snow so that cattle going along the highway would pass on to the track and be liable to be killed; that the company permitting its cattle guards to remain in that condition was guilty of negligence, and if an injury was thereby sustained it was liable. This is what the instruction amounts to. Now it is pretended that the charter does not impose upon the company the duty of putting up and maintaining proper cattle guards along its track. And why is this? Obviously for the protection of the property of the citizen. Yet to what purpose are railroad corporations required to put up such guards, if they are not kept open, but are permitted to fill up, so that cattle are liable to pass over them on to the track without any fault to the owner? Now we are to assume in this case that the plaintiff was guilty of negligence; that his cattle escaped from his enclosure into the highway without his knowledge, and then passed over on to the track of the company because the cattle guards were filled with snow, and had been permitted to remain in that condition, and while thus on the track were killed. If the company was not bound to keep its cattle guard open, it was guilty of no negligence. On the contrary, if it was its duty to keep them open and it did not, and this negligence caused the injury complained of, then it is liable.

In view of the facts proven on the trial we are of opinion that the Circuit Court fairly laid down the law applicable to the case, and that the judgment must be affirmed.

Judgment affirmed.

Fortifications versus Railways.

The Paris *Moniteur* publishes a report from the Minister of War to the Emperor, proposing modifications in the situation of ninety-eight fortified towns in France; the changes, he observes, have been rendered advisable by the development of railway communications in the empire. The Minister proposes to divide these towns into four classes: In the first, consisting of eighteen, the military buildings only will be preserved; in the second, nine in number, the fortresses will be retained under military jurisdiction; in the third, thirty-seven, the zone beyond the external limit of the fortifications will be abandoned; and in the fourth class, consisting of thirty-four, the territory outside the defensive works, but subject to military servitude, will be decreased in extent. The Emperor has approved the modifications.

Ohio and Mississippi Railroad.

The following is an abstract of the report of the Trustees of creditors and stockholders of this company, presented to the holders of certificates at their annual meeting, December 13, 1865.

The property acquired at different times, and held for the benefit of the certificate holders, was on the 1st of December last, as follows:

First mortgage bonds	$759,850 00
Second "	247,000 00
" " coupons	110,810 00
Construction bonds and scrip	4,176,162 59
Premium allowed on construction bonds as per agreement	1,402,066 36
Construction coupons	620,305 00
Income bonds and scrip	3,303,164 71
Income coupons	344,610 00
Capital stock and scrip	567,763 17
Sundry claims	391,477 41
Rolling stock	523,795 98
Accrued interest, &c., surrendered	174,657 97
Loans from income bondholders to pay coupons	192,171 75
Aggregate assets held by trust	$12,813,834 94

In payment for these assets the Trustees, up to December 1, 1865, had issued:

Preferred 7 per cent. certificates	$1,624,185 69
Common certificates	10,887,899 91
Total certificates issued	$12,512,085 60

The balance having been settled in cash or its equivalent.

The total amount of certificates authorized to be issued on account of the company is:

Preferred 7 per cent. certificates	$1,700,000 00
Common certificates	12,000,000 00
Total certificates authorized	$13,700,000 00

From these statements it appears that the Trustees held for ulterior distribution $75,814 31 in preferred certificates, and $1,112,100 09 in common certificates, or a total of $1,187,914 40.

The following statement shows the details of the property received into the trust from the Western Division up to Dec. 1, 1865, and the amount of certificates issued in payment therefor:

First mortgage coupons	$28,910 00
Second " bonds	750,000 00
" " coupons	11,025 00
Accrued interest allowed on coupons	7,385 51
Funded debt, bonds and scrip	805,725 00
Premium allowed on same	4,700 00
Income bonds and scrip	923,500 00
The entire road, 148 miles long, including all the capital stock, rolling stock, the Caseyville Branch road, and all lands and other properties	7,730,025 00
	$10,261,270 51
Less first and second mortgage coupons with interest redeemed in cash up to Dec. 1, 1865	47,320 51
Aggregate assets received by trust	$10,213,950 00

For which has been paid as follows:

Common certificates	$8,934,950 00
Preferred "	1,326,320 51
Total certificates issued	$10,161,270 51

From these statements it appears that the Trustees have issued, up to the 1st of December, 1865, on account of the two interests forming the new connection as follows:

	Common.	Preferred.	Total.
Eastern Div.	$10,887,900	$1,624,186	$12,512,086
Western Div.	8,934,950	1,326,320	10,261,270
Total issued	$19,822,850	$2,950,506	$23,773,356

The claims and securities outstanding against the trust are exhibited in the following statement:

	Eastern Division.	Western Division.	Total.
First mort. bonds	$2,050,000	$850,000	$2,900,000
" " coup.	71,225	32,690	103,915
Second " bonds.	11,000	750,000	761,000
" " coup.	8,015	1,260	9,275
Construction b'nds and scrip	65,837	.....	65,837
Construction coupons & interest.	8,449	.....	8,449
Income bonds and scrip	16,835	226,500	243,335
Income coupons & interest	1,768	.....	1,768
Funded debt, b'ds and scrip	.....	44,275.	44,275
Funded debt, coupons & interest.	.....	3,099	3,099
Capital stock, including $1,000,000 held by the city of Cincinnati for loan of $600,000, (receivable into the trust at 10 per cent.)	1,696,701	.....	1,696,701
Various claims	80,000	.....	80,000

Of the above claims and securities, all are receivable into the trust, except the following:

1st mort. bonds, Eastern Div. due July 1, 1872	$2,050,000
1st mort. bonds, Western Div. due July 1, 1872	850,000
2d mort. bonds, Western Div. due Jan. 1, 1874	750,000
Total mortgage debt outside of trust	$3,650,000

—or about $10,700 per mile on total length of road.

The following table shows the gross earnings of both divisions, and of the whole line for each year, from 1858 to 1865, inclusive. For the year

1865, the month of November is approximately stated, and December estimated:

	Eastern Division.	Western Division.	Total.
1858 ..	$846,669 91	$626,640 90	$1,473,310 81
1859 ..	974,430 75	698,315 09	1,672,745 84
1860 ..	959,231 59	725,681 16	1,684,912 75
1861 ..	771,999 25	574,115 97	1,346,115 22
1862 ..	1,122,530 27	797,402 22	1,919,932 49
1863 ..	1,663,702 41	1,162,126 49	2,825,828 90
1864 ..	1,945,986 66	1,365,084 16	3,311,070 82
1865 ..	2,210,526 34	1,548,607 11	3,759,133 45

From this statement it appears that the gross earnings of 1865, are in excess of those of 1864, by the sum of $448,062 63.

According to statements furnished from the General office at Cincinnati, the earnings of the years 1864 and 1865, were derived from the folsources:

	1864.	1865.
Passengers	$1,755,983 95	$2,096,701 15
Freight	1,401,374 76	1,485,363 77
Mails	68,199 96	68,199 96
Express	85,512 15	108,868 57
	$3,311,070 82	$3,759,133 45
Expenses same period	2,891,607 92	2,742,511 04
Net receipts..	$419,463 10	$1,016,622 41

—showing an increase over the business of 1864, of $597,159 31.

Of the net balance of the earnings as above, stating the distribution of this fund in round numbers, it shows remitted to New York office to pay interest, (including mail pay retained there,) the sum of	$521,000
For condemnation of land at East St. Louis, for depot purposes, $157,000, of which there has been paid	82,000
Construction work, embracing engine houses, stations, etc.	159,400
Paid on account of two new engine houses	30,000
Paid on account of Bridgeport accident in 1862	13,600
Paid on account of cars built at the shops	27,300
	$833,300
Leaving balance unexpended, estimated of	184,000

The proportion of receipts, consumed in expenses, as exhibited in the previous statement, is 87 per cent. for 1864, and 73 per cent. for 1865.

Our Foreign Imports.

While we avow we are the friends of commerce, have for several years back advocated the revision of our commercial treaties, and on more than one occasion have called the attention of the public to the fact that very large changes have recently been made in the commercial regulations of foreign countries, which have not been officially noticed here, yet we see with pain that a large amount of foreign goods comes and is sold here, which we do not want, being either able to do without them, or to produce them ourselves. We have frequently called the attention of our readers to the fact, that here the shops and warehouses of Europe empty themselves continually at our expense, the owners of which by their command of our market keep our financial affairs in constant disturbance, and indirectly contribute to perpetuate the reign of extravagance, paper money and inflation.

In looking over the entries of foreign vessels at this port, on Thursday last, we noticed that a large if not the largest numbers of consignees are foreign agents with difficult names, and the goods imported seem to be many of them entirely out of place. Thus, in a Liverpool ship, we find large quantities of iron and iron rods, and earthen pipes; in another, hundreds of sacks of salt, fire brick by the ten thousand, nails, and casks of plaster. In a Dutch ship we find hundreds of cases of glass, bundles of willow, packages of spelter and zinc. In a Porto Rico vessel comes castor oil; in a Barbadian, whale oil; in a Martinique bark, *lemonade;* in a Mansinilla brig, cedar; and from Halifax we get potatoes. Coal and pig iron come here all the time in large quantities, though our country could supply the world.

What does all this mean? The articles named are mentioned promiscuously, and given to show that they are sent here to be turned into money and taken away again in that shape, often at our great inconvenience. The late flurry in the gold market was one of the consequences of this kind of commerce. There is more iron and coal in this country than in any other in the globe; and yet we import them by millions of tons, and are undersold by those who bring them 3,000 miles across the ocean!

The numerous names of the consignees on that day, will be found many of them, to be of foreign spelling, quite unAmerican and unfamiliar; and yet they are at the head of this importing business, making fortunes for their associates abroad. They in fact rule the street, and make the market what they like.

While we are in favor of business, we regret to see our money go where we can get nothing back. Cotton is about the only thing we can now send out of the country. Our tobacco furnishes a monopoly to the French Government, and enormous revenues to the English. Thus wheat stays at home to rot; it is even brought here from abroad, and we eat French bread.

One of the corrections of all this evil rests with ourselves. It is a revision and contraction of our paper currency. As long as we are issuing and using paper at prices far beyond what it may be converted into, we must give more of it for every article we want than we otherwise would. We obtain no standard of prices, have none of value. The whole business of buying and selling is but a system of gambling, and there being plenty of paper, and most people being willing to exchange it for other property, do not care what they give for anything. A recklessness of expenditure opens up to speculation in a thousand ways, the opportunity of making money out of this folly; and we have a class of middlemen who are actually getting rich as commission dealers between buyers and sellers. The ⅛ per cent. charged on the ordinary money transactions in exchanges in the street give enormous incomes to hundreds of individuals. These add to the general mass of the expenders of money easily made, and all comes finally out of the earnings of labor. This is the base of the pedestal, no matter how showy may be the column which rises to our view.

Just as soon as our gold is not within the easy grasp of the foreign trader, just as soon as it is got here in the same way it is got elsewhere, and a promise to pay it is worth as much here as anywhere else, and is as convertible, we shall see a very different state of things. During a great and costly war, it was excusable that we should sustain ourselves by every means in our power. We might even give three paper dollars for one of gold and call them eventually good, if this be necessary; but after peace is restored, when no further debt is necessary, when the receipts of income are large, when taxation is heavy, and reimbursement positively assured, it seems preposterous and wicked to keep our fictitious system a single day when the necessity for doing so has entirely ceased.

There is a large monied interest establishing itself in this country, which has all the benefit of this disorder. A large class is allowed to issue their own promises to pay, to receive interest from the people for having loaned some of these promises to pay to the Government, while they never do so, and they do not wish to be called on to perform their own contracts, though they are not unwilling to press all others who do not perform theirs. As long as a paper dollar is worth but 60 or 66 cents, and they can get interest in it as if it were really 100, they are making money. At the same time sellers charge what they like, and have for their excuse the unsettled market—the price of gold—the expense of remittance—the change in values. Every one is adrift, and persons of moderate means are nowhere in the confusion.

Almost all the foreign goods now brought here are sold at an enormous profit and turned into gold. It is rather tough that pig iron, of which we have an unlimited quantity, should come in here by the ton and be converted in 30 days into the precious metals to be taken away. The philosopher's stone is found at last, and it is in the United States. Our remedy is with ourselves. With fixed prices, fixed values, fair chances in the market and any equality in trade, we are not at all apprehensive of American skill, or of the results. But at present, our defective currency puts us behind all other nations, who are sending here everything that can be carried, and turned into money. We sometimes feel almost inclined to advocate non-intercourse and entire seclusion from other nations. We could do without almost everything they send us, and then live in comfort and ease; but at present we seem to be hewers of wood and drawers of water for those who hate us, envy us, and take our money in every shape they can. The richest, most ingenious, most industrious and the most enterprising people in the world, are the victims of the old fashioned, the effete and obtuse of the old world.

Union Pacific Railroad.

The Omaha and Kansas branches of the Union Pacific Railroad are being pushed westward with considerable rapidity. Col. Evans, Chief Engineer of the Omaha branch, is west of Kearney seeking for a practicable route from the Platte Valley to the Republican; and the company are looking to the expediency of making Denver a point, and passing through the heart of Colorado, provided it is possible to surmount the range. Denver is rejoicing in the anticipation that the southern branch, from which that city and the Territory hope to derive greater benefits, will also soon be completed to that point. We believe it is contemplated to form a junction of the two branches upon the Republican, if it be determined to make Denver a point in the southern branch, and run a single line from there onward. Col. Evans, of the northern line, and Col. Wickes, of the southern, will be in Denver probably in June, or early in July, and will immediately proceed to make thorough and complete surveys of the mountain passes. Although Colorado may be debarred from admission as a State for the present, the refusal may not work to her detriment, and her rapid development under her growing advantages will soon demand for her an admission into the sisterhood of States.—*Leavenworth Conservative.*

American Railroad Journal.

Saturday, June 30, 1866.

Stock Exchange and Money Market.

The report of the associated banks of this city for the week ending June 23, shows the following results: Their loans have increased during the week, $1,135,261, the specie has decreased, $2,713,209, the circulation has lessened, $302,462, their net deposits have fallen off, $446,383, while their legal tenders have increased in amount by the sum of $1,661,214. Thus we see the metallic reserves have declined very considerably, but the banks with but small circulation like those in this city are safe as long as their legal tenders are abundant, and these pass as money by the operation of law. This brings us to consider the subject of the resumption of specie payments, which just now appears to be very remote; so far from it, indeed, that we think events are quite unfavorable to the idea. The late news from Europe is not only warlike but discouraging. In a few short months the clouds of war have grown more dense, and we all know what tempests follow when the sky becomes heavy and stormy. In a late number we ventured the opinion that the metallic reserves of the nations engaged in the conflict would not hold out three months. The statement is being verified already. Italy has suspended specie payments, so far as to place certain kinds of paper money on a par with it in the discharge of debts, and though the sum thus far set afloat is moderate, we know very well no issue will stop until a heavy depreciation takes place. In Austria, paper is also circulated as money in place of the hard metals, and has been for some time, and Austria was never remarkable for its currency, even when it was pretended to be convertible. France is reported to be enjoying a plethora of specie. The Bank of France is said to have in its vaults more than six hundred millions of francs, above one hundred millions of dollars more at one time than it ever had before, or the Bank of England has had in its most prosperous days. This enormous sum is at the disposal of the French Emperor, practically and politically, and enables him to dictate to the rest of Europe. That he will do so when the right moment comes for him we do not doubt, and yet even he, if there be much of a struggle, will find himself obliged to resort to paper. So that it is quite possible there may be a general suspension of specie payments throughout Europe in a year or two, though the English will fight hard against the necessity. Such a state of things bids defiance to all deliberate calculation, but its possibility is already forseen and felt in this market. We see the speculators in gold preparing for a rise, and the importations kept up with incredible boldness. It seems to be a common idea among our merchants that we can receive all the goods of the world and consume them. Money is plenty, and people will have what they want as long as they can get the funds. Labor is still high, wages are dear, a man at the brainless work of the shovel can get his three dollars and three dollars and a half a day, and many a mechanic earns from $4 to $10 a day without much difficulty. It is but little matter how much a thing costs, if the money to pay for it is at hand. We have yet some things to understand in this country, and have not learned them yet. The French nation recovers itself from its financial difficulties by its economy, we do not think it worth while to practise it. We may learn this after a time.

The combination to keep up the price of gold is strong and vigilant. It is favored by circumstances, not interfered with by any. We have a large amount of currency afloat, a paper dollar is worth but about two-thirds of its face, and prices keep up very much in accordance. Some articles, such as tea, are higher than ever, and those who like the cup which cheers but not inebriates do not fancy this state of things. In this world we wish to have some comforts at a moderate cost, but a dollar for a peach is rather excessive even in the United States. As regards the general management of our national finances, as far as the Government is concerned, everything is going on well. This confidence enables us to disregard temporary inconveniences. We find the fundamental policy of the Secretary of the Treasury, which we have fully approved and all philosophical and practical minds must accept, is persevered in though in the face of much opposition. Since July 1, 1865, we find the greenback notes have lessened in amount from $433,169,569, to $402,128,318 on the 1st of June, and none since then have been issued to swell the amount. The

5 per cents during the same time, those which were used as currency, and which were in July, 1865, out to the extent of $39,954,230, have been paid off, the compounds have been reduced in the same time from $212,126,470 to $162,012,140, making a total reduction of all the national obligations to be equivalent to $121,100,811, and we have as we shall presently see, an enormous balance in the Treasury, and eleven States doing little or nothing to lessen the public debt. But more than this. We may safely add to the effect of this diminution the amount of those remaining compound notes, which bear a premium, and consequently are in fact withdrawn from active circulation, to wit., $162,012,140. It is also estimated that the next monthly statement of the Treasury will show that the whole amount of greenbacks afloat is but about $390,000,000, and the authorized contraction by the Treasury after 6 months from April last, will be $4,000,000 per month more. During the last nine or ten months the Treasury has largely reduced the principal of the public debt, besides meeting all the expenses of the army and navy and others of less questionable necessity, and for which Congress alone is responsible.

Nevertheless it is questionable whether with a European war, the rise of gold and the condition of trade, it will be easy to fund the old debts falling due into a new one at 5 per cent. We have yet to face many financial difficulties. The question is on whom shall the disadvantage of a change most properly fall. We come back to first principles, and maintain that labor and industry shall be spared, and speculation and large profits look out for themselves. They have had the field to themselves for a long time, let the classes who toil, and produce and save, have their turn; without them we should be nowhere.

We have had placed in our hands the proposals of a new American Company, a kind of *credit mobilier*, authorised by the Legislature of Tennessee, the object of which is to assist the industry and commerce of the South. The document is an able well considered one, and offers in its arguments many inducements for its establishment. We have not room to enlarge upon it in this place as we shall be pleased to do at a fitting opportunity. We understand that the company has taken offices in this city and are likely to find favor with capitalists. Certainly any project which will restore the business, the prospects and the commerce of the South will always find in our columns a warm support.

We find on our table a congressional document of great interest. It, is the report of James W. Taylor an agent of the Treasury on our commercial relations with British America. It was communicated officially to Congress by Mr. McCulloch, in reply to a resolution of Congress passed by that body in March last. It contains numerous tables of shipping, exports, values, articles and duties for 13 years, and throws great light on Canadian commerce, tariffs and products; among those of the maritime provinces as coal, 652,-854 tons being raised and sent to market in the year 1865 from Nova Scotia alone. The report is very descriptive of the various provinces and territories, and altogether is a valuable addition to our stock of information. But what makes the report most conspicuous is the suggestion of a plan of union with the provinces, representation, &c., to be affected by the United States, with an offer on our part when effected to pay $85,000,000, as follows: Canada West $36,500,000, Canada East $29,000,000, Nova Scotia $8,000,000, New Brunswick $7,000,000 New Foundland $3,000,000 and Prince Edward's $2,000,000. The proposed Act making these grants gives also annually in aid of local expenditures $1,646,000 to the provinces in particular proportions, and also provides that Canada West shall have 12 members of Congress, Canada East including New Foundland 11, New Brunswick 2, Nova Scotia Prince Edwards' 2. The navigation of the St. Lawrence and the Canals are to be improved so as to admit the passage of ships of 1,500 tons, and the expense is not to exceed fifty millions of dollars. Various railways are also promised. It is proposed to do all this by act of congress and many other things with about 13 sections.

But it must not be forgotten that this plan of annexation is but the plan of Mr. Taylor, and is submitted without opinion by the Secretary, and the probability is, that it will not meet with a favorable response by the Provinces if it assume even a more positive shape. Confederation is a settled purpose with them at present, and this conclusion has been arrived at by the abrupt termination of the reciprocity treaty, but more by the late Fenian invasion. This last affair has done that business effectually. There were those who foresaw all this, and who recommended a continuance of commercial reciprocity to keep this trade as it was. What now remains for us is to make the best of it, but as to the provincials, we conceive that it is the interest of the confederates to keep themselves free from the complications of all future foreign wars. This is their only danger, and one which they might as well avoid as did the colonies in the time of the last James. The fate of Canada in case a war breaks out between the United States and England is very clearly to be seen. It is the interest of the Provinces to secure their neutrality as soon as possible. That done they may look forward to permanent prosperity. We believe there are Statesmen in England and in Canada who see the force of this position very clearly and will advocate it. The mining market is still easy. Interest is in many cases put as low as 4 per cent., though the use of gold is paid for at the most usurious rates. The price demanded is enormous. Governments are quiet and steady, quite unaffected by the turmoil in the street. They continue favorites with all classes, and are easily converted into cash or used as securities. Exchange is still dull, in fact under par. If there are any debtors who owe much abroad, they have their own way about remitting and make their own terms. They certainly just now are a highly favored class. It is reported that the Rothchilds have written their correspondent here to draw no more bills and ship no more gold! The shipments recently made have been principally on speculation and a poor one at that. It is only when exchange is high and money scarce that the bill sellers make their harvest.

It has often been predicted that New York was yet to become a great financial centre for the world, and that here heavy financial negotiations would take place. The first remarkable movement in conformation of this theory is the advertisement of a Roman loan. In other words the Holy See has asked and advertised to borrow four millions of dollars in the city of New York and regular coupon bonds are being offered by his agents here at the rate of $100 in bonds for $66 in gold paid for the same. The interest of 5 per cent. is payable here and in Paris and amounts in fact to 7½ per cent. The Arch Bishop of New York has indorsed the loan, and subscriptions are received by Duncan Sherman & Co., and others. This loan is an appeal to American Catholics especially, and will no doubt meet with favor. It is a symptom of the times, when finance uses religous influence to obtain success, and when New York is esteemed a point at which capital may be hereafter extracted by foreign interests.

The New York exports, exclusive of specie, for the week ending June 26, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,455,906	$2,388,335
Prev. reported	74,457,062	102,495,879
Since January 1	$76,912,968	$104,884,214

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$992,825	$2,074,282
Gen. merchandise	2,215,391	4,672,661
Total for the week	$3,208,216	$6,746,943
Prev. reported	67,407,274	155,694,466
Since January 1	$70,615,490	$162,441,409

The balance in the Sub-Treasury on Wednesday was $99,052,846 84.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

B. C. Morris & Son.

This new stock commission house, doing a general business in money and securities, and making collections in the States and Canada, propose to carry out some principles which will make monied transactions much safer for principal and agent with ample security for both. They intend to receive and issue certified checks exclusively, and to require the amount of a probable order to be fully covered at the time of giving it. They will neither buy nor sell stocks at option. It will thus be seen that they propose quite a revolution in the mode of doing business, so much to the advantage of the public, that they will undoubtedly be considered as public benefactors.

Imperial Mexican Railway.

The Imperial Mexican Railway connecting the capital city with Vera Cruz, a distance of 350 miles, is one of the greatest railroad enterprises ever undertaken. In a distance of 55 miles an elevation of 7,000 feet is to be overcome, corresponding to 119 feet per mile, or 2 feet in every 44½ feet throughout the whole distance. The most abrupt ascent ever before achieved was that on the Copiapo line in Chili, 196 feet per mile in 17 miles; but the chief incline of the Mexican Railway at Maltrata will overcome 211 feet per mile in a distance of 23 miles. In achieving this part of the work, the engineers have been called upon to construct over the river Metlac, midway between the cities of Orizaba and Cordova, a viaduct which, when completed, will surpass any structure of the kind now existing in the world. This viaduct, to consist of an iron bridge, now nearly completed in England, will carry the road over the Barranca de Metlac, at the enormous height of 380 English feet, nearly 150 feet higher than any such work now extant. One hundred and sixty miles of this road will be opened this month, and the whole is under contract to be completed on the 30th of April, 1869. The road is built under the superintendence of Col. Andrew Talcott, an eminent American engineer.

Platte County Railroad.

We learn from the Kansas *Journal* that the Council Bluffs and St. Joseph Railroad Company, through their President Mr. Phelps, have purchased that portion of the Platte County Railroad extending from St. Joseph to the State line north paying therefor $150,000 in Missouri State bonds. Mr. Phelps obligates himself to complete the road to the Iowa State line by the 1st of January, 1867. Cars already run to Savannah, and the grading is completed to Forest City. The line for the balance of the way follows the Missouri River Valley, where the grading is very light, and the necessary bridging and culverts can be built at a slight expense. Mr. Phelps has already purchased, we understand, the necessary iron and other materials for its speedy construction. Othe County in Nebraska has donated $100,000 in county bonds to aid in its construction to Nebraska City, upon condition that it be built to that point one year from September next. Mr. Phelps has accepted the conditions, and obligates himself to finish the contract, so that enterprising city can expect an Eastern and Southern railroad connection inside of 15 months.

Baltimore and Potomac Railroad.

The directors of this road have resolved to receive proposals for its construction, on the following terms: First. The right of way to be secured, and the road to be located by the company. Second. The road to be completed from Baltimore city to Upper Marlboro', with a branch road to the city of Washington, and delivered to the company on or before the first of January, 1870, and from Upper Marlboro' to the Potomac River, to be completed and delivered within the time required by the terms of the charter. Third. Payment to the contractors to be made in the bonds of the company, bearing interest from January 1, 1870, or from completion of road to Upper Marlboro' and the branch, and the bonds to be delivered at 80 per cent.

Tennessee State Bonds.

The Tennessee State bonds, which are now selling at 99¾@100, carry 33 per cent. arrearages of interest since the 1st of January, 1861. Three per cent. of this interest, or the half-yearly coupon of July 1, 1866, will be paid in cash, on that day at the National Bank of the Republic in this city. The other 30 per cent. is fundable into a new bond due at or about the same time as the original bond. Whether the holders of the old bonds will be permitted to accept the cash payment on the surrender of the 1st of July, 1866, Coupon, without funding the other 10 Coupons in arrear we are not advised. But we advise all holders to accept the settlement in full in order to make their Bonds at all times marketable. After the 1st of July the New York Stock Exchange dealings will be in the Bonds as readjusted, that is ex all Coupons.

☞ Some 15 or 20 men, with teams, have commenced work upon the Utica, Chenango and Susquehannah Valley Railroad, near N. W. Moore's lower paper mill, a short distance from Souquoit. The work is being done under the contract entered into with Henry Bailey, esq., of Watertown.

Railroad Earnings.--Weekly.

The earnings of the Western Union Railroad for the week ending June 21, 1866 ....$24,910 90
Corresponding week previous year.... 20,379 73

Increase..... $4,531 17

Receipts from Jan. 1, to June 21:
1866 .....$322,657 67
1865 ..... 265,807 63

Increase $56,850 04

The traffic of the Great Western Railway of Canada, for the week ending June 22d, 1866, were $58,997 72
Corresponding week of 1865 ..... 56,740 90

Increase..... $2,256 82

The earnings of the Marietta and Cincinnati Railroad the 2d week in June, 1866....$21,556 00
Corresponding week previous year.... 28,302 94

Decrease $6,746 94

Commencing 1st Jan. 1866..... ....$481,467 00
Commencing 1st Jan. 1865..... ..... 480,367 59

Increase..... $1,099 41

The earnings of the Chicago and Northwestern Railway for the third week in June, 1866 were.....$225,703 68
Corresponding week of previous year.. 191,908 06

Increase..... $33,795 62

The earnings of the Chicago and Great Eastern Railway for 3d week in June were....$27,153 00
Same period last year..... 25,114 51

Increase in 1866.....$2,038 49

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in June, 1866, were..... $86,726 00
Corresponding week of 1865 ..... 87,519 00

Decrease $793 00

The earnings of the Michigan Central Railroad for the 3d week in June, 1866, were...$79,043 79

Minnesota State Railroad Bonds.

The Minnesota Legislature at its last session passed an act for the Equitable adjustment of the State Railroad Bonds, the following is a copy:

Be it enacted by the Legislature of the State of Minnesota:

Section 1. The Governor shall nominate, and by and with the advice and consent of the Senate, appoint three commissioners, citizens of this State, who, having qualified by filing in the office of the Secretary of State an oath of office, shall inquire into and report to the next Legislature of this State, at the commencement of its session, who are the holders of the State railroad 7 per cent. bonds, issued under and pursuant to the amendment to section 10 article 9 of the constitution adopted April 15, 1858, the amount due to each holder thereof, and the amount which each bona fide holder paid therefor.

Sec. 2. The said board shall have power and authority to receive propositions from the several owners and holders of said bonds on what terms they will surrender the same to the State, and to inquire into and examine all claims arising under the amendment aforesaid, and report thereon as required in section 1 of this act.

Sec. 3. The said Board of Commissioners shall cause a notice to be published in two newspapers published at St. Paul, and one newspaper published in the city of Boston, and one in the city of New York, stating the time and place of their meeting and the object of their appointment, and requiring the holders of said bonds to present before the said Board of Commissioners their claims against the State, together with proof of the amounts paid for said bonds. The said Board of Commissioners shall have power to send for persons and papers, and to administer oaths, and to examine any party presenting claims under oath or by deposition.

Sec. 4. All claims or bonds arising under and by virtue of said amendment, which shall not be presented to said Board of Commissioners prior to the first day of January, 1867, shall be forever barred, and the Legislature will not feel bound to recognize.

Sec. 5. This act shall take effect and be in force from and after its passage.

Approved February 28, 1866.

The commissioners appointed by the Governor of Minnesota, by virtue of the above-named act, are now in session at the Astor House, in the city of New York, and will meet at the Capitol in the city of St. Paul on the 18th day of July, 1866.

Baltimore and Ohio Railroad.

The usual monthly meeting of the directors of this company was held in Baltimore on the 14th inst., the President, J. W. Garrett, Esq., presiding.

In addition to the usual routine business, the board approved the recommendation of the committee of transportation for a material reduction of the local tariff on agricultural implements, to take effect on the 18th instant, the business in which, it was stated, had recently largely increased.

The board also approved of the purchase of a large additional property upon Locust Point, at a cost of $25,750, designed for the increase of station facilities at that point, and for use in connection with the large steamers intended hereafter to ply between Baltimore and European ports.

The proceedings of the convention of the four Atlantic trunk lines, held in New York on the 22d and 23d of May last, were submitted, and the action of the president in connection with the agreement then made was unanimously approved.

The president called the attention of the board to the frequent attacks that had recently been made by certain newspapers in Washington city and other parties, who were apparently in the interest of the so styled air lines and other projects which were claiming the legislation of Congress and its authority for building railroads through the territory of the State of Maryland. The allegation had been repeatedly made by these parties that the Baltimore and Ohio Company did not design to act in good faith in the construction of the railroad from the Point of Rocks to Washington. The president desired to review the action of the board, and to develop, in the most authoritative form, the present determination of the company upon this subject. During the war, especially, much anxiety had been expressed by leading members of Congress and many of our most distinguished military officers for a direct interior line to the West—a line which, in the case of foreign war, would be removed from the danger of attacks from the coast, and which would economise the cost and time of transportation, both for freight and passengers, from a large portion of the West and Northwest.

The company was advised by many eminent members of the Government and of Congress that if it would obtain legislation from the State of Maryland to build a direct line of road from the Point of Rocks to the city of Washington, all the reasonable requirements of all parts of the country would be gratified, and there would be no danger of any attacks upon the policy and interests of the State of Maryland in connection with her system of internal improvements. With great unanimity the Legislature of Maryland granted a charter for the Metropolitan Branch, free from capitation or other tax, and the company proceeded at once to survey and locate the line. The distance from Point of Rocks by the Relay House to Washington is 91 miles. The line selected by the engineers for the Metropolitan Branch is but 42 miles, showing a saving of distance for the immense travel and business from the West to Washington of 49 miles.

The company has already effected contracts, amounting to over $56,000, upon which the work is rapidly progressing, upon the heaviest portion of the line, at Parr's ridge, and as the president understands the determination of the company, its design is fixed to progress rapidly with the work upon the route, as soon as the requisite legislation is obtained from Congress for the portion of the line in the District of Columbia, and when it is ascertained that the reasons upon which the action of the company is based are correct, namely, that no unnecessary and competing lines will be authorized by Congress, which would serve to damage largely or destroy the investment which would be thus made. As these reckless charges have been recently repeatedly made, undoubtedly for the purpose of unjustly influencing Congress in its action upon antagonistic bills now before it, a further expression of the judgment of the board was now desired, that the president might continue to speak authoritatively upon the subject.

It might not be improper to state that an absurd and untruthful statement had been made that the quartermaster general had recommended the department to build a road from Washington to Point of Rocks during the war, and that the influence of this company was used to prevent the construction of such a line for the Government. This charge, like those being made generally against the company, is without the slightest foundation. The officers of this company certainly never heard of such a design, and the president judged that the quartermaster general would be as much surprised as himself by having attributed to him a design to build such a road for the Government during the war.

Col. Nicholas offered the following resolution, which, after receiving the earnest endorsement and approval of the members who addressed the board upon the subject, was adopted by a unanimous vote:

"*Resolved*, That the president be authorized to state that the policy of the Baltimore and Ohio Railroad Company, as heretofore declared, is to build the Metropolitan Branch Road from Point of Rocks, to Washington, and that, the work there-

on shall be vigorously prosecuted, provided that the construction of no additional or parallel line or lines be authorized by the Congress of the United States."

In the course of the debate attention was called to the fact that the company now possesses a first-class double track road from the Point of Rocks to the Relay House, and from the Relay House to Washington, and the present capacity of the road is far more than quadruple any probable business for Washington, but that the direct branch road would be built, although upon a most costly route, irrespective of remunerative results, in order to gratify and promote the various and large interests that would be benefited by its construction.

A communication from W. P. Smith, master of transportation of the company, was submitted, tendering his resignation, to take effect on the 30th instant, in connection with which the president offered the following resolutions, which were unimously adopted:

"*Resolved*, That in accepting the resignation of William Prescott Smith, as master of transportation of this company, this board takes pleasure in acknowledging its sense of the ability, fidelity and integrity with which, during many years, and in trying periods, he uniformly discharged the duties of his office.

"*Resolved*, That the board hereby tenders to him its most cordial wishes for his future success and prosperity."

The president then nominated Mr. John L. Wilson (the present master of the road) as the successor of Mr. Smith as master of transportation. In making this nomination, the president stated that Mr. Wilson entered the service of the company in 1848; that he was appointed assistant master of road in 1854, and master of road in 1858; that during the eighteen years of service in the company, Mr. Wilson had been distinguished by a uniform devotion to its interests, by the exhibition of marked foresight, energy, courage, indomitable perseverance, and by the most careful and judicious selection of the officers and men in his department. It was scarcely necessary for the president to state to the board that to this eminently practical officer the company had been largely indebted for many of the brillant successes of his department during the war, in the rapid and repeated reconstruction of the bridges, tracks and works of the company; that under his supervision, prior to the war, many of the principal and most difficult tunnels of the company were successfully arched, and much superior bridge masonry and double track had been constructed, and the iron and other bridges erected, with the most marked avoidance of accidents and with uniform safety and success. Whilst to some members of the board he might not be personally known, as his modesty was only exceeded by his merit, his general reputation for integrity, and as an earnest and faithful officer, could not fail to be appreciated by all. The president did not doubt that his large experience, during the long period he had been connected with the works and business of the company, would enable him to make a most practical, efficient and successful master of transportation.

The president stated that the assistant officers in the road department were men of energy and ability, and he expected at an early day to present for the action of the board suggestions in regard to the organization of that department, that would insure its continued success.

After the remarks of the president, the nomination of Mr. Wilson as master of transportation was confirmed and approved by an unanimous vote.

In connection with the business of the company for the past month, it was stated that, exclusive of the large quantity of coal brought from the Alleghany region for the use of the company, 89,073 tons of bituminous and gas coals had been transported for the trade, being 19,068 tons more than the largest number of tons transported in any previous month in the history of the company. It was added that, with the rapid increase of double track, the large and increasing equipment in locomotives and cars of the company, and with the great demand for the coals from the line of the road for manufacturing, railway and marine purposes, a continuous and heavily increased business might be anticipated in the future. The company's arrangements for the expected further development of this trade were of the most extensive and comprehensive character. Recently the construction of a further addition of one hundred three-pot iron hopper coal cars had been ordered. The board then adjourned.

Interest and Dividends.

The Pittsburg, Ft. Wayne and Chicago Railway Company have declared the regular dividend of two and one-half per cent. on the capital stock, for the quarter ending June 30, payable, free of United States tax, on and after July 18th. The semi-annual dividend of three and one-half per cent., due October 1, on the third mortgage bonds, is also ordered paid, in anticipation, at the same time.

The Columbus and Indianapolis Central Railroad Company have declared a quarterly dividend of 2½ per cent. in cash, on the stock of the company, and also 5 per cent. in stock, both free of Government tax, payable on and after July 10, at the company's office, Columbus, Ohio.

The New Bedford and Taunton Railroad Company has declared a dividend of $4 per share, payable June 30.

The Panama Railroad Company have declared a dividend of four per cent., out of the earnings of the road for the three months ending 30th inst., and two per cent. out of the earnings of steamers, sailing vessels, &c., payable to the stockholders, or their legal representatives, on and after the 5th of July next.

The Hartford and New Haven Railroad Company has declared a quarterly dividend of $3 per share.

The Connecticut River Railroad Company has declared a dividend of 4 per cent., payable July 2.

The Boston and Providence Railroad Company have declared a dividend of five per cent., payable free of U. S. tax, July 2.

The Boston and Maine Railroad Company have declared a dividend of five per cent., payble, free of U. S. tax, on the 2d of July.

The Providence and Worcester Railroad Company have declared a semi-annual dividend of four per cent., payable July 2.

The Vermont and Massachusetts Railroad Company have declared a dividend of $1 50 per share, payable July 2.

The Worcester and Nashua Railroad Company have declared a dividend of $4 per share, payable July 2.

The Fitchburg Railroad Company has declared a dividend of $3 per share, payable July 2, to holders of stock, June 23.

The Terre Haute and Indianapolis Railroad Company have declared a dividend of 6 per cent.

"New System of Ventilation."

We have read with much satisfaction a pamphlet published by Henry A. Gouge under the above title, descriptive of his process of Atmospheric Ventilation. It seems to be the adaptation of a well known principle, by a simple and effective contrivance to any place needing ventilation.

The testimonials which he appends are from parties who are well known, and give assurance that he does accomplish what is so much needed —perfect ventilation. See advertisement of Gouge's Ventilating Co.

The Aerial Bridge over Broadway.

The construction of this bridge has at last assumed a definite shape. It was originally projected by Alderman Charles E. Loew of the Twelfth Aldermanic district, upon whose motion the matter was referred to a special committee of five, of which Alderman Loew was chairman. The committee held several sessions, at which they received proposals for this work, and finally agreed upon a plan which seemed the cheapest, the most ornamental, and at the same time the most durable of all the plans submitted to the committee.

On the 18th inst., the committee presented their report to the Aldermen in favor of the device mentioned, and authorizing the Street Commissioner to advertise for plans and specifications. This report the Board of Councilmen on the 21st inst., concurred in, and the paper was sent to Mayor Hoffman for his official sanction. His Honor kept the matter before him until the 26th, at which time he approved it, and the resolution at once became a law. In pursuance thereof the Street Commissioner will invite proposals for the erection of this bridge; but the result has been already anticipated, as the firm submitting the accepted plan will undoubtedly receive the contract at the sum they proposed, viz., $15,000. The Legislature caused to be inserted in the City Tax Levy the amount of $15,000 for the erection of this bridge, so that as soon as all the necessary formulas shall have been complied with, our citizens may look for the commencement of the work.

☞ The Montreal *Gazette* says that a meeting was held at Varna on the 4th inst., to promote the construction of the projected road between London, C. W., and Bayfield, on the River St. Clair. Such a line would run through a very rich and improving portion of the country, which is now excluded from railway communication, and become an important channel of transit between Lake Huron and Lake Erie, thus avoiding the difficult navigation of the Detroit River.

☞ Mr. S. S. Merrill, the General Manager of the Milwaukee and St. Paul Railroad, has been elected General Manager of the Milwaukee and Prairie du Chien railway, *vice* Mr. James C. Spencer, resigned.

☞ Hon. W. C. Pierrepont has been re-elected President of the Rome, Watertown and Ogdensburgh Railroad Company, Marcellus Massey Vice-President, and B. E. Hungerford Secretary.

Railroad Earnings.--Weekly.

Minnesota State Railroad Bonds.

The Minnesota Legislature at its last session passed an act for the Equitable adjustment of the State Railroad Bonds, the following is a copy:

Be it enacted by the Legislature of the State of Minnesota:

Section 1. The Governor shall nominate, and by and with the advice and consent of the Senate, appoint three commissioners, citizens of this State, who, having qualified by filing in the office of the Secretary of State an oath of office, shall inquire into and report to the next Legislature of this State, at the commencement of its session, who are the holders of the State railroad 7 per cent. bonds, issued under and pursuant to the amendment to section 10 article 9 of the constitution adopted April 15, 1858, the amount due to each holder thereof, and the amount which each bona fide holder paid therefor.

Sec. 2. The said board shall have power and authority to receive propositions from the several owners and holders of said bonds on what terms they will surrender the same to the State, and to inquire into and examine all claims arising under the amendment aforesaid, and report thereon as required in section 1 of this act.

Sec. 3. The said Board of Commissioners shall cause a notice to be published in two newspapers published at St. Paul, and one newspaper published in the city of Boston, and one in the city of New York, stating the time and place of their meeting and the object of their appointment, and requiring the holders of said bonds to present before the said Board of Commissioners their claims against the State, together with proof of the amounts paid for said bonds. The said Board of Commissioners shall have power to send for persons and papers, and to administer oaths, and to examine any party presenting claims under oath or by deposition.

Sec. 4. All claims or bonds arising under and by virtue of said amendment, which shall not be presented to said Board of Commissioners prior to the first day of January, 1867, shall be forever barred, and the Legislature will not feel bound to recognize.

Sec. 5. This act shall take effect and be in force from and after its passage.

Approved February 28, 1866.

The commissioners appointed by the Governor of Minnesota, by virtue of the above-named act, are now in session at the Astor House, in the city of New York, and will meet at the Capitol in the city of St. Paul on the 18th day of July, 1866.

Baltimore and Ohio Railroad.

The usual monthly meeting of the directors of this company was held in Baltimore on the 14th inst., the President, J. W. Garrett, Esq., presiding.

In addition to the usual routine business, the board approved the recommendation of the committee of transportation for a material reduction of the local tariff on agricultural implements, to take effect on the 18th instant, the business in which, it was stated, had recently largely increased.

The board also approved of the purchase of a large additional property upon Locust Point, at a cost of $25,750, designed for the increase of station facilities at that point, and for use in connection with the large steamers intended hereafter to ply between Baltimore and European ports.

The proceedings of the convention of the four Atlantic trunk lines, held in New York on the 22d and 23d of May last, were submitted, and the action of the president in connection with the agreement then made was unanimously approved.

The president called the attention of the board to the frequent attacks that had recently been made by certain newspapers in Washington city and other parties, who were apparently in the interest of the so styled air lines and other projects which were claiming the legislation of Congress and its authority for building railroads through the territory of the State of Maryland. The allegation had been repeatedly made by these parties that the Baltimore and Ohio Company did not design to act in good faith in the construction of the railroad from the Point of Rocks to Washington. The president desired to review the action of the board, and to develop, in the most authoritative form, the present determination of the company upon this subject. During the war, especially, much anxiety had been expressed by leading members of Congress and many of our most distinguished military officers for a direct interior line to the West—a line which, in the case of foreign war, would be removed from the danger of attacks from the coast, and which would economise the cost and time of transportation, both for freight and passengers, from a large portion of the West and Northwest.

The company was advised by many eminent members of the Government and of Congress that if it would obtain legislation from the State of Maryland to build a direct line of road from the Point of Rocks to the city of Washington, all the reasonable requirements of all parts of the country would be gratified, and there would be no danger of any attacks upon the policy and interests of the State of Maryland in connection with her system of internal improvements. With great unanimity the Legislature of Maryland granted a charter for the Metropolitan Branch, free from capitation or other tax, and the company proceeded at once to survey and locate the line. The distance from Point of Rocks by the Relay House to Washington is 91 miles. The line selected by the engineers for the Metropolitan Branch is but 42 miles, showing a saving of distance for the immense travel and business from the West to Washington of 49 miles.

The company has already effected contracts, amounting to over $56,000, upon which the work is rapidly progressing, upon the heaviest portion of the line, at Parr's ridge, and as the president understands the determination of the company, its design is fixed to progress rapidly with the work upon the route, as soon as the requisite legislation is obtained from Congress for the portion of the line in the District of Columbia, and when it is ascertained that the reasons upon which the action of the company is based are correct, namely, that no unnecessary and competing lines will be authorized by Congress, which would serve to damage largely or destroy the investment which would be thus made. As these reckless charges have been recently repeatedly made, undoubtedly for the purpose of unjustly influencing Congress in its action upon antagonistic bills now before it, a further expression of the judgment of the board was now desired, that the president might continue to speak authoritatively upon the subject.

It might not be improper to state that an absurd and untruthful statement had been made that the quartermaster general had recommended the department to build a road from Washington to Point of Rocks during the war, and that the influence of this company was used to prevent the construction of such a line for the Government. This charge, like those being made generally against the company, is without the slightest foundation. The officers of this company certainly never heard of such a design, and the president judged that the quartermaster general would be as much surprised as himself by having attributed to him a design to build such a road for the Government during the war.

Col. Nicholas offered the following resolution, which, after receiving the earnest endorsement and approval of the members who addressed the board upon the subject, was adopted by a unanimous vote:

"*Resolved*, That the president be authorized to state that the policy of the Baltimore and Ohio Railroad Company, as heretofore declared, is to build the Metropolitan Branch Road from Point of Rocks, to Washington, and that, the work there-

on shall be vigorously prosecuted, provided that the construction of no additional or parallel line or lines be authorized by the Congress of the United States."

In the course of the debate attention was called to the fact that the company now possesses a first-class double track road from the Point of Rocks to the Relay House, and from the Relay House to Washington, and the present capacity of the road is far more than quadruple any probable business for Washington, but that the direct branch road would be built, although upon a most costly route, irrespective of remunerative results, in order to gratify and promote the various and large interests that would be benefited by its construction.

A communication from W. P. Smith, master of transportation of the company, was submitted, tendering his resignation, to take effect on the 30th instant, in connection with which the president offered the following resolutions, which were unimously adopted:

"*Resolved*, That in accepting the resignation of William Prescott Smith, as master of transportation of this company, this board takes pleasure in acknowledging its sense of the ability, fidelity and integrity with which, during many years, and in trying periods, he uniformly discharged the duties of his office.

"*Resolved*, That the board hereby tenders to him its most cordial wishes for his future success and prosperity."

The president then nominated Mr. John L. Wilson (the present master of the road) as the successor of Mr. Smith as master of transportation. In making this nomination, the president stated that Mr. Wilson entered the service of the company in 1848; that he was appointed assistant master of road in 1854, and master of road in 1858; that during the eighteen years of service in the company, Mr. Wilson had been distinguished by a uniform devotion to its interests, by the exhibition of marked foresight, energy, courage, indomitable perseverance, and by the most careful and judicious selection of the officers and men in his department. It was scarcely necessary for the president to state to the board that to this eminently practical officer the company had been largely indebted for many of the brillant successes of his department during the war, in the rapid and repeated reconstruction of the bridges, tracks and works of the company; that under his supervision, prior to the war, many of the principal and most difficult tunnels of the company were successfully arched, and much superior bridge masonry and double track had been constructed, and the iron and other bridges erected, with the most marked avoidance of accidents and with uniform safety and success. Whilst to some members of the board he might not be personally known, as his modesty was only exceeded by his merit, his general reputation for integrity, and as an earnest and faithful officer, could not fail to be appreciated by all. The president did not doubt that his large experience, during the long period he had been connected with the works and business of the company, would enable him to make a most practical, efficient and successful master of transportation.

The president stated that the assistant officers in the road department were men of energy and ability, and he expected at an early day to present for the action of the board suggestions in regard to the organization of that department, that would insure its continued success.

After the remarks of the president, the nomination of Mr. Wilson as master of transportation was confirmed and approved by an unanimous vote.

In connection with the business of the company for the past month, it was stated that, exclusive of the large quantity of coal brought from the Alleghany region for the use of the company, 89,073 tons of bituminous and gas coals had been transported for the trade, being 19,068 tons more than the largest number of tons transported in any previous month in the history of the company. It was added that, with the rapid increase of double track, the large and increasing equipment in locomotives and cars of the company, and with the great demand for the coals from the line of the road for manufacturing, railway and marine purposes, a continuous and heavily increased business might be anticipated in the future. The company's arrangements for the expected further development of this trade were of the most extensive and comprehensive character. Recently the construction of a further addition of one hundred three-pot iron hopper coal cars had been ordered. The board then adjourned.

Interest and Dividends.

The Pittsburg, Ft. Wayne and Chicago Railway Company have declared the regular dividend of two and one-half per cent. on the capital stock, for the quarter ending June 30, payable, free of United States tax, on and after July 18th. The semi-annual dividend of three and one-half per cent., due October 1, on the third mortgage bonds, is also ordered paid, in anticipation, at the same time.

The Columbus and Indianapolis Central Railroad Company have declared a quarterly dividend of 2½ per cent. in cash, on the stock of the company, and also 5 per cent. in stock, both free of Government tax, payable on and after July 10, at the company's office, Columbus, Ohio.

The New Bedford and Taunton Railroad Company has declared a dividend of $4 per share, payable June 30.

The Panama Railroad Company have declared a dividend of four per cent., out of the earnings of the road for the three months ending 30th inst., and two per cent. out of the earnings of steamers, sailing vessels, &c., payable to the stockholders, or their legal representatives, on and after the 5th of July next.

The Hartford and New Haven Railroad Company has declared a quarterly dividend of $3 per share.

The Connecticut River Railroad Company has declared a dividend of 4 per cent., payable July 2.

The Boston and Providence Railroad Company have declared a dividend of five per cent., payable free of U. S. tax, July 2.

The Boston and Maine Railroad Company have declared a dividend of five per cent., payble, free of U. S. tax, on the 2d of July.

The Providence and Worcester Railroad Company have declared a semi-annual dividend of four per cent., payable July 2.

The Vermont and Massachusetts Railroad Company have declared a dividend of $1 50 per share, payable July 2.

The Worcester and Nashua Railroad Company have declared a dividend of $4 per share, payable July 2.

The Fitchburg Railroad Company has declared a dividend of $3 per share, payable July 2, to holders of stock, June 23.

The Terre Haute and Indianapolis Railroad Company have declared a dividend of 6 per cent.

"New System of Ventilation."

We have read with much satisfaction a pamphlet published by Henry A. Gouge under the above title, descriptive of his process of Atmospheric Ventilation. It seems to be the adaptation of a well known principle, by a simple and effective contrivance to any place needing ventilation.

The testimonials which he appends are from parties who are well known, and give assurance that he does accomplish what is so much needed —perfect ventilation. See advertisement of Gouge's Ventilating Co.

Such a line would run through a very rich and improving portion of the country, which is now excluded from railway communication, and become an important channel of transit between Lake Huron and Lake Erie, thus avoiding the difficult navigation of the Detroit River.

☞ Mr. S. S. Merrill, the General Manager of the Milwaukee and St. Paul Railroad, has been elected General Manager of the Milwaukee and Prairie du Chien railway, *vice* Mr. James C. Spencer, resigned.

☞ Hon. W. C. Pierrepont has been re-elected President of the Rome, Watertown and Ogdensburgh Railroad Company, Marcellus Massey Vice-President, and R. E. Hungerford Secretary.

An Act to Authorize the Formation of Corporations.

An Act to amend an Act entitled "An Act to authorize the formation of corporations for manufacturing, mining, mechanical, or chemical purposes," Passed February 17, 1848. Passed April 28, 1866.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The title of the Act entitled "An Act to authorize the formation of corporations for manufacturing, mining, mechanical purposes," passed February 17, 1848, is hereby amended so as to read as follows: "An Act to authorize the formation of corporations for manufacturing, mining, mechanical, chemical, agricultural, horticultural, medical, or curative, mercantile or commercial purposes."

SEC. 2. At any time hereafter, any three or more persons may form a corporation for the purpose of carrying on any kind of manufacturing, mining, mechanical, chemical, agricultural, horticultural, medical, or curative business, may make, sign, and acknowledge before some officer competent to take acknowledgment of deeds, and file the same in the office of the Clerk of the County in which the business of the Company shall be carried on, and a duplicate in the office of the Secretary of State, a certificate in writing in which shall be stated the corporate name of each Company and the object for which it shalll be formed, the amount of capital stock, the number of shares of which said stock shall consist, the term of its existence not exceeding 50 years, the number of its trustees and the names of those who shall manage the concerns of the Company for the first year, and the names of the town or city and county in which the operations of said Company shall be carried on.

SEC. 3. It shall be lawful for any manufacturing company, heretofore or hereafter organized under the provisions of this act or the act hereby amended, to hold stock in the capital of any corporation engaged in the business of mining, manufacturing or transporting such materials as are required in the prosecution of the business of such company, so long as they shall furnish or transport such materials for the use of such company, and for two years thereafter and no longer; and the trustees of such company shall have the same power with respect to the purchase of such stock and issuing stock therefore as are now given by law with respect to the purchase of mines, manufactories and other property necessary to the business of manufacturing companies. But the capital stock of such company shall not be increased without the consent of the owners of two-thirds of the stock, to be obtained as provided by sections 21 and 22 of the act hereby amended.

SEC. 4. When any such manufacturing company shall be a stockholder in any other corporation, its President or other officers shall be eligible to the office of trustee of such corporation, the same as if they were individual stockeolders therein.

SEC. 5 This act shall take effect immediately.

Southwest Pacific Railroad.

We are informed that the sale of the Southwest Pacific Railroad to Gen. Fremont was consummated yesterday by the approval of the contract of sale, and by the execution and delivery of the deed to Gen. Fremont and of the mortgage by Gen. Fremont to the State. The first instalment of purchase money ($325,000) was paid to the Commissioners, who to-day delivered possession to James Tanssig, Esq., as attorney in fact of Gen. Fremont. The papers were all filed for record in the Recorder's office of the county. By reference to the seventh and eighth paragraphs of the contract, it appears that the interest of the State is very stringently secured. A failure to perform any condition of the contract works a forfeiture of the road and every portion of it to the State, and gives to the Governor the right to take immediate possession of the road without process of law. Besides this, the State gets a mortgage on the road securing the balance of the purchase money, and the performance of all the conditions of the contract. This mortgage may be enforced by a sale of the road in the ordinary mode. The ninth article of the contract secures to the State lien the precedence over all other liens and mortgages which may be hereafter created by the purchaser. By the terms of the contract the road is to be completed to Springfield in two years, while the law required the road to be completed to Springfield in four years. In several other respects is the contract more favorable to the State than the law required. Thus the law required the preservation of a lien to the State, only for the payment of the purchase money and for the expenditure of half a million dollars each year, while the contract preserves a lien to the State for those two and all other conditions of the contract.

We are informed that the contract was drawn up by the attorneys of the Commissioners and of the purchaser, and that the Governor before approving it submitted the same to the Attorney-General, who pronounced the contract drawn in accordance with the law.

It is the intention of the purchaser to commence work immediately, and to complete the road as fast as men and money can build it.—*Missouri Democrat, June* 16.

Portable Railways.

The principle upon which the construction of railways has proceeded in this country is one which, well suited for the purpose of locomotive traveling, is not less applicable in that large field of labor which still gives so large an amount of employment for farm horses. Just as the steam plough promises to supersede the old form, so is there reason to believe that a very large extension of the railway principle may be applied successfully to the economy of many kinds of farm labor. There are difficulties, no doubt, in the way of any change in the system in this direction; but they ase surely not of a nature which would be considered insuperable. At the last meeting of the Southport Cattle Show, our attention was directed to a model of a plan by which the railway system could be very readily applied to the farm. The system was, if we remember rightly, the invention of Mr. Grant, of Bankside, Southwark, and its main features consisted of a very successful combination of simplicity with lightness and strength. The invention, we are informed, is already rapidly working its way into favor by several influential gentlemen, who are using it, not merely as a substitute for carts and wheelbarrows in such works as road-making, quarrying, brick-making, and the emptying of lakes, all of which it does remarkably well, at a very saving of labor. It is also useful as a means of overcoming difficulties in farming practice, such as the state of the weather which agriculturists have hitherto been accustomed to regard as insurmountable, but which may now be successfully contended against, assured of being able to remove the produce off the land without interference by the rains, and when the carting would be injurious upon the soil, the farmer may now safely leave his crops to arrive at maturity and afterwards to be got in by rail. The same also applies to the depositing of manure in the winter season, for now, instead of waiting for a frost, which too frequently does not come at all, he can now run it out by rail at any convenient time, regardless of weather and without injury to the land.

The leading features in the construction of the rails are the combination of wood and iron affording a large bearing surface, the simple, but effectual, mode by which their ends are jointed together, the weight of the passing truck being the only fastening, the total absence of cross-sleepers and consequent even bearing of the rails upon the ground throughout the entire length, and the light iron tie-rod for regulating the gauge. The trucks and turn-table are, in point of lightness, simplicity, and strength, in perfect keeping with the rails, and we anticipate the time when we have no doubt that these light, inexpensive, and really portable railways of Mr. Grant, will be considered as indispensable an adjunct to every well-managed farm or estate as the lumbering and mischevious dung-cart is at present.—*London Railway News.*

B. C. MORRIS & SON,

STOCK COMMISSION HOUSE,

No. 17 William St.

Government Securities, Railways, Petroleum, Mining Insurance Stocks and Scrip, Miscellaneous shares of all descriptions, bought and sold at the different Stock Boards.

Collections made in all the States and Canadas.

For the more thorough protection of all—both Broker and "Principal"—our business will be conducted entirely on the basis of Certified Checks; none given or received unless Certified.

To more fully enable us to carry out this principle, although starting with a sufficient capital, all parties giving orders for stocks, of whatever description or amount, will be required to cover same with probable amount at time of leaving order. Receipts for such deposits given until stocks are delivered.

No Stocks Purchased or Sold on "Option,"

Out-of-town orders solicited, and those complying with above requirements will receive spec al and prompt attention.

Quotations can be had daily upon application, or will be furnished if desired.

France.—A glance at the Map.

The position occupied by France at the present time is one of unprecedented importance. Never has it occupied so commanding an influence in the affairs of the old world as now. Its ancient enemy, England, seems determined to withdraw from all considerations but commercial ones, and for these is willing to take any place that may fall to it; but France, rich and confident, with a sort of contempt for any progress that is not full of glory, aspires to influence and direct the policy of Europe. It is pretty apparent that the Emperor means to profit by the occasion. The Empire, said he, is Peace, but it always sleeps with the sword in hand. Its material strength cannot be overrated. With the exception of Spain, it is the most compact and homegeneous of the European kingdoms. It possesses an extensive coast, and is forced into commerce; it has several noble rivers and considerable internal navigation; it has some fine sea ports and great naval stations. It can trade at its pleasure with the shores of the Atlantic and the Mediterranean, close at hand; while it can, by the way of India, reach forth its hand for the treasures of the East? The continental area of France is 201,576 square miles—about four times as large as that of England, and two-thirds more than that of England, Ireland and Scotland.

The population is about 36,000,000, or eight millions more than that of Great Britain; and it is increasing. The sea coast bordering on the British channel and the Bay of Biscay is about 1,200 miles in length, while that on the Mediterranean is 360 miles. Compared with the coast of the British islands it is about one-third less in extent. The coast on the British channel is indented by two large bays, separated by the peninsula of Cotentin, from the extremity of which, and facing the Isle of Wight, loom the great arsenals and port of Cherbourg, the finest, most costly and magnificent travel depot in the world. The more easterly of these bays is subdivided into smaller ones formed by the estuaries of Havre and Harfleur, so well known to American travellers, and the stay-at-home readers of Shakspeare. Here the coast is low and shelving lined with sand hills. Beyond Havre to the East is the embouchure of the river Somme; and at the mouth of the river Bethune, a name much revered in this city and Philadelphia, is the city of Dieppe, which is the Brighton of France and the Newport of the United States. On the North, (for the coast line takes that direction from Havre,) we come to the nearest point to England, the Cape Gris Nez, a little south of Calais, where the Telegraph cable across the channel terminates. To the East of Calais we have the famous town of Dunkirk, celebrated in history, and renowned in war. At the other end of the channel we have the celebrated Cape of la Hogne; where as long ago as 1692, the name of Russell became famous for his naval victory. Here, in a deep indentation of the sea, lie the islands of Alderney, Jersey, Guernsey and Sark, which as much belong to France, naturally and properly, as the Isle Wight does to England, the language and costumes of the people, and in fact their manners, being after the Norman School.

The Western extremity of France is Britanny, opposite to Cornwall, where is the bay of Douarnenez, and the roadsted and harbor of Brest, now become important to this country as a station for passengers by the new line of steamers. The coast is lofty and precipitous. Further down in the Bay of Biscay we find the embouchure of the Loire, and estuary of the Gironde formed by the junction of the Garonne and the Dordogne, with a low coast and salt marshes. Still further on we find Rochelle, at the mouth of the Charente, having the third best harbor in France; and below that is the island of Oleron, celebrated in the history of commercial law. Southward, the coast of Gironde runs in an almost unbroken line to the South, in sandy dooms to the Spanish frontier. This makes the Atlantic Coast of France.

The Medditteranean Coast, which begins to be defined at the frontier line by the Pyrennees, encloses the gulf of Lion, or Lyons as it is generally and inaccurately termed, and a part of the Gulf of Genoa. The former was called the *Mare Lesm's* as late as the 13th century; and the reason given is, the violence of the storms which rage upon it. The shores are flat and sandy, much intersected by lagoons or salt lakes. Here empties the river Rhone, which comes in from Switzerland. Eastward is the ancient and thriving port of Marseilles, and beyond that the naval arsenal of Toulon. This part of the coast is broken and elevated. The Eastern boundary of France is formed by the Alpine frontiers of Sardinia, and Switzerland, and the Rhine which separates it from Baden, Bavaria, and the Rhenish provinces of Prussia. So that we see what territory will be annexed to France, if it is to be extended in that direction. The Northern Boundary is Belgium, with less natural obstructions.

France is not very mountainous; though on the Southern and Eastern districts it has some very considerable elevations. Thus we have the lofty peaks of Mont Olan, 18,120 feet high; Pelnoux, 14,000; and Trois Ellions, 12,737—being in the French portion of the dividing lines of the Alps.

In the beautiful district to the south of the Pau, on the Spanish portion in the old kingdom of Navarre, are some very lofty eminences, which are the admiration of travelers. In the south of France is the range of Cevennes, or Languedoc which under various names, stretches northeasterly to the 48° of N. L., where it meets the Vosges Mountains at the lofty plateau of Langres; thus forming the western boundary of the valley of the Rhine, and the water shed of the great rivers of

the south of France—those of the eastern slopes flowing into the Mediterranean, and those on the western into the Bay of Biscay. This range will compare in elevation with our White Mountains, being about 5,000 and 6,000 feet high. There are some interesting physical and natural facts connected with these ranges, as at the Puy de Dome, the Juvas and others.

The principal rivers in France are the

	Miles long.
Seine	480
Maine (tributary)	268
Somme	110
Loire	600
Allier	250
Cher	215
Viene	207
Creuse (affluent)	167
Aude	100
Rhine	525
Soane	304
Doub	210
Isere	190
Duvana	220

Though many of these rivers are navigable, and some by steamers, yet none of them will compare with the Mississippi or Hudson. France contains many canals, their aggregate length being about 900 miles. Among them are the Canal of Briare, connecting the Loire and the Seine, 34½ miles long, 37 years in being constructed, and costing as much as the Erie before it was enlarged. Paris gets much of its provisions through this canal. The famous canal of Languedoc, 148 miles long, with a tunnel 720 feet long, and 55 aqueduct bridges, completed in the time of Louis XIV, and costing about six millions of dollars. The canal of Orleans, the next in the order of construction, 45 miles long, assisting the navigation of the Loire, and costing 1½ millions of dollars. The canal of Loing, connecting the canal of Briare and the River Seine, 33 miles long, and costing half a million of dollars. The canal of the Centre or Charolois, 71 miles long, costing two millions of dollars. The canal of St. Quinton, 23 miles long, leading to the Scheldt, and costing $2,250,000.

There is quite a canal system in France, which the present Government takes great care to protect and forward. The country is full of prosperous railways.

The country is rich in minerals; manganese, antimony, lead and copper abound. Coal is quite plentiful, and gold and platinum are found. In the mountain region, mineral springs are abundant. The productive character of the country is wonderful, but it is well cultivated. The cereal region of the Loire is famous. It raises enough to supply itself and send to the United States! The vine region extends to the 44° of N. L., and the olive region to the south of that. The French wines are famous all over the world, and drank freely in this country.

The climate is various. There is an average difference of 20 degrees between the south and the north in summer, and about 14 degrees in winter.

Thus we perceive France has wonderful strength as regards locality, area, advantages and power of production. The people are refined, courteous, impulsive and brave. Their fault is impetuosity, and a false estimate of the objects of national existence; though individually they are the most prudent and economical of nations.

We may safely conclude, that as Louis Napoleon looks over the map of France, he may very well express his contentment with its physical geography, while as he looks at its history, the treaties of 1815, and the then confederation of the German States with 17 votes, and the Presidency in Austria, he may be willing to give France a little more territory and political power at their expense.

Portland, Saco and Portsmouth Railroad.

The earnings and expenses of this road for the fiscal years ending May 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$311,732 57	$303,180 39
" freight	123,283 03	166,435 73

		135,636 84
Surplus earnings		$100,091 34
Surplus per last report	$145,914 55	
Less over estimate of income May, 1865	1,131 30	
		144,783 25
Surplus year ending May 31, 1866		100,091 34
Total		$244,874 59
Paid Eastern and Boston and Maine Railroads		20,000 00
Apparent surplus, May 31, 1866		$224,874 59

The business of the road has been about the same as last year. A small decrease in the passenger receipts will be observed, while that from freight is increased, leaving the aggregate about the same.

The road and equipment have been kept in good condition, and the trains have been run regularly, free from any serious accidents. About 17,000 new sleepers were put down last summer, and 300 tons of re-rolled iron rails laid, with the improved joint. It is estimated about the same quantity of iron will be required this season, with 12,000 new sleepers, a part of which are now on hand, and the balance contracted for; these can be placed in the track, properly stamped and bedded, early in the season before the fall rains. The wood sheds at Kennebunk, with steam power for sawing wood and pumping water, were completed last season. Wood sheds have also been erected at North Berwick, with capacity for 1,000 cords of sawed wood. One new engine from the Portland Company's Works has been purchased and put upon the road. Seventeen box, and eight platform cars have been added to the equipment, largely increasing the business in that department. A gravel train was run some two months of the year raising about nine miles of track principally between North Berwick and Kittery. That portion of the road now compares favorably with the remainder. The company are preparing to build a new machine shop, engine house, turntable, etc., at the westerly end of the bridge leading out of Portland, about three-fourths of a mile from the Portland depot. Arrangements will shortly be made for constructing a new passenger depot with freight buildings, etc.

The number of miles run by engines was 190,412. Number of passengers carried, 312,378.

Trial Balance, May 1, 1866.

President.—Ichabod Goodwin.
Treasurer.—Eliphalet Nott.
Superintendent.—Francis Chase.

Alabama and Florida Railroad.

The stockholders of this company assembled a Pensacola on the 16th of May last, for the first time since the 6th of May, 1861, for the purpose of receiving the report of the directors, and of proceeding to the formal election of their successors. Although no meetings have been held, it is stated that reports have been made annually, and placed within the reach of all interested. From the report before us we learn that it is the intention of the directors to rebuild the road at an early day. One hundred tons of rails with the necessary fastenings have been purchased in this city for the purpose of filling up a large gap in the road, which will enable them to run trains nine miles out from Pensacola. One engine and eleven freight cars have been purchased from the Government sales in Manchester, Va., also one new engine from Philadelphia. The iron work for ten platform cars have been ordered some time since, the wood work being already to put together.

An arrangement has been made in England through their agent Mr. Geo. B. Crow, under which 3,000 tons of rails with the requisite fastenings are to be sent to Pensacola as fast as required. The proceeds of the cotton remaining will be applied towards payment for this iron. This arrangement will enable the company to lay about 41 miles of track, bringing them within 4 miles of the State line, and 7¼ miles from Pol-

lard, Ala., the point of junction with the Mobile and Great Northern Railroad. They formerly ran from the State line to Pollard, on the track of the Alabama and Florida Railroad Company of Alabama, under agreement with that company. As this piece of road has to be reconstructed, it is proposed to purchase what is left—which is simply the grading; this will place the company in possession of the whole line to Pollard. The President estimates that it will require about $225,000 to complete tho whole line to Pollard.

It is expected the earnings of the road will be more than sufficient to meet all contingent expenses; and it is hoped, too, from these earnings to be able to meet promptly all payments, hereafter required for rolling stock.

To enable the company to meet its obligations, a third mortgage bond has been prepared. The accompanying statement exhibits the facts upon which they rely to obtain the support of those whose aid is now solicited.

The Alabama and Florida Railroad Company (of Flo.,) desiring to reconstruct their road without waiting the action of the Courts upon their claims for property taken by parties representing themselves as acting for the Confederate Government, have concluded to issue a third mortgage and convertible bond, to the amount of $250,000.

As a basis for the issue of these bonds, and to show that the investment is a safe one on the part of the purchaser, the company exhibit the following assets and accompanying statement of facts:

ASSETS.

Nine miles of road complete	$150,000 00
Thirty-six miles road bed with cross ties and bridging remaining, estimated value per mile $10,000	360,000 00
Equipment	50,000 00
One million brick	10,000 00
150,498 acres land, $1 per acre	150,498 00
Balance cotton gone and going forward to be invested in iron fastenings, &c., for road estimated	75,000 00
1st mortgage bonds not disposed of	153,000 00
Claims upon sundry railroads for iron, rolling stock, etc.	672,914 78
	$1,621,412 78

LIABILITIES.

Capital stock paid in	$343,000 60
1st mortgage bonds, due Jan. 1, 1879.	400,000 00
2d " " Apr. 1, 1881.	154,000 00
Bills payable	129,001 28
Interest account—for interest due foreign and domestic bondholders, including interest on all indebtedness up to Jan. 1, 1866.	142,220 45
Surplus over and above liabilities	453,191 05
	$1,621,412 18

Under an arrangement entered into between the city of Pensacola and the representatives of the heirs of Vincente Sebastian Pintado, portions of the water front of the city may be sold, and the money received paid over to the Alabama and Florida Railroad Company, to aid in reconstructing the road, they paying interest for its use. It is now in contemplation to pledge this property to the extent of six hundred acres for the ultimate redemption of the third mortgage bonds of the company and the payment of the interest. This property upon the completion of the road will be of great value.

The city authorities have authorized the company to construct a wharf at the foot of Sarragona street, the street upon which they enter the city. A temporary one, but strong enough to sustain an engine and train of cars, is now being built, for the purpose of receiving the iron, rolling stock and materials for the road, and also to accommodate the timber and lumber business. From this temporary wharf the labor of constructing a permanent wharf can be prosecuted to advantage.

After leaving the bay and clearing the city—which it does through a depression in the heights apparently prepared by nature for that purpose—the road, for eighteen miles, follows the crown of the ridge dividing the waters flowing into Pensacola Bay, from those which enter Perdido Bay, attaining at the distance of four miles an elevation of ninety feet; at fifteen miles, an elevation of one hundred and fifty feet above the water at medium tide in Pensacola Bay. At eighteen miles the road begins to descend into the valley of the Escambia, which it reaches about 21 miles from Pensacola, it there follows this valley to the State line. The grades are light, none exceeding thirty-nine feet to the mile. The curves are few, and none exceed three degrees. Heavy trains may therefore be drawn over this road with comparatively light engines.

The company have leased to different parties about 8,000 acres of Pine lands for the purpose of manufacturing turpentine and rosin. These, with lands of other parties, are now yielding their rich stores to industry, and it is confidently anticipated that during the present season, 2,000 barrels spirits of turpentine, and 12,000 barrels of rosin will be produced from lands tributary to the road.

The receipts and disbursements from July 1, 1865, being date of last report, to April 30th, 1866, have been as follows:

	CR.
Cotton account	$49,113 11
Sugar and syrup	783 77
City and Pintardo fund	2,278 05
Land account	3,022 58
Bills payable	19,457 45
Bonds payable	4,000 00
Passenger account	572 10

To show the importance of Pensacola as seen by the different railroad lines, tending in that direction, the names of a few that are looking to a participation in the advantages to be derived from its position are given—they are, the Southwestern Railroad of Ga., the Atlantic and Gulf, now extending from Savannah to Thomasville, Ga., a distance of 200 miles; the Atlantic and Gulf Central, with the Pensacola and Georgia Railroad extending from Jacksonville, East Florida, to Quincy, Middle Florida, a distance of 187 miles—all looking to the Bay of Pensacola.

Buffalo and State Line R. R.

At a meeting of the stockholders of this company, held in Buffalo on the 26th inst., the following directors were elected: Dean Richmond, Charles H. Lee, Henry L. Lansing, James C. Harrison, Joseph Field, Edwin Smith, Wm. Williams, Geo. W. Patterson, John H. Chedell, Wm. S. Brown, John M. Hutchinson and Charles M. Reed.

The directors elected the following officers: President, Dean Richmond; Vice-President, Charles H. Lee; Secretary and Treasurer, Henry L. Lansing; General Superintendent, J. Lewis Grant.

Southern Railroad.

Dr. Emanuel, President of the Southern Railroad, informs the Meridian *Messenger*, that the trestling over Big Black is being pushed forward satisfactorily. The iron for the bridge had all arrived at Vicksburg, and a portion of it at the Big Black River. It will be remembered that this is an iron bridge. When completed it will be one of the finest structures in the South.

☞ We learn from the Sackville *Borderer*, that operations on the Truro and Moncton line have been commenced. Mr. Ketchum, the Engineer, who has full charge of the New Brunswick section of the work, has begun it by placing forty or fifty men—shortly to be increased to two hundred—on the Dorchester Island road. The work has also been commenced on the Nova Scotian side.

☞ The Portage and Superior Land Grand Railroad corporation has been organized at Portage, Wis., by electing the following officers: President, John P. McGregor, of Portage; Vice-President, Henry L. Palmer, of Milwaukee; Secretary, Henry B. Munn, of Portage; Treasurer, John Nazro of Milwaukee.

☞ The iron for a continuation of the St. Joseph Valley Railroad from Schoolcraft to Kalamazoo has been purchased of the Cleveland Rolling Mills. A part of it is now in transit, and the entire quantity is to be delivered by November 1. Nine miles of the line is already located, and it is thought the road will be ready for trains by December 1.

☞ The property owned conjointly by the Franklin and Pewabic Mining Companies has been divided by arbitration. The Franklin took the greater portion, paying the Pewabic its half of the valuation. The hospital, store, warehouse and dock now belong to the Franklin, and henceforth the two mines will be operated independently of each other.

☞ The annual meeting of the Fredericksburg and Gordonsville (Va.) Railroad Company was held at Fredericksburg, on the 26th ult. Col. Carter M. Braxton was elected President of the road in place of Mr. Rowe, the present incumbent. The directors were authorized to contract for the completion of the road to Gordonsville or Orange Court House, as may seem to them most desirable and practicable.

☞ The work of building the Milledgeville, Macon and Augusta Railroad, which was graded before the war, has been recommenced, and will be pushed forward rapidly.

Journal of Railroad Law.

LIABILITY OF RAILROAD COMPANIES TO THEIR EMPLOYEES.

In the case of Patrick O'Conner *vs.* The Baltimore and Ohio Railroad Company, the question as to the liability of the company to one of their employees for injuries arising from the negligence of another was fully discussed, and the conclusion come to that unless there was negligence in the company's general duties they would not be liable.

GOLDSBOROUGH, J.—delivered the opinion of the court.

The action in this case was instituted by the appellant against the appellee in the Superior Court of Baltimore City, to recover damages for an injury sustained by him while in the appellee's employment. It is alleged in the declaration that whilst the appellant was engaged in his work as an employee, without any neglect or carelessness on his part, but through the carelessness of another employee over whom the appellant had no control, a dumping or gravel car of the appellee was upset and fell upon the appellant, and he was permanently injured. That the car on which he was riding, was upset from its defective construction and the unskillfulness and neglect of the employee having charge of the car.

To these allegations the appellee pleaded "not guilty."

At the trial and after the evidence detailed in the record had been submitted to the Jury, the appellant offered nine, and the appellee five prayers.

The prayers of the appellant were rejected, and those of the appellee were granted by the court. The verdict and judgment being for the appellee, this appeal was taken.

The law arising out of the relation of the parties litigant in this case, is presented for the first time for our consideration. It affects a large class of citizens, a class, constantly being augmented by the diversity of employment incident to the enterprise of the age.

In the absence of any controlling decision in this State, we find ourselves aided in the formation of our opinion by a current "of decisions both in England and in this country, entitled to our highest consideration and greatly relieving us from the responsibility of settling the law as to the relative obligations of parties holding positions similar to the parties in the case."

It is proper to state that though the appellant received the injury stated in his declaration while riding in one of the appellee's cars, it is not claimed that he was a passenger who had paid for the privilege of travel, but one of a number of laborers who were in the employment of the appellee, who were required to ride upon the cars to and from the place of their daily labor.

The appellant seeks to recover damages upon the ground that there is an implied warranty on the part of the appellee of the soundness of the machinery put in the hands of its servants, so far as any unsoundness therein may be discovered by the exercise of proper care and diligence; and in the employment of men of care, skill and capacity for the full position they severally occupy. The appellant also relies upon the fact, as he insists, that he, with other laborers were under the management and control of one Downey as superintendent of the laborers; that Downey was rash and wholly regardless of the safety of the men, and that the train was managed by an engineer having charge of the train. That neither Downey nor the engineer inspected the cars at or before the time they were started, and that the fixtures by which the cars were adjusted to prevent their dumping, especially the car on which the appellant was riding, were out of order and unadjusted at the time of the accident, and from all these causes he suffered the injury complained of in this suit.

Having thus with due care stated the character of the claim of the appellant and the defence of the appellee. We fully concur in the opinion that the defence is well taken.

It is sustained in all its aspects by an almost unbroken current of authorities both in England and in this Country. See the case of Priestly *vs.* Fowler, 3 Mees. and Wels, Rep., 1; 24 E. Law and Eq. Rep., 396; Fowler *vs.* Boston and Worcester R. R. Co., 4 Met., 49, 1 Selden, 493, 3 Cushing, 270, 10 Cushing, 228, 32 Vermont R., 473, 23 Penn. R., 384. This last case was decided in 1854, is almost identical in its prominent features with the case under consideration. In several of the earliest of these cases, the question being regarded as a new and important one, the courts in view of its novelty and importance, considered and decided it after careful and mature deliberation.

The following conclusions of law applicable to this case, may be deduced from the above authorities.

When several persons are employed in the same general service, and one is injured by the carelessness of another, though the negligent servant in his grade of employment is superior to the one injured, the employer is not responsible. The liability to injury of one from the carelessness of his fellows, is but an ordinary risk, against which, the law furnishes no protection, but by an action against the wrong doer.

Though it is the duty of a railroad company to exercise all reasonable care in procuring for its operation, sound machinery and faithful and competent employees, and though they are liable to their servants for the neglect of this duty yet, after they have procured such machinery and employees, they are not liable to a servant for the injuries occasioned by the neglect of any of his co-servants employed in the same general business of operating the road, 23 Penn. Rep., 386, 387, 32 Vermont Rep., 473 4 Met. Rep., 49.

We are of opining that these rules of law are so directly applicable to the case under consideration, that they constitute a flat bar to the appellant's right to recover.

It only remains for us to consider the ruling of the Court below in rejecting the appellant's and granting the appellee's prayers.

It is manifest from what we have said as to the law controlling this case that the appellant's 1st, 2nd, 3rd, 4th, 6th, 7th, 8th and 9th prayers, could not have been granted.

We will consider the appellant's 5th in connection with the appellee's first prayer. They both embrace the question, on whom is imposed the burden of proof.

Though the Supreme Court of the United States, in the case of Stokes *vs.* Saltonstall, 13 Peters. S. C. Rep., 191, recognize the doctrine that a stage proprietor warrants the safety of passengers as far as human care and foresight can go, and that he will transport them safely; and the facts that "a carriage was upset and thr plaintiff's wife injured, are *prima facie* evidence that there was carelessness or negligence or want of skill on the part of the driver, and throws upon the defendant the burden of proof that the accident was not occasioned by the driver's fault;" yet a majority of this court are of opinion that the above cases is not applicable to this. The appellant held no such relation to the appellee; it was under no obligation to look to the safety of the appellant under the circumstances of this case; did not contract to carry him to and from his place of work, and received no compensation therefor; and he having alleged in his declaration the causes of his injury, must sustain his allegations as in ordinary cases, by corresponding proof. The Court below therefore, in rejecting the fifth prayer of the appellant and granting the first prayer of the appellee, ruled correctly.

The appellee's 2nd, 3rd, 4th and 5th prayers were properly granted. They are sustained by the law of this case as herein announced, and are otherwise unobjectionable, as they submit the matters of fact contained in them to be found by the jury.

Judgment affirmed.

Boston, Newport and New York Steamboat Co.

The annual meeting of this corporation was held at Newport, R. I., on the 28th ult., at which the annual report of the Treasurer was submitted, and also a statement of the earnings of the company since its organization, three years ago. The company own the side-wheel steamers Metropolis, Empire State, Newport, Old Colony, and the propellers Fall River and Mount Vernon, all of which are valued at $1,365,000. The earnings of the Corporation, on a capital of $975,000, during the year ending May 31, 1866, were $208,326 60, and the stockholders have received an annual dividend of ten per cent., a dividend of five per cent. being payable on the 2d of July. The company has been at great expense in repairing and building new boats, erecting a machine shop, and securing a pier at New York, but has perfected its working organization, and will be able to accommodate the extensive business which is demanded of this line. The following gentlemen were chosen directors for the ensuing year: Oliver Ames, Easton; Benjamin E. Bates, Francis B. Hughes, John R. Brewer, Boston; John A. Burnham, Brookline; Alexander Holmes, Kingston; Rufus B. Kinsley, Benj. Finch, Newport, R. I.; Albert Tirrell, South Weymouth.

☞ The Milwaukee *Wisconsin* learns from a reliable source that the work of "procuring the right of way for the railroad from Oshkosh to Omro is progressing with satisfaction. The people along the line are well interested in the subject, and terms are made exceedingly favorable. The survey will commence soon, and then Oshkosh and Milwaukee will know exactly what the grading will cost."

☞ The committee on railroads in the New Hampshire Legislature have unanimously agreed to report a bill granting a charter for the extension of the Concord and Claremont Railroad from Bradford to the Connecticut River.

Northern (N. H.) Railroad.

The earnings and expenses of this road for the years ending March 31, 1863, 1864, 1865, and 1866, have been as follows:

American Railroad Journal.

Saturday, July 7, 1866.

Stock Exchange and Money Market.

The fiscal year closed on the 30th of June last, and though we have not officially from the department of the Treasury, the figures made up with precision, yet we are able in some measure to give results very accurately. The modern press makes it a duty to publish continually, day by day or week by week, tables, quotations, sales and balances on hand, of everything that gets into and upon the Money Exchange, so that all ordinary readers have constantly before them such financial facts as enable them to judge correctly, if they will, of the monied resources and power of the country. It appears that the value of the foreign merchandize brought to this port during the year ending June 30, 1866, was $301,398,899; and at other ports, $100,466,299—making a total of $401,865,198. If, however, we take the amount by the sum of duties received at the custom house we find the figures something less; but the difference is not enough to make it important in any financial proposition. On the other hand, the exports appear far more formidable and valuable han would be supposed. From this port have gone $212,684,618; from other ports, $80,285,735; besides in cotton bales $183,375,000—a total of $487,445,353. We see by this that notwithstanding the excessive imports of the year, especially the last four months, the balance of imports and exports of merchandize alone is largely in our favor, amounting to $85,580,155. But if to this we add the specie which has been shipped, the balance is still greater. Sent from New York, $57,728,100; other ports, $14,684,459; extra from Boston, $5,000,000—total $78,413,559. So that the total balance in our favor is $163,993,714. All this tallies well with the recent admissions of English financial journals that the United States is not really a debtor country, and these figures seem to sustain the statement. If this is so, and we see no reason to doubt it, then all the fears arising out of the late shipments are groundless, and no harm can come to us from them; though if they had not been made, or rather permitted for they were the result of foreign agencies we should have seen the suspension of payment of specie in England, and a wide spread bankruptcy there. Our own security is not entirely owing to our paper currency, therefore, but to the fact that we are, as a trading nation, not in debt to foreign merchants. That most of the articles brought and sold here are the veriest of trash, and not wanted, we have long thought; but bad as this is, we are still in a solvent condition, the balance of the account is on the right side, and but for the national debt, we should hold the best position of any nation in the world. We are therefore rather amused with the grave speculations of the London *Globe* of the 19th of June, on American finance. The British Press, never for a moment forgetting their assumed importance, condescendingly point out what may happen, and speak of the "convulsion" that is likely to occur here when we return to specie payments. We are obliged to them for their sympathy, but can get along very well without it. We have preserved our neutrality, and saved Canada; we have allowed foreign agents to take our specie to the extent of fifty millions, by borrowing and drawing bills, and the Government helped them to get what they needed. We have plenty more of the article, as appears from the receipts at the Custom House since July 1, 1865. The amount officially stated, is $133,617,484, and the Treasury has paid out in gold interest but $46,145,548, leaving the balance there in gold of $87,471,936.

It will be seen, therefore, that deducting the amount sold by the Treasury, there were still upwards of forty millions on hand the 1st of July. Again, the receipts from California alone the past year have been $29,142,577, having increased from the previous year $16,054,555. We may safely estimate the receipts for the coming year to be equally large; and would observe that the amounts received from other interior gold bearing territories and states are not calculated at all, but may be set down by tens of millions annually. It is worthy of remark that the high price paid for the use of gold has in a very large number of instances been paid by foreign agents and for foreign account.

It is a fact that the Canadian Banks have not been unwilling to come in and take their share of the fleece. They have been known in some cases to have transmitted their gold to the city of New York, to be lent to the street speculators at usury.

We hear of one sum, of five thousand dollars being paid at one British agency in this city for the use of Canadian gold for a single day. And no doubt this operation was often repeated. So that our sympathising friends across the water may see that their provincial friends in Canada like very well the operations of our street, and will risk all convulsions here, in preference to the jog trot of their old fashioned loans in Canada.

The fact is that if we were resuming specie payments to day, we should have a flood of the precious metals even from England to the extent of hundreds of millions of dollars. This is a general opinion in financial circles.

One of the most important measures just now before Congress, is the bill for the new tariff. It is not yet settled whether cotton is to be taxed to any considerable extent or not. One thing is certain, that by getting the control of the shipment of cotton by the restoration of the Union, we have the greatest of commercial and financial powers restored to us, which in one sense would have been worth the war alone. We have exported the last year 967,375 bales at the currency value of $193,475,000. This of itself is a practical efficient item of trade, and settles enormous difficulties in a clean business-like way. We may look even large imports in the face with entire calmness, when we have cotton to dispose of in such quantities, will have more, and so on through all time. What we want in this direction, is fair reconstruction, honest labor, tranquility and mutual confidence, and then we may look forward to the future as brilliant beyond calculation.

We believe that as soon as that future becomes more settled, we shall attract to our country still more capital and more industry from the old world, now tost by the tempest of war; the plough share broken to pieces, and garments rolled in blood. To the American observer, Europe presents a melancholy sight. It is torn to pieces not for a principle, not for rights, not for institutions to increase the happiness of man, but to increase the possessions and power of a few families supported by the sweat, suffering and toil of the unhappy people.

It is believed that on a large portion of the bonded goods in warehouse, the new tariff will take no effect whatever. It seems strange to us that articles of luxury are not more taxed than they are. The last week saw the importation of $103,000 in furs, $22,800 in currants, $28,000 in lemons, $30,000 in nuts, prunes and oranges, $30,000 in raisins, $10,000 in sauces and preserves, $33,000 in watches, $35,000 in champagne, $25,000 in rosewood, $14,000 in willow baskets, $53,000 in segars, $100,000 in fancy goods, $5,000 in perfumery, $12,000 in pipes, $16,000 in toys, etc. The American people are very generous to take all these things in a single week in a single port. This is indeed the Dorado of foreigners, here they can sell everything, and just now at their own prices. A dollar is only valued at about 60 cents; no matter, we have plenty of paper dollars, you can change them into gold. Here you can borrow money at 4 per cent., you are paying 10 per cent. for it in London. Come in and bring all you have to sell, you need not take anything from us but gold. We take paper from each other, but you shall have the specie. This is the practical kind of talk we are now giving the world, and *it listens.*

Government securities stand firm, with a tendency to an advance. The foreign arrivals on Monday bring the intelligence that the 5-20s were again on the rise abroad, and our foreign journals state, are in demand. They also admit that the confidence of European holders in them is unshaken, and there is reason for it. It now appears that our revenue is ascertained to be not five hundred millions as we have asserted, but five hundred and twenty-five, thus exceeding the expectations of the most sanguine among us. The internal revenue is $306,000,000; customs, $169,000,000; public lands, $675,000; miscellaneous, $50,000,000—total, $525,675,000. The revenue from public lands if not foolishly or unfairly voted away by Congress, would in a few years give us millions annually.

It is understood that nearly all the remaining certificates of indebtedness to the extent of 30 millions will at once be paid off in pursuance of notice from the Treasury.

By the return of the associated banks of the city for the last week, it appears their specie had declined $706,878, but their loans have increased, by the sum of $2,447,360, circulation, $121,228, legal tenders, $982,122, and their deposits, $2,387,984. The truth is our market is entirely unmoved by anything but its own business, and that appears at present to be uninfluenced by any foreign influences.

Flour and breadstuffs have taken an advance, wheat going up in Liverpool 4s. 6d. per qr., while cotton has fallen ½d. per lb. Both results are natural under the European difficulties. Food in the shape of bread is a necessity for large armies, and must be supplied otherwise than by soldiers, while cotton enters but lightly into their dress, where other materials are necessary and more enduring.

We perceive by the last arrivals that the 5-20s were quoted at the last dates at 65 in London, and at Frankfort at 67. This is in strong contrast to those foreign securities which have almost disappeared from the market, and yet a short time since were at higher quotations than our own. The truth is that American securities are destined to take the highest rank in the world, and will be in demand everywhere as the safest and surest of all investments. It will be soon seen that our public debt has been diminished one hundred millions the last year.

The New York exports, exclusive of specie, for the week ending July 2, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,023,471	$2,200,013
Prev. reported	76,912,968	104,884,214
Since January 1	$78,936,439	$107,084,227

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,840,192	$1,278,778
Gen. merchandise	3,278,447	1,734,827
Total for the week	$5,118,639	$3,013,605
Prev. reported	70,615,490	162,441,409
Since January 1	$75,734,129	$165,455,014

The balance in the Sub-Treasury on Tuesday was $81,709,211 39.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Kentucky 6s, 95; North Carolina, N. B., 62, N. Y. State 7s, Bounty Loan, 102⅞; Brooklyn 6s, W. ☞ We invite attention to the advertisement of Messrs. STUDWELL & FINCK, Bankers and Brokers, in another column. These gentlemen have been in Wall street, the last six years; and for three years and a half with Messrs. P.M. Myers & Co., to whom they refer, as well as to other well-known houses in this city and elsewhere. Mr. Finck is a member of the Stock Exchange. This firm will allow interest on deposits, make collections in the United States and Canadas, buy and sell government securities, stock, bonds, etc.

☞ A new railroad route has recently been opened from Boston to Fitchburg and places north. The route is over the track of the Boston and Worcester Railroad to Framingham, thence over the Agricultural Branch Railroad to Northborough, and on a track which has been built from Northborough through the towns of Berlin, Bolton, Clinton and Leominster, connecting at Pratt's Junction with the Worcester and Fitchburg Railroad.

Railways and the War in Europe.

The *Moniteur de l'Armee* has an article on the importance, in case of war, of the railways now spreading throughout Europe. There are five great lines running from west to east, and three from south to north:—1. From Cologne to St. Petersburg, through Hanover, Berlin, Frankfort-on-the Oder, Bromberg, Kœnisberg and Dunabourg, a distance of about 1,410 English miles. 2. From Cologne to Lemberg, by Giessen, Gunterhausen (near Cassel,) Gotha, Weimar, Leipsic, Dresden, Breslau and Cracow—about 960 miles. 3. From Frankfort-on-the-Maine to Prerau, between Vienna and Cracow, through Wurzburg, Nuremburg, Prague and Olmutz—540 miles. 4. From Strasburg to Vienna, through Carlsruhe, Stuttgard, Ulm, Augsburg, Munich, Salzburg and Linz—550 miles. 5. From Turin to Pesth, through Milan, Verona, Mestre near Venice, Udina, Nahrezina near Trieste, Pragerhof, Graukanisa and Lake Balaton—750 miles. 6. From Grenoble to Bremen, through Chambery, Geneva, Lausanne, Berne, Basle, Carlsruhe, Darmstadt, Frankfort-on-the Maine, Cassel and Hanover—800 miles. 7. From Lindau on Lake Constance to Wismar and Rostock, through Augsburg, Nuremburg, Bamberg, Hoff, Altenburg, Leipsic, Halle, Madgeburg, Wittemburg and Schwerin, a branch from Leipsic to Berlin, and another from Hagenow to Hamburg, where the lines of Schleswig and Holstein meet. The distance from Lindau to Rostock is 690 miles. 8. From Trieste to Stettin, through Laibach, Gratz, Vienna, Prerau, Orderburgh, Cosel, Breslau, Posen and Stargard, a branch to Ratiboar and Warsaw, and another to Breslau and Berlin. From Trieste to Stettin 880 miles. A ninth line runs along the frontiers of Belgium and the Rhine Provinces between Ostend and Manheim, through Bruges, Ghent, Brussels, Warre, Namur, Luxembourg, Treves, Sarrebruck and Kaiserlantern. The theatre of the Seven Years' War is situated between the first and second of the above named railway lines, and the first line leads from Eylau to Moscow. The campaign of Saxony was conducted on the latter part of the second line. The French army followed the line from Strasburg to Vienna in 1805 and 1809, and the line from Vienna to Brunn passes at ten miles from Austerlitz. The fifth line passes over the ground on which the battles were fought during the campaign in Italy.

Kent County Railroad.

A Chestertown, Md., correspondent of the Baltimore *Sun* says: "Considerable feeling and interest is evinced here in relation to the contemplated railroad from this county, and a committee has been appointed composed of gentlemen of the county, Baltimore and Delaware, to confer with the Philadelphia, Wilmington and Baltimore Railroad Company, in relation to the matter, being the feasibility of connecting with the above road at Elkton. If the plan contemplated is carried out much benefit will no doubt result to this section of country as well as to the city of Baltimore."

☞ It is stated that the Delaware Railroad will be completed to the Chesapeake Bay the present month, when an express train will be run from Philadelphia to that point. A steamboat to connect with Norfolk is now being built by Harlan & Hollingsworth & Co., of Wilmington, Del., and will soon be ready for the route.

Congressional Railroad Legislation.

In the U. S. Senate on the 22d ult., the bill granting lands in aid of the construction of the Kansas and Neosho Valley Railroad, and its completion to Red river, was taken up, and after discussion was passed.

On motion of Mr. Pomeroy, the Senate concurred in the House amendment to a bill reviving a land grant to the Lansing and Traverse Bay Railroad.

Mr. Edmunds, from the Committee on Commerce, reported adversely on a bill to establish a railroad between Washington and the Northwest, which recently came from the House. He said it was the opinion of the majority of the committee that Congress had no constitutional power to pass a law authorizing the construction of a railroad through a State without the consent of that State. He felt it his duty to say that he did not agree in this opinion, but believed Congress had power over the subject, as asserted in the bill.

Mr. Edmunds, from the Committee on Commerce, reported adversely on the bill of the House to authorize the construction of a railroad from Pittsburg to Cleveland.

The two reports were received, and the committee was discharged from the further consideration of these subjects.

Vicksburg, Shreveport and Texas Railroad.

We learn from the Shreveport *Gazette* that the Railroad Bridge on Silver Lake has been repaired, and the locomotive is now running over it carrying out iron and cross-ties. There is about a mile of track to lay near the city to connect with three miles of the old road, which is now ready for use. Next week the locomotive will run out five miles, and the track laying will be pressed forward to the present terminus of the Marshall road, thirteen miles from Shreveport. All the grading on the line is finished, except one cut. A sufficient number of hands are employed in this cut to remove the dirt in a few weeks. The contractor is confident that the cars will run through to Marshall, by the first of August next.

The new Steamship Lines on the Pacific.

The first steamers of these new British line between Panama and Australia, was to have left the former port on the 24th ult., for Auckland, to be followed monthly thereafter by a vessel of the same class, and the new route between San Francisco, Japan and China, for which the New York Pacific Mail Steamship Company is building some of the finest steamships in the world, goes into operation on the first of the coming year. The importance of these lines can hardly be over-rated. They will greatly facilitate travel from Europe and the United States to Eastern Asia and Australasia. The distance between England and Australia will be shortened by eight days, over the old route by way of the Isthmus of Suez. The Pacific will be traversed by a fleet of ocean steamships unsurpassed; and very much of the products of China and Japan, that now take the tedious route around the Cape of Good Hope to New York, will find their way to the latter port *via* San Francisco and the Isthmus of Panama.

☞ The Halifax Street Horse Railway is now in full blast, and proves as beneficial to its originators as it is advantageous to the general public.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending June 29th, 1866, were $54,380 25
Corresponding week of 1865 ..... 52,074 87

Increase..... $2,305 88

The earnings of the Grand Trunk Railway of Canada for the week ending June 23d, 1866, were $124,718 00
Corresponding week of previous year.. 116,784 00

Increase..... $7,934 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in June, 1866.... $25,415 00
Corresponding week previous year..... 29,708 44

Decrease $4,293 44

Commencing 1st Jan. 1866..... $506,882 00
Commencing 1st Jan. 1865..... 510,076 03

Decrease $3,194 03

The Atlantic and Great Western Railway Case.

We publish below the decisions rendered on the 29th ult., by the Supreme Court of Pennsylvania, in Wilkesbarre, in the great controversy between the Philadelphia and Erie Railroad Company and the Pennsylvania Railroad Company on the one side, and the Catawissa Railroad Company, the Atlantic and Great Western Railway Company, and the Philadelphia and Reading Railroad Company and other companies on the other side.

The points decided by the Court—all the judges except Judge Read concurring—are so clearly stated by the Chief Justice, who pronounced the decision, that we need not relate them. They will be read by all concerned with great interest.

The Commonwealth of Pennsylvania *ex rel.* Attorney General *vs.* The Atlantic and Great Western Railway Company.

Information and suggestion in nature of *quo warranto.*

Chief Justice Woodward pronounced the following decision *per curiam:*

The case having been fully argued and considered, we are of opinion—

First. That the instrument called a certificate of consolidation of the Atlantic and Great Western Railway Company, dated 19th of August, 1865, was a lawful and valid instrument for the purposes therein expressed, and upon being filed in the office of the Secretary of the Commonwealth, constituted the defendants a legal corporation in the State of Pennsylvania.

Second. That *nul tiel* record is well replied to by the defendants' pleas, and the demurrer to the replication must be overruled. But the defendants have leave to rejoin that there is such a record with a *prout patet* record.

Third. If in support of such rejoinder the defendants shall produce the contract of agreement and act of consolidation set forth in answer to the oyer craved by the Attorney General, with evidence that the same was deposited with the Secretary of State in his office, on the third day of October, 1865, the opinion of this Court will be that the defendants have fully complied with the requirements of law in respect to said instrument; that it became then and there the duty of the Secretary of the Commonwealth to file the same of record; that as against the Commonwealth the legal presumption must be that the Secretary performed his duty, and filed the same of record, and that it remained and still remains filed of record in his office, and judgment will accordingly be entered for the defendants upon inspection of the instrument and such proof. If in the opinion of counsel any indorsement of the date of filing by the Secretary be necessary, a mandamus would lie to command him to add the appropriate date, and to perform every other necessary act in the premises.

OPINION OF CHIEF JUSTICE WOODWARD.

The Philadelphia and Erie Railroad Company *vs.* The Catawissa Railroad Company and the Western Central Railroad Company of Pennsylvania and the Atlantic and Great Western Railway Company of the States of Ohio, New York and Pennsylvania.

Andrew Scott *vs.* the same defendants.

Two bills in equity, on appeal from the decree of the Court of Nisi Prius of Philadelphia, sitting in equity, Woodward, C. J.

An opinion will be filed in the above cases at the next term of this court, to be held in Pittsburg on the third Monday of October next, in which the following conclusions will be explained and justified:

1st. That the plaintiffs in the above bills in equity being private parties, and not representatives of the Commonwealth of Pennsylvania, have no right to draw into question the corporate existence *de jure* of the Atlantic and Great Western Railway Company.

2d. That it appearing that Andrew Scott is not the owner of any stock in the said company, he has no equity to maintain his bill against the said company.

3d. That the lease and contract made the first day of November, 1865, between the Catawissa Railroad Company of the first part, and the Western Central Railroad Company, of Pennsylvania, and the Atlantic and Great Western Railway Company, of the States of Ohio, New York and Pennsylvania, of the second part, is a lawful and valid lease and contract, and that no ground has been shown for a decree that it be cancelled or annulled.

4th. That the memorandum of agreement made the 31st October, 1860, between the Sunbury and Erie Company, of the first part, and the Catawissa Railroad Company, of the second part, is lawful and valid for the term of twenty years from this date, and that all the rights and interests of the Catawissa Railroad Company under said agreement have passed to and become duly invested in the Atlantic and Great Western Railway Company.

5th. That under the several contracts and agreements, and within the meaning of the act of Assembly of the 23d of April, 1861, mentioned or referred to in the bill and answers, the Philadelphia and Erie Railroad *connects* the Catawissa Railroad with the Atlantic and Great Western Railway, notwithstanding the diversity of gauge in said roads.

Wherefore it is now, this 29th day of June, A. D., 1866, considered, adjudged and decreed that the decrees made in the above cases at Nisi Prius be reversed, set aside and taken for nought; and it is here decreed that each of said plaintiff's bills be dismissed, at the costs of the plaintiffs, respectively.

DISSENTING OPINION OF JUSTICE READ.

The Philadelphia and Erie Railroad *et al.* vs. the Catawissa Railroad Company *et al.*

Andrew Scott vs. the same.

Eastern District of Pennsylvania. Appeal from decree of *Nisi Prius.*

READ, J.—In my opinion at *Nisi Prius* I said: "The real question in this case is whether the railroads of the Atlantic and Great Western Railway Company and Philadelphia and Erie Railroad Company are connecting roads within the meaning of the Acts of Assembly of the 18th March, 1859, and the 23d of April, 1861; for, if they are such connecting roads, the first named road is connected by means of an intervening railroad with the Catawissa Railroad, which is unquestionably directly connected with the road of the Philadelphia and Erie Railroad Company."

I believed the true construction of these acts required that connection to be a mechanical connection, so that the cars and locomotives of the one road could run over the other, thus preventing a break of gauge, which the uniform experience of England and America had proved to be highly injurious both to freight and passenger traffic. A careful study of railroad history had so impressed the extent of this evil upon my mind, that I believed the words, the spirit and the policy of these acts required such a construction. My brethren think differently, and they regard the connection meant as simply a business one. This rules the case, and all the other questions become entirely immaterial, for whether the consolidation of the Ohio, Pennsylvania and New York companies was legal or not, still there was a Pennsylvania road, under a charter from the State, with a business connection at Corry, and neither the plaintiffs nor any one else had a right to apply to a Court of Equity to restrain the execution of a lawful contract.

The policy of avoiding a break of gauge is proved by the stipulations of the Philadelphia and Reading contract, and, since the argument before me, the road from Elmira to Canandaigua has had its gauge changed to four feet and a half inches, forming, with New York, Pennsylvania and Maryland roads, a continuous land route, with one uniform gauge, from the Niagara to Washington City. Still further: since the commencement of this Court the Morris and Essex, one of the roads to be used in the contemplated route to New York, has changed its gauge to a uniform gauge of four feet eight and a half inches, (the narrow gauge,) so as to connect mechanically with the Pennsylvania road at Easton.

I dissent from the decree just filed.

Chicago Lake Tunnel.

The enterprising and costly project of supplying the great City of Chicago with pure and wholesome water is rapidly approaching successful completion. Though a novel undertaking, without precedent in many of its details, it is being carried through without any obstructions which were not early foreseen and guarded against, and we therefore record its present condition as a triumph of American engineering equal to all the demands that necessity can make upon it.

The breaking of grounds for the shore shaft was commenced on the 17th March, 1864; and in sinking the shaft, there were 16 feet of sand and 11 feet of water to contend with. The top of the shaft is 6 feet above the level of the lake, and the sand is here tubed by three iron cylinders of 10 feet long, 9 feet in diameter, and 2¼ in. thick, set upon each other and bolted together and caulked in the seams or joints with lead, each cylinder weighing 14 tons. This is for the first 30 feet of the shaft, and from here down to the bottom it is bricked and laid in water lime 12 inches wide. The whole depth of the shaft is 87½ feet. The bottom of the tunnel is 76 feet from the surface, and here there is a bonnet arch tunnel of 7 feet in diameter, which falls off to the regular size of the tunnel, which is 5 feet in diameter. The brick is laid in two rings of one brick each, making a 9 in. wall, and is laid for 750 feet where there are two chambers excavated. One is on each side of the tunnel, 6 feet high, 12 feet long, 8 feet wide, and well secured with timber, here the brick, cement, sand and water, is deposited during the day for the bricklayers, and the cement is here prepared for the laying of the brick. The tunnel progresses for 1,000 feet further, and here there is another set of chambers put; in and so it progresses, putting in chambers at every 1,000 feet, until the tunnel has reached 4,400 feet, through hard blue clay; and strange to say, there is no water dripping through, while there is so large a body extending over the workmen. The excavation is made 6⅛ feet in diameter, and this cut to a sixteenth of an inch of the size required. There is an iron railroad laid through the tunnel for the

transportation of the clay, brick, &c., in cars of 4 and 5 in a train propelled by mules. The brick work in this tunnel has become as firm as any granite in the country, and is worked by three sets of hands, of eight hours each during the 24 hours, which keeps the work of excavation and laying of brick going on constantly, (Sunday excepted,) at the rate of 14 feet per day. Working with such regularity, it seems as if there was but little work going on. This is owing to the good system established, and every man employed understands his position in the work.

At the lake shaft which is established about two miles out in the lake from the shore, there is a crib sunk which is the same as a coffer dam, and is settled down in 35 feet of water, which is a great barrier to protect the shaft on the inside from the storms of the lake. This crib is built of timber, containing 750,000 feet, and about 200 tons of iron bolts; it is 83 feet in diameter, and 41 feet high, and is five-sided, with a hole in the centre of 33 feet in diameter, leaving a wall of 25 feet thick, and has 3 inlets from 10, 20 and 25 feet from the bottom of the lake, for the purpose of letting the water into the tunnel. The crib, that is the wall, is filled with 7,000 tons of stone, and caulked on the inside and outside, the same as a first class ship, and floated out to its destination on the 24th July last. It is covered with a good substantial house to accommodate some 45 men, who will live here, and a large quantity of brick, cement, sand and coal, also provisions in the winter months, as there will be no access from the shore on account of the ice in the lake. The machinery of the shore and lake shafts are alike for hoisting and lowering material. On the inside of the crib the shaft is sunk through 35 feet of water, and 31 feet of clay, and this is done by iron cylinders of the same dimension as those in the shore shaft, of which, there are seven set upon each other, and forced down into the bottom of the lake, and the shaft is bricked up under the cylinders, and the arch is turned for the tunnel, and the process of excavation is going on westward, while the shore hands are tunneling eastward, and will meet one and a half miles from the shore, under Lake Michigan, and when completed the water will be let in from any of the inlets, and can be let in either fast or slow, until the water rises to the level of the lake in the shore shaft.

The water can be pumped out at any time, and the tunnel cleansed from one end to the other, and is never taken direct from the surface of the lake.

This tunnel with a head of water of 2 feet, would produce 19,000,000 gallons, 8 feet, 38,000,000 gallons, 18 feet, 57,000,000 gallons daily. The velocity would be for the above quantities through the tunnel 1 4-10ths to 2 8-10ths, and 4 2-10th miles an hour.

The ventilation of the first 2,000 feet of the tunnel was at the commencement effected by heat, but towards the last of a half mile it was found unreliable in the summer months. One of Messrs. J. P. Aldens patent blowers of 48 inches diameter, was then adopted and found to possess many superior advantages and give general satisfaction. The foul air of the tunnel is exhausted through a tube the length of the whole distance of the tunnel. The blower is used to extract the gas which sometimes rises in very large quantities from the earth, and cannot be safely consumed. The work is abandoned for an hour or two when it is necessary to resort to this process. So far the arrangement has proved a complete success, and no accident to life or limb has occurred.

At this time the shore shaft has been extended to the distance of 6,466 feet, the progress of the tunnel from the shore end being about 15 feet per day. The lake shaft is sunk, being 1,209 feet from the bottom. They are constructing 10 feet per day, and this will be the average progress daily. At both ends the daily average is about 25 feet. We see nothing therefore to prevent our assuring our readers that the work is sure of an early completion, and the grant city of Chicago will then be supplied with a great desideratum which it has shown its intention to acquire under circumstances of no little disadvantage, and by a magnificent outlay, not one cent too great for the objects to be attained.

The Superintendent of the work is John P. Offerman.

The Pittsburg and Connellsville R. R. Case.

The case of the Pittsburg and Connellsville Railroad Company, to determine whether there had been a "misuse or abuse" of its charter by said company, which has been on trial before the United States Court at Williamsport, Pa., for several days, was brought to a close on the 28th ult. Hon. Reverdy Johnson and John H. B. Latrobe, Esq., were counsel for the company and the city of Baltimore, and Judge Black and others for the Southern Pennsylvania Railroad Company. A letter to the Pittsburgh *Dispatch* said that Mr. Johnson made the closing address. His speech occupied some two hours in its delivery, and made a marked impression on both court and jury. Judge McChandless in his charge to the jury remarked:

This is an issue out of Chancery, to inform the conscience of the Chancellor as to a question of fact, which cannot be revived elsewhere, and I have only to instruct you as to what constitutes misuse and abuse of the franchise of a corporation. Your verdict for either party, in making his decree, the Chancellor may disregard altogether.

You will have perceived during this protracted and interesting investigation, that the Legislature of Pennsylvania, by an act passed the 28th of April, 1866, and which the Governor of the State refusing to sign, under a provision of the Constitution, became a law on the 19th of August of the same year, repealed the charter of the Pittsburg and Connellsville Railroad Company. That law this court declared to be unconstitutional, being a law impairing the obligation of a contract which the State of Pennsylvania made with a corporation, and which is in violation of the Constitution of the United States. As there was a writ of *quo warranto* at the instance of the Attorney General of the State, pending in the Supreme Court, we deemed it due to the parties legislating, as well as a proper courtesy to that high court, that an opportunity should be afforded to the law officer of the commonwealth to inquire in that tribunal whether the Pittsburg and Connellsville Railroad Company had misused or abused its corporate franchises. Ample time was allowed for that purpose, and no further proceedings having been taken by the Attorney General, this court directed an issue to try the question of fact. * * *

In this examination we have limited the inquiry to acts of omission and commission on the part of the corporation, subsequent to the date of the condoning act of the State of Pennsylvania, of the 11th of April, 1856, upon the faith of which the city of Baltimore loaned her credit and paid one million of dollars. Any offense against the sovereignty of the State of Pennsylvania she pardoned by the act of her Legislature of that date. You will therefore ascertain from the testimony, and inform us by your verdict, whether the Pittsburg and Connellsville Railroad Company, since the year 1856, has misused and abused the franchise granted to it by the State of Pennsylvania.

The jury retired, and in a few minutes returned into court with a verdict that the Pittsburg and Connellsville Railroad Company had not misused or abused its charter.

After the finding of the jury, J. H. B. Latrobe, Esq., counsel for the company, made application before Hon. Wilson McCandless, of the United States Court, for an injunction to prevent any further interference with the progress of the work. The defense objected to the decree, contending that further opportunity should be afforded to prove allegations in answer other than those passed on by the jury. The objection was overruled, and a *perpetual injunction* was granted. The Connellsville Railroad Company will now be enabled to push forward their road to completion as rapidly as possible, and as the Baltimore and Ohio Railroad Company have guaranteed the money necessary, Pittsburgh will soon have another line of communication to the seaboard.

A Railroad from Baltimore to Aquia Creek.

We believe that we have heretofore reported the revival of the above enterprise. New York parties have, as has been suggested to us, been willing to furnish the needed capital for said road, provided that the provision of its charter for a branch to Washington shall be carried out. To this end the people of the interior of the peninsula or Western Shore are now asking Congress to give authority to have the road extend into this city. Of course, it is for our interest to have a competing road to Baltimore, especially as it is to be extended in the direction of Marlborough, near which point another road should extend down the Patuxent to Leonardtown and on to Piney Point Lookout. Besides, should the Baltimore and Aquia Creek road be built, the people in that part of Maryland bordering the Potomac will have access to this city. Moreover, a branch may be constructed from the proposed road to Annapolis. Thus, Western Masyland, between Chesapeake Bay and the Potomac river, would have a good railroad system for its manifold productions of land, water and forest. If it were a matter of much interest, the suggestion that the proposed road might carry travel past Washington does not carry much weight, since that when the proposed road between Fredericksburg and Alexandria is completed, in connection, particularly, with an interior line hence to New York, pretty much all Southern travel will take the latter route. One thing is certain; any new line of railroad extending directly in any course from this city is a vast advantage to it.—*National Intelligencer.*

☞ Prussia has a population of 19,304,843, all but 2,504,179 of whom are Germans. The Austrian Empire contains a population of 36,795,100, the German element including only 8,200,000. The remainder of the inhabitants consist of Magyars, 5,050,000; Bohemians, Moravians, and Slowacks, 3,600,000; Poles, 2,200,000; Russians, 2,800,000; Sclavonians, 1,210,000; Croats, 1,360,000; Servians, 1,470,000; Bulgarians, 25,000; Italians, 3,050,000; members of other races, 4,130,000.

☞ Hon. Nathan Parker has been elected Treasurer, and James H. Kendrick, Assistant Superintendent of the Concord Railroad Company.

Finances of Maryland.

The report of the Comptroller, submitted to the Legislature of Maryland, January 10, 1866, states that the balance in the treasury at the close of the fiscal year, Sept. 30, 1864, was..... $876,899 33
Receipts from all sources during the year ending Sept. 30, 1865 ..... 2,681,592 20

$3,558,491 53
Disbursements 3,125,565 58

Balance $432,926 00
Add amount to credit of Free School Fund..... 43,773 34
Do., Sinking Fund..... 177,178 72

Total balance in Treasury Sept. 30, 1865 ..... $653,878 06

Of the amount received into the treasury from all sources, as stated above, $2,681,592 20; $830,-745 81, proceeded from a loan negotiated by the treasurer, and $248,742 26 was derived from the public school tax. If these sums be deducted, there appears, as received from the ordinary sources of revenue, the sum of $1,602,-104 13, which amount is less by the sum of $110,-013 34 than the receipts from similar sources during the last fiscal year.

The estimated receipts from all sources for the fiscal year ending 30th September 1866, are $2,243,000. The probable disbursements are estimated at $3,025,000, exceeding the receipts by about $782,000.

The principal item in the estimates of disbursements is $1,250,000, for bounties to soldiers.

The receipts into the School Fund for the fiscal year ending September 30, 1865, were $87,132 83, and shows an increase over the previous year of $11,433 94. The balance at the close of the last year to the credit of this fund was $27,417 47, added to the receipts of the present year makes an aggregate of $114,550 30; and the disbursements were $70,776 96—leaving a balance to the fund of $43,773 34.

The balance in the Treasury to the credit of the sinking fund was $177,178 72. The greater portion of the State stock held for the use of this fund having been cancelled by the Treasurer, as directed by the act of 1864, Chap. 285.

The revenue derived from licenses, etc., received amounted to $352,606 26, an increase over the preceding year of $29,006, and over 1863 of $59,-074 87.

RECEIPTS FROM INTERNAL IMPROVEMENTS.

The Baltimore and Ohio Railroad Company paid into the Treasury during the fiscal year $398,262 32, being less than was paid during the year 1864, by the sum of $19,639 91. An extra dividend was declared in that year. This company, however, since the close of the fiscal year, has made large payments into the Treasury. The ability and success with which this important work has heretofore been managed is still exhibited, even in a greater degree.

There has been received from the Northern Central Railroad Company $90,000, the annuity due the State according to the terms of her mortgage, and also $831 52 which has been withheld in the previous year for the payment of a tax claimed by the State of Pennsylvania. The payments have been made quarterly, and with commendable promptness.

The Susquehanna Canal Company has also paid $60,000. This sum was not equal to the current interest due from the company, and cost of exchange. The act of 1865, chapter 196, authorized the Treasurer to renew the bonds of this company (which were due on the first of January, 1864,) for twenty years, with the principal and interest, at the rate of six per cent., payable in currency, upon the payment of all arrearages of interest, exchange and expenses, before the first of July last. The company has totally failed to comply with this condition. The operations of this company have been seriously impeded by the injuries sustained from the heavy freshets of the last spring.

RE-ASSESSMENT OF PROPERTY.

The assessed value of the real and personal property in the State, liable to direct taxation, is $278,507,519, being a decrease from the assessments of last year of $7,234,836. This difference is caused by the fact that all assessments on account of slaves were deducted from the tax books, as required by chapter 113 of 1865.

According to the general assessment made in 1852, the value of coal and personal property was $261,143,660, exhibiting an increase of $49,667,-825 when compared with the year immediately preceding, and of $64,492,515, or nearly thirty-three per centum, when compared with the general assessment of 1841, only eleven years before.

Ship Canal through Florida.

Would an undertaking of such magnitude as to build a ship canal from the waters of the Atlantic through Florida, to the waters of the Gulf be practical? We are unprepared to say; but it is well enough to raise the question. Capital can accomplish wonders, and it is at least reasonable to suppose that such an undertaking could be made to succeed. If such an enterprise could succeed it would add much to the commercial and agricultural importance of the State, and be of a very great benefit to the commerce of the United States, as well as of the greatest importance in the event of a heavy foreign war.

It is not presumed that every heavy article will generally pass over the railroad, and a canal would increase the quantity of light freight and travel on the roads.

We would be pleased to hear some persons on this subject, who perhaps have given it some consideration. It would be a grand enterprise and if successful, a wonderful blessing to us.—*Gainsville New Era.*

☞ The receipts of the Camden and Atlantic Railroad for the year 1865, were $283,637, of which amount, $210,700 were from passengers, $69,337 from freight, and $3,600 from miscellaneous sources. The expenses of all kinds were $189,571—leaving an excess of $94,066.

☞ At the annual meeting of the Western Extension Railway Company, held at St. John, N. B., on the 27th ult., the old Board of Directors were re-elected. The annual report was presented, and such arrangements made as will ensure the early energetic prosecution of the work.

☞ The Connecticut House of Representatives has rejected the bill authorizing the bridging of the Connecticut River at Lyme, by the Shore Line Railroad.

French Metrical System.

A bill is before Congress changing our present system of weights and measures so as to conform to the French metrical system. The New York Chamber of Commerce has taken up the subject, and appointed a committee to report upon it. Congress has created a new five cent piece containing a certain number of grammes of the weight of 15,432 grains to the gramme, which is already in circulation, so far assisting in the general project. It is a base coin in its ingredients, and the expense of preparing it is fully equal to the cost of the metal, while it has no real value—at least none worth speaking of as a metal of real intrinsic value. It seems to us that the enthusiastic persons who are pressing the proposed measure have not duly considered its effect, or they would not be so full of haste. The idea of a uniform system of weights and measures all over the world is certainly a pleasant one, but it may be doubted whether as Americans we are yet quite on the right track. At least much may be said to induce us to pause, before we plunge into the French system, and change our own. On a former occasion we gave an explanation of the metrical theory of weights and measures, and it is not necessary to repeat it here. Simply, it is taking an universal standard from the supposed length of a quadrant of a meridian line between the equator and the pole, and not a quadrant of the diameter of the earth as at the equator east and west, as some persons have supposed. The ten millionth part of this quadrant is called a metre, and solids enclosed by certain numbers of metres, or measured in length merely by them obtain distinctive names, and out of this all the forms of lengths, areas and solids are arranged and fixed.

But the fact is, that this quadrant is now found out to be incorrect. It is even doubted whether the form of the earth is what it has been supposed to be. It makes a good deal of difference in its measurement and the length of the meridianal lines adopted by the astronomers, whether we measure on an oblate spheroid or not. Certainly great errors have been discovered in the measurements from which the metre has been derived. An invariable standard is not in fact yet obtained. So that the idea and merit of universality would not be owing to the facility of verification, or the certainty of accuracy. Any other standard on which men might agree would do just as well.

Then, again, it is very doubtful whether a nation like the United States, which in 1900 is to be the greatest, most populous and most commercial country of all Christian and civilized nations, should be indebted to any second rate kingdom or empire for its system of weights and measures. It is doubtful whether the language, thoughts or opinions of any European nation should be accepted, from any notion of mere convenience. We admit many good things have come from France, but much that we could never accept. There was a time when it altered the number of the days of the week, ignored the Christian Sabbath, and worshipped Reason as a divinity; but these changes were followed by anarchy, bloodshed, the overthrow of commerce, and of liberty, and by the establishment of the most grinding despotism ever known. We certainly do not wish to follow in these footsteps.

Now as regards the particular introduction of this measure, it is a fact that even in France, all through it, the new system, though established by law, is everywhere evaded and ignored. All sorts of ancient weights and measures, to which the people are accustomed, are still in use and preferred. Of this there is no doubt. It is to be hoped that some careful inquirer will hunt up the facts in regard to this, and let us know them. On the continent, where in several places the metrical system has been introduced, it has been very much modified, and the names of the different measures changed to the comprehension and vernacular of the people. In England, where the system is permitted by law to be used, if people choose, it has made no progress.

While the use of decimals has been well introduced into our money, which is no more than the Chinese have long done, and which seems to be a natural method from the construction of our fingers and thumbs, on the other hand, the division of material objects seems equally natural to be by halves, quarters, eighths and sixteenths, which are easy of comprehension mentally, and easily put in practice. There are no fractional remainders as in the case of the compounds, or divisions of the metre. Simple expressions in figures are easier than long decimal notation which requires time in the calculation and writing, and leaves us without a perfect idea as to quantity. To write or set down a yard is easy enough in a few figures, but to write down or calculate 36 inches in metrical length requires the care of a good arithmetician. It will be found on the metrical system that great accuracy is almost impossible in off hand business; there is no natural symmetry in the parts or proportions. There is no reason in any division—we know why two halves are equal, we can divide 36 inches in halves very readily, but do not see why the half of 29.37 inches should be divided for anything in itself, or in the numbers themselves.

Persons who have given this subject their attention, are by no means of one opinion as to the merit of the system. Learned men are found against it as well as for it, even in the countries where the principle has made headway.

John Quincy Adams long ago published a most able report on the subject, but seemed himself to

be in doubt as to what was the best course to take. The Chamber of Commerce took up the subject some years since, and a joint committee of that body and the American Geographical Society after full investigation made a report favoring an alteration of our system, but on an American plan which was simple, universal and ingenious. Why it has not been followed up is not known. Recently the Albany Board of Trade has recommended the adoption of a new system of measuring grain by the hundred pounds or centals, and the idea has been sanctioned by other Boards.

What we want is, that no indiscreet zeal may be able to fasten this metrical system upon us without a full investigation. It should be thoroughly understood and explained before it is forced upon us by any law, and we hope the Chamber of Commerce will not commit itself to this measure, without at least placing before the public in an intelligible light, the whole subject, and what are the opinions of competent judges as to its utility.

Cincinnati, Hamilton and Dayton Railroad.

The income and expenses of this company for the years ending March 31, 1865 and 1866, were as follows:

Income:	1865.	1866.
From passengers	$546,810 15	$545,666 09

Added to surplus of March 31, 1865	498,133 59	
Leaves to credit of that account	$547,076 76	

The gross receipts for fourteen years ending March 31, 1866, have been as follows:

1853	$321,793 17	1860	$561,681 52
1854	463,021 45	1861	615,071 07
1855	483,629 48	1862	646,205 67
1856	471,885 70	1863	877,403 86
1857	518,333 95	1864	1,088,828 47
1858	487,421 27	1865	1,241,856 71
1859	489,437 92	1866	1,361,566 47

The earnings of the past show an increase over those of the preceding year of $119,709 76. The operating expenses also show an increase of $90,648 03. The entire expenditure, including interest, taxes, etc., were $1,042,623 30. The balance of income after deducting all expenditures, was $318,943 17. The gross earnings of the road per mile were $22,692 78, against $20,697 61 in 1864–'65—an increase of $1,995 17. The percentage of operating expenses was 60.9. The number of through passengers carried during the year was 137,258; way, 468,795—total, 606,053, an increase over the previous year of 63,514. Tons of freight transported, 412,847. The President in his report says:

The expenses of transportation show an increase over those of the previous year. While the prices of wages and supplies used remain as heretofore, the rates of transportation, arising chiefly from competition, have been materially reduced, showing the result of increased expenses, in proportion to the amount earned.

The Superintendent's report shows the amount of equipment added during the year. The increase of business demands still more; and there should be a further expenditure of not less than two hundred thousand dollars for passenger and freight cars.

The company have already erected two substantial freight depots, and an extensive shed in Cincinnati, for the receipt and delivery of freight. Another one, from Freeman to Carr streets, will be required within a year or two, where the company has already secured the grounds requisite. Additional facilities for handling live stock will also be requisite near the city.

The books of the company show an expenditure of $455,966 81 for construction, equipment and real estate, beyond the amount received from capital stock and bonds. This has used up the surplus earnings, besides leaving the company with a floating debt.

To pay off this debt, and to supply the requisite additional machinery, we would recommend that authority be given by you for the issue and sale of additional stock, to be distributed *pro rata* to the present stockholders. The increase of business which the company will be able to do, with the additional facilities of freight depot and machinery, may be fairly expected to keep up present dividends. If this be not provided, more or less of the present business of the road will be diverted to other channels.

The company has recently purchased a controling interest in the stock of the Eaton and Hamilton Company, at a cost of $61,727 68, being twenty-five cents on its par value, and will hereafter operate that road in connection with its own, at a saving in expense, and, it is believed, at a fair profit to this company. On the 30th of last month, the old Board of the Eaton and Hamilton Company retired, and the Directors in this company were elected in their places.

The Eaton and Hamilton road (hereafter to be known as the Cincinnati, Richmond and Chicago Railroad) connects with the Cincinnati, Hamilton and Dayton road at Hamilton, and extends to Richmond, Indiana, a distance of forty-five miles, forming a link in the shortest Cincinnati and Chicago line. The bonded debt of the road is now $560,000, bearing seven per cent. interest, and is secured by a first and only mortgage. The capital stock of the company issued is $470,000. There is no floating debt. The road is located through a rich and highly cultivated country, and the business on it must soon show an increase. The earnings of the past year were $260,000. In making this investment, the Board of Directors were not only of the opinion that a fair return would be received, but had reason to apprehend that other parties would obtain control of the same, and use it in rivalry with the Cincinnati, Hamilton and Dayton road.

The business in connection with the Atlantic and Great Western Railway has fully met the expectation of our Board the first year; and it is believed the future will demonstrate the wisdom of providing the broad gauge track from Dayton to Cincinnati.

The earnings of the Dayton and Michigan road the past year have been fifty per cent. beyond what was expected when this company leased the same. The expenses of operating the road, however, have shown a corresponding increase. It has been found necessary in the past twelve months to expend an amount beyond the net receipts, in permanent improvements on the road, and in supplying addiiional machinery, which has been advanced by this company. There is still a necessity for more equipment to keep pace with the business offering.

The high prices of labor and materials for keeping in repair and operating the roads of our country generally still continue, whilst the prices for transportation, especially on through freights, are much lower than for several years past. Under these circumstances, and until there is a corresponding fall in the prices of labor and material, it can hardly be expected there will be as much margin left for dividends on shares.

The economy in operating the Cincinnati, Hamilton and Dayton road compares favorably with other roads, and it will continue to be the study of those in charge to reduce expenses. Its operating force has already been largely diminished.

The contract for a division of earnings with the Little Miami and Columbus and Xenia Companies, made April 2, 1860, for twenty years, has been brought to a close, with the approval of all parties interested.

A contract has been made with the Cincinnati and Marietta Company, to continue for a period not exceeding five years, for the use of our double track six miles, commencing at a point seven miles from Cincinnati, and terminating at the east end of the bridge over Mill Creek, at the city limits, for the consideration of $25,000 per annum. At the point of junction, seven miles from the city, it is expected there will be an interchange of business in coal, live stock, etc., and preparations are now being made therefor.

The revival of the project for bnilding a railroad from Cincinnati, in a southerly direction, by way of Lexington, through Kentucky and Tennessee has deservedly excited the interest of a portion of our property holders and business men. The importance of this line to the trade and manufacturers of Cincinnati, as well as to the existing lines of railroads north of the Ohio river, cannot well be exaggerated. A glance at the map will show that the country through which such a line must pass, would send us new business which we do not now possess, while the direct connection with the great net work of the southern system of railroads would throw a very large amount of new business upon all roads now radiating from this city.

Every citizen should do his share in the promotion of this enterprise, so essential to our business supremacy. The Board of Directors of this company have made a proposition to lend its aid in the work, of which you are requested to-day to signify your approval. The proposition is as follows, viz: To donate out of the first earnings from the business between our road and the proposed new road, after its completion, one-half the net receipts (first deducting sixty per cent. of the gross for expenses) to the amount of fifty thousand dollars.

We call upon our connecting lines to make similar proposals. It is presumed that other companies, equally interested, will aid the work in the same or such other substantial form as they may deem proper.

The receipts from operations of the Dayton and Michigan Railroad during the year were $951,357 46. The expenditures were: operating expenses, renewals, taxes and insurance, interest and exchange, $693,062 20; interest on bonds, $274,291 66; construction, equipment, etc., $61,032 09;

Toledo Depot Improvement, $28,814 86; Trustee of sinking fund, $30,000—total, $1,087,200 81—excess of expenditures over receipts, $135,843 35; add balance from previous report, $36,002 16—making a total of $171,845 51, due C., H. and D. R. R. lessee.

Ass't Superintendent.—LEWIS WILLIAMS.

Southern Pacific Railroad of Texas.

It will no doubt be gratifying to the friends and stockholders of this enterprise to learn the present status and future prospects of the company. On the 1st of August next the road will be completed from Shreveport, on Red River, to Marshall, Texas, a distance of 42 miles. This, with 19 miles more graded west of Marshall, is valued at the sum of $1,500,000; due to the State of Texas, $150,000; floating debt, $50,000; first mortgage bonds, $150,000, owned by citizens of Louisville; transportation certificates, $15,000; capital stock, $650,000; total, $1,015,000; surplus value, $485,000.

The company have secured from the Shreveport road 21 miles of the road for the term of twenty years, without cost, only keeping the same in repair and turning it over to them at the expiration of that time in good order.

Two splendid passenger cars and six construction cars, will leave here to-day for Shreveport, to be there in time for the grand opening celebration to take place on the 1st of August.

It is the intention of the company to immediately commence the work west of Marshall. After grading six miles more (with the nineteen already graded) they will then be entitled to the land grant of 10,240 acres per mile, or 156,000 acres, and the loan of $6,000 per mile from the State of Texas. It estimated that *not less* than 1,500,000 acres of land and large sums in money will be donated by individuals and counties through which the road will pass. Such is the enthusiasm that nothing can hinder its progress. We may safely say that there is no other enterprise on the continent in a more favorable position than the Great Southern Pacific Railroad of Texas.—*Louisville Jour. June* 30.

Dayton and Michigan Railroad.

The income and expenses of this company, for the fiscal years ending March 31, 1865 and 1866, was as follows:

Income:	1865.	1666.

Tunnel under the Mississippi.

So much objection has been made to bridging the Mississippi river, that the railroads centering at St. Louis are said to have determed to construct a tunnel under the river at that city. Consent to construct the work will be asked of Congress, and as soon as it is obtained, it is proposed to begin the work. The cost is estimated at $3,000,000, and the time required for the completion of the work three years. The tunnel will not be more than three-fourths of a mile long.

☞ The Directors of the Pittsburgh, Fort Wayne and Chicago Railway Company, at their last meeting, created an additional office of Assistant President, and appointed Mr. Thomas D. Messler to the position. Mr. Messler for several years was Comptroller of the Company, and latterly has been connected with the banking-house of Winslow, Lanier & Co.

☞ The Concord and Claremont Railroad, now open to Bradford, twenty-six miles, was sold at auction at Concord, N. H., on the 9th inst., for one hundred thousand dollars, subject to mortgages. It was bid off by Hon. Josiah Minot.

☞ A contract, it is stated, has been made for the construction of a railroad between Alexandria and Fredericksburg, to be completed in eight months.

Journal of Railroad Law.

EVIDENCE FOR PLAINTIFF IN AN ACTION FOR INJURY TO EMPLOYEE ON RAILROAD.—WHAT AT THE TRIAL ARE HARMLESS.

The case of O'Donnell *vs.* The Allegheny Railroad, lately decided in Pennsylvania, decides that in action for negligence against a railroad company, it is error to reject any evidence tending to prove that the plaintiff, although in the service of the company was by the original contract a daily passenger on their road, that he was not out of place at the time of the injury.

Error to the Common Pleas of Armstrong Co.

This was an action on the case brought by Daniel O'Donnell against the Allegheny Railroad Company, to recover damages for personal injuries received while riding on its road. The accident occurred on the 2d of March, 1861, and under the following circumstances: The defendant employed a number of carpenters, under a master workman, in repairing bridges on the line of the road. These men were working on the Kiskiminitas viaduct at the time, but were boarding at Kittanning, where the plaintiff and some others resided, about fifteen miles from their work. As the downward train left Kittanning early in the morning, and the upward one returned late in the evening, it was convenient for the hands to ride to and from their daily work. In doing so they occupied the baggage car. They assisted in receiving the freight along the line, at the way stations, and paid no fare directly; but it was alleged to be part of the contract with the foreman that they should be carried thus to and from their work. On the day of the accident, O'Donnell, who had been at work, was coming home as usual in the train. Whether he was in front of or in the baggage car at the time of the accident did not clearly appear, but the weight of evidence seemed to be in favor of the latter. When the train was within two miles of Kittanning, a rail broke, and the baggage car was thrown off the track and upset. Mr. O'Donnell was afterwards found near the centre of the road under one of the passenger cars. He was very badly injured. Both legs were broken, and one of them had to be amputated. He was otherwise badly injured. He lay many months in the hands of his physician. Soon after his recovery, this suit was brought to compensate him for the loss. There was evidence that when the rail broke, which it was supposed threw the car off, a tie was rotten, and also that the chair at the end of the broken rail was broken.

The opinion of the Court was delivered by

WOODWARD, C. J.—We think there was manifest error in rejecting that part of Listen's deposition which is in the bill of exception. The plaintiff had been very badly hurt whilst riding in the baggage car of a passenger train, and the accident arose apparently from the defective condition of the railroad. But his action was resisted on the ground that he was an employee of the company, going to his proper work on the road, and that it was negligence on his part to place himself, even with the conductor's consent, in the baggage car. It would seem that Listen had the general supervision of the railroad from Pittsburg to Kittanning, for the building of bridges, trestle work, etc., and occasionally, says Listen, "myself and hands were employed in repairing the track. I was authorized by the company to employ all the hands under me. I employed plaintiff to work for me on the Kiskiminitas Bridge; he was living at Kittanning. I boarded at Kittanning and the other men from Pittsburg with me; we left Kittanning in the morning train for our work, and returned in the up train from Pittsburg in the evening; by my contract with the plaintiff I authorized him to do the same. Under and by virtue of my contract with him, he was carried by the company on their cars daily back and forth to Kiskiminitas the place of work." Then follows the rejected clause in these words: "It was the custom for myself and hands to ride in the baggage cars; this was done in going up and down town. By the request of the conductor, myself and hands always assisted in taking in and putting out freight."

It was primary and fundamental question in the cause whether the plaintiff was a passenger, entitled to all the rights of a safe transit which belong to passengers, or whether he was a servant in such a sense as to preclude an action at loan for a personal injury to himself resulting from the negligence of other servants of the company; and on this question the rejected evidence to have been received. It tended to prove that, though in the service of the company, he was, by original contract a daily passenger on their road; that he was not out of place in the baggage car, but was there in pursuance of a custom of the road; and that besides the original contract, there was a consideration rendered by him for his ride, in helping to take in and discharge freight. Had the jury been convinced that he was a paying passenger, it is fair to presume that he would have recovered a larger verdict. They must have regarded him as sustaining a relation to the company something more than a mere servant, else they could not have found for him at all under the instructions given them by the Court; and as his right of recovery, and to some extent the amount of the verdict depended on a clear definition of that relation, whatever evidence tended to elucidate it relevant and very important. If he was in fact a passenger who had paid for his transportation, he was entitled to the benefit of the fact, and all of its legal consequences. The cause must go back to secure to him this right.

It is quite possible that a majority of us would think that there was error also in admitting that part of Dr. Reynold's deposition, which undertook to fix the amount the plaintiff claimed, had it been excepted to and sent up under sealed bill. Plaintiff's paper book show neither exception nor bill, and all the defendant's paper book tells us about this piece of evidence is, that it was not objected to until after it was received, and it is not intimated that a bill was then sealed. The record is not at hand to be consulted, and if it were, and a sealed bill should appear upon it, the negligence of counsel in not furnishing it in our paper books, is reason enough for our not noticing it. The rules prescribed in 6 Harris, 577, for preparing paper books, are plain and simple, and if counsel mean to have their questions considered they must respect the mode prescribed for presenting them. Dismissing, therefore, the second assignment of error as baseless as founded on no bill of exceptions, we give no opinion about the remaining fifteen assignments, not merely because every one of them is informal, but because it is not legally manifest that the plaintiff was injured by the misrulings alleged. Notwithstanding the answers of the Court, the plaintiff recovered a verdict. Why then should we reverse these ruling at his instance? A vague conjecture may be indulged that had the answers been different, his damages had been larger, but judgments are not reversed on vague conjectures. How are we to know that more correct answers would have augmented damages a dollar? They never reverse for harmless errors, and all errors are harmless which the record does not show occasioned the complaining party a loss, inconvenience, or injury. If the jury undertook to reverse the Courts law, it was a great wrong, for which the proper remedy was a new trial and not a writ of error.

In the instance of Listen's deposition, there is ground for presuming injury from the error of the Court, for that part was an exclusion of part of plaintiff's case from the consideration of the jury; and in a suit for damages it is impossible to reject the most material part of a plaintiff's evidence without impairing his damages; but in the instructions given upon what evidence was received, the record afford no presumption that the plaintiff was injured, and therefore we inquire not into the soundness of those instructions. The great question of the cause was whether this plaintiff, in the peculiar circumstances of his case, comes within the rule of law that denies to a servant an action against his employer for the negligence of fellow servants, and it is a question on which we reserve our opinion until the record presents it in a shape fit for judgment.

The judgment is reversed, and a *venire de novo* is awarded.

Strong, J., dissented.

Atlantic and Great Western Railway.

At the meeting of the proprietors of the Consolidated Bank, held in London on the 18th ult., the following satisfactory explanation was made relative to the debentures of the Atlantic and Great Western Railway and the financial position of that undertaking:—

Mr. T. Fairbairn said he was glad to have the opportunity of removing an impression that had been prevalent in the city, that this bank had embarked to the extent of hundreds of thousands of pounds in the Atlantic and Great Western Railway. It was quite true that they had had some connection with that railway, and there was no doubt that it would continue to perform its engagements with the same exactness as it had hitherto done. They were under engagements in the shape of acceptance for £60,000 to the Atlantic and Great Western Railway Company, and they held good bills on perfectly solvent houses for £64,000. Those bills would fall due almost simultaneously. They had already paid acceptances to the extent of £65,000, the cover against which was not met, but they held £90,000 of claims against firms that had temporarily suspended. Not only would there be no ultimate loss, but he believed they would have to hand back some of the money. That was the full extent of their liabilities. Two years ago the Consolidated Bank guaranteed the interest for three years upon the sum of $2,800,000, and the terms of that negotiation were that the bank were to have one year's interest in hand in cash, and each six months the coupons were paid the railway company was to put them in possession of the exact amount of the money. For that they also had the guarantee of five of the largest of the banking and financial institutions of London. At the present time they had sufficient cash in hand to meet all their liabilities due on the coupons for

November next, and a portion of the money necessary for those which would fall due in May, 1867, but they had to rank either against the railway company or the guarantors for nearly one year's interest, which however was not claimable from them before May and November next year. During the past two years they had paid the interest, and the railway company had always met its remittances in time, consequently the bank had never yet had to call upon the guarantors for anything.

Central Argentine Railway.

The first section of this road from the port of Rosario to the Tortugas, in the province of Santa Fe, was opened for public traffic on 1st May last, and although the distance is only 70 miles, the railway will be found a great convenience, inasmuch as it saves passengers one night on the road, and the bullock-cartmen or public carriers in the provinces from being obliged to pass the Carcaranal river with their unwieldy conveyances. The Carcaranal bridge is stated to be one of the best specimens of English workmanship in South America. On the occasion of the opening of Congress on the 6th of May the Vice-President of the Republic, Dr. Don Marcos Pay, in his message to the Senate and Chamber of Deputies, remarked as follows:

"The great expenses caused by the war have deprived the Government of expending in useful works such as roads and bridges, and limited it to the continuation and completion of works already commenced. The important work in the country is the Central Argentine, the first section of which 70 miles to the river Tortugas, is complete and open to public traffic. Early in August the line will be finished to San Geronimo (Frayle Muerto), 120 miles from Rosario. The great activity of the contractors, Messrs. Brassey, Wythes, and Wheelwright, in pushing the works ahead, deserves especial praise, and particularly the untiring labors of Mr. Wheelwright, the concessionnaire. The Government has omitted no endeavor to fulfill its stipulations with the company, and I think it right to remark that Mr. Wheelwright has now commenced surveys for the continuation of the line from Cordova to the other province, a scheme of the greatest importance for this country and destined to work an important revolution in the social and industrial resources of the Republic by facilitating transportation and calling into demand many of the Argentine products as yet comparatively speaking unknown."

When the railway shall have been finished as far as the city of Cordova it will monopolise all the traffic, passengers as well as goods, between the extremities of the line, as also of the intermediate points. The line will not have competition from the *carretas*, or cargo carts, which the railways of Buenos Ayres have. It will take all the traffic of the interior for the coast and *vice versa*. The number of inhabitants on the line of the Central Argentine is admittedly less than on the Buenos Ayrean lines; but in Cordova and the other provinces there is a population of more than 500,000, who will have need of the Central Argentine as passengers, transport of merchandise, and produce. For several years to come the port of Rosario will be the only outlet to the coast for all the interior provinces, and when the line is open the entire distance to Cordova, 250 miles, the merchandise now sent from Chili and other ports on the Pacific will come by this railway. Moreover, the lands contiguous to the Central Argentine are being daily settled, which will cause much more traffic both in passengers, produce, and merchandise. It is confidently expected that when the line has been opened to public traffic in its whole length for one or two years it will not be required of the national Government to makeany disbursement whatever on account of their guarantee of 7 per cent., but rather the effect of this great enterprise will be to lighten the national expenditure by economising the subventions the Government at present pays to the provinces of Santa Fe and Cordova.

Boston, Hartford and Erie Railroad.

We learn that a contract has been made by the Boston, Hartford and Erie Railroad Company with N. C. Munson McNeil of Litchfield, Conn., and the Messrs. D. N. and I. C. Stanton, to complete the road from Boston to Fishkill. The road is to be completed to Willimantic in twenty months, and to Fishkill within three years. The contractors are to be paid in the bonds authorized by the legislation of Massachusetts, Rhode Island and Connecticut last winter. From the well known caution, energy and wealth of the contractors, there would seem to be no reasonable doubt that the success of the enterprise is now assured. Mr. McNeil is less known in this community than the others, but has been prominent as engineer, contractor and president of several Western railroads. This public improvement is of great importance to Boston as giving a new avenue to the West. To the towns and villages along the line it will open direct communication with the coal fields of Pennsylvania. The Erie Railroad and its stockholders, and some of the large coal companies in Pennsylvania, have a deep interest in the performance of this contract.—*Boston Advertiser.*

Railroads in Delaware and Maryland.

The engineers are now surveying the route for a railroad from Centreville, in Queen Anne's County, Md., to Massey's X roads in Kent County, Md., which is about twenty-three miles, and another route from mouth of Swan Creek to Massey's X roads—thirty-two miles. Here a junction will be formed, and the road extended from Massey's X roads eight miles to unite with the Delaware Railroad at Townsend. This is a very important road and will by means of boats on the Chesapeake and the local travel add largely to the business of the parent stem of our railroad system. That these branches will be built in a very short time we have no reason to doubt. The funds, in part, are to be raised as follows: The State of Maryland gives to Queen Anne's County $112,000, as soon as the people of the county subscribe an equal amount, which they are ready to do, or have done. The farmers along the line from Centreville to Massey's X roads are ready to subscribe $50,000, making $274,000. The State of Maryland gives to Kent County $102,000, when the county subscribes an equal amount; and the farmers along the line from the mouth of Swan Creek to Massey's X roads subscribed $5,000—making in all $528,000. The eight miles to connect with the Delaware Railroad, we understand, will be provided for by the farmers along the route and the Philadelphia, Wilmington and Baltimore, or the Delaware Railroad Company.—*Delaware Gaz.*

☞ The following gentlemen have been elected directors of the Chicago, Detriot & Canada Grand Trunk Junction Railroad Company: John W. Brooks, Samuel G. Ward, Boston; Charles G. Brydges, James Ferrier, William Molsom, Montreal; Lewis Moffat, Toronto; and Robert McClelland, Detroit.

☞ The bridge over the Tennessee river at Decatur is completed, and trains now run through to Memphis.

☞ S. G. Fry, Esq., has been elected President of the Philadelphia and Darby Railroad.

Portsmouth, Gt. Falls and Conway R. R.

At the annual meeting of the stockholders of this company, held at Portsmouth (N. H.) on the 10th inst., the recent acts of the Legislatures of Maine and New Hampshire in relation to the corporation were accepted by the stockholders, and the directors were empowered to take measures to construct the road in accordance with the terms of its charter. The Legislature of New Hampshire has recently given this road authority to increase its capital stock to a million and a half dollars and to extend its track to the Atlantic and St. Lawrence Railroad in Gorham, N. H. Geo. M. Browne, Nathaniel Hooper of Boston; Ichabod Goodwin, Wm. H. Y. Hackett of Portsmouth, and Geo. W. Burleigh of Great Falls were elected directors. The officers are: George M. Browne of Boston, President; John B. Parker, Salem, Treasurer, and William H. Hackett of Portsmouth Clerk.

Cincinnati and Charleston Railroad.

The Charleston *Courier* has been favored by President Andrews with the subjoined extract from a letter from the Chamber of Commerce Delegation, under date Cincinnati, June 17:

Messrs. Mordecai, Trenholm, Kerr, West and Courtney are all here. We have been received by the President and members of the Cincinnati Chamber of Commerce with great courtesy and kindness, and spent last evening at the Club House. We find that the Knoxville people are altogether in favor of the Blue Ridge route, and therefore we wait for the delegation to arrive here. They are expected to morrow, and we are to have a public meeting on Tuesday evening of the citizens where we shall be heard.

The plan of building railroads in this section of country is to get subscriptions to a road, to be paid as a bonus on construction of the road.

Already there has been subscribed $800,000, in Cincinnati, and it will reach one million. This is exclusive of what will be done in Louisville. Now if we put in the three millions already spent on our Blue Ridge Road as a bonus, the company will have four millions subscribed to complete a road to cost seven millions originally."

Ottoman Railway.

The Smyrna correspondent of the *Levant Herald*, writing on the 1st, says—"My telegram of Monday reported to you the opening of the great tunnel on the Aidin line on the previous day, when an engine first passed through the work, and crossed the plain beyond to within some six miles of the town of Aidin. The over-the-mountain temporary line had already been some time open to the contractors' engines, and the permanent way and bridges in the plain beyond have consequently been pushed on within recent weeks with an energy which has left nothing to desire. The great thing, however, was to get both the tunnels open, and this being now done, what remains to complete the line may be regarded as engineering child's work, which another month or five weeks will easily and certainly bring to a conclusion. It is now certain that the formal opening of the line to Aidin will take place in the first or second week of next month.

☞ The annual meeting of the Taunton Branch Railroad Company was held on the 9th inst. The report which had been printed and distributed prior to the meeting shows the net earnings for the year ending May 3, 1866, to have been $29,248 38. W. A. Crocker, N. H. Emmons, T. B. Wales, Jas. M. Beebe and Willard Lovering were chosen directors for the ensuing year.

Stock Exchange and Money Market.

The real difficulties before us as a people just now, are high prices and the fluctuations in our excessive paper money in its purchasing value. These concern us all, and tell on our pockets and comforts. And though we have a large number of persons, skilful, active and prosperous, who have done well, have made fortunes perhaps, and to whom money has become a very common acquisition, yet by far the greater part of the nation is still compelled to resort to labor, economy and self-denial as the usual methods by which life is supported, or independence obtained. This is the great law which follows existence, and is the verification of the declaration, that bread must be gained by the sweat of the brow. When obtained otherwise, it is the exception and not the rule. It is therefore of the highest importance that prices should not from any cause be so high or so inflated as to place the necessaries and comforts of life beyond the reach of the industrial masses, or prevent their use in trade and commerce. This has been our case for some time past. Everything we eat, or drink, or wear, has been dear and costly, far beyond the usual rates, and the prices of our products have been artificially kept up so high, that they could not be exported to be sold abroad. They must be sold at home at high rates, or not produced, consumed, or exported at all.

One of the bad effects of an undue abundance of paper money, passing at a nominal value which it is impossible to realize, is the rise in prices; and when these are once established every means is resorted to to keep them up. Holders of stocks and ordinary producers when they can make a large profit on what they have, are unwilling to take less, and resort to every method to retain their advantages. The only equivalent they can return to the nation at large is in the amount of taxation they pay to the public revenue, but this is added to the price of the article, and comes out of the consumer. Though gold had fallen from 280 to 125, yet prices have been slow in falling; in a large number of instances they are higher than ever; and now that gold has gone up again to upwards of 50, the market has stiffened in many articles, and holders have taken advantage of it to increase their profits. When this thing is to end, no one can now see. There is a sturdy and interested opposition to a return to a sound currency and moderate prices, as disturbing too many powerful interests, and effecting the profits of too many dealers in securities, yet it may be safely asserted, that until a paper dollar is really convertible into its equivalent, at the pleasure of the holder as it professes to do, if not exchangeable into the universal value of a dollar and good in specie to that extent, a paper currency unsettles all the principles of truth and justice in human dealing, disturbs trade, inflates prices, renders property and earnings insecure, and while redundant, weakens the morality of a people. It is for this reason that we so often allude to the subject, so often appeal to past experience, and so frequently urge retrenchment and resumption. An honest press does less than its duty if it conceals these truths.

We cannot too earnestly recommend to Congress economy in its measures. Extravagant expenditure is anti-republican, it is unwise and dangerous; and though it sustains a host of office holders, it tells upon the industry of the country in a most oppressive manner. All the schemes which, in one shape or another, are got up to expend the public money are a fraud upon the people of this country, who are not born to work for a political class, and do not desire to do so. If the 550 millions which we are now paying in our necessities, or to a class of creditors who live on the earnings of others and never toil themselves, were retained in the pockets of this people, we should be the most prosperous nation in the world, the best off, and the most contented. But at present it taxes the whole efforts of industry to accumulate enough to meet the tax gatherer, though done ever so cheerfully and patriotically. We are taxed as much as we can bear, money goes but a little way, prices keep up, and our paper currency is still largely below par. It is due to the people that this policy should be changed, and that economy in public expenditure should be imperiously insisted on. In the facility with which money is paid into the Treasury, and the enormous amount of the revenues, lurks a danger of extravagance and heedless legislation against which we should set our faces.

The Money Market continues to be easy. Interest is low, and loans are easily effected. It is certain that what we consider money is more plentiful here, and more easily obtained than in any other Money Market in the world at this time. The last week's report of the associated banks, showing their condition on the 7th of July, gives us the information that their loans had increased $6,650,665, their specie, $2,068,048, their circulation, $589,903, and their deposits, $1,442,339, while the amount of legal tenders had decreased by $2,281,002. This report is not of much interest, beyond the fact that the amount of specie increased and of legal tenders decreased, was quite reciprocally the same. On Monday, the amount of specie in their vaults was increased by the arrival from Aspinwall of a California remittance by the steamer North Star, of $1,429,833 06. Thus the supplies keep steadily coming in from certain sources. The receipts at the New York Custom House continue large. From the 2d of July to the 7th, inclusive, the amount of duties received, is given at $2,471,626 56, (for the week including both dates.) During the same number of days all the payments made into the Sub-Treasury were $25,259,144 81, and the disbursements $18,039,083 43; so that the balance on Monday morning, of what was on hand with the week's added receipts, amounted to $95,285,863 99.

We know on the latest authority that the Treasury is in the best possible condition, and the Secretary considers its position one of great ease. If undue expenditure is not indulged in by Congress, the finances of the country are in the very safest position, and we could well afford to largely reduce our direct taxation, instead of increasing it. It is said by some fault finders that Mr. McCulloch is no Statesman. If this be true, it is enough to say that he has now no harder task than to be careful and exact, to be watchful of his accounts, and keep out errors. He does not want any more money, he is not a borrower, he may well and wisely employ his talents as a Banker and financier legitimately and with effect.

We notice that an idea we put forth some weeks since, has been taken up in some of our cotemporaries, that in her late commercial distress, the only relief that England received was from the United States, and that in fact our shipments alone saved her. She could not have obtained them from any other customer! We are also of the opinion that the assistance, was gained by extraordinary efforts on her part, through her agents here, and not as a creditor nation. By-and-bye it will be seen that of all her commercial friends the United States are the strongest, readiest, and the most to be relied on in an emergency. We would suggest a change in the tone of the British press forthwith, and a relaxation from that supercilious judgment and criticism which it is want to indulge in, when speaking of this country. It is time that the assumption of superiority was abandoned.

The exports of specie from the port of New York for the week ending July 7 1866, were $1,630,730; previously reported, $45,493,138—total since January 1, 1866, $47,123,868; against same time in 1865, $18,015,784; in 1864, $29,755,185; in 1863, $21,044,601; in 1862, $30,623,411; in 1861, $3,251,638; in 1860, $23,199,382.

Foreign exchange has again dropped under par, for the best bills. The truth is, there is no pressure to remit by American houses. Bill drawing is a business mostly in foreign hands very skilfully managed, and very much the creature of combination and foreign necessities.

The stock market is reported strong and active. Speculation is again at work in the Erie. It is said new parties are trying to get control of the stock for a change in its policy, and the consequence is seen in a large advance in the price of shares. Much complaint has been made of its management, and it is claimed that there is a considerable deficit in the receipts. Other railway shares are also in demand from purely business reasons of increase in earnings.

The miscellaneous stocks are firm and active. Governments are steady and in demand. The latest arrivals from abroad state a trifling decline in the 5-20s, but this information had no effect on prices here. On the contrary, a rise being anticipated, large foreign orders to purchase, have been received and will have been executed during the present week. It is of no use to cry down the value of our securities any longer. They must take the first place among national obligations. We have shown our power in a great war, we are now showing it in peace. When our enormous annual revenue of five hundred and fifty millions is reported in Europe, the doubters there will be roused to a just conception of our resources, and the extent of our ability, other stocks may go down, but the capitalists of the old world will not be slow in transferring to this country a large share of their surplus for safe keeping and certain returns. To this complexion they must come at last.

Gold fell again at the beginning of the week. There is no doubt but that the London market is manipulated with reference to that in New York. Communication is so easy, so constant and so direct, such are the arrangements and such the confidences between the chief managers in both, that combinations, reports, rumors, prices and sales are made for particular objects with considerable success. We must be careful not to give credence to everything we hear from the other side. This market if not yet, is sure to be in the end an independent one; and the day is not far distant when our operations will be thoroughly free from those of the London or Paris Bourse. They are even so now to a considerable extent, as is seen by the firmness of our stocks notwithstanding the unfavorable news we have been receiving from abroad, and which is sure to be sent us as often as possible.

The dry goods market is reported dull and without change. If there is any particular profit in any of the branches, it is found in what are called *seasonable* articles, which our people will have, cost what they may. The flour and grain market is also dull; prices not having declined so much as to induce heavy shipments to Europe. After a few months of war there, we may expect a demand even at present prices.

The cotton market is also very quiet and the inquiry is limited. It is yet quite uncertain what the coming crop will amount to. Freights are dull and heavy outward. Provisions for shipping are more firm, and speculation is on tiptoe with the expectation of a rise. The Austrians, Prussians and Italians, are likely to want our supplies. Fighting does not furnish provisions as fast as they are consumed and wasted by large armies.

The New York exports, exclusive of specie, for the week ending July 10, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,757,283	$2,094,882
Prev. reported	78,936,439	107,084,227
Since January 1	$80,693,722	$109,179,109

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,369,009	$1,413,181
Gen. merchandise	2,422,082	1,789,317
Total for the week	$3,818,091	$3,292,498
Prev. reported	75,734,129	165,455,014
Since January 1	$79,552,220	$168,657,512

The balance in the Sub-Treasury on Wednesday was $89,847,059 89.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Tennessee 6s, new, 71; New York State 6s, 1874, 97; do., 7s, Bounty Loan, 104¼; North Carolina, 6s, new, 63½, Illinois Canal reg., bonds, 95; Minnesota 8s, 100; North Carolina 6s, issued to W., C. & R. Catawissa Railroad.

The Philadelphia *News* of July 6th says: "The excitement in regard to Catawissa has died out, and there were but moderate transactions yesterday at 37½. Reflection and a further knowledge of the plans and purposes of the Atlantic and Great Western railway are suggestive of the fact that the stock has already been run up to a higher figure than the prospects of the company will warrant. The lease with the Atlantic and Great Western is practically abandoned, and, judging from arrangements recently made by it for other working connections, it is more than doubtful if it will ever be revived. The ground west, which, according to the programme that excited so much attention some time ago, was to be occupied for the benefit of the New York scheme, has been entered on by the surveyors of the Philadelphia and Erie company, under the authority obtained at the last session of the Legislature. The decision of the Supreme Court at Wilkesbarre, although directly in the face of one made by Judge Woodward and sustained by the full bench, is, therefore, not likely to amount to much in the present case."

Washington County Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 7th inst. The estimates of the Engineer of work done by the several contractors were received, approved and paid. It was found that a large increase of work had been performed in June over any preceding month. With a corresponding increase in each succeeding month, the entire route of 23 miles can be completed by the 1st of January next. It is understood that material for the entire line has been contracted for, and a portion of the road is being laid. This line of road, when completed, will give to the citizens of Washington Co., Maryland, and Franklin County, Pennsylvania, a direct line of railroad to Baltimore, and upon the completion of the Point of Rocks road, which is at this time under contract, very much the shortest and consequently the cheapest route to Washington.

☞ We learn from Omaha that the Government Commissioners examined and accepted an additional twenty miles of the Union Pacific Railroad on the 3d inst. One hundred and twenty-five miles are now in running order. Regular passenger trains, carrying the daily overland mail, commenced running to Columbus the first of July. At Columbus the daily line of overland stages connect with the railroad.

☞ The Central Pacific Railroad is completed to Dutch Flat, sixty-seven miles beyond Sacramento, at an elevation of 3,416 feet.

East Indian Railway.

The works of this vast and rapidly improving undertaking are drawing near a close, and probably in the course of another year the entire work will be placed in the hands of proprietors in a completed state in so far as the main line and its Jubbulpore Extension are concerned. The Chord line is begun, and is likely to be prosecuted ere long with vigor. The gross receipts for the *year* ended 31st December, 1865, were 1,678,943*l.*, against 1,272,576*l.* for the year 1864, showing an increase of 406,367*l.* The *net* receipts since the opening of the line have been as follows:

15th August, 1854, to 31st Dec., 1862	£1,122,426
Year ended 31st December, 1863	439,964
" " " 1864	625,894
" " " 1865	928,751

The working expenses for the *year* ended 31st December, were 44.95 per cent., against 50.81 for the previous twelvemonth.

Perkiomin Railroad.

At a recent meeting of the Directors of this road a committee, including President Markley, was appointed to settle the damages with the landholders. The engineer corps of the Reading Railroad Company will proceed, as soon as the grain is cut, to review the route, and finally locate it. Proposals will be invited for placing under contract the first twelve miles, as soon as the engineers complete their labors. Twelve miles will take the road to about the mouth of Swamp Creek. The subscriptions of stock are all conditional that that distance shall be at once put under contract.

Northern Central Railway.

The Williamsport *Bulletin* says that this company designs extending its line of running to Rochester; passenger cars being attached to the New York Central trains between Elmira and Canandaigua. Trains between Rochester and Canandaigua will be drawn by engines of the New York Central road. By the above arrangement the Northern Central hope to increase greatly their through passenger business between the West and Baltimore and Washington. Judging from their experience during the short time they have been running the northern branch to Canandaigua, their expectation as to increased business and profit will be abundantly realized.

☞ The Fox and Wisconsin River Improvement Company has been reorganized under the name of the "Green Bay and Mississippi Canal Company." Captain N. M. Edwards has been appointed Chief Engineer, and George McDonald and A. L. Smith continued respectively as General Superintendent and Secretary.

☞ The Easton, Md., *Star*, says that the trains commenced running on this road on the 9th inst., from Halltown (Maryland and Delaware State Line.) The Superintendent hopes to reach Greensborough by the 1st of August, the material for laying the track having been purchased.

☞ The Railroad from Northampton to Williamsburgh, Mass., has been put under contract. Willis and G. B. Phelps, of Springfield, are the contractors.

☞ John H. Bradley, of West Chester, Penn., has been elected to the Presidency of the Huntingdon and Broad Top Railroad and Coal Co., in place of Lewis T. Wattson, resigned.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending July 6th, 1866, were $53,288 61
Corresponding week of 1865 ..... 51,861 83

Increase..... $1,426 78

The earnings of the Grand Trunk Railway of Canada for the week ending June 30th, 1866, were $119,844 00
Corresponding week of previous year.. 116,317 00

Increase..... $3,527 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in June, 1866.. $35,118 00
Corresponding week previous year..... 34,380 23

Increase..... $737 77

The earnings of the Western Union Railroad for the week ending June 30, 1866 ..... $30,913 45
Corresponding week previous year..... 27,532 01

Increase..... $3,381 44

The earnings of the Chicago and Great Eastern Railway for 4th week in June were..... $33,947 50
Same period last year..... 23,431 39

Increase in 1866..... $10,516 11

The earnings of the Chicago and Rock Island Railroad for the 4th week in June, 1866, were $65,076 00
Corresponding week of previous year.. 72,743 00

Decrease $7,667 00

Illinois Central Railroad.

The statement of this Company for the month ending June 30, 1866, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	7,110.35 for	$79,584 49
Acres Int. Fund Lands sold.....	240 00 for	3,971 00
Acres Free Lands sold..	751.73 for	8,129 70
Total sales during month of June, 1866.....	8,102.08 for	$91,685 19
To which add Town Lot Sales.....		1,571 35
Total of all		$93,256 54
Cash collected in June.....		$137,321 75

TRAFFIC DEPARTMENT.

Receipts from	Passengers.....	$144,417 30
do.	Freight.....	360,249 00
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	45,000 00
Total Receipts in June, 1866		$560,024 63
Total Receipts in June, 1865		$589,702 66

Philadelphia Coal Trade.

The following statement, carefully compiled, will show the state of the trade for the first six months of 1865 and 1866, on the four principal routes from the Schuylkill and Lehigh Anthracite fields:

Coal brought down—	1866. Tons.	1865. Tons.
By Reading Railroad.....	2,076,171	1,379,014
By Schuylkill Canal.....	595,533	241,143
By Lehigh Canal.....	357,221	241,722
By Lehigh Valley R. R	897,950	644,169
January to July, 1866.....	3,926,876	2,506,053
January to July, 1865.....	2,506,053	
Increase, 1866.....	1,420,823	

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th June, inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865..	189,200	1,465,300	1,700,200	150,700
1866..	57,700	617,500	4,200,000	50,800
Dec.	131,500	847,800	*2,499,800	99,900

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 301,060 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of June, in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1.
Flour, bbls.....	324,100	189,200	57,700
Wheat, bush.....	5,628,300	1,465,300	617,000
Corn, bush.....	1,737,100	1,700,200	4,200,000
Barley, bush.....	137,000	150,700	50,800
Oats, bush.....	2,646,200	2,671,400	1,919,700
Rye, bush.....	64,500	90,500	125,800
Malt, bush.....	.....	167,700	86,300
Beef, bbls	5,000	6,690	100
Pork, bbls.....	45,200	13,750	7
Bacon, lbs.....	559,300	1,900,900	.....
Butter, lbs.....	23,600	40,600	29,100
Lard, lbs.....	694,300	1,423,200	54,700
Cheese, lbs....	41,200	199,400	78,600
Wool.....	23,200	88,500	61,500

☞ The Earnings of the Western Union Telegraph Company in May, 1866, were.. $343,138 16
In May, 1865 ..... 250,463 48

Gain in 1866..... $92,674 68

The May earnings are on a capital of $28,000,000—the consolidation with the American Telegraph Company having been completed after June 1st, 1866.

☞ The earnings of the Louisville and Frankfort and Lexington and Frankfort Railroads in May, 1866, were..... $38,851 42
And the expenses 30,788 92

Leaving $8,062 50

Bills Approved by the President.

The President has approved the following named bills:

A bill to extend the time for the reversion to the United States of the lands granted by Congress to aid in the construction of a railroad from Amboy by Hillsdale and Lansing to some point on or near Traverse Bay, in the State of Michigan, and for the completion of said road.

A bill authorizing the Union Pacific Railroad Company, Eastern Division, to designate the general route of their road. They are to connect their line of railroad and telegraph with the Union Pacific Railroad, but not at a point more than fifty miles westwardly from the meridian of Denver, in Colorado.

A bill granting certain lands to the State of Michigan, to aid in the construction of a ship canal to connect the waters of Lake Superior with the lake known as Lac la Belle, in that State.

A bill, granting lands to the State of Michigan, to aid in the construction of a harbor and ship canal at Portage Lake, Kewenaw point, Lake Superior, in said State.

A bill making a grant of lands in alternative sections to aid in the construction and extension of the Iron Mountain Railroad from Pilot Knob, in the State of Missouri, to Helena, in Arkansas.

Agricultural Railways.

The following is an extract from a communication "on Railway Legislation," recently published in the London *Times*:

Suppose an ordinary agricultural district lying beyond the limits of an existing main line. I will assume the *maximum* distance of the area to be served to be, say 19 miles, and at a distance of ten miles from the existing main line a moderate sized country town. The promoters of the line introduce a bill for a line ten miles in length, joining this town to the main line. I will suppose the works to be heavy, and the line to cost £20,000 a mile—a high average—or £200,000 for the whole line. Let us consider—what indeed Parliament has to consider—what will be the public effect of this line if authorized and constructed. First of all the country town will become a little emporium for the whole surrounding district. Commodities will come to and go from it cheaper and more easily. It will have access to better and cheaper markets for the goods which it buys, to better and dearer markets for the goods which it sells. It will get its coals, its lime, its timber, at lower prices and of better quality. The town will grow; there will be more trade, more building, more business. The value of the adjoining land will rise in price because it can be more profitably employed as building land, &c. So much for the terminus. Now let us consider the course of the line. It will traverse or approach various villages and farms. The villagers will get their coals from 5s. to 10s. a ton cheaper. They will therefore be able to buy more food or more clothes. They will be able to send their wives to market to buy what they want in the towns of better quality and at lower prices, instead of dealing with the dear and bad village shop. The farmer is, perhaps, the man who will reap the greatest advantage. He will get by the line—within, let us say, a circle of three miles—goods which before he had to cart eight, ten or thirteen miles, or possibly was not able to get at all from the expense of carriage. It is usually calculated that on average the cost of carting a ton of goods may be taken at a shilling a mile. If he lives three miles beyond the terminus he saves 13s. on every ton of coals, lime, guano, oilcake, or artificial manure which he imports, and the same amount on every ton of wool, corn, or hay that he exports. He gets to markets where he never went before, at which he can buy cheaper and sell dearer. He may send to the great towns milk which he before, at a less profit, was obliged to make into butter. He buys sheep and cattle where he could not buy before. The result of all this is that he saves money or improves his tillage, or probably both, having to pay less for his manures or his tiles, he can buy more manure and do more drainage. Having less cartage to do, he either keeps fewer horses or employs those which he keeps more profitable. Having to pay less for the carriage of his wool and corn, he has more money either to save or to spend. The result of the whole is a greater profit to the farmer, and every one knows—at least the House of Lords should know—that greater profits to the farmer means a rise of rents. It means another thing, too, and that not an insignificant one—viz., greater employment of labor and better wages.

But, then, it is said, if this is a good thing for the district, why does not the district find the money for itself? To this there are two sufficient answers. First of all, the district cannot find the money. Secondly, why should it find the money if some one else will find it? Suppose the line traverses the property of one landowner, is it likely he can find £200,000? If it traverses that of 20, can they find £10,000 apiece? One is up to his neck in mortgage, another has 13 children, a third keeps a racing stud, a fourth thinks a railroad brings poachers, &c. Is it denied that the railroad will be a benefit to the farmers? Yet who will expect a farmer with a yearly tenancy to put down £10 for a line in a district which he may have to leave long before it is constructed? Is the £20,000 to be found by the country parson, the country doctor, and the tradesmen, &c., who will

contribute their shillings and half-crowns by their use of it, or by the day laborer, who will feel its blessings at every moment of his life and in every article of his consumption? It is idle to say that the true test of whether a man wants a thing is whether he is willing to find the capital necessary to produce it. Every man in the district I have supposed wants cloth clothes, cotton shirts, hats more or less silk, and boots. Are they, therefore, not to have them unless they are prepared to enter into subscription contracts for cloth manufactories, cotton-mills, tanning yards, or silk works? But this is exactly Lord Redesdale's contention, who says that no district ought to have a railroad unless it subscribes for it itself. The truth is the landowner, the farmer, the tradesman, the manufacturer, and the mineral owner have other calls on their capital which they much more advantageously, both for themselves and the nation, employ in their own business. To set up as railroad capitalists would destroy both businesses. The proper people to find capital for railroads, as for all other trades, are those whose special trade it is. They know most about it, and will transact the business best—in the first instance for themselves, and in the end for the public.

French Railways.

The Minister of Agriculture, Commerce, and Public Works has just issued one of his quarterly statements, showing the progress of traffic upon the French systems. The return is brought down to March 31 this year, and is compared with the corresponding period of 1865. The average mileage worked and the amounts acquired upon the old and new networks were as follows in the three months ending March 31 in each year:

	1866. Miles.	Receipts.
Old network	4,740	£4,280,808
New network	3,643½	1,163,527
Total	8,383½	£5,444,335

	1865. Miles.	Receipts.
Old network	4,773½	£3,866,256
New network	3,371½	960,306
Total	8,145½	£4,826,562

This shows an increase of 617,773*l.* in the receipts, with 237½ additional miles worked. The increase in the receipts per mile worked on the old network was 11.51 per cent., and upon the new network 12.13 per cent., giving an average for the old and new networks combined of 9.60 per cent.

Buffalo and Lake Huron Railway.

The following report of this company for the half-year ending 31st December, 1865, has been just published:

The report and accounts of the Grand Trunk Railway Company, which accompany this statement, exhibit a balance to the credit of the Buffalo and Lake Huron Railway Company of 16,863*l.* 15*s.* 3*d.* This amount is materially affected by the loss on American currrency and very heavy renewals. The directors have every reason to believe that these items will be much less onerous in future.

As before stated, these accounts are subject to such verification of amounts and appropriation of items as may be shown to be in accordance with the agreement.

The bill for confirming the agreement with the Grand Trunk Company will again go before the Legislature in the present session of the Canadian Parliament, and no doubt is entertained of its being sanctioned.

A bill is also before the House for the consolidation of the arrears of interest due to the preference shareholders, in conformity with the resolution passed at the last meeting of proprietors.

Coupons can be presented at the office for payment as heretofore on or after August 1.

Imperial Mexican Railway.

The report of the directors of the Imperial Mexican Railway states that great progress has been made in the construction of the railway. Mr. Samuel, the consulting engineer, had informed them that the earthworks had been completed on two hundred and seventeen miles of the railway; that it was probable from recent despatches that the section between the city of Mexico and the junction with the branch line to Puebla at Apixaco, a distance of eighty-five miles, had been completed. The engineer's estimate of the traffic receipts on the Mexico and Puebla division showed a probable *minimum* of upwards of £50 per mile per week, and an estimated rate of working expenses of thirt-three and one-third per cent., and that the additional expenditure to expedite the completion of this portion of the railway it was expected would be amply repaid. The electric telegraph was now completed on one hundred and thirty-three miles of railway. Considerable progress had been made in the erection of the workshops at Vera Cruz and Orizaba. The receipts from traffic on the Vera Cruz section, forty-seven miles in length, for twelve months ending the 81st of March last, amounted to £86,703, or an average of £35 9s. 6d. a mile per week. During the last three months of the twelve—namely, January, February and March last—the receipts had been £29,636, or an average of £48 10s. 1d. per mile per week. Upon the Guadaloupe section, three and three-quarter miles in length, the receipts for passenger traffic in the twelve months amounted to £7,647, or an average of £39 6s. 9½d. per mile per week. On the Vera Cruz section the actual amount of profit had not been finally ascertained, but was estimated for the year at about £17,000, to be shared between the company and the contractors. On the Guadaloupe section the profits had amounted to £4,074, three-fourths of which belonged to the company, and one-fourth to the contractors. It was estimated that the local and through traffic on the Mexico and Puebla division, one hundred and twelve and a half miles in length, would average £52 per mile per week, or more than £303,000 a year, the working expenses £101,000, and the net revenue more than £202,000 a year. The directors felt that their report would have been entirely satisfactory to the shareholders but for the Mexican government having unfortunately allowed their payments to the company to fall recently into arrears to the extent of about £220,000, and for the political state of the continent, which, with the condition of the money markets of London and Paris, had made it impossible for the company to proceed with the arrangements for raising part of the capital on bonds. It would be necessary to raise immediately by debentures the funds required for the completion of the upper portion of the railway. The expenditure on the railway to the 31st of December last amounted to £1,534,241.

☞ At a recent meeting of the directors of the Atlantic Mail Steamship Company, the capital stock was increased from $4,000,000 to $8,000,000. The increase of capital represents the New York Mail Steamship Company, the West Indian and Brazilian line, which are all absorbed into the new organization.

☞ It is stated that the New York and New Haven Railroad Company will increase its capital stock $1,000,000, and that the new stock will be offered to the shareholders at par in the proportion of one new share to five of the old.

Tunneling Chicago River.

The Common Council of Chicago has ordered the construction of a tunnel under the South Branch of Chicago river at the crossing of Washington street. The *Tribune* says the time it will save to teamsters and pedestrians in crossing the river will be of more value, each year, than the total cost of its construction. As the commerce of Chicago increases, the bridges have to be swung open oftener and kept open longer each year. The enormous travel over them and their constant swinging speedily wears them out, so that some of them are out of repair or being rebuilt nearly all the time. There is no remedy for this growing evil but a tunnel under the river. This tunnel will relieve three bridges and enable the 10,000 vehicles and 50,000 persons who daily cross those bridges to pass and repass the river without obstruction or loss of valuable time. The *Tribune* urges the construction of another tunnel, to accommodate the travel between the north and south divisions of the city.

Woonasquatucket Railroad.

The Woonsocket *Patriot* says that the project of building a railroad from Providence to Woonsocket through the Woonasquatucket valley is again revived, and the prospect is reported quite flattering. An extension of the charter was granted by the General Assembly at its January session. The distance is about 18 miles, but by using the track of the Boston, Hartford and Erie Railroad at Woonsocket, and that of the Providence, Hartford and Fishkill at Providence, only 14 or 15 miles of new rail will be required, while the expense of depots at the termini will be saved. The road is easy of construction; an estimate, made before the war, placed it at $25,000 per mile. The friends of the enterprise are now busily at work.

Mt. Washington Railroad.

We learn from the Boston *Journal* that the engine for the steam railroad up Mount Washington passed up the Boston, Concord and Montreal Railroad on the 29th ult. This invention, or, perhaps, more correctly stated, the new application of a principle in mechanics by Sylvester Marsh, will be of great value in many ways besides overcoming the steep hills of Mount Washington and carrying in comfort and safety a car load of passengers up and down its fearful grades. The work is progressing. The old White Mountain Notch is alive with Mr. Marsh's men, constructing for a first trial a section of this railroad and preparing for the laying out of the immense hotel, which is to be the starting point of the mountain railroading.

☞ The books of the Auditor of Indiana show the total debt of the State to be $8,316,950. Of this, $5,342,500 is in 5 per cents., $2,076,460 in 2½ per cents., and $898,000 in 6 per cents. On the 1st of July $500,000 of the 2½ per cents, were to have been redeemed, making the debt $7,816,960.

☞ The Indianapolis and Cincinnati Railroad Company have taken possession of the Lafayette and Indianapolis Railroad. Both roads will be hereafter operated under one management.

☞ Ohio has paid off a million and a half o her debt, through the sinking fund, in about a year.

Uniontown and Newbern Railroad.

A meeting of the citizens of Greensboro, Ala., was held on the 16th ult., for the purpose of raising capital. It was stated there that a subscription of $50,000, within the town, would be sufficient to justify the directors in putting the work under immediate contract. Mr. T. M. Thompson, agreed to take $5,000, and two other gentlemen agreed to grade the road and take one-third of the cost in stock. A committee was appointed to solicit subscriptions. The *Beacon* thus briefly describes the work:

Some nine or ten years ago the project of constructing a railroad from Uniontown to Greensboro was started. A few wealthy and enterprising citizens of Newbern backed by a most liberal subscription from Selma, resolved to have a railroad connection with Uniontown, and soon accomplished the object. The project of extending the road to Greensboro was then revived, and would probably have been consummated had not another scheme been proposed, for placing Greensboro in railroad connection with Selma, that of extending Cahaba and Marion road to this place. That scheme was finally adopted, and the one for connecting us with Newbern abandoned. For a year or two the work was prosecuted with vigor, but pecuniary embarrassments and the war stopped operations.

A few of the citizens of Greensboro, after consulting some weeks ago with stockholders in the Uniontown and Newbern road, determined to make another effort to have the Uniontown and Newbern road extended to this place—hence the meeting.

Pacific Railroad.

The fourth section of 20 miles of the Pacific Railroad, Eastern Division, having been completed and a report to that effect having been made by the Commissioners, the Secretary of the Treasury has ordered the issue to the above Railroad Company of bonds to the amount of $320,000, to which they were entitled on the completion of this section of their road. The Secretary has also ordered the issue of bonds to the amount of $640,000 to the Central Pacific Railroad Company of California, which had fallen due owing to the completion of one-quarter of the work on a section of 20 miles of the road, the cost of which has exceeded $1,015,000.

☞ At a meeting of the Directors of the Manitowoc and Mississippi Railroad at Doty's Island, on the 20th ult., George Reed of Manitowoc, was elected President; Jos. Vilas, jr., of Manitowoc, Vice President; and Henry Hewitt, of Menasha Treasurer.

☞ The chains and iron work of the Charlotte and Columbia Railroad bridge, over the Catawba river, South Carolina, are made from the muskets, bayonets, shell, &c., picked up on Virginia battle fields, and which were stored in the Confederate armory in Richmond when that building was burnt at the time of the evacuation.

☞ The product of the Pittsburg and Boston Mine for six months ending June 1, 1866, was 639 tons, against 562 tons in 1865—an increase of 77 tons. The expenses during the same period were $117,272 91—a decrease from those of the corresponding period of 1865 of $38,869 70.

☞ The Common Council of Buffalo have adopted a report in favor of loaning money to the Buffalo and Washington Railroad, and ordered an election in which the citizens were to decide on the matter.

Vicksburg, Shreveport and Texas Railroad.

Messrs. John T. Ludeling & Co., the owners of this road, are pushing the road with rapidity and energy. A large number of laborers is now employed on the road, and many more are daily expected to arrive with Mr. Jacob C. Seale, an agent of the road, who has visited Vicksburg and Natchez and other places, to procure their services. One of the old locomotives has been thoroughly repaired at the machine shop, near the Monroe depot, and is as good as new, and others are being repaired by skillful machinists under the employ of the present company. The cross ties are being entirely renovated, and are made of the best and most durable timbers, and the trestle work for Lafourche Swamp, and Crew Lake, is rapidly progressing.—*Monroe Intelligencer.*

Florida Railroads.

Mr. Houstoun, President of the Pensacola and Georgia Railroad, returned to this city a few days since from a visit to Savannah, Charleston and Augusta. We are gratified to learn that arrangements have been made or are now pending which promise the establishment of continuous railroad communication between Tallahassee and Savannah, to go into effect not later than next fall. On the other hand, Mr. Yulee, President of the Florida Railroad, is, we understand now in New York on business connected with that road, which, we have been assured, will be in running order throughout its whole length by September or October. If these anticipations are to be realized, our Middle Florida friends may congratulate themselves on the prospect of being able, at an early day, to choose between the three Atlantic shipping ports of Savannah, Jacksonville and Fernandina.—*Floridian, Tallahassee.*

☞ The Grand Trunk depot at Point St. Charles, Montreal, was consumed by fire on the evening of the 4th inst. The building was a large passenger and freight depot, and the loss must be heavy.

☞ Benjamin T. Reed, George M. Browne, Robert W. Hooper, William H. Y. Hackett and William M. Shackford, have been re-elected directors of the Eastern Railroad of New Hampshire.

☞ Tappan Wentworth, of Lowell, has been elected President, and S. W. Stickney Clerk and Treasurer of the Stony Brook Railroad Company.

☞ From January 1, 1865, to July 1, 1865, there was exported from Philadelphia, 539,868 gallons of petroleum, valued at $303,398; from the 1st of January to the 1st of July, 1866, 9,937,193 gallons, valued at $3,949,985.

Telegraph in Persia.

Lieutenant Colonel F. I. Goldsmid, Director General of the Indo-European Telegraph, and Major Murdoch Smith, of the Royal Engineers, Director of Telegraphs in Persia, have lately passed the station *en route* for Kurrachee. Their present visit to India has been, we understand, in connection with a proposal to construct a telegraph line from Guader, on the Mekran coast, to Bunder Abbas, and thence *via* Kerman and Yezd to Ispahan, so as to join the Indo-Persian line between Teheran and Bushire, and thus serve as an alternative line, to be used for Indo-European messages in the event of injury happening to the sub-marine cable between Guader and Bushire. They advocate the adoption of the inland route above described, for the alternative line in lieu of a line hugging the sea coast, as formerly proposed, because the new route lies through a tract of country far superior in point of climate and populousness to that by the sea coast, while the line would place Kirman and Yezd, two important commercial towns, in telegraph communication with Teheran and India; a circumstance which will tend greatly to develop the commercial relations of those places with India, and at the same time give the Persian government a material interest in the undertaking. The proposed line has the further advantage of securing an alternative line to support that portion of the Persian line which traverses the hilly and difficult country between Bushire and Shiraz. We trust the exertions of these gentlemen will be attended with every success.—*Lahore Chronicle.*

Mississippi and Missouri Railroad.

We learn from the Davenport (Iowa) *Gazette* that the foreclosure of the Mississippi and Missouri Railroad mortgages, as decreed by the United States Supreme Court, was completed on the 9th inst., under the superintendence of Thos. F. Witherow, Master in Chancery. The sale took place at ten o'clock, at the Court House, and was largely attended, there being at least a hundred persons present. The road was sold in divisions. The First Division, consisting of the road between Davenport and Iowa City, and Wilton Junction and Muscatine, together with all the rolling stock, shops, &c., started the sale. The first bid was $800,000, by Mr. E. Cook, who represented the Chicago and Rock Island and Pacific Railroad Company. Mr. John Elliot, of New York, bid $900,000. Mr. Cook then bid $1,000,000, at which figure it was struck off.

The Oskaloosa Division, from Muscatine West, was next offered for which Mr. Cook bid $300,000, and got it.

The next offered was the lands granted to the M. & M. R. R. by the United States, estimated at about 475,000 acres, was knocked off to Mr. Cook for $200,000.

The last offered was the Western Division of the road, from Iowa City West. This sold for $600,000, Mr. Cook's bid. Making the whole purchase money $2,100,000. The only competition beside that noticed for the First Division was upon one quarter section of the land, which was started at $1 per acre by a gentleman from Polk County, and it was run up to $3 per acre, and struck off to Mr. Cook.

The Canadian Canals.

In discussions, debates and reports, many misstatements occur in relation to the extent, size and capacity of the main line of traffic from the head of Lake Superior to the seaboard, through the Canadian Canals. The facilities offered by this route, described in detail, may not at this time be uninteresting.

The distance in statute miles from Fond du Lac, at the head of Lake Superior, to the head of tide water in the St. Lawrence River, at "Three Rivers," is 2,385 miles; and from the head of tide water to Liverpool *via* Belle Isle and Malin Head, north of Ireland, 2,234 making the total distance from head of Lake Superior to Liverpool 4,619 statute, or 4,017 geographical miles, made up in detail, as follows:

	Miles.
Fond du Lac to Sault St. Marie Canal	397
Length St. Marie Canal	1
From St. Marie Canal to Welland Canal	625
Length Welland Canal	28
Welland to Galaps Canal	236⅜
Length Galaps Canal	7⅝
Galaps to Rapide Plat Canal	4½
Length Rapide Plat Canal	4
Rapide Plat to Farran's Point Canal	10⅛
Length Farran's Point Canal	¾
Farran's Point to Cornwall Canal	5
Length Cornwall Canal	11½
Cornwall to Beauharnois Canal	32¾
Length Beauharnois Canal	11¼
Beauharnois to Lachine Canal	15¼
Length Lachine Canal	8½
Lachine to Head Tide Water (3 Rivers)	86
Head Tide to Straits of Belle Isle	900
Straits Belle Isle to Malin Head, north of Ireland	2,013
Malin Head to Liverpool	221
Total	4,619

Of the 4,619 miles, 715⅝ is canal, 1,258 lake, 1,056 bay and river, and 2,234 ocean navigation The total distance in statute miles from Fond du Lac to Liverpool *via* the Erie Canal and New York City is 4,546 miles. Of this distance 351 miles is canal, 1,022 lake, 150 river, and 3,023 miles of ocean navigation. Lake Superior is about 600 feet above the highest tidal flow of the St. Lawrence at "Three Rivers." The size and capacity of canals on the main line to the seaboard on the Canadian route are as follows:

SAULT ST. MARIE CANAL.—This is an American work, and connects Lake Huron with Superior. It is 1-17 miles long with 18 feet lockage. The locks are 350 feet in length between quoins, 64 feet wide, with 12 feet depth of water on the sill, capable of passing vessels of over 900 tons burthen.

WELLAND CANAL.—The length of main line is 28 miles, with a feeder 21 miles long. There are 27 locks upon the main line, 3 of which are 200 feet in length and 45 feet wide, and the remaining 24 are 150 feet long, 26½ feet wide with 10½ depth of water on sills. From the last Canadian report this canal has cost $4,855,141. It is now in process of enlargement, doubling the sectional area and capacity of locks. The total rise of lockage is 330 feet. Its present capacity will pass vessels of 400 tons, and when enlarged nearly 700 tons burthen. Present size of vessels 142⅛ feet long, 26¼ wide with 10 feet draught. Twelve miles of the Lake Erie level is enlarged. The original size of prism of 26 feet in bottom has been increased to 50 feet and the depth 2 feet.

The following are the amounts of toll, collected:

In 1860	$165,220	In 1863	$225,442
In 1861	229,769	In 1864	.....
In 1862	271,885	In 1865	.....

The construction of this canal was commenced in 1818. Navigation opens between March 25, and April 15, and closes betweeen Dec. 12th and 15th.

ST. LAWRENCE CANALS.—The Canals of this river are: The Lachine, Beauharnois, Cornwall, Farran's Point, Rapide Plat and Galaps Canals. The dimensions and capacity of each are embraced in the following statement. Navigation opens between May 1st and 15th, and closes about Dec. 15.

CANAL.	Length in miles.	No. of locks.	Dimensions of Locks. Length in the clear.	Width in the clear.	Depth of water on sills.	Feet lockage.	Size of Prism. Width of bottom.	Depth of water.	Tonnage of vessels.
Lachine Canal.....	8½	5	200	45	9&16	44¾	50	9½	600

THE LACHINE CANAL passes around the St. Louis Rapids. It forms the eastern section of the St. Lawrence Canal, terminating at Montreal the head of ocean navigation. The depth of water on the sills of the three upper locks are 9 feet, and 16 feet on the two lower, which were constructed for this depth to accommodate the shipping. Its construction cost $2,125,554, to July 1st, 1865.

BEAUHARNOIS CANAL.—This canal is on the south side of the river and next above the Lachine. It lies at the foot of Lake St. Francis, and passes around the rapids of Coteau, Cedars and Cascade, This canal cost, July 1st, 1865, $1,598,353.

CORNWALL CANAL.—This is the largest of the St. Lawrence series, being nearly double in width of prism of those above, and ¼ larger than those below. Its construction cost $467,150. The remaining canals of the St. Lawrence series cost in the aggregate $1,320,536.

THE CHAMPLAIN ROUTE VIA CANADIAN CANALS.—This third line of navigation extends from Sorel, a point 46 miles below Montreal, and 114 above Quebec, through the American Canals and Hudson River to New York. The canals on this route are the St. Ours and Chambly, the Champlain and a portion of the Erie Canal. The total length of canal navigation between Montreal and New York is 85 miles, and the total lockage 283 feet. The total distance from Montreal to New York *via* this route is 456 miles as follows:

	Miles.
Montreal to Sorel	46
Sorel to St. Ours Lock	14
St. Ours Lock to Chambly Canal	32
Chambly Canal	12
Chambly Canal to Province Line	23
Boundary Line to Champlain Canal	111
Champlain Canal to its junction with the Erie.	64
Erie Canal to Albany	9
Albany to New York	145
Total	456

The dimensions of St. Ours Lock is 200 feet between quoins, 45 feet wide and 7 feet depth water on sill. The rise of lockages is 5 feet. This lock and dam retain the water of Richelieu River, and give an increased depth, as far as the lower entrance into the Assembly.

CHAMBLY CANAL.—The length of this canal is 12 miles, [illegible] locks 122 feet between quoins, 23½ feet wi[illegible] with 7 feet depth of water on the sills. It overcomes a fall of 74 feet in the Richelieu River between St. Johns and Cha[illegible]asin. Boats of 230 tons pass this canal. The Canadian reports strongly recommend the enlargement of this canal so as to bring the large class of vessels from Chicago into Lake Champlain.

The total distance in statute miles from Fond du Lac to Liverpool *via* Champlain Canal is 4,882 miles. Of this 168⅞ is canal, 1,641 river and lake, and 3,028 miles of ocean navigation.

CHAMPLAIN CANAL.—This canal from its junction with the Erie to Whitehall is 64 miles. The summit level is 150 feet above tide, making the ascent from the Erie 125¼ feet, and descent to Lake Champlain 56⅛. The former elevation is overcome by 18 locks, and descent by 7 locks. The unenlarged portion of the prism is 28 feet on bottom, with 4 feet depth of water, and the locks 97 between quoins and 14 feet wide, capable of passing boats of 80 tons. This canal is now under process of partial enlargement to 35 feet width at bottom and 5 feet depth of water, and the locks to 110 feet between quoins and 18 feet wide, capable of passing boats of 120 to 130 tons.

THE RIDEAU CANAL.—This canal is 126¾ miles long, and extends from Ottawa City to within 6 miles of Kingston connecting the Ottawa River with the lower end of Lake Ontario at a point above the rapids of the St. Lawrence. It has 47 locks 134 feet between quoins, 32 feet wide and 5½ feet of water on the sills. The total lockage is 446¼ feet, and capable of passing boats of 250 tons.

The Canadians, to control the commerce of the west, are agitating the construction of a canal *via* French Creek and Ottawa River at an expense of 24 million dollars, of capacity to pass the largest class of lake vessels. The following shows the distance saved from Chicago to Montreal:

Chicago to Montreal *via* Welland Canal 1,348 miles and 196 hours.

Chicago to Montreal *via* Toronto and Georgian Bay 1,050 miles and 176 hours.

Chicago to Montreal *via* French and Ottawa Rivers 980 miles and 152 hours.

Making a saving on the first route of 368 miles and 44 hours, and on the second of 70 miles and 21 hours.

From Chicago to New York *via* Welland Canal, 1,721 miles.

Chicago to New York *via* Toronto and Georgian Bay, 1,423 miles.

Chicago to New York *via* Ottawa and French Rivers, 1,353 miles.

In estimating the time, a speed of eight miles an hour through lake and river, 3 miles on canal, and allow 1½ minutes for each foot of lockage. The total lockage on first route is 535 feet to Montreal, 805 on the second, and 698 feet on the Ottawa and French River route. The estimated saving per ton on cost of transportation from Chicago to Montreal *via* the Welland Canal route at 87 cents, and second route 38 cents, making the total net cost over last route 32.89 per ton—2½ mills per ton per mile.

Tennessee and Alabama Central Railroad.

The Department of the Interior has received an official certificate from the Governor of Alabama in regard to the Tennessee and Alabama Central Railroad, to the following effect: The road is completed for a distance of eighteen and one half miles, and the cars have been running over the road for two years. That portion of the road which is completed starts from a point on the Alabama and Tennessee River Railroad known as "Lime Station," and extends beyond the Cahawba River in the direction of Ebytur, in Jefferson County. In addition to this line of eighteen and one-half miles, there is a branch road two miles in length, which touches several coal pits, and over this branch the cars have been running two years.

From the point to which the cars run on the main trunk line beyond the Cahawba River, the road is graded to Elyton, a distance of eleven and one-half miles. The road is also graded at different places in Megan County. These gradings made in the aggregate a distance of about ten miles. The original grant in June, 1856, limited the time for the completion of the road to ten years, but in consequence of the inability of the company to continue the work during the war, the company desires to obtain an extension of time for completion.

Cleveland, Columbus and Cincinnati R. R.

The earnings and expenses of this road for the years ending December 31, 1864 and 1865, have been as follows:

Earnings:	1866.	1865.
From passengers....	$808,423 90	$974,220 34

Dividend Feb. 1, 1866, 5 per cent.....	299,835 00	
		599,635 00
Balance.....		$37,063 73

Compared with the preceding year, the gross income of 1865, shows a decrease of $118,215 29; with an increase in working expenses of $286,437 09. The entire expenditures show an increase of $151,330 21. The total expenditures are 73 per cent. of earnings. In 1864 they were 63.9 per cent.

The increase in transportation and general expenses is mainly due to increase of wages in the freight and passenger service. The increase in expenses for maintaining track is due to large renewals of iron in new rails and re-rolling. The amount and cost of material used in track repairs during the year is as follows:

800 tons new rails	$86,869 89
4,428 tons re-rolled rails	212,297 32
1,151 repaired rails	9,717 73
83,602 new cross ties	38,950 05
159,757 lbs. joint chairs	12,105 30
378,934 lbs. iron joint splices	25,600 99
109,120 lbs. joint bolts and nuts	11,299 45
221,840 lbs. spike	15,386 06
Frogs and switches	8,500 00

In addition to new rails in above statement, twenty-seven gross tons imported steel rails, costing $5,715 87, were laid in track near Cleveland, and charged track repairs. Included, also, in repairs, is $38,036 04 for graveling track during the year. About 1,000 feet additional side track was put in at Shiloh Station. The condition of the track at the close of the year, was greatly improved over the corresponding period of 1864.

The renewals and repairs to bridges, were more extensive during the year than for several years past. The two swing bridges over the Cuyahoga, at Cleveland, were extensively repaired. A new "Howe Truss" wooden bridge was built over the Olentangy, at Delaware, 4 spans, 67½ feet each, and two new stone piers added. A stone culvert over Wellington Creek, 30 feet arch; one of same span over the Black River, at Rochester, and also one of same span over the Whetstone, near Galion, were put in during the year. About 950 perches stone masonry were also put into culverts and abutments on the branch.

The item of $94,233 75, for repairs and renewals of buildings, was for this company's proportion of expenditure for the new Union Passenger depot in Cleveland, and for general building repairs.

The number of locomotives was not increased, but the severe strain upon the limited number for the last three years, rendered a general system of repairs absolutely necessary. The long continued cold weather of the winter of 1864, also contributed largely to the necessity for extensive repairs. Two locomotives were rebuilt with new boilers, and three new boilers nearly completed to replace others. Seven new tanks, with frames and trucks complete, were also built to replace others old and worn out.

Fuel account was increased $10,463 54. The consumption being 36,384 cords of wood, and 3,400 tons of coal.

Four new first class passenger cars, and one new baggage car, were placed on the road in June, built in the company shops, and charged to repairs. Four more first class cars for the spring business of 1866, were nearly completed at the close of the year. Three passengers cars were broken up, being unfit for repairs. The equipment is in general good order. Thirteen house cars were broken up, and three new ones built. Five platform cars were also broken up, and not replaced. Ten new stock cars were built to replace a like number broken up, unfit to repair. The cost of the new work is included in the general repair account. The repairs were thorough, and the freight equipment is in good condition.

The equipment of the road consists of 44 locomotives, 24 first class and 4 second class passenger cars, 3 mail and express, 7 baggage, 473 house, 122 stock and 179 platform.

Miles run by locomotives with passenger trains, 318,758; with freight trains, 405,272; with fuel trains, 47,023; with gravel and repair trains, 85,358; with switching trains, 161,4[illegible]—total, 967,820, against 1,032,368 in 1864, a [illegible]crease of 64,548.

The number of passengers carried was 559,384, of which 430,864 were way, 95,769 through, 6,526 excursions at half fare, and 26,225 local military. Number of passengers carried one mile, 35,499,248. Average rate received per mile 2.73 cents. Tons of freight transported, 459,703; do., carried one mile, 42,238,326.

During the year, $16,500 of the bonded debt has been paid, leaving $475,000 yet due, which matures at the rate of $75,000 per year until the whole sum is paid.

The assets and liabilities of the company, December 31, 1865, were as follows:

ASSETS.

Road and depot	$4,000,000 00
Equipment	750,000 00
Bellefontaine Railway Co. stock	1,131,750 00

President.—L. M. HUBBY.

Directors.—David Dows, Erastus S. Prosser, Amasa Stone, Jr., Stillman Witt, Martin B. Scott, Samuel Williamson, Joseph Perkins, Solomon D. McMillan, Leander M. Hubby, Hoesa Williams and John Miller.

Secretary and Treasurer.—GEO. H. RUSSELL.

Superintendent.—E. S. FLINT.

Pikesville Railroad.

The provisions of the recent act of the General Assembly incorporating the Pikesville Railroad Company having been fully complied with, the subscribers to the capital stock of the company held a meeting in Baltimore on the 14th inst., when the following gentlemen were elected for the ensuing year: President, G. A. Thompson; Treasurer, James F. Purvis; Secretary, Charles H. Mills; Directors, J. Howard McHenry, Edwin F. Abell, John T. Ford, Dr. John T. Councilman, L. P. D. Newman, Charles H. Mills and F. L. Morling.

Dorchester and Delaware Railroad.

The preliminary survey of the route of this road which was commenced on the 19th of June, was completed on the 6th inst. The Cambridge *News* says: There were two lines run, one from near Mill street, on the land of Mr. Samuel Byrn, the other from the mouth of Cambridge Creek, on the land of Mr. T. T. Martin, running to Seaford and Bridgeville. A map of this survey will be completed in a few days by the engineer, Mr. S. D. Hessey, of Delaware, and laid before the company. After their determination upon what point of connection with the Delaware road will be of most value, &c., the direct route will be surveyed.

Marietta and Cincinnati Railroad.

OFFICE MARIETTA AND CINCINNATI R. R. Co.,
Chillicothe, O., Feb. 21, 1866.

To the Stockholders:

The Board of Directors respectfully submit the following as the Fifth Annual Report, for the fiscal year ending the 31st of December, 1865:

BALANCE SHEET, DEC. 31, 1865.

Railway and equipment		$10,543,877 69

		$1,135,339 86
Balance Dec. 31, 1864		$675,948 76
Net earnings year ending 31st Dec., 1865		445,302 20
Interest account balance year ending December 31, 1864		14,088 90
		$1,135,339 86

Construction Account—The expenditures on this account are as follows:

From Aug. 15, 1860, to June 30, 1862	$157,623 98
From July 1, 1862, to June 30, 1863	119,017 02
From July 1, 1863, to Dec. 31, 1863.	245,120 00
From Jan. 1, 1864, to Dec. 31, 1864.	714,887 37
From Jan. 1, 1865, to Dec. 31, 1865.	755,427 86
Total as charged construction acc't.	$1,992,076 23
Cincinnati extension from July 1, 1863, to Dec. 31, 1865	1,117,772 24
	$3,109,848 47

Revenue Account—The revenue from traffic for the fiscal year amounted to $1,224,058 25
Deduct working expenses, 64 per ct. 778,756 08

Leaving as net earnings $445,302 20

—which sum is carried to the credit of profit and loss account.

A classification of the freight earnings shows that they have been derived from the following sources:

Agricultural products	$152,572 40
Merchandize	208,584 06
Minerals	171,106 88
Products of the forest	15,626 52
Miscellaneous	44,963 33
Total	$592,853 19

Of this,

Local freight amounted to the sum of	$445,662 52
Through, (which includes freights to and from the termini of the road)	$147,190 57

The revenue from passengers has been derived almost exclusively from local sources.

It is thus seen that by far the larger proportion of the revenue is derived from local sources.

As an impression has prevailed, to some extent, among the patrons of the road, that its managers were disposed to favor through traffic and to neglect local, it may be proper to remark that by far the larger proportion of the equipment of the road has been devoted to local business—as shown by the results. If disappointments have occurred, they have arisen in consequence of the great accumulation of that class of business at particular seasons of the year, and not from any intention to neglect so important a source of revenue.

The obstructions upon the line of the Baltimore and Ohio Road, incident to the war, having been completely removed, the through traffic over this road has increased over 100 per cent. during the year, and, with the friendly disposition manifested by the managers of that company in co-operating for through business, we may hope for still more favorable results.

Completion of the Main Line.—It will be seen by reference to the Report of the Engineer, that a large amount of work has been done in perfecting the main line of the road.

Pilcher Tunnel, 1,664 feet in length, was completed and brought into use in September. An entirely new structure, consisting of two stone abutments and three piers supporting a substantial Howe Bridge, has been built at the crossing of Little Hocking, and is now ready for use.

Seventy-six thousand seven hundred and thirty-five yards of excavation and 426,076 yards of embankment have been moved by the steam excavators, 4,853 yards of masonry laid up, making seven-tenths of a mile lineal of trestle work that has been filled with solid embankment, under the contract with Dodge, Balch & Co.

The ballasting has, also, been extended westward from Tunnel Sta. to Little Hocking, and from Warren's to Athens, making 17 miles during the year, and 33 miles altogether, on the east end of the road.

Cincinnati Extension.—This work was so far completed as to allow trains to pass into the city on the 17th inst. This track has been well ballasted, and is in good condition for the trains.

By the terms of our contract with the I. & C. Company, we have the use in common with them, of the new and beautiful Passenger Depot, recently built on Pearl street by that company.

This location affords the best possible facilities for our local passengers visiting the city, and secures reliable connections with the entire system of western railroads for western travel.

Ample grounds have been secured for freight purposes, fronting on Columbia street a distance of 537 feet, and 537 feet on Pearl street. Grounds have also been secured between Harriet and Horn streets for turntable engine-house, and yard room for cars. This property also affords a front on Sixth street for a distance of 248 feet, thus securing an excellent location in that part of the city for heavy freights. In addition to the above named property, we have secured 40 acres within the corporate limits of the city, lying between Liberty and Flint streets, and extending from the main line of the railroad in Mill Creek valley, to within about 200 feet of Freeman street. A considerable portion of this property is held on permanent leases at 6 per cent. per annum. Its total valuation amounts to about $600,000, and is constantly increasing.

In addition to the above parcels of real estate, we have also purchased, in connection with rights of way, near 400 acres of land between Loveland and the city, all of which lies immediately contiguous to the line of the road. This property is admirably situated for suburban residences, and may be divided up into lots and sold at a profit. The new line from Loveland to the city passes through a district of country of the most inviting character for residences, affording most beautiful and healthy locations for quiet homes, and may be brought within an average of 30 minutes of the city by placing hourly trains upon that part of the road.

It is safe to estimate that a large part of the cost of the extension to the city may be repaid by the sale of real estate not needed for road purposes, and that a local business may be built up that will fully pay the interest upon any remaining amount not reimbursed by such sales. Practically, then, the outlay for this work will not result in a burden to the finances of the company.

Shops at Zaleski.—Two new car shops at Zaleski are now completed and well supplied with tools and machinery for construction and repairs of cars. Thirty-five coal, 10 platform, 4 passenger, and 3 baggage cars have been built in these shops during the year 1865. With an abundance of lumber suitable for such purposes, at moderate prices, the supply of cars hereafter may be secured at our own shops.

New Rolling Stock.—There have been purchased during the present year: 5 new locomotives, 2 new passenger cars, at a cost of $211,095 43. There has also been expended in extraordinary renewals of rolling stocks, $90,579 16.

This amount, added to former expenditures on this account, shows a total of $248,812 65, since the re-organization of the company.

Ohio River Bridge.—The work on the Railroad Bridge over the Ohio River at Parkersburg, has been diligently prosecuted during the year, and has resulted in the preparation and delivery near the bridge site of a large amount of dressed stone designed for piers and abutments of that structure.

The necessary boats and lumber for prosecuting work on the foundations have been provided; but the continued high state of water in the river, during the latter part of the season, prevented any attempt to commence that part of the work.

It is expected that with a favorable season for the purpose, the foundations may be laid during the coming summer, and the stone structures brought at least above ordinary stages of water, so that they may be prosecuted to completion without interruption to that source.

Increase of Equipment.—The directors have decided to ask the Stockholders for authority to execute a mortgage upon the road for the purpose of securing an issue of Bonds, not to exceed $2,500,000 in amount, the proceeds of which will be required mainly for equipment. The extent of this requirement can not be easily determined at this time, as it will increase with the developments of traffic.

The amount of the mortgage has therefore been fixed with reference to the future, rather than the present; consequently the sale of the larger portion of them will be reserved until the demands of traffic shall demonstrate the amount of Rolling Stock required.

The prosecution of the various works of construction in which the company has been engaged, has been effected under the most disadvantageous circumstances, consequently costing more than was at first anticipated.

The entire expenditure has been made during a time of war, with prices of labor and material increased nearly 100 per cent. It is not remarkable, therefore, that the cost has run beyond the estimate.

A large portion of the First Mortgage Bonds have been used for equipment, and similar purposes.

The Reports of 1864 and 1865, show an expenditure of about $700,000, for these purposes, while the sum of $301,000 has been used to procure right of way and real estate upon the line of extension west of Loveland, and in the City of Cincinnati.

With the balance of the first mortgage, the Cincinnati Extension and the various works of construction on the main line, have been accomplished. With a small additional outlay on the eastern end of the road, the future expenditures of the capital of the company may be directed to the acquisition of necessary rolling stock, and other accommodations for its increasing traffic.

Increase of Traffic.—The earnings of the road for the past five years, have been as follows:

1861	$439,676 84
1862	512,217 25
1863	710,225 04
1864	1,038,165 73
1865	1,224,058 28

This statement shows a constant and healthy growth in the business of the road, resulting in an increase of 300 per cent. in the five years.

While many other leading railroads of the country received large accessions to their traffic, from the transportation of troops and army supplies during the war, the revenues of this company were but slightly affected from that source; consequently the return of peace brings with it but slight diminution of traffic. Of the entire aggregate of earnings during the five years, amounting to $3,924,324 64 not over 13.2 per cent. was derived from military business, and during the year

1865, not over 4½ per cent. was derived from that source. Calculations for the future, are, therefore, not disturbed by the withdrawal of what has been to the road so insignificant a source of revenue.

It is also true that while we derived so little benefit from this source, the frequent interruptions of the Baltimore and Ohio Railroad, by the operations of hostile armies, resulted in completely destroying, for the time, all our through traffic. We have, therefore, to look to this class of business as a new and almost untried element in future calculations for increased earnings. With the advantage of our new position in the city of Cincinnati—affording most desirable connections with all the western lines of railroads terminating at that point—we shall be enabled to compete successfully for this class of traffic and assert the superiority of that geographical position which unites the center of western business by the shortest line with the seaboard. Valuable as the results from this source may prove to be, they will doubtless be surpassed in the future by that still more reliable source of income—*local business*. If we were dependent for this upon the agricultural products of the country through which the road passes, we would have much for future hope and encouragement, but could not expect a rapid increase. Fortunately, however, we have in addition to a good agricultural district, one of the most valuable mineral regions in the whole country, depending entirely for the transportation of its immense products, upon the line of this road.

The following extract from a Report made in April, 1865, by Prof. E. B. Andrews, of Marietta College, upon the minerals of Southern Ohio, presents some of the characteristics of this future source of local traffic.

COAL.

"To show the extent of the coal field which is being developed by your road, let us compare it with the most famous ones, probably, of the Old World. We quote from David Dale Owen: 'The celebrated Newcastle coal field, which supplies more than one-third the entire product of Great Britain, and from which most of the coal burnt in London is obtained, has an area of from seven to eight hundred square miles. The entire thickness of the measures is sixteen hundred and twenty feet, varying, however, in different parts. The total thickness of the twenty five coal seams is from forty to sixty feet, the beds varying from a few inches to six feet; but there are seldom more than five seams that are workable, and often not more than one or two exist in a locality.'

The Southern Ohio region, which is directly tributary to your road, is seventy-five miles in length and forty miles wide, making an area of three thousand square miles. Counting only those seams that are workable, we have over forty feet as the aggregate thickness. The total thickness of the Coal Measures in Ohio, is about twelve hundred feet. Again, the principal seam of the Newcastle field is six feet thick, while one of the seams of this region has a thickness of ten feet. In order to estimate the actual amount of coal in the field, and I am now considering only the outcrop, let us represent it by a stratum forty feet thick, twenty miles wide (allowing half the distance across the region for loss on the out-cropping strata) and seventy-five miles long. If, as is estimated, there are 1,000,000 tons of coal to one square mile of a layer one foot thick, there would be 40,000,000 tons to one square mile of this stratum, and multiplying by number of square miles, 1,500 we have for the amount of coal 60,000,000,000 tons. These figures relate only to those seams which are for the most part above surface drainage. The presumption is that most of the seams continue under the surface of the coal basin and may be reached by shafts. It is by deep shafts that most of the coal in Great Britain is obtained. The total quantity of coal in Southern Ohio, which is accessible by drifting and shafting, is almost beyond calculation, and the time will come when our coal will sustain large and busy mining and manufacturing cities.

"Supposing the iron ores to extend uniformly over half of this belt, or seven and half miles, and the length of that portion of the belt, included in this report, to be seventy-five miles, we have an area of five hundred and sixty-two square miles.

"With an aggregate of seven feet of ore there would be 4,061,986,134 cubic yards, which, according to the usual estimates, would yield 1,624,794,449 tons of metallic iron.

"There are about forty furnaces in this region, consuming annually not far from two hundred thousand tons of ore, from which are made eighty thousand tons of iron.

SALT.

There have been produced in the district, during the year 1864, 1,677,774 bushels of Salt, from the tax on which the Government has received $41,011 68."

One fact of the greatest importance, in connection with these minerals, has been developed during the past year. That is the successful use of coal in its raw state for the purpose of smelting the iron ore. This has been accomplished to such an extent, that all doubts upon the subject may be regarded as settled.

Future investments in iron furnaces will be made with a view to use either the raw coal or coke as a fuel. In this way the number of furnaces may be multiplied almost indefinitely.

This belt also possesses the important advantage, geographically, of securing by cheap water transportation a supply of Missouri, Tennessee, and Lake Superior ores, to combine with the native yield. The immense products of its furnaces, mills and mines will also start to the consumer in the great Mississippi Valley with an advantage in transportation over more eastern products, amounting to a handsome profit.

New Railroad Connections.—Great activity is now manifested in the development of this wealth. This activity is shown not only in the opening of mines, but also in the projection of lines of railroad all looking to connections with this road, and calculated to give a more speedy and successful development of this great mineral district.

Parties interested in the following new railroad schemes, are maturing their plans with reasonable prospects of an early commencement of their respective works:

1. A line commencing at Athens and thence passing up the Hocking Valley through the Nelsonville coal fields to Columbus.

2. A line commencing near the junction of the Portsmouth Branch with the Main Line of this road, and thence upon such location as will unite the traffic from Pomeroy, Gallipolis, and commanding ultimately, a connection with the projected railroad up the Kanawha Valley, to tide water at the mouth of the James River.

3. A line from Bloom Station on the Portsmouth Branch to Center Station on the Ironton Railroad, thus securing a route through a most valuable mineral district to the Ohio River at the City of Ironton.

The completion of these different lines will require the construction of about 125 miles of new railroad. They will all contribute materially to the business of this road, and when added to the 285 miles in operation, will make an aggregate of 410 miles. This will constitute the railroad system of Southern Ohio—as required for a thorough and complete development of its mineral wealth and resources. Of this aggregate of 410 miles, about 150 will be within the great mineral belt, opening out to that extent its vast and varied products, while the remaining portion of the rail line becomes the great highway over which those products will seek markets to the North, West, and South.

While it has not been deemed prudent to extend pecuniary assistance to any of these enterprises directly, every assurance has been given of cordial sympathy and a willingness to extend efficient aid and co-operation in working any of the lines when constructed.

CONCLUSION.

A point is now reached in the history of this enterprise, when the labors and outlays of construction are soon to cease, and the more welcome task of building up a traffic is to commence.

The expansion of business in the way of through freight and passenger traffic, is assured by our close connections and cordial working operations with the western railroad system, centering in Cincinnati, which, with the immense local resources of the route, particularly in minerals, opens up a most brilliant future.

W. P. CUTLER, Vice Pres't.

Atlantic Mail Steamship Company.

The stockholders of the Atlantic Mail Steamship Company have determined to increase the capital stock of the company from $4,000,000 to $8,000,000, the vote standing 33,240 shares in favor and 2,050 shares against the proposition. By this increase of the capital stock of the Atlantic Mail a powerful combination has been effected, and a large number of fine steamships have been brought under the management. Under this combination the New York Mail Steamship Company have the privilege of exchanging 9,950 shares of their stock at any time within four months for the stock of the Atlantic Mail, the latter company already owning the balance of the shares. The West India Mail Steamship Company receives 10,000 shares of the stock of the Atlantic Mail in exchange for their ships, docks, &c.; and the Brazilian Mail Steamship Company receives 14,000 shares.

The Atlantic Mail Steamship Company, before the present consolidation was effected, owned the San Jacinto, San Salvador and Missouri, the two first named of which have been making alternate weekly trips to Savannah, Ga., since last November. The New York Mail owns the Morning Star, Evening Star, Guiding Star, Rising Star, Rising Sun, Merrimac, Mississippi, Monterey and Mariposa; the West India Mail the Columbia, Eagle and Morro Castle; and the Brazilian Mail the North America, South America, Havana and Matanzas.

The steamships of this company place this port in regular and frequent communication with Savannah, Havana, New Orleans, St. Thomas and the ports of Brazil; and this combination will be only the forerunner of increased trade and trading facilities with the South, the West Indies and South America.

Baltimore and Potomac Railroad.

We learn that the preliminary survey of the branch of the Baltimore and Potomac Railroad to Washington commenced last week near Collington, under the charge of William W. Taylor, Esq., Chief Engineer of the Western Maryland Railroad, and Captain Von Stamp, of the Royal Danish topographical engineers. The president of the road, Col. Oden Bowie, is with the surveying party, urging them forward with all proper dispatch, and so soon as the preliminary line to Washington is completed, we are informed that the location of the main route from Baltimore to Upper Marlborough will be entered upon. Our people are asked to do but very little towards securing the road, viz: to pay the engineering expenses and grant the right of way. Capital to the full amount necessary to build the road has been secured, contingent upon the bill to enter the District passing Congress.—*Marlboro' Gazette.*

☞ The President having signed the new Tax bill, the change in the tax upon brokers' sales goes into operation. The charge becomes a stamp tax upon every memorandum or bill of sale of stocks, bonds, &c., to the equivalent of one cent on every $100 of the actual amount represented on the bill of sale.

American Railroad Journal.

Saturday, July 21, 1866.

Stock Exchange and Money Market.

The Money Market has been working in favor of all strictly first-class borrowers, through the week. The drain of currency from the city, for use in the interior, to move produce to the seaboard and for other local purposes, has not been sufficient to make any noteworthy impression on the available supply of capital at this centre. Government is making liberal disbursements in currency in redemption of the outstanding one-year six per cent. Certificates of Indebtedness, and in liquidation of the July interest claims of the holders of the (third series) Seven Thirties. The outflow from the Treasury contributes to the ease of the market, and effectually prevents any stiffening of rates. Call loans are readily made at 4@5 per cent., and prime discounts at 5@6 per cent. per annnm, with a very moderate inquiry for accommodation. The last weekly statement of the city banks shows an increase of $2,586,418 in the specie reserve, $1,598,601 in the loan item, $1,890,432 in the deposits, and $507,642 in circulation, with a decrease of $3,999,661 in the legal tender reserve, which latter about represents the currency value of the increase in specie, and would seem to indicate that the banks have been buyers of specie. Government disbursed through the Sub Treasury in this city last week, $1,267,000 on the coin interest account, and received $2,485,926 in the form of customs revenue. The customs revenue (in coin) at this port thus far in the current week has averaged over four hundred thousand dollars a day, or equal to a weekly aggregate of two and a half million dollars. The balance in the office to the credit of the Government on Wednesday morning stood as high as $88,224,214. The total disbursements of the Treasury Department, on account of the principal executive branches of the Government, last week, were only $1,118,638, including for War Department $365,136; Navy, $605,986; and Interior $147,516. The cash balance in the Treasury vaults at Washington at the close of the week was $71,630,605, or $47,507,975 less than a week before. Government received $5,579,775 from internal revenue last week.

Gold has fluctuated with the variable tenor of the European news by each succeeding steamer. The extreme rates have been 153⅝ to 148⅝. On Wednesday it varied from 150⅝ to 149⅛ to 150⅝ to 149½, closing heavily, under the very latest accounts, by the *Africa*, reporting the conditional acceptance of an armistice by Prussia and Italy. The speculative element in the Gold Exchange is by no means strong at present. But for the temporary pause in the foreign demand for our Government securities, the *bulls* would have an uphill task, in their efforts at the inflation of the premium. The current specie exports are light, being confined to $56,000 by the *Aleppo* from this port, on Wednesday and $275,000 by the *Cuba* from Boston. Foreign Exchanges are quoted rather heavy, with a less urgent demand for even prime bankers' bills, which are quoted at 109@109¼ for London, and 5.17½@5.10 for Paris' sixty day drafts. Short sight drafts are marked at 110¼@110⅝ on London, and 5.10@5.07½ on Paris.

At the Stock Boards and in the street, Government securities of all issues and descriptions have been actively inquired for, chiefly for investment purposes, at advanced prices. Sixes of 1881 have been wanted at as much as 109¾@109⅞, ex July coupons; 5-20s of 1862 (the favorites of foreign buyers) have been sold up to 107⅞; 5-20s of 1865, up to 106⅛; 10-40s to 99⅛@99¼; Seven Thirties to 104⅛@104⅜. Toward the close on Wednesday the demand became less active, and the market yielded a fraction right through the list, chiefly because of the temporary dullness, resulting, in no small degree, from the fierce heat of the weather, which has retarded business operations of all kinds. Yet, holders are confident of an early revival of the popular inquiry for national stocks, and are not eager to realize at prevailing rates.

In the railway and miscellaneous stock line, there has been a less active speculative movement, and considerable depression in prices. The *bull* clique in Erie shares closed out their interest at nearly the highest figures of the recent inflation, and the stock speedily ran down to 63¼@63½, rallying again to 66¼. The break in Erie affected the whole market rather adversely. At the close, there was rather more firmness apparent, under a fresh investment demand.

Only one new national bank was established

last week, the Kittatanning National Bank of Kittatanning, Pa., with a capital of $200,000, but without any circulation. This makes 1,654 banks now established under the national system, with a total circulation of $284,566,675.

The Commissioner of Internal Revenue has decided that although the tax of 10 per cent imposed by the act of March 3, 1865, upon banks on the notes of State banking associations paid out by them after July 1, 1866, is not actually repealed until the act of July, 13th inst., takes effect on the 1st of August next, yet, as it was clearly the intention of Congress to postpone the tax until that time, and the act of 1865 does not provide specially for the manner of its payment, it will not be collected for the current month of July.

In response to a formal call for information, the Secretary of the Treasury has had the following statement of the amount of public funds in the various United States depositaries on the 1st of May last prepared and furnished to the Committee on Banking and Currency: In the United States Treasury and Sub-Treasuries, $193,827,578; in National Banks, $46,765,590; total, $240,593,169. Of the above there was to the credit of the United States Treasury, $192,077,999; do. disbursing officers, $48,515,170; total, $240,593,169; distributed as follows: In the Treasury, &c., to the credit of the Treasurer, $163,572,640; do. to credit of disbursing officers, $30,254,931; total, $193,827,578; in National banks to the credit of the Treasurer, $28,505,352; in National banks to the credit of disbursing officers, $18,260,239; total, $46,965,591.

The long expected decision of Judge Nelson has been filed in respect to the taxation of stocks sold by bankers and brokers for their own account. The Judge holds, first, that persons doing business under a banker's license may transact the business of both banker and broker under it; that when purchases and sales of stock are made by a banker for his own account, he is not liable to pay a tax on such transactions; also that a banker may advance money on stocks and sell them to reimburse his advances, without being liable to the broker's tax. This decision attracts considerable attention, as it overrules the one lately made by the Revenue Department, and is of great importance to Wall street operators.

A Washington dispatch says it is stated at the Treasury that the actual reduction in the principal of the Public Debt in June was nearly $20,000,000. During the same period about the same amount of Five twenties were sold, and certificates of indebtedness to the amount of $11,000,000 redeemed. The complete statement of the debt for the last fiscal year will not be ready before the 1st of August.

The exports of specie from the port of New York for the week ending July 14, 1866, were $2,239,270; previously reported, $47,123,868—total since January 1, 1866, $49,363,138; against same in 1865, $18,314,060; in 1864, $30,056,429; in 1863, $21,446,547; in 1862, $33,048,327; in 1861, $3,253,226; in 1860, $24,482,517.

The following is a recapitulation of the returns to the Banking Committee from the Assistant Treasurers and Government depositaries respecting the amount of public money on the 1st of May, 1866: Amount of coin on deposit, $99,524,474. Amount of currency on deposit, $94,317,999; total, $193,842,473; less overdrafts, $14,895; balance, $193,827,578; add amount in national banks, $46,765,591; total, $240,593,169. Amount to the credit of the Treasurer is as follows: With Assistant Treasurers, $163,665,287; with national banks, $28,505,352. Total, $192,170,639. Amount to credit of disbursing officers is as follows: With Treasurer and Assistant Treasurers, $30,254,931; with national banks, $18,260,239. Total, $48,515,170. Add amount to credit of Treasurer, $192,170,639. Total, $240,685,709. Less overdrafts, $92,640. Total public money May 1, $240,593,169.

It is thought in Wall street that the redemption of the outstanding U. S. certificates of indebtedness will be followed by the liquidation of the temporary loan.

All classes in business in this city earnestly expresses the hope, that the Bankrupt Bill, now reported to the Senate, may become a law. The great principle embodied in the House Bill has been preserved in the act amended by the Judiciary Committee of the Senate; and some of these amendments are not, we fear, for the better, but the bill is very much needed, and we hope will pass before the adjournment of Congress. Five of the seven members of the Judiciary Committee are in favor of the bill.

The New York exports, exclusive of specie, for the week ending July 17, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$4,063,538	$4,076,857
Prev. reported	80,693,722	109,179,109
Since January 1	$84,756,260	$113,255,966

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,298,443	$2,740,608
Gen. merchandise	1,466,349	3,759,747
Total for the week	$2,764,792	$6,500,355
Prev. reported	79,552,220	168,657,512
Since January 1	$82,317,012	$175,157,867

The balance in the Sub-Treasury on Wednesday was $89,253,151 71.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State 6s, 1872, 97; do., 7s, Bounty Loan, 104¾; Tennessee 6s, new, 69¾; Minnesota 8s, 100; North Carolina new bonds, 68½, Brooklyn 6s, Water Loan, 97; Milwaukee and St. Paul, 55; do., pref., 68½; McGregor Western, 22; Chicago and N. W., consolidated bonds, 78; New Jersey Central R. R., 117; Catawissa, 79¼; New York and New Haven R. R., 112; Stonington, 110; Boston Water Power, Co., 32; Mariposa pref., 22; Spring Mt. Coal, 38; Ashburton Coal, 16; Wyoming Valley Coal, 40; American Coal, 61; Central Coal, 45; Western Union Tel., 54½; do., Russian Extension, 107; Ocean Bank, 100; Bank of Commonwealth, 104; 4th National Bank, 103¾; Metropolitan Bank, 119½; Am. Ex. Bank, 113½; Central Bank, 111; Merchants Bank, 109; Bank of Commerce, 111; Bank of New York, 114; Corn Ex. Bank, 120. Bank of Republic, 112; 9th National Bank, 114; Continental Bank, 98; Mechanics Bank, 114; Importers' and Traders' Bank, 112.

Philadelphia.—Reading mort. 6s, 90; Belvidere Delaware bonds, 80; Huntingdon and Broad Top 2d mort., 80; Connecting R. R. bonds, 90; West Chester 7s, 95; Pittsburg 5s, 70¼; West Branch Canal, 30; Phila., Wil. and Balt., 56½; 13th and 15th streets R. R., 22; St. Nicholas Coal, 2¾; N. Y. and Middle Coal Fields, 4½; Hazleton Coal, 94; Fulton Coal, 6¾; New Creek Coal, ⅝; Clinton Coal, ⅝; Big Mt., 5; Commonwealth Bank, 53; Bank of North America, 225; Ocean Oil, 5⅜; Maple Shade, 2¾; Keystone, ⅝. Change in our Foreign Trade.

Looking over the amounts of exports from the City of New York to foreign countries for the last six months, we notice a very considerable difference in the value of many articles shipped, as compared with those of preceding years. We discover quite a falling off in many of a very serious character, the reason of which is that the excessive increase of our currency has diminished its purchasing value. More of it is necessary than formerly to obtain the required articles; this makes the price in amount larger than ever before, and the consequence is the home market is better for sellers than the foreign, the price is enhanced without restriction, and it does not pay, therefore, to export to a cheaper market than our own. Prices have gone up on most all the necessaries of life far beyond that of gold, so that the foreigner can send his cheap wares and cheap labor here, get high American prices for them, and converting his receipts into specie still have margin enough left for a very large profit. The great plenty of currency has made us liberal, if not improvident buyers. Everything that can be carried in a ship finds a ready sale here, no matter what it is, scrap iron or old clothes, lemonade or firecrackers, all can be sold at a profit. Money is abundant, and we are not quite so scrupulous as to the means of getting it, if it is only got. On the other hand, some of our most valuable products are now scarcely of any importance in commerce. During the last six months, we exported of flour, 482,532 bbls.; wheat, 138,532 bushels. But in 1864 we exported all of 1,009,823 barrels of flour, and 6,821,943 bushels of wheat. In the year ending 1861, we exported 4,823,756 barrels of flour, and 31,238,057 bushels of wheat; not all from this port, but by far the greatest portion.

Of the article of candles, for which, however, we are substituting petroleum, we sent away the last six months 87,745 boxes; in 1864, 72,071 boxes; and in 1860, 4,569,259 lbs. Of hops we have exported 756 bales this year; in 1864 we sent away 15,175 bales, and in 1860, 8,835,837 lbs. Of pork our shipments have only been 51,743 barrels for the last half year; when in 1864 we sent off 82,135, and in 1860 disposed of 1,682 tierces, and 153,964 barrels. Of butter we shipped 1,037,409 lbs., but in 1864 sent away 5,815,113 lbs., and in 1860 15,531,381 lbs. Of lard we exported 14,766,130 lbs., in 1864, 32,993,544, and in 1860 47,729,297 lbs. Of tobacco we sold abroad the last six months 52,247 lbs., unmanufactured, and 1,917,647 lbs., manufactured, when in 1864 the amounts were reciprocally 51,075, and 2,058,318 lbs. In 1860 we exported 160,816 hhds., 18,815 cases, and 19,450 bales of unmanufactured leaf.

Of corn meal the last six months we sent away 71,002 bbls., in 1864, 64,029 barrels, and in 1860, 10,678,244 bushels. We might extend this list considerably to show the recent falling off in the export of our staples to a very serious degree. On the other hand, though the exports decrease in our staples, our imports are on the increase, a circumstance highly approved by the foreign merchant and manufacturer. The amount of books has doubled since 1864, when it was about $100,000. The fact is that many American works in consequence of the dearness of paper and the rise in its price, are actually put to press in England, and then brought here for sale. The import of buttons has increased, since 1864, (when it amounted to $112,213,) to $294,820, although our country is full of the materials of which they are made, and our machines for making them are of the most ingenious description. The importation of segars is also rapidly on the increase, and as much as one dollar is asked for a segar in some of the shops; forty cents is a common price. The introduction of foreign cheese is largely on the increase for home consumption, notwithstanding the extent of our own production and the increase of our dairies. The import of leather is on the increase. We should have to go without shoes but for the foreign supply. The value of the skins received the last six months, was $2,871,126, and in 1860 it was in all the United States but $555,202 for the whole year. All our skill, all our patents, and all our ingenuity are unable to supply us with good leather. Of the staples, such as sugar, the receipts are very large, and on the increase. The late rebellion has deprived us of our domestic supplies from Louisiana. Wines still come in in great quantity, by millions of gallons and bottles, and at enormous prices, much of it adulterated, spurious and bad. The introduction of the California wines will probably have a great effect on the market ere long, as a regular system of producing, curing and selling them is now established, and we get a pure and cheap article free from duty, without the temptations to adulteration.

We might go through a list of 40 leading articles, which show an increased import into this country the last year, and which has been greater than usual. Prices keep up most astonishingly. Articles of necessity are even now 200 and 300 per cent. higher than during the war, and articles of luxury are only in reach of the very prosperous. Fixed incomes and salaries are nowhere in these times, and no one can tell how or when this is to change. Those persons accustomed to realize certain prices and large profits have no idea of reducing them, and the change is a slow one. We must remember, too, that the great influx of gold as well as paper is changing all our experience of values. We who have known New York for a few years back, see a wonderful difference going on in everything. What would have been very excellent a short time ago, is now of little worth. The new houses are palatial, and so is the modern furniture inside of them. The prices of food and of clothing have gone up higher than ever before, rents have advanced enormously, and labor was never so dear. In the meantime expenditure is on the increase, and what was a competence once is now scarce a support.

We attribute our difficulties to the necessity of paper money; which, when it is abundant, gives the appearance of prosperity and affects the conduct and calculations of people most injuriously. There are those who contend that this will all correct itself. We should like to know how. Keep up the evil and the evil will remain. We see a plain fact that by law money in paper 30 per cent. below the professed value is used in business as if it were worth its face, and is by law passed off at more than its value in payment of debts. The people knowing this make up the difference by all sorts of shifts and subterfuges, prices advance, labor becoming scarce or unfashionable dictates its own terms for the service it renders, and the whole country is afloat without standard, or rule, or certainty. If a man acquires property, he does not know what will become of it or what will be its final value. Meantime, the imports go on in a large and increasing scale, and though fortunately for some years back the balance of trade has been in our favor, yet the enormous wealth of the country, the large prizes in the lottery of life some operators are continually drawing around us, tend very much to unsettle those fixed rules and principles without which neither public nor private affairs are finally successful.

Enormous increasing imports and diminishing production and exports will in the end absorb all the cash and credit of the nation, that is if we continue to buy and use our credit instead of money in the purchase, and if we continue to deal in a false money by which we obscure real values, and in which we have no standard, but such as the speculative demands and opinions of the hour may create. When a dollar may be worth 100 cents one day, and but 30 the next, it is apparent that no man can tell what he is worth or what he is toiling for.

☞ Mr. E. W. Brown has been appointed Treasurer of the Erie Railway, to fill the vacancy occasioned by the resignation of Mr. John Hilton, promoted to the auditorship of the company.

☞ R. E. Ricker, Superintendent of the Terre Haute and Indianapolis Railroad, has been tendered and accepted the General Superintendency of the Pennsylvania Railroad.

☞ Walter S. Gurnee, Esq., of New York, has been unanimously elected Vice President of the Milwaukee and St. Paul and Milwaukee and Prairie du Chien Railway Companies.

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg ailroad for the month of June, 1866, were:

rom freight	$130,190 93
" passengers	58,889 92
" miscellaneous	4,500 00
" military	1,557 10
	$195,137 95
June, 1865:	
Freight, passengers, etc..	$200,391 28
Military	45,235 37
	245,626 65
Decrease	$50,588 70
Decrease in regular traffic	6,810 43

The earnings of the Housatonic Railroad for he month of June, 1866, were $41,293 47
ame time in 1865 ..... 35,287 98
Increase $6,005 49

The earnings of the Ohio and Mississippi Railond line, from Cincinnati to St. Louis, for June were:

	1866.	1865.
Eastern Division	$149,307 66	$179,024 20
Western Division	104,616 92	125,438 73
Total	$253,924 58	$304,462 93
ecrease		$50,588 35

Comparative earnings from January 1, to June 0, inclusive:

	1866.	1865.
Eastern Division	$972,767 02	$987,359 54
Western Division	681,598 71	691,823 49
Total	$1,654,365 73	$1,679,183 03
Decrease		$24,817 30

The receipts of the European and North American Railway, for the month of June, 1866, were 11,914 25, and for the corresponding period the revious year $11,182 01, being an increase of 732 24.

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of June, 1866, were:

Erie Railway	$1,146,039 84	
Buffalo Division	97,103 02	$1,243,142 86
June, 1865—		
Erie Railway	$1,177,371 57	
Buffalo Division	74,998 25	1,252,369 82
Decrease on Erie Railway and Buffalo Division		$9,226 96

The earnings of the Erie Railway (including the Buffalo Division) for the first six months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1866.	
January	$1,070,890	$1,187,188	Inc. $116,298
February	1,011,735	983,855	Dec. 27,880
March	1,331,124	1,070,434	Dec. 260,690
April	1,538,313	1,153,295	Dec. 385,018
May	1,425,120	1,101,668	Dec. 323,452
June	1,252,370	1,243,143	Dec. 9,227
Total decrease			$889,969

Alexandria and Fredericksburg Railroad.

At a meeting of the directory held at Alexandria on the 11th inst., D. C. McCallum was chosen President, R. W. Latham, Vice President, Robert Turner, Treasurer, and Reuben Johnson, Secretary. The entire construction and equipment of the road was contracted for by Bodfish, Mills & Childs, of New York, who deposited the required guaranty for the faithful performance of their engagement. The work will be commenced early in August, perhaps in the current month.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending July 13th, 1866, were $55,912 39
Corresponding week of 1865 ..... 51,578 25
Increase $4,334 14

The earnings of the Grand Trunk Railway of Canada for the week ending July 7th, 1866, were $122,658 00
Corresponding week of previous year.. 114,799 00
Increase $7,859 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in July, 1866 .. $21,394 00
Corresponding week previous year 23,226 35
Decrease $1,832 35

The earnings of the Western Union Railroad for the week ending July 7, 1866 ..... $20,874 81
Corresponding week previous year 17,923 13
Increase $2,951 68

The earnings of the Chicago and Great Eastern Railway for 1st week in July were $22,419 13
Same period last year 17,391 33
Increase in 1866 ..... $5,027 80

The earnings of the Michigan Central Railroad for the 1st week in July, 1866, were... $73,659 40
Corresponding week of previous year.. 81,398 00
Decrease $7,738 60

The earnings of the Chicago and Northwestern Railway for the first week in July, 1866 were $190,762 98
Corresponding week of previous year.. 176,193 18
Increase $14,569 80

Journal of Railroad Law.

COMMON CARRIERS.—DEVIATION FROM INSTRUCTIONS OF SHIPPER.

The case of Dwight Johnson against The New York Central Railroad Co. respondant, lately decided by the Court of Appeals of this State decides that a carrier in forwarding goods beyond the terminus of his own route, is bound by the instructions of the owner. Also that it is his right and his duty, in an unforeseen exigency, when the safety of the goods required it, and the consent of the owner may fairly be presumed, to deviate from the letter of his instructions and notify him of such deviation; but when the deviation is unnecessary, and for the mere convenience of the carrier, he assumes the risk of consequent injury, and remains responsible as an insurer. The primary duty of an agent is to observe the instructions of his principal; and when he disregards them, he voluntarily assumes a responsibility by which he must be content to abide. The action was for the value of ninety one bales of tow, addressed to E. Ludlow, Jr., at New York, and delivered by the plaintiff's firm to the defendant at Little Falls, to be transported to Albany and to be forwarded thence by the People's Line of Steamboats to New York. The tow was received by the defendant on the 29th of November, 1854, and on the arrival of the property at Albany, it was offered to the proprietors of the People's line, who declined to receive it, on the ground that they were prohibited by act of Congress from transporting freight of that description. The tow was then shipped by the defendant on the "E. Corning," a freight barge in good condition, running in the Albany and New York line, which was accustomed to convey freight of this description. The barge left for New York on the 1st or 2d of December, and was the last boat in the line that went down the river that fall, that being the close of navigation for the season. On the passage to New York the tow was lost with the barge.

The cause was tried before Judge Pratt, and the plaintiff recovered; but the judgment was reversed at the General Term, which held that upon the foregoing facts the defendant was not liable for the loss.

On the last trial before Judge Hubbard, further evidence was given tending to support the allegation made in the complaint, and denied in the answer, that the defendant was directed when the property was received to forward it only by the People's Line of steamboats.

On the first trial the plaintiff rested his case, in this respect, on the note made by the defendant at the foot of the entry in the way-bill book, "*Via* People's Line;" but on the last trial it was proved that when the tow was taken to the defendant, the plaintiff asked Mr. Priest, the freight agent of the company, with whom the contract was made, whether the company could forward the tow in question by the People's Line, who replied that it could, but it would cost more than it would to send it by tow boats. The plaintiff told him that it was so late in the season, that unless the defendant could forward it by the People's Line, he did not then wish to send it, and that he did not care about the extra expense. Priest thereupon received the goods to be forwarded in that mode. This evidence was undisputed. It was also proved that there was daily communication by mail and by telegraph between Albany and Little Falls.

The plaintiff claimed that under these circumstances, the forwarding of the flax by a tow boat, without notice to the owner, was a breach of duty, and that the defendant assumed the risk by disregarding the instruction. The judge held otherwise and granted a non-suit, which was sustained at the General Term.

The following opinion of the Court was delivered by

PORTER, J.—The defendant undertook to transport the flax to Albany, and to forward it thence to New York by the People's Line of Steamboats. On the refusal of that line to receive it, the defendant's obligation as a carrier ceased; and if it incurred any further liability, it was in the character of agent for the owner of the property. In the absence of instructions as to the mode of transportation from Albany, it owed no duty to the plaintiff, beyond the delivery of the property, in the usual course of business, to safe and responsible carriers for transmission to its destination. Brown *vs.* Dennison, 2 Wend., 593. Van Sanford *vs.* St. John, 6 Hill, 157.) But when the forwarding agent is instructed as to the wishes of his principal, and elects to disregard them, he is guilty of a plain breach of duty. When he sends goods in a mode prohibited by the owner, he does it at his own risk, and incurs the liability of an insurer. (Ackley *vs.* Kellogg, 8 Cow. 225.)

It appears in the present case, that the contract was made with the freight agent of the defendant, who suggested that it would be better to forward the hemp by tow boat from Albany; but the plaintiff replied in substance, that it was so late in the season that he would not send it, unless it

could go by the People's Line. This proof tends to show that the defendant received the property, with an express understanding that the hemp was not to be forwarded to New York unless by the People's Line. If this was so, the defendant was clearly liable. On the refusal of the steamboat proprietors to receive the property, the company should have either communicated the fact to the plaintiff, and awaited further instructions, or it should have relieved itself from liability by depositing the hemp for safe keeping in a suitable warehouse. (Forsyth *vs.* Walker, 9 Barr, 148; Goold *vs.* Chapin, 20 N. Y., 259; Fisk *vs.* Newton, 1 Denio, 451.)

There is a class of cases in which the agent is justified, by an unexpected emergency, in deviating from his instructions, where the safety of the property requires it. In this instance no such exigency arose. The only inconvenience which would have resulted to the owner, from compliance by the carrier with his own wishes, would have been mere delay in transmitting the hemp to market; and he had notified the company that he would rather submit to this delay, than to the hazard of tow-boat transportation at the close of the season of navigation. The primary duty of the agent is to observe the instructions of his principal, and when he departs from these, he must be content with the voluntary risk he assumes. (1 Pars. on Cont., 69; Forrester *vs.* Boardman, 1 Story, 43; Ackley *vs.* Kellogg, 8 Cow., 223.)

The evidence would have authorized the jury to find that there was a breach of duty by the defendant, and the non-suit was therefore erroneous.

The judgment should be reversed, and a new trial should be ordered with costs to abide the event.

All the judges concurred in the foregoing opinion, except Brown and Campbell, J. J., who dissented.

Judgment reversed, and new trial ordered.

Debt of North Carolina.

The North Carolina State Convention has adopted an ordinance, making provision for cancelling a portion of the State debt, by exchanging the stocks of railroad companies held by the State in a manner satisfactory to the public creditors. It is entitled an "Ordinance for exchanging the stocks of the State for bonds issued before the year 1861," and was ratified in Convention on the 26th of June, 1866:

Whereas the destruction and depreciation of taxable property in North Carolina, arising out of the late unhappy war, has greatly increased the proportion borne by the public debt to the means which the State possesses for its payment; and whereas the people of North Carolina are solicitous fully to discharge their just obligations at the earliest possible moment, in any manner that shall be acceptable to their creditors; whereas, further, the stocks, liens, and other claims upon the railroad companies and other corporations are proceeds of the bonds of the State, issued in great part before the twentieth day of May, in the year one thousand eight hundred and sixty-one, and now outstanding; and whereas due regard being had as well to economy and other grave public interests as to the rights of public creditors, it were good policy to exchange for the principal of such bonds the stocks and other property above mentioned, if such exchange can be made at par; therefore,

Sec. 1. Be it ordained by the delegates of the people of North Carolina, in convention assembled, That the Public Treasurer shall advertise in such newspapers as he may select, and invite proposals for an exchange of the principal of any bonds issued by the State prior to the twentieth day of May, one thousand eight hundred and sixty-one, for certificates of stock and other interests held by the State in various corporations; such bids shall be opened by the Treasurer upon some day (of which he shall give due notice to them) in the presence of the Governor of the State and the Comptroller of public accounts, and it shall be his duty to accept those terms which may be most advantageous for the State. Provided, That in no event shall any of the said stocks or other property be exchanged for less than their par value; and any premiums which may be obtained upon such exchange shall be applied either to the extinguishment of coupons or other interest (if any) due upon the particular bonds accepted in exchange, or to a further discharge of the principal due upon other such bonds, or interest, it may be, as an alternative, at the discretion of the Treasurer, be paid in currency into the Treasury and charged to the public fund.

Sec. 2. As soon as may be practicable after the acceptance of any bid, the Public Treasurer shall receive the bonds offered in exchange, and in the presence of the Governor and Comptroller shall cancel the same; it shall also be his duty to transfer the stocks and execute such conveyance of the other interests hereinbefore mentioned as shall be deemed necessary; such conveyances to be in a form approved of by the Governor and the Attorney General: Provided, however, that the interest to be acquired by any such purchaser or assignee of any stock now held by the State shall not be other than that of the holders of a like amount, in the general stock of the several and respective corporations in which the State may be a corporator.

Sec. 3. It shall be the duty of the Comptroller to take a minute of what may be done by the Public Treasurer in the premises, and to make therefrom such entries in the books of his office as may secure a just accountability on the part of the Treasurer because of the transactions hereinbefore mentioned.

Sec. 4. The Public Treasurer shall make special reports upon the subject of this ordinance to the General Assembly at every session, and this ordinance shall be subject to repeal or modification by the General Assembly.

Montreal and Champlain Railway.

The adjourned general annual meeting of this company was held in Montreal on the 12th May. Hon. James Ferrier, President, occupied the chair.

The report issued by the directors to the proprietors was read and adopted on a division, after further information and explanations were given by the President and Mr. Byrdges in regard to the company's affairs.

The auditors and directors were unanimously re-elected.

In the report the directors state that considerable additions and improvements have been made to the roadway and to the rolling-stock, and both are now in a much better condition than they have been for several years past. Considerable outlay still requires to be made upon the main line, between St. Lambert and Rouse's Point, especially for new iron. Some of the bridges also want repairing. The one-fifteenth of the joint earnings of the Grand Trunk and Champlain lines have amounted for the year 1865 to less than the minimum of $100,000 a year, which, under the agreement with the Grand Trunk Company, has to be paid for three years ending 31st December, 1866. The Grand Trunk Company have consequently paid the sum of $100,000 for the past year, out of which the interest upon the bonds and preference stocks has been paid and the balance carried to the sinking fund to redeem the preference shares. That fund now amounts to $12,586 83.

The revenue account for the year showed the following as the mode of distributing the $100,000: To interest on notes, incidental expenses, &c., $2,405 98; interest on bonds (one year), $50,567 10; preferred stock dividends (one year), $40,460; sundry amounts in settlement of old accounts chargeable to revenue, $4,114 92; interest on sinking fund, $773 27; balance to sinking fund, $1,678 73—total, $100,000.

The School of Mines Columbia College.

The school was opened Nov. 15, 1864, with laboratory accommodations for twelve pupils. Twenty-five pupils applied the first day, and the number increased in a few weeks to forty-eight. At the close of the first year a large five story building on the college grounds was placed at the disposal of the faculty, and laboratories, drawing room, etc., were arranged for seventy-two pupils; more than one hundred, however, availed themselves of the privileges of the school. At the close of the second year the trustees of the college, after listening to the able and elaborate report of President Barnard, voted thirty-five thousand dollars to erect and equip an additional building. Mechanics are now busily at work, and by the 1st of October, when the third year opens, there will be accommodations for one hundred and fifty students.

The buildings will then contain a large mineralogical hall, a large geological hall, a drawing academy, assay laboratory with furnaces, etc., sufficient to enable fifty pupils to make assays at the same time, two qualitative laboratories, a quantitative laboratory, library and reading room, lecture rooms, etc.

Kent County Railroad.

We learn from the Cecil *Whig*, that a meeting of citizens friendly to the construction of this road was held at Warwick on the 9th inst., for the purpose of comparing views, taking stock, and devising the most practicable railroad route best suited to the interest of the people. All present seemed fully alive to the importance of the occasion, and the sum of $10,000 was subscribed. Resolutions were adopted by the meeting recommending the location of a route from Middletown, Del., to the head of Sassafras, in Maryland, and a committee appointed to superintend the survey. A finance committee was also appointed to canvass the district for subscriptions to the capital stock of the company.

☞ All the stock of the Richmond, Fredericksburg and Potomac and Richmond and Petersburg Railroad Connection Company having been taken, a meeting was held at Richmond on the 13th inst., for the purpose of organizing and electing officers. The following gentlemen were chosen directors, viz: P. V. Daniel, Jr., Charles Ellis, Gustavus A. Myers, Thomas H. Wynne and W. W. Crump. William H. Lyons was elected President, and James B. Winston, Secretary and Treasurer. E. D. T. Myers was appointed Engineer. The work of constructing the connection between the roads will be commenced at once.

☞ The work of laying a horse car passenger railroad in Camden, N.J., from Cooper's to Kaighn's Point, it is understood, will commence during the present summer.

Railroads in South America.

There are six railroads in Brazil, four in Chili, four in the Argentine Confederation, and one each in Peru, New Grenada and Venezuela. The two most extensive railroads in Brazil are the Pedro II Railway and the San Paulo. The former, now eighty miles long, is pushing from Rio into the interior, under the auspices of the Imperial Government, with Mr. Wm. Ellison of Massachusetts as Engineer-in-Chief; while the latter, though built by an English company, has been mostly laid out by engineers from the Province of New Brunswick. Chili has the greater number of miles of railway of any South American Government, and was the first to complete an iron road of any extent. The progress of Chili in this respect is owing to the energy and indomitable perseverance of one man, William Wheelwright, Esq., of Newburyport. This gentleman has within the past three years transferred his efforts to the Argentine Confederation. Although between sixty and seventy years of age, he has undertaken to build a railway 250 miles long through the fertile region extending from Rosario, on the River Plate, (240 miles from the city of Buenos Ayres,) to the city of Cordova. In May, 1863, the first sod was turned, and on the first of May, 1866, eighty miles of this magnificent undertaking was inaugurated for travel and traffic in the presence of astonished multitudes of dwellers on the rich Pampas. A Buenos Ayrean journal, in conveying deserved compliments to Mr. W., does not over-estimate the importance of this vast enterprise when it says: "Since our Independence no event of greater or more lasting importance has taken place in these provinces than this triumph of Wheelwright. Of the thousands who assisted in 1863, at the turning of the first sod, scarcely a dozen believed that the road would be carried out—so many difficulties were in the way, and so many political troubles obscured the horizon at every point—yet the indomitable perseverance of Mr. Wheelwright has been the magician's wand brought to bear against the Pampas."

☞ The Allentown (Pa.) *News*, of 11th July, says that William Call, of Reading, contractor, has commenced work on the new railroad from Topton to Port Clinton, being a link in the Atlantic and Great Western through line from New York to the West, under the agreement between the Atlantic and Great Western, the Philadelphia and Reading, and the East Pennsylvania roads, which contract has just been decided valid by the Supreme Court of Pennsylvania.

☞ A Leavenworth dispatch says great satisfaction is expressed in Kansas over the passage and signing by the President of the bill allowing the Kansas branch of the Pacific Railroad to go up the Smoky Hill Valley. This gives the State 470 miles of continuous railway.

☞ A great Southern Telegraph Company is being formed at Louisville, with a capital of a million dollars, Kirby Smith is President, with his headquarters in Louisville, and Don Carlos Buell, Vice President. More than half the stock is already subscribed.

☞ The Danville (Va.) *Times* says that Pittsylvania has subscribed $100,000 to the Lynchburg and Danville Railroad.

The Chicago Stockyards.

The Union Stockyards of Chicago, according to a statement of the President of the association, consist of 345 acres, of which 70 acres are covered with plank and the block pavement. The company own 13½ miles of railroad track, connecting with all the railroads entering into Chicago. There are 28 miles of drainage. Nineteen millions of feet of lumber have been used in construction in the premises. There are 1,043 pens, with a capacity for 14,000 head of cattle and 50,000 hogs.

Two and a half miles of shed are built over the pens, and seven and a quarter miles of feed-troughs. There are large barns and cribs, holding 8,000 bales of hay, and 40,000 bushels of corn. In the yards, 1,910 gates cross the many alleys; 215,000 gallons of water are consumed daily, being obtained by damming the south branch of the Chicago River at a point where "pure country" water is not contaminated by filth and sewerage. It is raised by steam and distributed through five and a quarter miles of pipes into two and a half miles of water tanks.

The whole outlay has been $1,500,000. The work was commenced June 30, 1865, and the yards opened six months later on Christmas day.

The operations since then are shown by the following receipts of live stock, a period of six months:

Cattle	200,000
Hogs	470,000
Sheep	104,000
Horses and mules	700
A total of	774,700

head, valued at $25,000,000, the freight charges on which have amounted to over $1,500,000.

☞ At a special meeting of the Western Railroad Corporation, held in Boston on the 18th inst., the act passed by the last Legislature increasing the capital stock $3,800,000, was accepted, and authority given to the directors to issue stock from time to time in such amounts as they deem necessary. The capital stock of the corporation, when all paid in, will amount to $10,000,000.

☞ The Commissioners of the Ohio State Sinking Fund have completed their labors in New York. They have paid out interest money to the amount of $326,937, and have redeemed a portion of the State debt to the amount of $555,768.

☞ At a railroad meeting at Council Bluffs, Iowa, the citizens voted to accept a proposition from the Chicago and Northwestern Railroad Company, to extend their line to that city, and the amount of money asked for was subscribed on the spot.

☞ I. D. Jones, S. S. Costen, Geo. R. Dennis Hurnell Toadvine, Cathell Humphreys, H. H. Dashiell, and Samuel Harlan, of Wilmington, Delaware, have been elected directors of the Eastern Shore (Md.) Railroad.

☞ The Wabash and Erie Canal is to be reopened from Terre Haute to the Ohio State line this season, and throughout its whole line at as early a date as possible.

☞ It is proposed to extend the Girard and Mobile Railroad from Union Spring to Troy, and thence to Greenville, Ala. John F. Milner offers to complete the whole for $3,500,000.

THE
Sterling Iron and Railway Company,
Office No. 42 Pine St., New York,
Offer for sale at lowest market rates, in quantities t suit purchasers,
THEIR SUPERIOR
MAGNETIC IRON ORE,
for Blast and Pudding Furnaces; also
"STERLING"
CHARCOAL PIG IRON
AND
ANTHRACITE PIG IRON.
J. DUTTON STEELE, President.

THE RHODE ISLAND
LOCOMOTIVE WORKS,
PROVIDENCE, R. I.
(FORMERLY THE BURNSIDE RIFLE CO.)
THIS EXTENSIVE ESTABLISHMENT, situated in PROVIDENCE, R. I., on the line of the New York, Providence and Boston Railroad, is prepared to fill orders for
LOCOMOTIVE ENGINES
Interchangeable in all their Parts,
Combining all the Latest Improvements, and made of the Best Materials and Superior Workmanship.
Orders addressed to
A. E. BURNSIDE, President,
will meet with prompt attention.

SCHOOL OF MINES,
COLUMBIA COLLEGE,
East 49th St., New York.
FACULTY.
F. A. P. BARNARD, S. T. D., LL. D., President.
T. EGLESTON, Jr., E. M., Mineralogy and Metallurgy.
FRANCIS L. VINTON, E. M. Mining Engineering.
C. F. CHANDLER, Ph. D., Analytical and Applied Chemistry.
JOHN TORREY, M. D., LL. D. Botany.
CHARLES A. JOY, Ph. D., General Chemistry.
WILLIAM G. PECK, LL. D., Mining Surveying and Mechanics.
JOHN H. VAN AMRING, A. M., Mathematics.
OGDEN N. ROOD, A. M., Physics.
J. S. NEWBERRY, Geology and Palæontology
The plan of this school embraces a three-years' course for the degree of ENGINEER OF MINES, or BACHELOR OF PHILOSOPHY.
For admission, candidates for a degree must pass an examination in Arithmetic, Algebra, Geometry and Plain Trigonometry. Persons not candidates for degrees are admitted without examination, and may pursue any or all of the subjects taught. The next session begins Oct. 1, 1866. The examination for admission will be held on Sept. 28, 29. For further information and for catalogues apply to.
DR. C. F. CHANDLER,
4t29 Dean of the Faculty.

Ottoman (Smyrna to Aidin) Railway.

The completion of the Ottoman railway to Aidin is announced in the Smyrna papers. On the 29th of June the road was inspected by the Imperial Commissioners, and handed over to the company by the financial agent, in the presence of the Governor General, preliminary to the running of through trains to Aidin on the 1st of July. By this important event, the city of Smyrna is united with the foot of its great producing plain, that of Aidin, and a continuous line of communication formed in connection with the Cassaba railway of 120 miles between the cities of Aidin and Manisa, or of 140 miles with the town of Cassaba. Smyrna itself has now full communication with the great valleys of the Mœandes, the Cayster and the Hermus leading to a remarkable development of produce and enterprise. The completion of this railway is an event of too much note in the industrial history of Turkey to be passed over with the mere record of the fact. Apart from the interest attaching to it as the first enterprise of the kind in the Empire, its special fortunes have been chequered and protracted enough to challenge a somewhat fuller review, now that the completion of the road to Aidin is announced. The works on the latter half of the line now opened are of even greater solidity than those on the first section between Smyrna and Ayasalook. They have at all points been executed without regard to cost, and will in this respect bear favorable comparison with the best portions of either the Cassaba, Kustendjie, or Varna lines. The passage of the Gume-dah is of itself a work, or rather a series of works, which reflect the highest credit on English engineering skill and constructive resource. Of the stations on the new section of the line, Azizieb, a village founded by Mr. Clarke in honor of the Sultan, will give convenient access for passengers and goods traffic to the important towns of Sokia, Boorgas, and their surrounding villages: Balachick, the first station in the Aidin plain, will collect a large amount of produce along the eastern base of the mountain, whilst Dirminjik and Karabonnar will garner in still more up to the very confines of Aidin itself, with its thriving and industrious population of 60,000 Mussulmans and Greeks. Though the line has thus reached the end of its first terminal stage, its extension on towards Ouchack will, of course, be an early commercial necessity, in the interest both of the scheme itself and of the important districts beyond Aidin, which, whilst they offer few or no constructive difficulties, collectively form one of the largest, richest, and most populous plains of Asia Minor. In this part of the interior, indeed, much more than in that traversed between Aidin and Smyrna, lies the real traffic wealth of the enterprise, which must be reached and utilised before the line can bear its full fruits either of profit to its shareholders, or of industrial benefit to the country. The liberality of the Government hitherto encourages the hope that no ungenerous difficulties will be thrown in the way of such a development of the scheme as will conduce to these results—fostered as it has been in even its most discouraging phases by the Sultan himself, and by all the leading members of the Government for the past eight or nine years.

The value of this line, and the cause of its embarrassments and slow progress, consists in the passage of the great mountain chain of Messogis, a barrier between the several plains forming the valleys of the Mœander and its feeders and the plains adjoining Smyrna. This difficulty is now overcome at the Ephesus pass by a series of heavy works, executed under discouraging circumstances by Mr. T. R. Crampton, the contractor, who has been likewise the chief supporter of the undertaking.

Continual financial embarrassments have retarded the undertaking until this final section was taken in hand, and the enterprise has been carried to a successful issue by the exertions of Sir M. Stephenson, the chairman in London, and of Mr. Hyde Clarke, the financial agent in Tuurkey, in co-operation with the Ottoman government, which has most liberally contributed to the progress of the undertaking by concession after concession.

His Imperial Majesty the Sultan Abdul Azis turned the first sod of the new works at Ephesus in 1863, and had circumstances permitted it was his intention to have opened in person this the most important railway undertaking in his empire.

The city of Aidin has expected with the greatest anxiety the completion of railway communication. Already the once flourishing cotton cultivation, of which it was the metropolis, is rearing its head, and European and native enterprise have begun operations for the development of its varied resources. Aidin, is, however, only a centre of communication to numerous rich districts and plains spreading around and far into the interior, and which may be covered with railways and tramways for many hundred miles. The mineral and forest resources, almost untouched, will be large feeders of revenue.

The Aidin plan is already well cultivated, and presents examples of orchard culture not to be surpassed in the world, and carried on by a hardy and industrious population, but the want of means of transport has been an impediement to the extension of agticultural and other enterprise. Now the camel is driven into the interior to become a feeder to the main line of communication.

The works on the section from Smyrna to Ephesus have always received the approbation of Europeans and natives, and the new works executed by Mr. Crampton show the same care and solidity, and are of a durable and almost monumental character.

The station in Aidin is in contact with the Bazaars, and at Smyrna, the large English steam-

ers frequenting the port can lie alongside the railway pier and ship cotton, valerian, grain, liquorice, emery, figs, hemp, tobacco, raisins, and the various products of the interior.

Michigan Central Railroad.

The earnings and expenses of this road for the years ending May 31, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.
From passengers	$1,771,813 60	$2,061,335 05
" freight	2,233,529 47	2,208.591 82
" miscellaneous	140,076 50	176,563 64
	$4,145,419 57	$4,446,490 51
Expenses, viz:		
Repairs of road	$476,964 91	$625,056 84
" buildings	273,667 24	229,212 91
" locom'tives	230,490 35	256,225 26
" cars	306,943 46	299,900 79
Locomotive service	105,855 31	114,529 88
Train "	75 651 94	91,101 94
Station "	442,959 13	479,027 13
Fuel	245,452 28	300,111 71
Oil and waste	60,292 95	67,962 66
Stationery	28,280 18	39,781 37
Telegraph	18,567 26	24,961 76
Local taxes	91,533 41	97,059 60
Miscellaneous	47,491 21	183,444 07
	$2,406,149 63	$2,808,375 92
Net earnings	$1,739,269 94	$1,638,114 59

Compared with the previous year the gross earnings of 1865-'66 show an increase of $301,070 94; with an increase in expenses of $402,226 29—making a decrease in net earnings of $101,155 35.

The increase in the earnings of the past over those of the preceding year is equal to 7.26 per cent. The increase in expenses (less taxes) 14.82 per cent.

The earnings from passengers show an increase of $289,521 45, or 16.34 per cent. over the last year. The earnings from freight show a decrease of $24,937 65, or 1.11 per cent. less than last year. The increase in earnings from miscellaneous sources was $36,487 14 or 26.04 per cent.

The expenses of operating the road (not including taxes) were $2,738,592 35; or 61 per cent. of the gross earnings. In 1865 they were 55.8; in 1864, 47.6; in 1863, 40.4; in 1862, 45.1; in 1861, 51; in 1860, 53.7.

To show the amount properly chargeable to operating expenses, there should also be deducted the sum of $214,084 71—being amount expended on new freight house, etc., at Detroit, claims for property destroyed at the freight house fire, temporary structures, and shafting, machinery, etc., for the new Elevator—and it leaves the sum of $2,497,231 61, which is 56.2 per cent. of gross earnings.

In addition to the above extraordinary expenses, 724 tons of new rails were purchased, 2,638 tons re-rolled rails put in the track, 2,871 tons repaired rails replaced in the track, equal in all to 60 miles of renewed track, 110,458 new ties and 120 tons spike.

The total number of tons of freight moved has been 533,451. Average number of tons carried per train per mile, 115.77. Average distance freight is carried 159.15 miles. Freight earnings per ton per mile, 2.60 cents. Tons carried one mile eastward, 50,534,629; do., westward, 34,263,-084—total tons carried one mile, 84,897,713. Proportion of tonnage carried eastward 59.64 per cent.; do., westward, 40.36 per cent. Earnings of freight trains per mile $3.01.

The total number of passengers carried was 902,826, of which 766,755 were way, 123,636 were through, and 11,985 were emigrant. Of the way passengers 369,560 went east, and 397,195 west; of the through passengers 59,247 went east, and 64,838 went west. Average number of passengers per train per mile 101.42. Average number of miles travelled by each passenger, 83.76. Passenger earnings per passenger per mile, 2.72 cents. Passengers carried one mile 75,629,075. Passengers carried one mile per mile of road 266,299. Earnings of passenger trains per mile run $2.76.

Income Account.

Balance to new account		460 802 67
Total		$5,159,664 64

Construction account has been increased $510,-846 49 during the past year.

The bonded debt has been decreased by the conversion of $102,000 of convertible bonds into stock, and the capital stock has been increased by that amount, (less $20 fractional scrip,) and also by $389,500 amount of stock dividend of July 1, 1865.

The funded debt now amounts to $7,463,488 89; capital stock $6,982,866—total $14,446,354 89.

The increase in earnings from passengers has been principally from through traffic, divided about equally between the eastward and westward, and between through and local, the earnings from the regular local business not varying materially from the previous year; but it will be borne in mind that the earnings from local passengers for that year were much increased by the movements of troops, which item has had but little influence in the earnings of this year. The earnings from freight vary but little from last year. The increase of tonnage is 48,176 tons, while the falling off in earnings is $24,937 65.

The completion of the contemplated *third* rail on the Great Western Railway, in October next, together with the car transfer boat now under construction, thus making the gauge uniform from the far West to the seaboard, must have a great influence upon the receipts of this company when once in operation, and this must have an important bearing upon the trade the ensuing year.

The equipment of the road consists of 97 locomotives, 70 1st class and 4 2d class passenger cars, 16 baggage, 28 accommodation, 751 stock, 501 merchandise, 191 platform, 120 hand and 151 road and repairing cars.

The number of miles run by locomotives with passenger trains is 745,648; with freight trains 783,340; with miscellaneous trains 121,756; with switching trains 140,926—total 1,741,670 miles.

Directors.—John W. Brooks, Nathaniel Thayer, R. B. Forbes, Elon Farnsworth, Erastus Corning, D. D. Williamson, George F. Talman, J. M. Forbes, and Sidney Bartlett.

Treasurer.—Isaac Livermore.

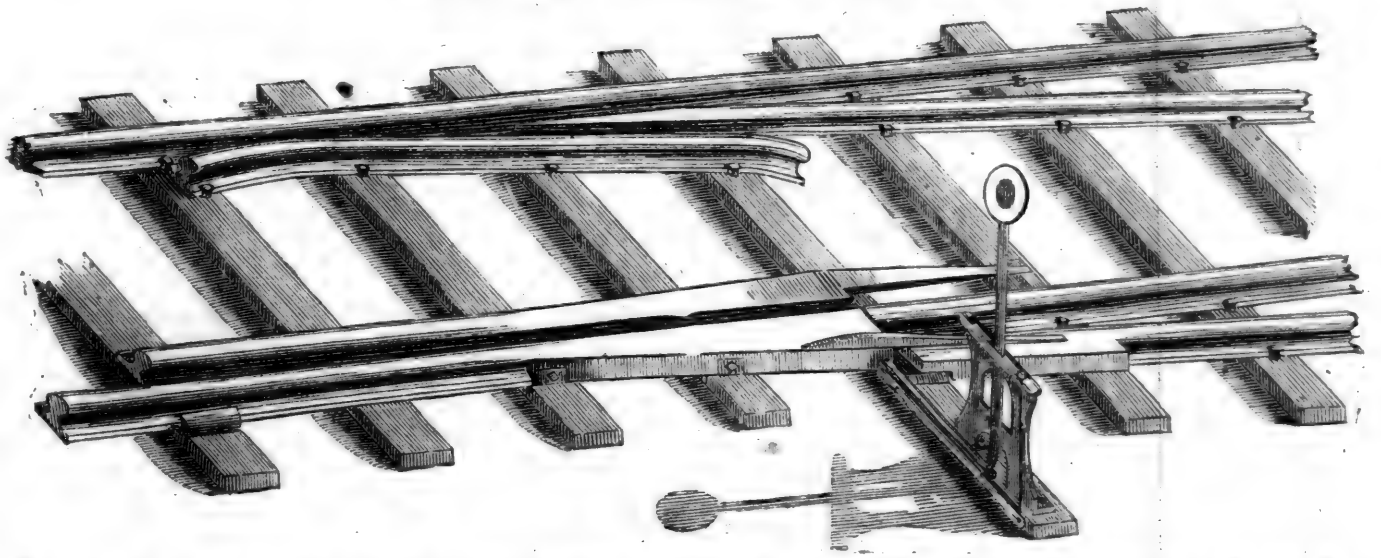
Superintendent.—R. N. Rice.

Auditor.—William Boott.

American Finances.

Mr. Gladstone's big words uttered in support of America in her financial department, are more than borne out by the results. We lifted up our hands and eyes at the Americans raising £80,-000,000 sterling a year revenue, but the accounts now are that for the year ending to-day (the 30th June) £100,000,000 sterling will be the American revenue, and the principal part of it internal revenue! £160,000,000 is above three times the interest on their gigantic debt, and as it is said they are cutting down their other expenses, and as they are bent upon reducing their debt with a rapidity that shall surprise the rest of the world, we may expect to find a large part of that debt redeemed this year. In this we think the Americans exercise a wise discretion. The more rapidly they pay off the debt the sooner will the rate of interest come down. It will not only be an exhibition of extraordinary financial strength, rivalling even that of Great Britain, but it will be attended with a positive pecuniary advantage. It is exactly the opposite course the Turks, and some others, take, who continually raise new loans to pay the interest on their old debts, but see what the Turks, &c., have to pay in interest; see how largely they increase their debt—how they add to their monetary difficulties, year after year, while America is surmounting hers, great as is her indebtedness, with the ease and certainty with which a strong man ascends a hill.

There may be some little pride in the powerful finance measures of America, but the very exhibition of it is in the nature of a virtue.—*Herapath.*



Peat for Fuel.

A trial of peat for fuel on the Hudson River Railroad was recently made with the following result: The locomotive Stuyvesant left Poughkeepsie for New York with forty-three hundred pounds of peat on her tender. The engine was attached to a passenger train, making time all the way, nothing but peat being used to generate steam. The engineer and fireman both agree in the statement that the peat worked well, and that there was an abundance of steam on hand all the time. The forty-three hundred pounds carried the train forty-three miles.

☞ Hon. G. K. Jewett has been elected President of the European and North American Railway Company.

IMPROVED RAILROAD SWITCH.

Safety and Economy Combined.

The attention of every Railroad Company is called to this valuable improvement. It is light, simple and durable. It can be constructed at an advance of from $10 to $20 on the cost of the ordinary bar switch, and can be kept in repair and renewed from 25 to 50 per cent. less than it or any other switch in use, and is always safe, always adjusted to the main track, except when the lever is in the hands of the switchman—unless intentionally arranged otherwise. There being but one moveable switch rail, (the rail on the opposite side of the track being stationary), the wheels are deflected by means of a guide rail securely attached to the switch rail, thereby reducing the friction of the wheels on the rails 50 per cent. in passing over it either in or out of the sideling. I will give all Railroad Companies the right to put down under my supervision one or more of these switches; and I will give any person $1,000, that will run an engine or car off the track at any speed, or in whatever position the switch may be placed, or in any way injure the switch in running over it.

Baltimore, Md.

Welland (Canada) Railway.

The annual meeting of this company was held in London on the 10th inst. The report of the directors which was presented, stated that although the depreciation of American currency had continued to a more serious extent than had been anticipated after the close of the war, the working of the line during the past year had shown satisfactory progress as compared with that preceding it. The receipts for the year 1865 amounted to 20,551*l.*, while the actual working expenses of the line were 14,331*l.* To these, however, must be added the depreciation of American currency, amounting to 2,870*l.*, leaving a profit on the working of the line of 3,350*l.* There was, however, a loss on the propellers of 549*l.* This was accounted for by the extreme dulness of the traffic during the early part of the season, and the passenger traffic having proved unremunerative. The propellers had been the cause of bringing an increase of traffic, and of considerably enhancing the repute of the line for regularity and despatch. The grain traffic received at Port Colborne and carried on the line amounted to 3,783,140 bushels, or as nearly as possible an increase of 1,000,000 bushels over the return for 1864. The quantity of flour carried was 49,140 barrels, being 24,137 in excess of the number carried in 1864. The lighterages amounted to 566,936 bushels, as compared with 342,372 bushels in the preceding year. The number of passengers carried had been 33,802, or 5,765 less than those in 1864. With respect to the prospects of the present season, the directors thought them encouraging; but it remained to be seen how far the abrogation of the Reciprocity Treaty would affect the railway. The opening of the season, though much later than usual, brought a great influx of traffic, so much so that the elevators and line were kept in constant use night and day to despatch the cargoes. The directors had great pleasure in reporting that Mr. Reekie had now undertaken the management of the line, and they augured the best results from his energetic working of the line and boats, while they were sure that in his hands every possible economy would be secured. The amount of preference bonds taken up to this date was 30,000*l.*, inclusive of 2,000*l.* bonds, which had been sent to the directors in Canada. Those, together with money remitted, would, it was hoped, be more than sufficient for the liquidation of the debts of the company.

The Chairman, in moving the adoption of the report, said it was gratifying that they had at last got over all their financial difficulties, and that the directors now saw their way tolerably clear, after encountering various debts since the concern came into their hands. They had received 48,400*l.* on the second preference bonds, 30,000*l.* on other preference bonds, and 10,400*l.* in cash, making 88,800*l.* The late Sir S. Cunard and Mr. Brassey provided two boats for the company at a cost of 18,000*l.*, 9,000*l.* each, with a view to develop the traffic of the railway, and it was desirable to purchase those boats as soon as possible. With this exception the directors had discharged every liability against the company, or placed the necessary funds in the hands of the manager to do so. The whole cost of the line was now ascertained to be 357,000*l.*, of which 200,000*l.* would be in bonds and the rest in shares. The money had been raised with great difficulty, and at various times the rates of interest for the bonds varied from 6 to 8 per cent. The business of the company was chiefly confined to the carriage of grain, and when it was considered they had only one farthing a bushel profit, it would account for the small sum they had available for the past year; but if they could raise the profit to ½d. a bushel they would have double their present net earnings.

Their net profit on working last year was 3,350*l.*, and this year they had reason to believe it would be about 12,000*l.*, because in the first five weeks of Mr. Reekie's able management the line had earned a net sum of 3,100*l.*, or nearly as much net profit as in the whole of last year; but of course that rate could not be expected to continue. The propellers had met with no accident, and were making three trips per week to Oswego. They expected to carry between 6,000,000 and 7,000,000 bushels of grain this year over the line; and they had the means of carrying 10,000,000 bushels should it be sent for conveyance, which, at ½d. a bushel, would produce 20,000*l.* This would not only cover the whole of the interest on all the bonds, but leave a considerable sum for dividend on the shares. There was a sum of 28,922*l.* due on unpaid coupons, representing arrears of interest which would have to be capitalized, so as to enable the directors to apply the net receipts to the payment of current interest. If they could issue the remainder of the 8 per cent. bonds, they could pay 18,000*l.* for the boats or propellers, by which they would save 400*l.* a year.

Railroads of New York.

☞ The "miles of road," when in connection with Horse-power passenger roads are expressed in equivalent single track; in connection with steam-power railroads the length of route, not equivalent single track, is meant.

The following companies made no reports—Brooklyn and Canarsie; Brooklyn Central and Jamaica* (sold Aug. 7 and Sept. 13 under foreclosure); Brooklyn city and Rockaway; Brooklyn, East New York and Rockaway; Canarsie, Brooklyn and Winfield; Clinton Avenue (Albany); Cohoes and Waterford*; East New York and Jamaica*; East and North River; Flatbush, Coney Island and Canarsie; First Avenue and Jersey Ferries; Fulton Ferry and Tenth Avenue*; Greenpoint and Calvary; Greenpoint and Williamsburg; Harlem River and Tarrytown; Hunters' Point, Ravenswood and Astoria; Jersey Ferries and First Avenue; Kingsbridge, Highbridge and Forty-second street; Metropolitan Railroad; Metropolitan Railway; New York City Crosstown; North River and Wall street Ferry; Port Morris and Westchester; Rockaway and Brooklyn; Sheepshead Bay and Sea Shore; South Brooklyn and Bergen street*; Tenth Avenue and Grand street Ferry*; Third Avenue and Fordham; West Farms and Morrisania; Williamsburg and Coney Island. The larger number of the above have either not commenced operations or have made but little progress. Those marked thus (*) are in part or wholly in operation.

The following are exempt by law from making annual reports.—Buffalo street; Central City (Syracuse); Grand street and Newtown (Brooklyn); Maine and Ohio street (Buffalo); Niagara street (Buffalo); Syracuse and Geddes; Troy and Lansingburg. All these are being operated.

KNOX RAILWAY CLAMP.

Expansion allowed for by the elongated holes through the Rails.

DESCRIPTION OF CLAMP.

THE KNOX RAILWAY CLAMP consists of a wrought iron plate passing underneath the rails and bent up around the outside, so as to closely fit over the base, at the same time extending up and wedging in under and against the shoulder of the rails, thereby securing the principals, and deriving all the benefits of both the ordinary Lip Chair and the Fish Joint *combined*. We remedy the defects of the old Fish joint, at the same time tightening up the Lip attachment, by securing the bolts with wedged shaped keys connected by a spiral spring. This spring draws the keys in as fast as the rails wear into the clamp, so that as the rim of the wheels crowd the rails outward into the lip, and force the vertical part (like the Fish plate) in between the base and shoulder, the keys draw in and secure the rails, so that after the train passes they cannot fly back to their former loose position but are firmly held within the corrugated form of the clamp, thereby preventing the possibility of one rail being forced lower or higher than the other, and entirely doing away with the *Chick-a-ty-chick, Thump-a-ty-thump* noise, so annoying to passengers, and saving thousands of dollars annually in repairs by new rails and otherwise.

One can hardly realize the importance of having a chair that will continually keep the ends of the two rails of the same height, unless he watches a joint when a train is passing over at full speed: then, and only then can he form any idea as to the force with which a wheel strikes the least projection of a rail, one above another, which is the sole cause of the splitting or "brooming" of the ends of the rails, breaking of wheels and axles, and racking of both engines and cars, all of which arise from the rails wearing, and soon becoming so loose in the chair that it is unsafe for a train to pass over them.

It is an *undeniable* fact that, until the KNOX CLAMP was introduced, there has been no chair made that worked tight; but on the contrary, all get looser as they become worn, whereas by examining our CLAMP, it will be seen by its simple construction, that the more it is used, and the more wearing and shaking there is, the tighter it becomes, which arrangement is entirely independent of and has nothing to do with the expansion and contraction, which is provided for the elongated holes through the rails; furthermore, each clamp allows for the expansion of its respective rail only, which is much safer than the ordinary lip chair, which allows the rails to slide along and open at a single joint from two four inches, resulting oftentimes in very serious accidents.

The greatest weight comes direct on the strongest part of the CLAMP (vertical portion between the base and shoulder, which also helps to support the shoulder) and decrease to the weakest point. For instance: The crowding outward of the rails removes all strain on the keys, and it is only after a train has passed and the rails undertake to fly back to their former loose position that they have to resist any pressure, and under no circumstances is there any strain whatever on the springs, except their own tendency to draw together; and should they break (which is not likely, as they test from 30 to 40 pounds), the ends are so fastened to the keys that the latter cannot work out of the bolt; but admitting that they could, and the bolts also come out, we then have a better article than the ordinary lip chair now in use, for the spikes through the CLAMP and Rail on the inside keep the latter in place, and the bracing under the shoulder on the outside attains the same end, and is far more effectual than an inside lip; for when a train is passing the rails are crowded outward so that they will not touch the inside flange, thereby compelling the outside lip to resist all the leverage, which at times is so severe as to break it off, unless bolted to the rails as we do ours, which plan, added to the Fish joint arrangement and the way in which the whole is combined and secured to the rails, one can easily see the great advantage we have over all other joints.

In conclusion we will say to Roads wishing to order, that we are prepared to furnish either the SINGLE OR DOUBLE KNOX RAILWAY CLAMP by the quantity, and we will *guarantee them to hold the rails tighter and tighter* instead of loosening, as is the case with all other chairs where the rails are so soon destroyed.

These clamps can be seen in operation where they have been down since 1863, and the ends of the rails are as perfect and even as when first laid down.

Railway iron already punched and of the most approved patterns furnished at the lowest market price.

KNOX RAILWAY CLAMP COMPANY,
Office, 249 Pearl Street, New York.

☞ The Washington *Chronicle* says: "The Chesapeake and Ohio Canal Company, at their late meeting at Berkeley, appropriated the amount requisite for raising the canal bridges in this city, and plans and estimates are to be prepared at once. With this outlet for the coal trade, our business men think the necessity for the 'reconstruction' of the Alexandria aqueduct is not apparent, as carriage of coal by river to Alexandria will be less than by the canal."

American Railroad Journal.

Saturday, July 28, 1866.

Stock Exchange and Money Market.

A very marked increase in the available supply of money is reported, this week, giving all first class borrowers unusual advantages in the negotiation of loans. The demand for accommodation, however, is quite moderate in the absence of anything like vigorous movements in business circles. Speculation at the Stock Boards is temporarily devoid of much spirit, though symptoms are not wanting of an early revival of active operations in this line. In produce and merchandise, the current transactions are on a restricted scale, taken as a whole, yet merchants do not seem to be in urgent need of pecuniary aid, to enable them to carry their stocks into the autumn. The large dealers in national stocks have had liberal offers of money at 4, and, in several instances, as low as 3 per cent.; while the foremost Stock Exchange firms have been abundantly supplied at 4@5 per cent. on call. Prime short-date commercial paper is not plenty, and is in great favor among lenders, who readily respond to all first class discount applications at the rates of 5@6 per cent. per annum. The last weekly return of the city banks, to July 21, is regarded as an eminently favorable one. It showed a gain of $4,983,015 in the legal tender reserve, and of $5,859,035 in the deposit item; with a reduction of $3,168,416 in the volume of loans, $225,152 in circulation, and $1,591,537 in the specie reserve, as compared with the footings of the preceding weekly statement. The bank Clearing House exchanges averaged only $95,225,813 a day, through the week, against $106,275,964 a day, during the week ending July 14. The exchanges the first two days of the current week have been as follows: Monday, $81,974,397; Tuesday, $78,268,445. These figures are significantly illustrative of the increasing dullness in business, an usual feature in mid-summer, when everybody that can get away for a short vacation, is leaving the city. The U. S. Sub-Treasury receipts, week ending with July 21, were $13,797,169, including $2,480,149 from customs duties; payments, $16,472,439; balance at the close of the week, $91,572,929, against $921,248,198 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $1,539,422, and payments, $13,674,357; Tuesday, receipts, $1,777,796, and payments, $585,162. The balance at the close of business on Tuesday stood at $83,630,627. The cash balance in the vaults of the U. S. Treasury at Washington, on the 21st inst., amounted to $97,678,460, including $86,232,425 of a surplus issue of legal tender notes.

The fluctuations in the Gold Market have not been important. The extremes of the week have been 148¾ and 151¼. The lowest figure was touched on Saturday, and the highest was realized on Monday. On Tuesday, the range was 150 to 150⅝ to 150⅛. On Wednesday, the opening rate was 150, followed by a decline to 149½, and a rally to 150⅛. The speculative demand has been moderate. The export inquiry has been somewhat brisker. Saturday's exports of specie were $351,373, and Wednesday's, $925,804, making the total since our last, equal to $1,277,177, against receipts of $2,064,062 of California gold on Saturday. Wednesday's exports consisted mainly of California gold bars. Government received last week, $2,480,149 from customs duties at this port; and disbursed through the Sub-Treasury only $324,100 on account of the coin interest on the public debt. The city banks now hold a specie reserve of $10,860,147, against only $7,797,218 on the 1st inst.

Foreign exchange has been in more liberal supply and less urgent demand, since our last, at declining rates. Though much dissatisfaction was expressed through the public journals of Great Britain at the stubbornness of the Bank of England directors in withholding the expected relief from business interests, the private letters recently received speak rather more encouragingly of the immediate future, thus fostering confidence on this side, and tending to depress the Exchange Market considerably below the specie shipping point. The buoyancy of American stocks in London is also another inspiriting sign of the times. Bankers' sixty day bills on London closed heavily at 108⅛@108⅞; on Paris, at 5.20 @5.15; sight bills on London, 109¾@110¼; on Paris, at 5.13¾@5.10. The gradual revival of the export trade in domestic produce, especia in cotton, corn and provisions, serves to swell

supply of merchant bills, and in these there is most depression. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,867,787, against $2,847,757 same week last year. The exports since Jan. 1, have been to the value of $116,123,753, or full twenty-eight and a half million dollars in excess of the exports, same time last year.

There has been a decided decrease in the volume of business at the Stock Boards and in the street, not only in Government securities, but in railway and miscellaneous property, and this, too, in the face of an extraordinarily easy Money Market. Very many of the leading Stock operators are absent from the city. The Government security list has yielded a fraction in most instances; the depression being most apparent in the 5-20s of 1865, and in the several issues of the Seven-Thirties. An informal offer has been made to the public by the Treasury officials to exchange Five-Twenties of 1865, for Seven-Thirties, on equal terms, as to principal, and an equitable adjustment of the accrued interest. Prior to this announcement, an important sum of the Seven-Thirties had been quietly converted into the Five-Twenties through the Government Loan Agency at a cost to the Treasury Department of only about an eighth of one per cent. commission. Since the announcement was made public, the conversion business has practically ceased; and both classes of national stocks directly affected by it, have been receding in price. On the other hand, the Sixes of 1881 have been comparatively firm, on a limited supply and a fair investment inquiry; the 5-20s of 1862 have been buoyant, influenced by the favorable foreign advices and the consequent improvement in the export demand. The 10-40s have been in less favor, since the publication of the new funding measure of Senator Sherman, which is adversely criticised in the street, and which is not deemed advantageous to the public credit. As, however, there is not much probability of its being decisively acted on during the present session of Congress, ample time will be available to canvass the subject of funding thoroughly, and mature a plan, which, while it will shield the interests of the national Treasury, will likewise prove of a practical nature, and reasonably tempting to the creditors of the Government. Compound interest notes have stiffened a fraction, under a partial renewal of the investment demand.

In railway and miscellaneous stocks and bonds, the dealings of the week have been on a restricted scale, especially during the first three days, when the market succumbed to the prevailing dullness. During the past three days, there has been more disposition evinced to purchase for a rise, and the tendency of prices has been toward a higher range. The street opinion is that we are on the eve of another active speculative period, and this theory would seem to derive confirmation from the apparent eagerness of certain clique operators to "load up" at what they regard as the current low rates. Should money continue even approximately as cheap as it is at present, there can be no reason to question the power of the *bull* interest to gain complete control of the Share Market.

In general business, there is a tardy to revival. The long depressed Dry Goods interest begins to show "signs of life." Prices of all desirable fabrics, foreign as well as domestic, are quoted very firm on a moderately supplied market. The entries of foreign dry goods at this port, last week, were $2,378,815, against $1,240,829 same week last year. Foreign merchandise is quoted steady, with an increasing demand. Domestic produce is moving more freely. Flour, wheat, and oats are cheaper, and are in somewhat better request, partly for export. In Corn, there is an active export trade in progress, which tends to strengthen prices. Provisions have attracted more attention in part from shippers; the leading articles closed in favor of sellers. Other commodities are moderately inquired for at about uniform rates. The metal market is temporarily dull, but holders are not disposed to make any important concessions to buyers. The freight interest is less prosperous, as produce is only going forward at reduced figures.

Government received, through the four leading ports on the Atlantic, during the fiscal year ending with June 30, 1866, the sum of $159,608,012 in the form of customs revenue, including through the port of New York, $132,522,722; Boston, $16,792,987; Philadelphia, $6,616,271; and Baltimore, $3,676,032.

Government receipts from internal revenue last week were $4,931,935; thus far this week, they have been as follows: Monday, $1,383,537; Tuesday, $598,726. The total income from this source, since July 1, has been $20,778,929.

The New York exports, exclusive of specie, for the week ending July 24, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,847,757	$2,867,887
Prev. reported	84,857,260	113,255,966
Since January 1	$87,605,017	$116,123,753

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,240,829	$2,378,815
Gen. merchandise	2,446,345	3,875,179
Total for the week	$3,687,174	$6,253,994
Prev. reported	82,317,012	175,157,867
Since January 1	$86,004,186	$181,411,861

The balance in the Sub-Treasury on Wednesday was $84,399,165 94.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, Water Loan, 94; Jersey City Water Loan, 93; New York State 6s, 1873, 97¼; do. 1868, 98½; do., 7s, Bounty Loan, 104¼; Tennessee 6s, new, 70; Illinois War Loan, 97; North Carolina new bonds, 62, Louisiana 6s, 95; Ohio 6s, 1881, 100½; do., 1875, 99½; Connecticut 6s, 100½; Chicago and N. W., consolidated bonds, 73; Ohio and Miss. 1st mort., 90; Long Dock bonds, 99; Pacific 7s guar., by Missouri, 80; McGregor Western 1st mort., 60; Milwaukee and St. Paul, pref., 70; do., 1st mort., 90; New York and New Haven R. North Missouri Railroad Bonds.

The North Missouri Railroad Company are offering for sale, through the Banking House of Messrs. JAY COOKE & Co., six millions of their Seven per Cent. First Mortgage Bonds, having thirty years to run, with coupons payable in New York on January 1, and July 1, in each year. The proceeds of these bonds will be used in extending a road already completed 170 miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa; and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri River, so that this mortgage of $6,000,000 will cover a complete and well-stocked road of 389 miles in length, costing at least $16,000,000, with a net annual revenue after the first year of over $1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The railroad connects the great city of St. Louis, with its 200,000 inhabitants, not only with the richest portions of Missouri but with the States of Kansas and Iowa and the great Pacific Railroads.

Having caused careful inquiry to be made into the condition and prospects of this road, which was examined by W. Milnor Roberts, Esq., and others, in their behalf, Messrs. Jay Cooke & Co., have no hesitation in recommending the bonds as first class securities, and a safe and judicious investment. $500,000 of these bonds may now be obtained at 80 cents on the dollar, if early application is made.

Calvert Iron and Nail Works.

These works, situated in Baltimore, Md., were established in 1848 by the late J. HOPKINSON SMITH, and were incorporated in 1865. They are provided with machinery for producing every variety of Railroad Track Fastenings in general use in this country—including the Rolled Continuous Lip Chair. The works are capable of producing 2,000 tons per annum; and with a full supply of spikes and chairs of the different patterns always on hand, the company will be enabled at all times to fill orders with promptness. Also, manufacturers of the "Dougherty Patent" Railroad Switch—a perfect security against the running off of trains at turnouts, etc. Address Calvert Iron and Nail Works Company, 25 South Charles street, Baltimore, Md.

Fidelity Insurance Company.

This is the title of a company established at No. 170 Broadway, New York, for the purpose of guaranteeing the honesty and fidelity of employees for a moderate premium. Railroad Companies, Merchants, Banks, Bankers, Insurance Companies, and all employers are invited to adopt this security. Cashiers, Tellers, and others holding places of trust, and who are required to give bonds for the faithful performance of their duties can have their integrity guaranteed for a moderate premium. Capitalists who are solicited to sign bonds for friends who hold places of trust can avoid such responsibility by referring them to the Fidelity Insurance Company. This company was chartered by the Legislature of New York, April 7, 1865. Its trustees are men whose integrity cannot be questioned, and employers are assured of the continued solvency of the company. Prospectuses, forms of application, etc., can be had on application to the company as above.

Important Improvement in R. R. Tracks.

In the "Philadelphia *Press*," of the 21st, an article appeared giving as Railway statistics, that in September there were in the United States 593 Steam Railway Companies, with nearly 36,000 miles of railway, and paying out for annual expenses $1,266,336,000; Pennsylvania taking the lead in the number of miles, Ohio being next and Illinois third. A great proportion of this immense outlay could be reduced, especially in rails and rolling stock, (caused by jaring,) if a perfectly smooth track with *even joints* could be had. This was thought to be accomplished in what is known as the "Fish Joint," but on account of the nuts rattling off these in many cases had to be abandoned and the old fashioned chair again substituted. This week we give for the benefit of railway managers a full description of Knox's Patent Clamp which is nothing more than the old style chair and the Fish Joint *combined in one* with a very simple arrangement whereby instead of nuts working off, the more shaking there is and the longer the clamp is down the more perfect the joint becomes. The thing itself looks more practical than any written description that can be given. We understand the company are furnishing Superintendents with full size working models on application by letter.

☞ Messrs. Vossnack & Meissner, Mechanical Engineers, 5 Tryon Row, New York, have for sale twelve locomotive engines at reasonable prices and on liberal credit. They are new, built after good designs, and of the best material and workmanship. For a description of these engines, see their advertisement.

☞ We invite attention to the advertisement of the Steam Syphon Pump Co., in another column.

Dorchester and Delaware Railroad.

At a meeting of the directors of this company held at Cambridge, Md., on the 18th inst., Mr. S. D. Hessey the Engineer of the road, submitted the result of the preliminary survey made by him, giving some three different routes, and after full consultations among the Board of Directors, we understand that they located the road in part; that is, from Salem to a point in the New Market and Crotcher's Ferry road, between Donoho's and New Market, and from thence to the Wading Place near Federalsburg. This much of the road we understand to be a permanent location, on condition that the people along the route will subscribe liberally towards building the road. The Directors also ordered the location of the road from the Wading Place to Seaford, and also to Bridgeville, and will permanently locate on the route which will subscribe most liberally. The distance from Salem to Donoho's is 3½ miles; from "Wading Place" to Bridgeville 10¼; from "Wading Place" to Seaford 9½. The reason given for not locating from Cambridge to Salem is, that the Directors desired Mr. Hessey to locate on his maps a few more points near Cambridge before they could properly decide where it should run. Mr. Hessey commenced locating on Monday.

☞ The earnings of the Philadelphia and Reading Railroad in May, 1866, were $1,109,266, against $416,340 in May, 1865—an increase of $692,926. The net profit for the month was 495,013, against $2,126 for the same month last year—an increase of $492,887. For the first six months of the present fiscal year the net profit has been $1,696,991, against $1,530,441 in the corresponding period of the preceding year—an increase of $166,550.

☞ At the last session of the Connecticut Legislature a law was passed providing that each railroad company conveying passengers shall provide their passenger, baggage, mail and express cars with a connecting apron of the full width of the train, so as to connect the platforms and enable persons to pass from one car to the other with safety. If this provision is not complied with by the 1st of September, 1866, each company neglecting it forfeits to the State Treasurer $100 for every day of such neglect. These aprons have to be examined and approved by the State Railroad Commissioners, and are of much value in guarding passengers who move from one part of the train to another.

☞ The Fall River *News* mentions a new railroad being constructed at the Copper Works of Crocker Bros. & Co., near the Portsmouth coal mine, to connect with the track of the Old Colony and Newport Railroad.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending July 20th, 1866, were $54,715 72
Corresponding week of 1865 ..... 53,110 60

Increase..... $1,605 12

The earnings of the Grand Trunk Railway of Canada for the week ending July 14th, 1866, were $125,259 00
Corresponding week of previous year.. 115,000 00

Increase..... $10,259 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in July, 1866 .. $21,044 00
Corresponding week previous year.... 24,380 40

Decrease $3,236 40

The earnings of the Western Union Railroad for the week ending July 14, 1866 .... $21,177 25
Corresponding week previous year.... 17,167 89

Increase..... $4,009 36

The earnings of the Chicago and Great Eastern Railway for 2d week in July were..... $19,796 00
Same period last year..... 22,684 87

Decrease in 1866 ..... $2,888 87

The earnings of the Michigan Central Railroad for the 2d week in July, 1866, were ... $72,081 01
Corresponding week of previous year.. 72,942 55

Decrease $861 54

The earnings of the Chicago and Rock Island Railroad for the 2d week in July, 1866, were $58,075 00
Corresponding week of previous year.. 51,661 00

Increase..... $6,414 00

The earnings of the Chicago and Northwestern Railway for the second week in July, 1866 were..... $191,859 96
Corresponding week of previous year.. 179,744 81

Increase..... $12,115 15

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in July, 1866, were..... $85,474 00
Corresponding week of 1865 ..... 65,185 00

Increase..... $20,289 00

The Case of the New York Bankers.

We have been favored with the following opinion of Justice Nelson, of the United States Supreme Court, (Circuit of Southern New York) on the question of taxing the Sales of Bankers, while acting as both Bankers and Brokers, for their own account.

UNITED STATES CIRCUIT COURT.—BEFORE JUDGE NELSON.

Clarke, Dodge & Co. *vs.* The United States and S. Shook, Collector, and S. P. Gilbert, Assessor.—In June last a motion was argued by Mr. John E. Burrill, counsel for Clark, Dodge & Co., to continue an injunction to restrain the collection of taxes claimed by the Collector of Internal Revenue to be payable on sales of stocks and securities.

In the bill plaintiffs stated that they were bankers, duly licensed as such, and that their transactions were as follows:

1. They receive such securities for sale and discount, and in such cases make sales.

2. They lend and advance on such securities, and in such cases sell to reimburse themselves.

3. They buy and sell such securities on their own account.

4. In the fourth paragraph of the bill they stated that they received orders to buy, and in such cases bought in their own names and transferred to their principal on repayment, and in case of non-payment sold to reimburse themselves.

The Commissioner of Internal Revenue claimed that plaintiffs were liable to pay taxes on all sales made by them in the classes of transactions above enumerated, and also that even if they would have been exempt from taxation on such transactions had they confined themselves to the business of bankers; the fact that they did business as brokers deprived them of that exemption and subjected them to taxation in regard to all their sales in the same manner as if they were not bankers.

In support of the application affidavits were read, showing the course and custom of dealing in New York.

In opposition to the motion, Mr. S. G. Courtney, United States District Attorney, read an opinion of the Attorney-General and the instructions from the Commissioner of Internal Revenue to the Collectors and Assessors.

The counsel for Clarke, Dodge & Co., made substantially these points.

1. The tax imposed by the 99th section of the Revenue Act is imposed upon brokers, and not on bankers.

2. The 79th section of same act expressly authorizes bankers to "receive stocks and securities for sale or discount," and to "lend and advance on such stocks and securities," and this necessarily carries with it the right to sell the same, either to reimburse themselves or to discharge the duty to sell imposed by the receipt of such stocks for the purpose of sale.

3. That the transactions in the *fourth* subdivision of the bill mentioned were equally exempt, because:

(*a.*) No tax is imposed on the *purchase* of stocks and securities, but only on the sales.

(*b.*) When the purchase is made no tax or duty is payable until the banker *sells*.

(*c.*) In such cases no sale is made unless by *order* of the principal or to reimburse the amount paid by the banker on the purchase, and in either case the transaction is within the catagory of "stocks received for sale or on which loans or advances are made.

4. That the distinction between the banker and the broker is clear and well defined, and that even if it should be that the transactions above mentioned were such as a broker might engage in, this did not convert the banker into a broker, or deprive the banker of his exemption.

5. That even if the transactions in the fourth or other sub-divisions should be decided to form part of a broker's business, and taxable as such, this did render the plaintiff taxable in respect to transactions which formed a part of the business of bankers.

6. That by combining the business of a banker and broker, the banker did not lose the exemption to which he was entitled as banker.

7. That even if the plaintiffs were taxable in respect to transactions had on account of others, this did not render them taxable on transactions made on their own account.

8. That the Supreme Court of the United States, in the case of Fisk & Hatch, decided that bankers were exempt from taxation upon all transactions as bankers.

9. That in the case of Cutting, that Court decided that a broker doing business under the 9th paragraph of section 79 was liable to pay taxes on all transactions specified in that paragraph.

10. That the Supreme Court had *not* decided that a banker licensed under the first subdivision of section 79 was liable to pay any tax on the business for which he is so licensed, nor that where bankers engage in transactions on which brokers likewise engage, that they thereby lose such exemption as brokers.

The District Attorney controverted these propotions, and, in addition to the oral argument, filed a pointed brief, in which the questions were thoroughly discussed.

The following is the opinion of Justice Nelson, which was filed in the case:

The bill is filed, in this case, against the defendants, who are the assessors and collectors of the Thirty-second Collection District of New York, under the internal revenue laws, for the purpose of restraining them from the assessment and collection of a tax claimed to have accrued against the plaintiffs as bankers, doing business as brokers, within said district, under the following circumstances:

The plaintiffs have a license as bankers, and have from time to time received at their banking house stocks, bonds and bullion for sale, and also have, during the same time, received bills of exchange and promissory notes for discount and sale, and did discount and sell the same on and for the account of the parties from whom received, and charged the customary compensation as bankers; and also, during the time aforesaid, did, at their banking house, lend and advance moneys to various parties, on stocks, bonds and bullion, and, after such advances and loans, did sell said stocks, bonds and bullion, on account of the parties from whom the same were received, and to whom the moneys were lent and advanced, deducting from said sales the moneys so loaned and advanced, with the interest and customary charges as bankers; and also bought and sold stocks, bonds, &c., on their own account, and not on commission or for others. The tax claimed as having accrued out of the above dealings is 1-20th of 1 per centum, monthly, on all the sales of the stock, bonds, &c., under the 99th section of the act (13 U. S. St. p. 273,) which imposes the tax on brokers, and "bankers doing business as brokers." The question in the case is, whether or not the plaintiffs in carrying on the aforesaid business under a banker's license, are to be regarded as bankers doing business as brokers. The 1st subdivision of this 79th section (p. 251,) enacts that bankers employing capital, not exceeding $50,000, shall pay $100 for a license, and two dollars for every thousand over this amount—and then defines the term banker: "Every person, firm, company, &c., having a place of business; (1) where credits are opened by the deposit or collection of money or currency, subject to be paid or remitted upon draft, check or order; (2) where money is advanced or loaned on stocks, bonds, bullion, bills of exchange, or promissory notes; (3) where stocks, bonds, bullion, bills of exchange, or promissory notes are received for discount or sale, shall be regarded a banker under this act." Besides the license fee exacted, the banker, under the 110th section, (p. 277,) pays a tax of 1-24 of 1 per centum, monthly, upon the average amount of deposits—1-24 of 1 per centum monthly upon the average amount of the capital of his bank beyond the amount invested in United States bonds—1-12 of 1 per centum monthly on the average amount of circulation if issued by any bank—and in addition, 1-6 of 1 per centum monthly on the amount of circulation beyond 90 per centum of the capital. The license fee and the above tax are the burdens imposed on the banker for the privileges conferred. Now among these is the privilege of doing the business set forth in the bill of complaint, and to which we have referred at large; and yet, it is claimed, the plaintiffs are liable to the additional tax as brokers specified in the 99th section of the act. According to this construction the license or privilege of the banker would be of little value. He might, indeed, receive deposits and pay them out, advance or lend money on stocks, bonds, &c.; but in case of default or repayment, he must not sell the pledge to reimburse himself—he may receive stocks, bonds, &c., for discount or sale, but is not at liberty to sell. If he does, it is insisted he instantly becomes a broker, and liable to the broker's monthly tax, in addition to the banker's, which he has already paid. We cannot agree to this view of the act. On the contrary, we are satisfied the banker is both, by express terms, as well as by necessary implication, empowered to carry on the business, authorized under his license, to its practical and useful results. That, when he is authorized to lend or advance money on stocks, bonds, &c., he has the right in case of default in the re-

payment, to convert the security into money by way of reimbursement—and, when authorized to receive stocks, bonds, &c., for sale, he may sell the same without, in either instance, making himself a broker. The United States *vs.* Fisk *et al.*, decided at the last term, carried the privileges of the banker far beyond the present case; for it was there held that he could purchase and sell stocks, bonds, &c., for himself, and on his own account, under his license—a business not specified in the definition of a banker. That case, in effect, decided that any business which a banker could carry on, as such, did not fall within the 99th section of the act. The case of the plaintiffs as set forth in the fourth paragraph of the bill, is in substance, as follows: That in carrying on their business as bankers, they purchase stocks, bonds, &c., for others, but make the purchases in their own name, and advance their own money, and take the transfers in their own name, and hold the stocks as security for repayment by the persons for whom purchased; and on receiving such repayment, interest and customary charges, delivers the stocks, bonds, &c., as per agreement—or in default of repayment, they sell the same to reimburse themselves. This business is not only outside of the business of a banker, as defined by the act, but comes directly within that of a broker, and subject to the tax under the 99th section. But, it is urged, that if the plaintiffs, in any of their dealings in stocks, bonds, &c., are brought within the category of bankers doing business as brokers, their whole business, as bankers, is thereby brought within it, and subject to the brokers' tax; and this extraordinary proposition is supposed to be decided in the case above referred to. The ninth subdivision, (p. 252,) declaring who shall be a broker, is as follows: "Every person, firm or company, &c., except such as hold a license as a banker, whose business it is as a broker to negotiate purchases or sales of stocks, bonds, &c., shall be regarded as a broker." The exception takes the banker out of the category of broker, and to make it more clear what was intended by the exception, a proviso is added, "that any person holding a license as a banker shall not be required to take out a license as a broker;" meaning, obviously, that he may do business as a broker under his license as a banker. But, surely, there is nothing in the provision which thus permits the business both of a banker and broker to be carried under the broker's license that suggest the idea, or gives any countenance to it, that dealing in both capacities merges the banker into the broker, so as to subject all his dealings to the broker's tax. The fair and natural inference would seem to be the other way, namely: that the broker is merged in the banker. But, we suppose, the reasonable and proper conclusion is, that although the license of banker authorizes him to do the business of a broker without further payment of money, yet, so far as he may do that business, he is to be regarded as a broker, and must pay the broker's tax. This we think is not only the natural conclusion and fair legal effect from the provisions of the law referred to, but is confirmed, as will be seen, by the language of the 99th section, imposing the tax on brokers, as follows: "That all brokers and bankers doing business as brokers shall be subject to pay the following duties," &c.; clearly enough implying that the banker, beside carrying on his own business, may also engage in business as a broker; but in such case, and as respects the business done as a broker, he must pay the tax imposed over, and above what he has already paid as a banker. This view of the statute was taken in the case of the United States *vs.* Fisk *et al.*, and is stated in the opinion in a few words: "Now, a banker," says Mr. Justice Grier, "pays a much higher license than a broker, and is permitted to prosecute or carry on the business or profession of a broker without paying any further license; but, if he prefers, he may not combine that business with own." Without pursuing the case further, an injunction must issue in conformity with the above opinion. If any difficulty arises in the settlement of this order, it can be referred to me.

John E. Burrill, counsel for Clark, Dodge & Co.; S. G. Courtney, U. S. D. A. for defendants.

The Court also rendered decisions and opinions in another case submitted at the same time as follows:

Lewis Einstein *et al. vs.* Sheridan Shook.—NELSON, C. J.—There is one question in this case not involved in the case of Clark and others against Gilbert and Shook, nor in any case heretofore before this Court; and that is, whether or not a banker, who purchases and sells stocks, bonds, &c., for others, and therefore, falls within the category of a banker doing business as a broker, but who sells the stocks, bonds, &c., through intervention of a broker, is liable to pay the broker's tax under section 99. The argument is that the tax on the sales has already been paid by the broker called in and who actually made them. As this case came before the Court on short notice, at the close of the sitting we will hear a reargument on the point, and at the same time an explanation by affidavit by either party, as to the mode and manner of conducting the business thus claimed to be exempt from the tax.

Interest and Dividends.

The Illinois Central Railroad Company will pay, August 1, a cash dividend of five per cent., free of government tax, to holders of full paid stock.

The New Jersey Railroad and Transportation Company will pay, August 1, a semi-annual dividend of five per cent., free of government tax.

The Delaware and Raritan Canal and Camden and Amboy Railroad Companies have declared a cash dividend of 5 per cent., clear of tax, payable on the 31st instant. Accompanying this announcement is a notice that all who were shareholders on the 19th of July, instant, will be entitled to take one new share of stock at par for every four shares held, provided the right to do so is availed of before the first day of September, 1866.

The Morris Canal and Banking Company will pay, August 7, dividends of 5 per cent. on their preferred stock, and of 5 per cent. on their consolidated stock, free of tax.

The Philadelphia and Trenton Railroad Company have declared a dividend of 5 per cent., clear of tax, payable on and after the 31st instant.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of 8 per cent., payable August 1.

The Cleveland, Columbus and Cincinnati Railroad Company have declared a dividend of 4 per cent., payable August 1.

The East Mahanoy Railroad Company a semi-annual dividend of 3 per cent. free of tax payable on demand.

The Little Schuylkill Railroad Company, a dividend of $1 per share.

The Lehigh Valley Railroad Company a quarterly dividend of 2½ per cent.

The August coupons on bonds of the Union Pacific Railway Company, Eastern Division, will be paid in this city, in gold, by Jay Cooke & Co.

☞ The Portsmouth, Great Falls and Conway Railroad Company has obtained from the Legislature of New Hampshire authority to increase its capital stock to a million and a half dollars, and to extend its track to the Atlantic and St. Lawrence Railroad in Gorham, N. H. The directors have elected the officers of last year, viz.: G. M. Browne, of Boston, President; John B. Parker, Salem, Treasurer, and W. H. Hackett, of Portsmouth, Clerk.

Warren and Franklin Railroad.

The route of this road is wholly along the Allegheny river, commencing at Irvine on the Philadelphia and Erie Railroad and extending thence to Franklin in Venango county, a distance, we believe, of about fifty-five miles. The road has, for a short time, been in operation from Irvine to Tidioute; and in next month, it is said, it will be completed to Pithole creek, where what was begun as the Clarion Land and Improvement Company's Railroad is merged in it from Pithole to Oil creek, a decision of the Supreme Court having squelched the Clarion Land and Imprement Company's railroad aspirations, and constrained it to sell out to the Warren and Franklin Railroad Company, whose road will be operated as a tributary to the Philadelphia and Erie Railroad, from the sources of oil supply.

From Irvine to Oil City the distance is about forty-eight miles; whether or when the Warren and Franklin Railroad will be extended from Oil City to Franklin, seven miles, we are unable to say; though it is obvious that the Allegheny Valley Railroad, which is now open from Pittsburg to Mahanoy, fifty-five miles, will be pushed on up the valley to Franklin or such other point as will give it a connection with a road of its own gauge (4 feet 8½ inches) and thereby establish an unbroken narrow gauge route from Pittsburg to the Philadelphia and Erie Railroad, and also between the last named road at Irvine and Corry, and the Western Pennsylvania Railroad at Freeport.

In other words, the narrow gauge roads in Northwestern Pennsylvania, like the narrow gauge roads east of the Allegheny mountain, will be so connected together, by necessary links, as will allow each one to co-operate in a general plan for reciprocal intertrade of freights by interchange of cars, without transhipment of goods at the intersections.—*U. S. R. R. and Mining Register.*

Lehigh Navigation Company's Railroad.

The Easton *Express* says: "The cribbing for the piers of the new railroad bridge of the Lehigh Navigation Company, across the river at Easton, is nearly completed, and will be sunk in a few days, when in a short time will be seen looming up, from the placid Lehigh, a splendid structure of masonry upon which the bridge will rest. The work in the "cut" and the piers at Williamsport, below Easton, are also nearly completed. The work goes bravely on, and no time, it appears, shall be lost to have the new road completed and in running order at the earliest day possible."

☞ The Baltimore City Passenger Railway Company has paid to the park commission for the quarter ending June 30th, $18,808 50, being one-fifth of the gross amount of receipts of said company for that period. The "York Road Passenger Railway Company" has also paid, for the same term, $527 17. The whole amount paid to the park commission by the Baltimore City Passenger Railway Company for the first six months of the past year is $34,006 15, and by the latter company, $527 17. This income of the park is appropriated to the payment of the interest on the city bonds issued for the purchase of the park, and the balance, if any, is expended in improvements.

☞ Trains on the Agricultural Branch Railroad have commenced running from Fitchburg to Boston, *via* Clinton and Framingham. This road opens up communication between Worcester and the towns of Bolton, Berlin, Northborough and Marlborough.

☞ In 1865, France had 97,278 kilometres of telegraphic wires at work; 610 offices were established, 1,967,748 despatches sent, and 6,123,272f. realized therefrom.

Journal of Railroad Law.

FENCING RAILROAD.—WHEN THE DUTY IS ASSUMED BY THE LANDOWNER.

Illinois Central Railroad Company *vs.* Elijah W. Swearingen.

Appeal from the Circuit Court of De Witt Co., the Hon. John M. Scott, Judge presiding.

This was an action on the case, instituted in the Court below by Elijah W. Swearingen, against the Illinois Central Railroad Company, to recover damages for the killing of three horses of the plaintiff on the road of the company.

The ground of recovery, as set forth in the plaintiff's declaration, was that by reason of the fences along the company's road not being kept in repair, the plaintiff's horses got upon the track and were run over by the cars and engines of the defendant, and thereby killed. It appears that the railroad ran through the pasture of the plaintiff, and the horses got out of this pasture upon the track through the railroad fence. The plaintiff alleged in his declaration, that he had not, as proprietor of the lands, erected, or agreed to erect, the fence in question.

Mr. Chief Justice Walker delivered the opinion of the Court.

It is insisted that appellee was not entitled to recover because he averred in his declaration that he had not, as the proprietor of the lands, erected, or agreed to erect, the fence required by the act of 1855, (Scates' Comp., 953,) when the proof shows that he did erect the fence. It also appears that the company fully admitted and recognized their liability to erect and maintain this fence, when they employed appellee, for them and with their materials furnished for the purpose, to erect the fence, and for which they paid him the sum agreed between them. Is this such an agreement as the statute contemplates shall release the road from its liability, and impose it upon the owner of the adjoining land? We think not. The act imposes the duty upon the company, but at the same time permits them by contract with the owner, to absolve themselves from its performance, by agreement with the owner that he shall assume it.

It cannot be imagined that it was the intention of the law makers to transfer this duty from the company to the land owner, simply because the company employed him as their agent or servant to construct the fence. The statute only contemplates the release of the company when the duty is assumed by the land owner, and in this case it is perfectly apparent that when he was employed to build this fence he did not intend, nor did either party suppose, that he was taking upon himself such a duty. It might as well be contended that because a hand in the employment of the company under their direction, and in discharging their duty, had built the fence and afterwards became the owner, that the duty was transferred from the company to him. It is not probable that it ever occurred to appellee that it could be imagined that he had assumed this duty, until he heard it claimed on the trial below, or to the company and its agents until they began to prepare for the defense of this suit. The pleas of appellant, to which demurrers were sustained, only relied upon this fact as a defense, and were, therefore, insufficient, and the demurrers were properly sustained to them.

It is likewise insisted that the Court erred in refusing to give appellant's last four instructions. The first of which asserts that the company, having built a good and sufficient fence, if it was blown down or thrown down by trespassers, and loss thereby ensues, before a reasonable time had elapsed for its repair, that the company are not responsible for damages thus occasioned. This instruction, like the sixth, asserts that where the fence has been insufficient to turn stock, they have a reasonable time within which to repair their fence. This is manifestly true, as it is not required that the company should have a patrol at all times, night and day, passing along their road to see the condition of the fence. If this is done daily, and they shall at once, when informed of its insufficient condition make the necessary repairs they should not be held liable. This was the rule adopted in the case of The Central Railroad Company *vs.* Dickerson, 27 Ill., 55, and the instructions numbered four and six should have been given. Under these instructions, it would have been for the jury to consider in the light of all the circumstances appearing in the case, whether reasonable care had been used to keep up the fence. Or if it had been injured, reasonable efforts had been used to repair the same. They, as practical men, must determine this question. And the road must be held to a high degree of diligence in the performance of this duty, but not to an impossible or unreasonable extent.

Whilst the fifth instruction stated the law correctly, it would have been better had it been qualified so as to inform the jury, that while the evidence tended to prove due diligence, it was not conclusive. Properly understood by the jury, it is free from objection; but if they understood that it could not be rebutted by other evidence, or that they could not weigh it as other evidence, then it would mislead and would have been improper.

The seventh instruction was properly refused. This action is transitory and not local, either by the common law or the statute. The act of 1853, (Sess. Laws, p., 65,) only relates to actions at law or suits in Chancery, where service could not be had by summons. It in such cases authorized publication instead of actual service. And the sixth section of that act confined the bringing of such suits to the county in which the cause of action accrued. This is the scope of that act. It was not intended to apply to cases where service could be had. The judgment of the Court below must be reversed, and the cause remanded.

Judgment reversed.

☞ The Cleveland *Herald* says: "The opening of the first division of the Warren and Franklin Railroad, between Irvington, on the line of the Philadelphia and Erie Railroad, and Tideoute, has given great impetus to oil mining operations in the vicinity of Tidioute. West Hickory is also a very important oil producing point. The whole road to Oil City will be finished the present month."

☞ Mr. Henry Tyson has been re-elected President of the Baltimore City Passenger Railway Company.

☞ Mr. Richard C. Smith has been elected Treasurer of the Baltimore City Passenger Railway Company.

SEVEN PER CENT.

First Mortgage Bonds

OF THE

North Missouri Railroad Company,

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and a safe and judicious investment.

The proceeds of these bonds ($6,000,000 in all) will be used in extending a road already completed one hundred and seventy miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa; and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri river, so that this mortgage of $6,000,000 will cover a complete and well stocked road of three hundred and eighty-nine miles in length, costing at least $16,000,000, with a net annual revenue after the first year of over $1,600,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the Great Pacific Railroads.

To the first applicants we are prepared to sell $500,000 at the low rate of 80 cents, desiring to obtain a better price for the remainder. This will yield about 9 per cent. income, and adds 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

American Railroad Journal.

New York, Saturday, August 4, 1866.

Old Colony and Newport Railroad.

At the annual meeting of the stockholders of this company, held in Boston on the 26th ult., the following gentlemen were elected directors for the ensuing year: Onslow Stearns, Alexander Holmes, Uriel Crocker, Francis B. Hayes, George A. Kettell, Oliver Ames, Benjamin Finch, Minot Tirrell, Samuel L. Crocker. The Annual Report of the Directors was presented and accepted. On motion, the directors were authorized to make and issue the bonds and obligations of the corporation, in sums not less than $100 each, and for an amount not over $1,000,000, in all, for the purpose of funding its floating debt, and borrowing money to complete the works of the corporation, said bonds or obligations, to be payable in not over twenty years from their date, and to bear interest not exceeding six per cent. per annum. The President, Mr. Holmes, said that the road was in a very flourishing condition, notwithstanding the heavy debt hanging over their head. They had commenced with a road of thirty-seven miles in length, and at this time they had about one hundred and forty miles. To be sure there were heavy responsibilities attached, but they were fully able to meet them. They had paid dividends amounting to sixty-nine per cent. since the company was formed, and he thought that in the course of ten years it would be the best stock, out of the city, in the market. In concluding his remarks the President, in declining a re-election, paid a merited compliment to his associates and the various employes of the company for their faithfulness in the discharge of their duties.

At a subsequent meeting of the directors, Hon. Onslow Stearns, of Concord, N. H., Agent of the Northern Railroad, was chosen President, and George A. Kettell, Esq., Treasurer of the Northern road, was chosen clerk.

Southern Pacific Railroad.

A meeting of the stockholders of this company was held at New Orleans on the 24th ult. Mr. J. S. Adler was called to the chair, and Mr. Tarleton appointed Secretary. The Vice President of the line stated that the road from Shreveport to Marshall was in running order, and that they were ready to contract for freight; there were running, 2 first class passenger cars, 3 locomotives and a number of freight and platform cars. Mr. A. S. Mitchell, who represented the Western stockholders, informed the meeting that the stockholders in Louisville were anxious to continue the active assistance they had been rendering the line. They took the statement as to the standing of the line, on trust, from the Directors and their agents, and have not been disappointed. They do not desire that any large loans shall be made. The same gentleman also stated that the Western shareholders will undertake, so fast as the Texas people will grade the line, to supply the iron for it and have it laid down. It is therefore, trusted, that with such mutual enterprise, the matter will be speedily carried through. Resolutions were passed unanimously thanking the President and Directors of the company for the industry, zeal and energy displayed by them in pushing forward the completion of the road between Shreveport, La., and Marshall, Texas; and requesting them to publish at the earliest moment, an official statement of the condition of the company, setting forth the amount of indebtedness, and the amount of stock under new charter. Also, that the Directors should use all diligence to extend the road as contemplated by its charter, it being understood that the counties West of Marshall are prepared to do their part in making the line.

East Indian Railways.

We give elsewhere, from the *London Railway Times*, extracts from the Annual Report of Mr. JULIAN DANVERS, Government Director of the Indian Railway Companies, to the Secretary of State for India; by reference to which it will be seen that up to close of 1865, there were 3,331¾ miles of railways open in India, exclusive of the lines belonging to the Indian Branch Railway and the Indian Tramway Companies.

These 3,331¾ miles form a length considerably longer than was open in the previous year, when the length was 2,943 miles. In the course of the year the additional openings were the following:

Great Indian Peninsula	116	miles.
Madras	40	"
East Indian	24½	"
Punjab (between Lahore & Mooltan)	208	"
	388½	miles.

The 24½ miles opened during the year of the East Indian Railway were part of the main trunk of that great line. The total length of main line of the East Indian now open (1st May, 1866,) is 1,129¼ miles, the whole authorized length of this company's main line being 1,276¼ miles, so that only 147 miles of it remain to be completed. The Chord line (with its coal line) remains to be opened of that great company's main line, and this Chord line shortens the main line, which is now completely open all the way from Delhi (at the left bank of the Jumna) to Calcutta. Until August last there was a gap on the East Indian line near Allahabad, at the Jumna, "but," to use Mr. Danvers' words, "the splendid iron girder bridge, which spans that river, was then opened, making the year 1865 memorable in the railway history of India as that in which an uninterrupted traffic was first established between Calcutta and the left bank of the Jumna at Delhi. The distance of 1,020 miles can now be traversed in 37 hours. Ten years ago the same journey generally occupied almost as many days, and, at express speed, seldom less than a fortnight."

The bridge at Delhi is expected to be completed in the course of the present year.

The total length of railway sanctioned for India

is 4,944 miles; 282 more miles are to be opened in 1866; 351¾ in 1867; and in and after 1868, 979 miles. Thus there are finished 3,331¾ miles, and remaining to be finished 1,612¼ miles. Above two-thirds of the whole authorized length are open for traffic.

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the years ending April 30, 1865 and 1866, have been as follows:

Earnings:	1865.	1866.

Dividend April 25, 1866, 8 per cent.	387,248 00	
		809,658 22
Balance to credit of income account		$226,059 25
The gross earnings for the year were	$2,388,868 02	
Running expenses	$1,117,074 50	
Taxes, rents, salaries, etc	236,076 05	
Interest on bonds	172,636 22	
		1,525,786 77
Leaving for the stock a net of		$863,081 25

—or 17.83 per cent. of the capital.

The balance to credit of income account May 1, 1865, was	$440,883 73
Add income for the year ending April 30, 1866, after payment of interest.	863,081 25
	$1,303,964 98
Deduct dividends Oct. and April, 13 per cent.	637,022 00
Leaving balance of income account, May 1, 1866, as shown in General Account	$666,942 98

The gross earnings show an increase over those of the preceding year of $284,769 38, with an increase in running expenses of only $36,318 46; to which add increase in general expenses, (including interest on bonds,) $40,281 01—making the total increase in expenses, $76,599 47, and leaving a net increase for the stock of $208,169 91.

The running expenses were 46 76 per cent. of gross earnings; in 1864–'65, they were 51.36—showing an improvement of 4.60. The total expenses were 63.87 per cent.—an improvement of 5 per cent.

The following is a comparative statement of the capital stock and bonded debt of the company, as given in their reports for the past and preceding year. The date of maturity of these bonds, and the time when and place where the interest is payable is given in full on page 738 of this week's issue.

Bonds:	1865.	1866.
Junction 1st mort., 1st div.	$229,000	$213,000
" " 2d div.	159,000	146,000
Tol., N. & C. 1st mort.	3,000	.....
Dividend bonds	12,235	.....
" Certificates due '65	575	280
Clev. and Tol. income	6,000	6,000
" mortgage	.....	300,000
" sinking fund.	2,205,000	2,081,000
Total bonded debt	$2,614,810	$2,746,280
Capital stock.	4,690,600	4,841,600
Total stock and bonds	$7,305,410	$7,587,880

Capital stock has increased during the year $151,000, all by conversion of bonds; the increase in bonded debt is $131,470—making the total increase in bonds and stock, $282,470, which is represented by new works and improvements chargeable first to "change of line," and "Union Passenger Depot," and thence to construction, by real estate purchased in Cleveland, by increased equipment, etc., as will more fully appear by reference to the annexed statement, showing the resources of the company and disposition of the same for the past year:

Resources.

Net earnings	$863,081 25
Cash on hand, June 1, 1865	39,011 64

	$1,303,764 39

With the consent of the committee on accounts, the "Construction Fund" and the "Iron" accounts have been closed by merging them into General Construction, which account is thereby somewhat reduced, and now shows, it is believed, the real cost of the property it represents. The President, in his report, says:

During the last four months of the fiscal year, the rates for freight transportation were 2.43 cents per ton per mile, and for the whole year 2.63 cents; or for the year, 10 per cent. less, and for the last four months 16 per cent. less than during the previous year.

In passenger train earnings, there was a falling off in December, January and February last, as compared with the corresponding months of the previous year, of $35,329 66, due chiefly to the *passport system* of 1864–'65 diverting the usual travel from the Canada lines to your route.

As will be seen by the Superintendent's Report, the expenses for fuel and for repairs of equipment, have been unavoidably higher than for the previous year, and the car repair account has been largely increased, by inventorying new cars at less than cost or present actual value.

Under these circumstances, the results of the year's operations are deemed very satisfactory.

A large amount of ballasting has been done, and masonry in bridges and culverts built during the year, materially improving the road bed.

The track has also been maintained in good condition. The rapid wear of re-rolled rails placed in your track during the past three years, has induced the Board to make efforts to obtain the best iron rails for renewals.

Experience both here and in Europe in the use of steel rails, leads to the opinion that steel will prove superior to, and more economical than iron, for rails on roads having a heavy traffic.

Your equipment has been increased by the addition of 122 new freight cars, 6 new passenger cars, and 2 baggage cars.

The number of freight cars now owned by the company would be ample for the coming year, if all your connecting lines furnished their share of cars for the through business.

Your motive power has been increased in capacity, by rebuilding three engines on larger proportions; four others are now in process of reconstruction, but to meet the probable demands for power, new engines should be built as the capacity of your shops will admit of it.

A sense of the importance to your company of having their own line completed to Cleveland at an early day, has caused the Board to proceed with the construction of the Oberlin and Elyria line, which will, it is expected, be ready for use in August next.

To meet the outlay on this and other improvements made and to be made, the Board, on the 22d of February last, authorized the issue of $1,000,000 in seven per cent. mortgage bonds, payable in 1886, to be sold as funds are required for these purposes. Of these bonds, $300,000 have already been sold. Upon the completion of the road between Elyria and Oberlin, the use of the C. C. & C. road by your trains between Berea and Grafton, will be discontinued, when your payments to that company for rents and repairs, will be materially reduced.

The large and increasing freight business of both roads, will soon require more facilities in Cleveland, which can be readily obtained by restoring your North Division track between Berea and Cleveland.

The Sinking Fund Commissioners' Report shows the assets in that fund to amount now to $370,860 65, a sum which, with the annual contribution from your earnings, provided for by the mortgage, will retire the bonds before maturity.

The Superintendent's Report shows a large increase in through freight and in passenger business, but owing to short crops along your line, last season, the local freight tonnage has fallen considerably below that of the previous year.

In the general business, the anticipations of the last report of the Board have been fully realized, and no reason now appears why you may not expect a steady increase in traffic.

Recent action of the principal railroad lines, indicates that you may look for more remunerative rates on freight business, than prevailed during the last part of the past year, and further, that

the payment of large commissions to parties selling passenger tickets, will be stopped.

This company has joined other roads in forming a line of through freight cars between Chicago and the seaboard, *via* New York Central road, which line proves a satisfactory addition to your facilities for freight business.

A similar line, to run in connection with the Erie Railway, is proposed, but not yet fully in operation.

The Union Passenger Depot at Cleveland is now approaching completion; it is expected that when done, passenger trains will be run through without change between Buffalo and Toledo, to the manifest advantage of the traveling public.

The equipment of the road consists of 37 locomotives, 32 coaches, 7 second class cars, 4 mail, 15 baggage, 380 box, 65 stock, 112 rack and 195 platform cars.

Number of miles run by freight cars, 7,075,916; by passenger cars, 1,030,170; by emigrant cars, 252,148; by baggage cars, 438,234; by mail cars, 99,154—total, 8,895,622.

Miles run by freight engines, 589,129; by passenger engines, 267,132; by working engines, 138,302—total, 994,554.

The number of passengers carried eastward was 270,575, of which 85,356 were through, and 185,219 way; do., carried westward, 336,911, of which 136,504 were through, and 200,407 way—total passengers carried 607,486, of which 172,820 were foreign, and 434,666 local passengers. Equivalent number of passengers carried one mile, 87,263,769, equal to 311,284 through. Number of passengers carried in 1864-'65, 586,172—increase 21,314; decrease in mileage of passengers, 869,571.

Tons of freight transported eastward 300,866, of which 229,109 were through, and 71,757 way; do., westward, 173,357, of which 119,203 were through, and 54,154 way—total tons transported, 474,223, of which 348,312 were through, and 125,911 way. Equivalent number of tons carried one mile, 44,328,972, equal to 406,869 through. Tons carried in 1864-65, 410,401, showing an increase in tonnage of 63,822, and in mileage of freight, 9,537,680.

GENERAL ACCOUNT.

Construction—cost of road to date	$6,672,156 75
Equipment	868,769 42

President.—JOHN NEWELL.

Directors.—John Newell, James Mason, T. P. Handy, D. N. Barney, A. H. Barney, Henry Keep, John Gardiner, T. H. Hoag and S. M. Young.

Superintendent.—L. D. RUCKER.

Secretary and Treasurer.—WM. F. STAUNTON.

California Treasure Shipments.

The San Francisco *Price Current* of 9th ult., reports the combined exports of treasure and merchandise during the past half year, compared with the same period of 1865 and 1866, as follows:

	1865.	1866.
Mdse. exports	$5,816,519 03	$8,031,823 04
Treas. exports	21,050,613 23	23,407,828 24
	$26,867,132 26	$31,439,551 28

The San Francisco receipts of treasure from different sources, during the past half year, have been as follows through public channels:

From California, northern mines	$12,327,734
From California, southern mines	2,298,384
From Nevada	7,263,218
From Coastwise ports, Oregon, etc.	2,079,069
Imports Foreign, British Columbia, etc.	1,345,340
Total	$25,313,745

The exports of Quicksilver from San Francisco for the first six months of this year as compared with the same period of 1865, were as follows:

To	1865. Flasks.	1866. Flasks.
New York	3,020	3,059
Great Britain	4,200	3,000
China	7,000	5,752
Mexico	1,426	4,007
South America	5,500	1,000
Australia	200	575
British Columbia	17	2
Other countries	....	41
Totals	21,363	17,427

The product of the silver mines of the State of Nevada, for the half year ending June 30, exceeded $7,000,000—being at the rate of $14,000,000 per annum.

India—Its Material Progress.

The subjoined extracts from the report presented by the Government Director to the Secretary of State for India will be read with avidity by every one interested in railway enterprise in India:

The length of open line has increased during the year from 2,945 to 3,332* miles by the addition of 116 miles to the Great Indian Peninsula, 40 to the Madras, and 24½ to the East Indian, and by the opening of the Punjaub line between Lahore and Mooltan, a distance of 208 miles.

Until August last there was a gap on the East Indian line at the Jumna, near Allahabad, but the splendid iron girder bridge which spans that river was then opened, making the year 1865 memorable in the railway history of India as that in which an uninterrupted traffic was first established between Calcutta and the left bank of the Jumna at Delhi. This distance of 1,020 miles can now be traversed in thirty-seven hours. Ten years ago the same journey generally occupied almost as many days, and, at express speed, seldom less than a fortnight. The bridge at Delhi is still incomplete, so that the railway does not yet enter that city, but the work is going on satisfactorily, and will probably be finished in the course of the present year.

The progress which has been made on the Jubbulpore branch of the East Indian is such as to warrant the expectation that it will be ready for traffic by the cold season of 1867. The communication between Calcutta and Bombay will not, probably, be completed for more than a year after that time, as the works on the Great Indian Peninsula, although now being vigorously proceeded with, have hitherto been in a backward state. The line which will connect Bombay with Madras will be finished about the same time, so, that by the beginning of the year 1869, continuous railway communication between Madras, Bombay, Calcutta and Delhi will be established.

* This is exclusive of the lines belonging to the Indian Branch and the Indian Tramway.

The following table shows the length of each line now open for traffic and the extent remaining to be finished:

	Miles sanctioned.	Opened during 1865.	Opened 1st May, 1866.	Remaining to be finished in 1868 and subsequently.	1866.	1867.	Total.	Ultimate Cost. £	Cost per Mile. £
East Indian { Main line	1,276¼	24½	1,129¼	147	147	28,000,000	22,000		
East Indian { Jubbulpore line	225	....	....	225	225	....	....		
Great Indian Peninsula	1,266¾	116	701½	220	145¾	220	565¾	18,380,000	14,510
Madras { S. W., including Bangalore branch	492	....	492	....	....	....	....	5,904,000	12,000

Calcutta and South Eastern	29	....	29	....	....	....	....	609,000	21,000
Total	4,944	388⅛	3,831¾	282	351¾	979	1,612¾	....	....

The length of line now sanctioned under the guaranteed system is 45 miles more than that given in my last report. This addition consists of the extension of the Eastern Bengal (which was then contemplated) from near Kooshtea, its present terminus, to Goalundo, a place situated at the confluence of the Ganges and Barampootra Rivers, where the railway will receive the down traffic of these streams.

Of the whole extent authorized—viz., 4,944 miles, above two-thirds have been opened for traffic. Of the 3,332 miles, which form this proportion, only about 250 miles are at present made with a double line. It has already been found necessary, however, in consequence of the unexpected development of the traffic, to take measures for the doubling of a greater extent, and a still further increase of the double system is in contemplation.

Last year I stated that the extension of the Raneegunge branch of the East Indian to Luckieserai on the main line had been determined on. This new work, which is called the Chord line of the East Indian, because it connects at Burdwan and Luckieserai two ends of the crescent formed by the main line *via* Rajmahal, has been let under contract to Messrs. Brassey, Wythes and Perry. Its length from Barrakur, to which place the railway is now open, is 123 miles, and it is to be made with a double line of rails at once. There is also a branch of 24 miles to the coal fields, to be constructed with a single line. The contract price is about 8,500*l.* per mile, exclusive of permanent way and rolling stock, which with contingencies, will probably bring the cost to 14,000*l.* a mile, or about 2,000,000*l.* for the whole.

With regard to the progress which has been made with those undertakings which were not started under the guarantee system, but which receive assistance in the shape of a subsidy from the Government, there is not at present much to report. They are still confined to the "Indian Branch Railway" and the "Indian Tramway" Companies.

The Branch Company have opened a line 27 miles in length from Nulhatee on the East Indian to Mooreshedabad, but hitherto the traffic has been such as to disappoint expectations. The chief hopes of the company are, however, placed upon the line which they are constructing between Cawnpore and Lucknow, and which is rapidly approaching completion. It is made with the 5ft. 6in. gauge, and is reported to have been well executed at a cost not exceeding 5,000*l.* a mile including rolling stock. It would appear to possess the elements of success, connecting as it does two large cities, between which there is already a considerable traffic. The further operations of the company in Oude and Rohilcund have not proceeded beyond the surveys for the proposed extended lines, the board deeming it advisable to await the result of the working of the Cawnpore and Lucknow section before more is attempted. The whole expenditure of the company upon the two lines, including 60,000*l.* borrowed from the Secretary of State in Council, to complete the equipment of the Cawnpore and Lucknow line, amounts to about 400,000*l.*

The Indian Tramway has opened a line in the Madras Presidency, 19 miles in length, from Arconum to Conjeveram. It has been constructed at the rate of about 4,000*l.* a mile, the 3ft. 6in. gauge having been adopted and light rails used. The traffic does not appear to be large at present, but the earnings per mile per week have only to reach the moderate rate of 9*l.* to realize a profit of 5 per cent. This company has a scheme for extending its operations, but the measure of the assistance to be granted to them by the Government for the purpose has not yet been determined.

It may be observed that all future railways, especially those which are connected with the main lines, will derive great advantage from the facilities for the transport of materials which they will afford. One main source of expense and delay in the construction of the trunk lines has been the difficulty of conveying the heavy materials along imperfectly constructed roads, and, in some places, across country destitute of permanent communications.

The absence of the returns from the Bombay Presidency of persons employed on the open lines prevents a comparison being made with that of the previous year. It may be taken for granted that, for some time to come, the number of Europeans will increase with the increase of open lines and of traffic. Measures are, however, taken to train the natives and Indian born so as to become qualified for situations which hitherto have been filled almost exclusively by European mechanics. On the Great Indian Peninsula two or three natives have already been employed as engine drivers.

The total expenditure of capital on the lines which are open and are in course of construction amounted on the 1st May (instant,) to 60,645,000*l.*, of which expenditure 22,000,000*l.* was incurred in England, and 38,645,000*l.* in India.

The amount raised up to the same period was 60,860,000*l.*, of which 47,980,000*l.* is in share capital, and 12,880,000*l.* in debentures.

The expenditure last year was 5,384,431*l.*, of which 2,192,090*l.* was expended in England, and 3,192,323*l.* in India. This is slightly in excess of the estimate made at the beginning of the year, and is 1,500,000*l.* more than the expenditure of the previous year.

The estimated expenditure for the current year is for England about 2,800,000*l.*, for India about 3,600,000*l.*, which is greater than it has been for several years. This is owing to the vigorous efforts now being made to complete the works on the lines in course of construction, and to the large supplies of locomotive engines and rolling stock required to equip the open lines. The balance now in the Government Treasury towards meeting this expenditure of 6,800,000*l.* is only about 220,000*l.* In addition to the amount required for this year's expenditure, the sum of 1,000,000*l.*, which the Government has been obliged to advance to some of the companies, will have to be raised during the year.

Besides the expenditure by the companies from guaranteed capital, it is estimated that this year the charge against the State for land required for the new lines under construction will amount to about 860,000*l.* Last year this item was not more than 173,000*l.* The estimated loss by exchange upon the capital advanced by the Governments in India, at the rate of 1s. 10d. the rupee, was last year upwards of 400,000*l.* The gain by exchange upon the net receipts was about 140,000*l.*, leaving a net loss for the year of 260,000*l.* It has been explained in a former report how the loss which is thus incurred by Government will be covered in future years by the gains arising out of the application of the 1s. 10d. fixed rate of exchange to the earnings of the railways paid into the Government treasuries.

The sum which it is now estimated will be expended on the undertakings as at present sanctioned is upwards of 81,000,000*l.*, being 4,000,000*l.* in excess of last year's estimate. This is accounted for by the construction of a much larger extent of double line than was then expected to be necessary by the additional length to certain lines, and by the greater number of engines, carriages, trucks, &c., required to equip the open lines, in order to provide for the rapidly increasing traffic.

The traffic on the principal lines during the past year has exceeded the most sanguine expectations. Upon the completion of the Allahabad bridge over the Jumna, on the East Indian, and of the ghat inclines of the Great Indian Peninsula, the unfinished state of which works had in former years caused serious interruptions in the traffic, the demand for the conveyance of goods was so great that the resources of the companies were, according to the accounts from India, inadequate to meet it. The rolling stock was reported to be insufficient, the locomotive power to be strained beyond what was desirable, and the officers and servants of the company to be hardly equal to the unexpected pressure brought to bear upon them. This state of things has unfortunately produced inconvenience and disappointment to the public, and has deprived the companies of much that they might have earned; but, greatly as it is to be regretted, the primary cause of it cannot but be satisfactory to the Government and to the companies. It is clear now that the traffic on these great highways will be enormous, and that for some time to come it will increase in proportion to the means provided for carrying it. As it is augmented, a proportionate decrease in the working expenses may be confidently expected, so that there is a fair prospect of an annual improvement in the revenues.

The following table gives the result of the traffic the years ending June 1864, and 1865:

	Mean Mileage open.	Net Receipts 1864.	Mean Mileage open.	Net Receipts 1865.
East India	979	£500,707	1,082	£772,099
Great Indian Peninsula ..	550	154,817	595	314,626
Madr's { S.W. / N.W. }	448	{ 118,998 / .... }	555	171,639
Scinde	105	6,657	114	3,507
Punjaub	45	5,547	84	6,009
East'rn Bengal	110	41,025	110	58,746
Gt. Southern..	79	13,717	79	14,711
	2,316	£841,468	2,569	£1,341,337

It thus appears that, during the year ending 30th June 1865, the railways, exclusive of the Bombay, Baroda, and Central India, whose accounts have not yet been made up, yielded the aggregate sum of 1,341,337*l.*, as compared with 841,468*l.* of the previous year. The chief increase in the traffic has, however, taken place during the latter half of last year—viz., from June to December; but the revenue accounts of all the companies have not yet been received from India, and I am only able to furnish the results of the five following lines for the year ending 31st December 1865:

	Net Receipts, 1864.	Net Receipts, 1865.	Guaranteed Interest, 1865.	Capital.	Expended on open lines.
	£	£	£	£	£
East Indian.....	625,894	928,750	1,161,813	23,236,260	22,000,000

Eastern Bengal...	42,202	62,111	78,441	1,568,820	1,500,000
Great Southern of India.....	11,805	17,785	43,391	867,820	650,000
	1,014,499	1,708,592	2,260,204	45,204,080	41,150,000

The net amount earned by these companies last year is thus shown to be 1,708,592*l.* The guaranteed interest paid to the same companies during the year was 2,260,204*l.* But this amount applies to a capital of 45,204,080*l.*, while the sum expended on the lines earning 1,708,592*l.* does not amount probably to more than 41,150,000*l.*, the guaranteed interest on which would be 2,057,500*l.* The amount earned by the open lines would, therefore, fall short of the sum paid for the guarantee on the capital representing those lines by only about 349,000*l.*

The receipts and expenses for 1864–'65 were as follows:

	Receipts.	Expenses.	Net.
East Indian.....	£1,442,104	£670,005	£772,099
Gt. Indian Peninsula.....	870,296	555,670	314,626
Madras.....	349,456	177,817	171,639
Bombay & Baroda	196,485	....	*

Eastern Bengal..	112,840	54,094	58,746
Calcutta & South Eastern.....	8,367	11,412	†3,045
Great Southern ..	30,878	16,107	15,911

* No revenue accounts have been received from India.

† Deficiency.

The expense of maintaining and working railways is a most important question in relation to their success. If, as in the case of some of the American lines, they are roughly made with steep gradients and sharp curves, with light rails, imperfect ballast, and wooden bridges, the cost of maintenance will absorb much of the profits. The railways in India do not labor under these disadvantages. They have been constructed substantially. Rails of the best iron, sometimes of steel, and of considerable weight, have been used; the bridges are of masonry and iron, and are executed with the greatest skill. The only part of the construction that has in any way failed is the wooden sleeper, which, on some lines, has not been found to resist the effects of the wet and heat. Iron is, consequently, being largely substituted for wood and, on the Madras, has already produced a considerable reduction in the cost of maintenance. But while the works have been admirably constructed, and the best materials have been used, it must not be overlooked that they cannot be altogether exempt from the influences of a tropical climate, with its floods and cyclones, and that watchfulness will be necessary to insure the preservation of the lines in their present condition. With regard to the working expenses, there are two items which, at present, are particularly high on Indian lines, and these are the

European establishments and the fuel, both of which, compared with railways in Europe, entail a heavy charge. As regards the high cost of fuel, however, this does not apply to the Bengal lines, the coal for which is obtained from collieries at Burdwan, Raneegunge, and Kurhurballee. The great advantage of these sources of supply will be understood when it is stated that the price of coal at the pit's mouth to the East Indian is about 10s. per ton, while English coal has lately cost the railways in the Bombay and Madras Presidencies from 40s. to 70s. a ton at their maritime termini. This high price is, at the present time, caused by the rise in freights from this country to India, but the cost, at the most favorable times, will not be less than 40s. On some lines wood is used instead of coal, and, with proper precautions against the escape of sparks, answers admirably. On the Madras it is calculated that the cost of wood fuel is less than half that of coal and coke. When some 150,000 or 200,000 tons of fuel are consumed annually, and when from 40s. to 60s. per ton has to be paid for it, it is time to look round for relief. Australian coal has been tried, with what success has not yet been reported; but from India herself the supply of fuel should ultimately come. By the judicious planting and preservation of forests, and by the developments of the mineral resources of Central India, means will, it is hoped, be afforded for rendering her independent of foreign supplies.

There has been a tendency during the past year to increase the rates and fares. They are still, however, low, as compared with European rates. It is hardly possible yet to judge what the established rates of charge for passengers and goods, especially the latter, should be. At present, the traffic on the principal lines is, as I have before explained, restricted by a scarcity of rolling stock. This has partly caused the rise in fares, but when there is a sufficient supply of rolling stock, and a large and well-sustained traffic, lower rates may be found to be more profitable than higher. If, however, the traffic goes on increasing in the same ratio as it has done during the last two years, the rates will, in some cases, have to be raised higher than they are now to realise the profits which the railways could command. Considering the question in the abstract, the first point to be ascertained, before fixing charges of this kind, is the cost of conveyance, and then, the charge which, in addition to what is required to cover the cost, will produce the greatest aggregate return; for it should be borne in mind that it is not the high profit upon the unit, but the small profits upon the large numbers or quantity, which should be sought for. Supposing the cost of running a train which should carry 50 tons to be 3s. a mile, and only 25 tons at 3d. a mile are carried, the profit is only 3s. 3d., or 1½d. per ton; but supposing the charge to be 2d., and 50 tons are carried, the profit is 5s. 4d., or 1¼d. per ton. Thus, when the profits upon each ton is more, the aggregate results are less, because the amount conveyed is insufficient to fill the waggons. When the amount is increased by the lower charge, the profit is smaller upon each ton, but (more being carried at the same cost) the profits are greater on the whole. The great aim should be, in the first place, to provide an adequate supply of rolling stock, and then to impose such rates as would bring that stock into constant use. An over-supply, as well as an under-supply, is to be avoided. Both have a tendency to raise rates. If too many carriages and trucks are provided, charges must be put on to cover the cost of those unemployed. If too few are provided, charges would have to be imposed to check the demand for conveyance. The East Indian and the Great Indian Peninsula lines have been in the position of being unable to meet the demand upon them, so that the rates are levied under circumstances which ought to be exceptional. At some of the stations on the East Indian, such was the demand for tracks, that it is supposed bribes were given to secure a preference; and it was proposed by a committee appointed to apply a remedy, that the trucks should be put up to auction, ignoring altogether the established rates. This would not have been a proper arrangement, and it was accordingly decided to fix higher charges generally.

With regard to the passenger fares, the tables given hereafter, exhibiting the number in each class, show that comparatively few people travel in the first and second classes. It appears that 91 per cent. travel in the third, 4-78 travel in the second, and 1-12 in the first class. Various fares and different kinds of carriages have been tried with the view of attracting more to the first and second, but without producing other results. Cheap fares are stronger than caste. The rich murasider and merchant may be seen traveling in the same carriage with the Coolie laborer who works in his fields and godowns.

On the Bombay lines the Government have established the principle of fixing maximum rates, within which the companies are allowed to levy such charges as they may find to be most desirable. The system has worked well, and the other Governments of India will probably deem it expedient to extend it in the course of the present year to the other railways. But whatever the fares may be, a most material point in relation to the profits they produce is the class of goods to which they are applied. On the Great Indian Peninsula, for instance, the transfer of cotton from the second to the fourth class has been attended with marked success.

The following statement shows the amount that has been advanced by the Government to the several companies on account of guaranteed interest during the past year, together with the aggregate sum which has been paid on the same account from commencement to the close of 1865:

	During 1865.	Total paid up to end of 1865.
East Indian	£1,161,812	£7,419,370
Great Indian Peninsula	609,233	3,470,134
Madras	367,326	2,192,808
Scinde	96,762	532,951
Punjaub	96,204	419,686
Delhi	52,367	142,628
Indus Steam Flotilla	18,695	98,030
Bombay, Baroda, and Central India	252,050	1,064,051
Eastern Bengal	78,441	356,215
Calcutta & South Eastern	20,391	96,009
Great Southern of India	43,391	173,968
Total	£2,796,676	£15,965,855

It will thus be seen that a sum of very nearly 16,000,000*l.* has been paid by the Government during the last fifteen years to the companies as interest on the capital raised by them. Of this sum, about 4,900,000*l.* has been received back by the Government from the earnings of the companies. The sum paid last year on account of the guaranteed interest was 2,796,677*l.*, as compared with 2,567,744*l.* in 1864. The receipts from the traffic, which in 1864 amounted to about 840,704*l.* last year rose to 1,341,550*l.*, reducing the net payment by Government on account of the guarantee from 1,727,040*l.* to 1,455,122*l.* This improvement furnishes ground for the hope that gradually the two amounts will be balanced, and that a commencement will then be made by the companies in paying back past years' interest, and in declaring a larger dividend than the guaranteed interest of 5 per cent. to the shareholders.

☞ The Milwaukee *Wisconsin* says that iron enough has been received to build the St. Paul and Pacific Railroad to St. Cloud, and is being put down as fast a corps of workmen can do it. The Minnesota Central, and Winona and St. Peter railroads are also being pushed forward as rapidly as possible between Faribault and Owatonna, on the Central Road. The track is being laid at the rate of three-quarters of a mile per day. The two roads are expected to reach Owatonna by the 1st of September, thus giving the citizens of that place an all connection with Winona.

Projected Railroads in the South.

It is proposed to construct a railroad connecting Memphis, Tenn., and Montgomery, Ala., passing through Columbus, Miss. A letter from Hon. W. J. Sykes, of Columbus, to Hon. J. D. Phelan, of Montgomery, in favor of the project, says:

This is an enteprise in which your City and State are deeply interested. From Memphis to Montgomery by this route it will not be more than three hundred or three hundred and fifty miles, the exact distance not known. The distance from Montgomery to Memphis is very little more than that from Montgomery to Nashville. At Memphis you are brought, by means of the Mississippi River, in communication with the great grain region of the North and Northwest. Your supplies can be brought as expeditiously and as cheaply over this road as by any other route. Memphis is destined to be the great city on the Mississippi River. The nearest route between Montgomery, Ala., and Memphis, Tenn., will either be Tuscaloosa or Selma. It is evident that Alabama must, in the new order of things, become a great manufacturing State, and Tuscaloosa, Selma and Montgomery must be the principal manufacturing cities in that State. They are all near the coal, the iron and the cotton, and when the various railroads are completed they will have every facility for manufacturing enjoyed by any cities. The railroads needed in your State immediately are the Northeast and Southwest road from Chattanooga to Meridian, the Decatur and Montgomery, the Montgomery and Selma, and a railroad either from Selma by Columbus, Miss., to Memphis, or a railroad from Lime Kiln Station on the Montgomery road to Tuscaloosa, Ala., and Columbus, Miss., to Memphis. To build these roads will require a very large amount of capital, but the productive energies of the country will furnish that capital in a few years, and the enhanced value of the property, arising from the building of these roads and the consequent developments of the natural resources of the country will more than pay for the building of the roads. The road from Memphis to Montgomery will cost say $10,000,000; this includes the road from Montgomery to Selma. Alabama possesses as many of the elements of wealth as any State. In the extreme Southern portion of the State there are the extensive piney woods, with splendid forests of timber and fine ranges for cattle. In the middle portion the rich canebrake and bottom lands for cotton, corn and other agricultural products, and north of a line drawn through Tuscaloosa, east and west, there are, in great abundance, coal and iron, and all other things necessary for manufacturing purposes. There is also fine land in the northern and northeastern part of the State. She may and probably will raise a less amount of cotton than formerly, but the enhanced price will compensate for the diminished production, and if it should be manufactured at home, the profits would be greatly increased, as before shown.

☞ We learn from the Pittsburg *Gazette* that the portion of Oil City, which was recently burned, has been almost entirely rebuilt. In a few months Oil City will be the terminus of no less than three railroads, the Atlantic and Great Western, already finished, the Oil City and Pithole, which connects with the Warren and Franklin at Oleopolis, and thence with the Philadelphia and Erie at Warren, and the Oil City and Petroleum Centre road, which connects with the Oil Creek Valley road, connecting Pittsburg and Oil City, is being pushed to completion as fast as possible.

☞ The N. O. *Commercial* says that "a railroad meeting was held at Waco on the 9th ult., and a committee appointed to confer with the President and managers of the Central railroad, in reference to carrying the road to that place."

American Railroad Journal.

Saturday, August 4, 1866.

Stock Exchange and Money Market.

Money is unusually abundant and low in price in this market. General business is comparatively prostrate, calling for little pecuniary accommodation. Speculation in Stocks, Produce, and Merchandise, especially the first mentioned, is reviving, but in a tardy sort of way; and does not afford lenders an adequate channel of employment for their idle means. Borrowers find no difficulty in negotiating call loans at rates ranging from 3@5, the ruling figure being 4 per cent., for Stock Exchange purposes. Prime discount applications are readily met at 5@6 per cent. per annum. The city banks last week increased their loans $647,053, or to $256,612,071, while adding $4,180,822 to their legal tender reserve, and $1,533,847 to their deposit item. They lost $1,158,607 in specie, and cut down their circulation $334,039. The Bank Exchanges at the Clearing House, through the week, averaged only $71,720,801 a day, against a daily average of $95,225,813 the preceding week; and $106,275,964 the week ending with July 14th. The exchanges of last week were the lightest thus far this season, reflecting pretty accurately the extreme dullness of business. It is more than probable that they will prove the most limited of the whole season, as the current week's clearances indicate a rising average, the aggregate having been on Monday, $86,417,527, on Tuesday, $96,873,417, and on Wednesday, $104,571,922.

The U. S. Sub-Treasury receipts, week ending with July 28, were $14,013,441, including $2,926,884 from customs duties; payments, $19,682,107; balance at the close of the week, $85,904,263, against $91,572,929 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $4,062,457, and payments, $4,293,073; Tuesday, receipts, $2,115,484, and payments, $7,657,904. The balance at the close of business on Tuesday stood at $80,131,227, against $67,765,455 at the beginning of July, showing an increase of $12,365,772 in the amount of cash on hand in the Sub Treasury, in July. The aggregate receipts of the office in July were $54,414,801, including $11,617,980 from customs duties at the port; andthe aggregate disbursements, during the month, were $51,937,088, including $7,346,979 in the form of coin and currency interest on the public debt, leaving the grand total balance to the credit of the Sub Treasury and Assay Office at the close of the month, $80,131,227, as given above. The cash balance in the U. S. Sub Treasury at Boston on Saturday last was $9,919,318, including $7,506,616 in coin.

The disbursements of the Treasury Department on account of the War, Navy and Interior Departments last week and month were:

	Week.	All July.
War	$845,906	$2,752,764
Navy	1,116,729	3,679,360
Interior	236,850	2,399,125
Total	$2,199,485	$8,831,249

Gold was as high as 151¼ on Friday, and as low as 146 on Monday. It has since rallied to 149 and receded to 148⅝. The extreme depression was caused by the telegraphic summary of the news by the *China* (to July 21.) reporting U. S. 5-20s in the London market as high as 70½@71, which showed an advance of about seven per cent. in the London price of this favorite American security since the close of June. With gold at 150 as at the close of business on Saturday, the *China's* quotations for the 5-20s in the London market were equal to about 115 in our currency, or nearly seven per cent. above the ruling figures in the home market on Saturday. Since the receipt of the *China's* news, London advices to July 30, have been received by the Atlantic Telegraph Cable, (now in successful working order). These advices quote 5-20s back to 68½@69, causing more firmness in the gold speculation, and some heaviness in the public funds. The speculative demand has improved since Monday, but the floating supply has been sufficient to prevent any very rapid inflation of the premium. The *Henry Chauncy* arrived from Aspinwall on Tuesday with $1,678,519 in California gold, of which about half a million came to the U. S. Sub Treasury on the transfer of San Francisco customs to this city. Government receipts from customs at this port last week, were $2,926,884; and, last month, $11,617,979, as against $9,908,190 same month last year. The Sub Treasury disbursements of coin interest, last week, were only $292,231; and, last month, $5,873,377, against $5,714,367 same month

last year. The city banks now hold a specie reserve of $9,701,540, against only $7,797,218 at the beginning of July. Saturday's exports of specie were $545,775, and Wednesday's, by the *Malta* from this port, $103,068, making the total since our last, equal to only $648,843, against receipts of $1,678,519 of California gold on Tuesday. There is no considerable export demand for specie at present, as with the extreme depression in foreign exchange, it would involve a loss of 1½@2 per cent. to ship specie under existing circumstances. Our exports of produce and securities are increasing so as to turn exchanges in our favor, and prevent the outflow of gold. The mainly reliance of the *bull* interest, outside of speculative operations, is on the customs demand for coin, which on Monday of this week amounted to $281,000, on Tuesday reached $757,000, and on Wednesday $715,000. This heavy drain was caused by the effort of importers to anticipate the enforcement of the revised tariff.

In the foreign exchange market, there has been unusual heaviness. Prime bankers' sixty day bills on London have been quoted down to 108@108¼; and on Paris to 5.16⅝@5.15; sight bills on London to 109¼@109⅜; and on Paris to 5.12½; with a supply of good to prime bills largely in excess of the demand. The active export trade in United States bonds, and the revival of the shipping inquiry for our produce add materially to the floating supply of bills. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $3,343,670, against $2,947,348 same week last year. The exports since January 1, have been to the value of $119,467,423, or over twenty-nine million dollars in excess of the exports, same time last year. Besides the produce exports of the week, there were nearly five millions of U. S. securities shipped to Europe during the week.

A very active business has been transacted in the public funds, this week. All the gold and currency interest bearing obligations of the Government have improved in price; the sixes of 1881, and the 5-20s of 1862, remarkably, on a lively demand for home and foreign account. The highly favorable news from Europe by the China led on Monday to extensive purchases of the old 5-20s for export. The later and less encouraging telegraphic reports partially checked this outflow; but the foreign houses are still purchasing pretty freely, in anticipation of an early and decisive rally in the markets abroad. In the 5-20s of 1865, there has been a vigorous home trade, partly by way of dealings through the commission houses, but largely also in the form of conversions of Seven-Thirties into the new 5-20s at the Sub-Treasury. The 7-30s and 10-40s have been actively sought after at strengthening prices, on which the rather adverse foreign telegraphic accounts had no perceptible influence. The Treasury Department has paid off all but three millions of the one-year certificates of indebtedness, and has *reduced the aggregate of the public debt twenty-seven million dollars since* the publication of the last exhibit of the National finances, June 1, 1866. The next debt statement will be issued about the close of the current week, and will doubtless favorably affect the market values of the public funds, which the extraordinary ease in money also largely benefits.

It is informally announced that Secretary McCulloch will promptly issue an order limiting the privilege of converting the 7-30s into 5-20s of 1865, to the holders of the first series of the 7-30s, maturing in August, 1867.

The dealings in railway and miscellaneous stocks have increased considerably, this week, on a decidedly firmer and buoyant market, caused by extensive purchases of the leading share property, on speculation which the low price and great plentiness of money tend to stimulate. On Tuesday there was some reaction, from liberal realizations; but on Wednesday there was a pretty general rally, on renewed orders to buy. Higher prices are confidently looked for by the bulk of the street operators, as also by the outside public; this serves to strengthen the disposition to "load up." The noticeable feature of the current business in railways is the marked preference of purchasers for the good dividend paying stocks, which indicates a more legitimate trade than usual in speculative seasons. This is an encouraging "sign of the times." The total sales of railroad and miscellaneous stocks at the various stock boards in July, were 1,461,517 shares, against 1,445,276 shares in June. The total sales of bank stocks in July, were 3,485 shares, against 3,430 shares in June. The aggregate value of Government, State, railway and miscellaneous bonds, and of gold, sold at the boards in July, was $16,836,000, against $13,923,000 in June.

In domestic produce, the business of the week has been an average one, on a tolerably steady market for the leading articles, though toward the close, the turn of prices is in favor of buyers. There have been considerable export dealings in breadstuffs, provisions and cotton. The week's shipments of cotton, are 3,007 bales, the heaviest for some time past. They were nearly all to Liverpool. In domestic cotton goods, there has been more firmness, on a revival of the consumptive demand. In domestic woolens, there has been little movement, and prices have been depressed. Foreign dry goods are quiet and rather heavy. The total imports of such goods, last week, were $2,869,310, and the total amount marketed $2,675,183. In foreign merchandise, the transactions have been generally moderate, on a firm market. Heavy purchases of Rio coffee were made on speculative account. The value of foreign merchandise imported last week, was $2,959,977—making the grand total value of last week's imports of dry goods and merchandise, $5,829,287. The ocean freight market is only moderately active, with 572 vessels of all classes in port.

The total number of National Banks authorized thus far in this country is 1,660, with an aggregate capital of $417,850,000, and an aggregate circulation of $286,126,845.

The balance in the Sub-Treasury on Wednesday was $81,944,266 31.

The Treasury of the United States has possession of United States bonds amounting to $328,725,150, as security for circulating notes of national banks, and bonds amounting to $38,310,500, as security for deposits of public moneys in banks designated as depositaries. The total amount of securities held, $367,035,650.

Government receipts from internal revenue last week were $5,770,850; thus far this week, they have been as follows: Monday, $1,375,505; Tuesday, $1,136,505, and on Wednesday, $2,146,216. The total income from this source, since July 1, has been $31,218,003.

The New York exports, exclusive of specie, for the week ending July 31, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,947,348	$3,343,670
Prev. reported	87,605,017	116,123,753
Since January 1	$90,552,365	$119,467,423

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$3,366,859	$2,869,310
Gen. merchandise	2,839,604	2,959,977
Total for the week	$6,206,463	$5,829,287
Prev. reported	86,004,186	181,411,861
Since January 1	$92,110,649	$187,241,148

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Tennessee 6s, 1890, 92; do., 6s, ex-coupon, 71¼; do., new, 69½; North Carolina 6s, 84½; do., ex-coupon, 61; do., new, 63; New York State 7s, Bounty Loan, 104¼; do., 6s, 1874, 97; Georgia 6s, 109; Kentucky 6s, 95; Brooklyn 6s, Water Loan, 95; N. Y. City 5s, 1870, 94; do., 6s, 1886, 90; Pacific R. R. 7s, guar., by Mo., 80; Chicago and N. W., con. bonds, 78½; Milwaukee and St. Paul, 57½; do., pref., 72½; do., 1st mort., 90; New York and New Haven, 111; New Jersey Central, 120; Catawissa, 79¼; New Jersey R. R., 125; Stonington, 110; Wyoming Valley Coal, 40; Wilkesbarre Coal, 54½; Central Coal, 46½; American Coal, 58; Ashburton Coal, 17; Mariposa pref., 28; Boston Water Power Co., 31½; Smith and Parmalee gold, 97⅛; Western Union Tel., 55¾; do., Russian Extension, 110; Bank of Commerce, 111; Bank of North America, 106½; Continental Bank, 100; Bank of Commonwealth, 103¾; 4th National Bank, 103; Bank of New York, 120; Ocean Bank, 102; Nassau Bank, 106; Merchants Ex. Bank, 112; Bank of State of New York, 108.

Chrome, 0.50@0.60; Bare Hill, 0.50@0.65; Atlantic Coal, 1.05@1.10; Mineral Hill, 0.50@1.00; Baltimore Coal, 140@200.

Rhode Island Locomotive Works.

This extensive establishment, of which Gen. A. E. Burnside is President, is situated in Providence, R. I., on the line of the New York, Providence and Boston Railroad, and is prepared to fill ordess for Locomotive Engines interchangeable in all their parts, combining all the latest improvements, and made of the best materials and superior workmanship. We understand that these Works have now under way four 27-ton and two 18-ton engines, and will have one of their engines running on the Providence and Worcester Railroad the present month.

☞ Messrs. Wm. P. Kittredge & Co., 164 Water street, N. Y., have for sale at a large discount, 20 new street railway cars, built by John Stephenson for a foreign market, of best material and workmanship.

Car Fares.

On Wednesday, August 1, the Internal Revenue law under which city railroad companies are obliged to sell tickets by the dollar's worth, with only the two and a half per cent. tax added to the legal rate of fare—five cents—went into operation. The following is the section of law referred to:—"And whenever the addition to any fare shall amount only to the fraction of one cent, any person or company liable to the tax of two and a half per centum, may add to such fare one cent, in lieu of such fraction, and such person or company shall keep for sale, at convenient point, tickets in packages of twenty and multiples of twenty, to the price of which only an amount equal to the revenue tax shall be added."

Union Pacific Railroad.

A dispatch dated Omaha, August 1, states that the Government Commissioners have just examined 35 miles more of the Union Pacific Railroad, and find the section in acceptable condition. The road is now in running order 163 miles from Omaha, and within 28 miles of Fort Kearney, to which point it will be built by September 1.

Kent County Railroad.

At an adjourned meeting of the friends of this road, held on the 26th ult., Mr. Warner, engineer, reported his surveys from Townsend to Massey's Cross Roads, 9 miles, and from Middletown to Massey's Cross Roads, 11 miles—the former costing $115,000, and the latter $150,000. The following resolution was adopted: *Resolved*, That the commissioners of the Kent County railroad be requested to call a meeting of the stockholders, in Chestertown, on the 11th of September next, to organize by electing a president and directors.

☞ The Southern Pacific Railroad was opened to Marshall, Texas on the 25th ult., and arrangements are making to continue it. The old Berwick Bay route to Galveston, was to have been resumed August 1st, with three steamers per week. The time of travel will be lessened from six to ten hours. Work on the broken levees will commence September 1st.

Anthracite Coal Trade.

The Philadelphia *Ledger* of July 31, says: "The authracite coal trade continues large. The tonnage from the Schuylkill region last week reached 127,239 tons, of which 87,730 tons were brought down by the Reading Railroad, and 39,509 tons by the Schuylkill Navigation Company. The total brought to market from that region so far this season, is 2,870,798 tons, being an increase over the tonnage from the same region to the same time last year of 1,081,976 tons. The Lehigh Valley Railroad has worked its coal business up over 50,000 tons per week, and thus far this season, has carried to market 1,030,873 tons of coal, being an increase over its last year's tonnage to the same time of 324,487 tons. The coal production thus far this season is 6,635,341 tons, against 4,462,551 tons to the same time last year—being an increase of 2,172,790 tons.

Western Union Telegraph Co.

The following gentlemen were elected directors of the Western Union Telegraph Co. on the 26th ult.: J. H. Wade, Cleveland; Hiram Sibley, Isaac Butts, G. H. Mumford, H. R. Selby, D. A. Wasson and B. R. McAlpine, Rochester; Ezra Cornell, Ithaca; Anson Stager, Cleveland; Alfred Gaither, Cincinnati; R. S. Burrows, Albion; N. Green, Louisville; John Butterfield, Utica; P. McD. Collins, Wm. Orton, John P. Yelverton, Wilson G. Hunt, C. Livingston and E. S. Sanford, New York; Thomas T. Eckert, Washington. At a meeting of the new Board John H. Wade was elected President, Messrs. Sibley, Orton and Green Vice Presidents, and A. H. Palmer Secretary and Treasurer.

Southern Central Railroad.

The new company of the Southern Central Railroad is pushing matters rapidly. They have acquired the old road bed north of Auburn, valued at $250,000, for the trifling sum of $63,000 of which $50,000 is payable in stock of the company. A survey is now being made from Cayuga along the shore of Cayuga Lake to Ithaca, which is intended to unite with the proposed road from Ithaca to Towanda and the Pennsylvania coal fields.

Schenectady and Ogdensburg Railroad.

We learn from the Albany *Journal* that the survey for this route has been commenced under Colonel R. Fanchot, of Schenectady. He has selected for his principal assistant A. Mason Peck, of Albany, for many years connected with the New York Central Railroad, and recently with the Imperial Mexican Railway. Mr. P. has organized his party and is fully under way. Ed. Edwards, Esq., has been selected to take charge of the commissary department through the wilderness.

☞ We learn from the Richmond *Examiner* that the long contemplated connection between the Richmond and Petersburg and the Richmond, Fredericksburg and Potomac Railroads, has at last been contracted for by Messrs. Gallaher & Mason. The task of connection involves the tunnelling of Gamble's Hill—a thing of difficulty and vast labor—but Messrs. Gallaher & Mason have proved themselves equal to even much greater performances. They have just completed the Clover Hill Railroad, in Chesterfield county, where they excavated 100,000 cubic yards of earth in seventy days—having within the same period also to purchase everything to commence the work.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending July 27th, 1866, were $53,356 86
Corresponding week of 1865 ..... 54,825 41

Decrease $1,468 55

The earnings of the Grand Trunk Railway of Canada for the week ending July 21st, 1866, were $127,917 00
Corresponding week of previous year.. 119,462 00

Increase..... $8,455 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in July, 1866 .. $22,577 00
Corresponding week previous year.... 24,706 50

Decrease $2,129 50

The earnings of the Western Union Railroad for the week ending July 21, 1866 .... $20,984 46
Corresponding week previous year.... 15,801 93

Increase..... $5,182 53

The earnings of the Michigan Central Railroad for the 3d week in July, 1866, were ... $67,806 39
Corresponding week of previous year.. 73,359 67

Decrease $5,553 28

The earnings of the Chicago and Rock Island Railroad for the 3d week in July, 1866, were $63,995 00
Corresponding week of previous year.. 54,167 00

Increase..... $9,828 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in July, 1866, were..... $70,546 00
Corresponding week of 1865 ..... 60,737 00

Increase..... $9,809 00

Journal of Railroad Law.

PROOF OF NEGLIGENCE—DEGREE OF CARE REQUIRED OF PARTIES STANDING IN SIMILAR RELATIONS.

The case of Patrick Bannon *vs.* Baltimore and Ohio Railroad Company, was an appeal to the Court of Appeals of Maryland, from the rulings of the court below, excluding certain evidence offered on the part of Bannon, and rejecting certain instructions offered by the plaintiff and defendants, and granting of others in lieu thereof by the court, from which rulings each party appealed.

The opinion of the court was delivered by

Bowie, C. J.—The cause of action is injury sustained by the plaintiff, through the alleged wrongful act, neglect, or default of the defendants or their agents, whilst moving their engine and cars in reversed order, over a semi-circular track called a Y, on the Locust Point branch of the defendants' road.

After evidence of the injury, for the purpose of showing negligence, the plaintiff proposed to prove it was the daily practice of the defendants to move their cars, without a guard at the rear of the train, over the Y, which was so situated that the engineer at the engine could not see the rear, which evidence the court rejected being of opinion the testimony must be confined to the mode in which the cars were managed at the time of the occurrence of the injury complained of; which constitutes the ground of the plaintiff's first exception.

There can scarcely be a question about the propriety of the court's decision on this exception.

The general conduct of the defendants was not in issue. They were not required to meet such an investigation by the pleadings. The acts and omissions of their servants and agents at other times, furnished no legitimate evidence of their conduct upon the particular occasion referred to; and if they did, the safe conduct of the cars for a long time before without injury, would rather tend to mitigate than inflame the injury, showing there was no danger to the community in that mode of managing the cars. The evidence was collateral and incapable of affording any reasonable presumption or inference as to the matters in issue, and properly excluded. Vide 1 Greenl., § 52. The first and second prayers of the plaintiff, referring exclusively to the measure of damages, will be considered in connection with the instruction of the court upon that subject.

The series of instructions offered by the defendants, substantially affirms—

1st. If the place where the accident happened was not a thoroughfare and used as such, or being crossed at the time by the plaintiff, and the cars were moving at a speed which would have permitted either adult or child to have avoided them, had he been using the street as a thoroughfare, or crossing the same, if he had used such diligence as was reasonably to have been expected of him, then the plaintiff is not entitled to recover.

2d. If the plaintiff was, just before the accident, playing in a place of safety, and seeing the cars, ran and jumped on them, and fell off and was injured, he is not entitled to recover, although the Jury believed the defendants did not use the care and diligence that would have prevented him from getting on the cars.

3d. If, in addition to the above facts, the plaintiff had been warned, and was of an age to understand such warning, and to know he was doing wrong, he is not entitled to recover, although the defendants had not used such care and diligence as would have prevented plaintiff from getting on the cars.

4th. If, at the time of the accident, the defendants were not complying with the ordinances offered in evidence regulating the use of locomotive engines in the city of Baltimore, yet the plaintiff is not entitled to recover, if the Jury believe that his conduct, was the immediate cause of the accident, and his injury the result of a want on his part of that degree of care which was, under all the circumstances, naturally and reasonably to be expected in one of the plaintiff's age and intelligence.

The instruction of the court is silent as to the place being a thoroughfare, but affirms, if the defendants were owners of the track, along which their cars were drawn or propelled about the business of the company, then in the management and movement of said cars the company was bound to exercise the utmost care and diligence which it was within their means and power to employ, to prevent accidents endangering the lives of the people of the city; and if the Jury find the plaintiff was injured by the defendants' cars, and if the defendants, in the use of their cars, had exercised the highest degree of care and diligence which it was in their power to employ, the said accident could have been prevented, then the plaintiff is entitled to recover; but although the Jury might find that the said accident could have been prevented by the use of such care and diligence on the part of the defendants, yet the plaintiff was not entitled to recover, if the Jury believed the accident could have been avoided by the circumstances, to be naturally and reasonably expected from one of the plaintiff's age and intelligence.

The theory of the defendants' prayers, taken collectively, is that if the injury was owing to the want of the reasonable care and diligence on the part of the plaintiff, the defendants are not liable, although they might have prevented the accident by the exercise of the utmost care and diligence. The theory of the court's instructions is, that the defendants, in the movement and management of their engines and cars, were bound to use the utmost care and diligence, and if by so using it, the accident might have been prevented, the plaintiff is entitled to recover, unless the Jury believe the accident could have been avoided by the exercises of such care as was reasonably to have been expected from the plaintiff.

The difference between the two propositions is, that under the court's instruction the defendants were bound to use the utmost care and diligence, and if the defendants were not in default at all, and the plaintiff was, he cannot recover. Unde the defendants' prayer, although the defendants were in default, yet the plaintiff cannot recover, if his own want of care, &c., was the cause of his injury.

The first of the plaintiff's prayers was liable to objection for the intended discretion it proposed to give the Jury, without any guide to its exercise; the pernicious tendency of which practice has been so strongly exposed in the cases cited by this court, in the case of the state of, use of Coughlan, against the defendants; and without adopting or denying the proposition so elaborately discussed by the learned Jurists, Sedgwick and Greenleaf, that "wherever the elements of fraud, malice, gross negligence, or oppression mingle in the controversy, instead of adhering to the system or even language of compensation, the law permits the Jury to give what it terms punctive, vindictive, or amplary damages," its application must entirely depend upon the circumstances of the case and the evidence in the cause.

There is no element of fraud, malice, or oppression in this case; but the inquiry is, was there gross negligence? Gross negligence is a technical term; it is the omission of that care "which even inattentive and thoughtless men never fail to take of their own property;" it is a violation of good faith; Angell on carriers § 10.

It implies malice and evil intention. Hence, in all questions of punctive or vindictive damages, the intention of the defendant is a material consideration.

"What is, and what is not gross negligence, is often a mixed question of law and fact;" Angell on carriers §§ 22, 27; Peirce on American Railroad Law 282, 283. Whether malice or gross negligence existed is a qustion for the Jury; but what facts are sufficient to prove malice or gross negligence, is in such cases the province of the court to determine. "The Judge is to inform the Jury as to the degree of diligence, or care, or skill, which the law demands of the party, and what duty it devolves on him, and the Jury are to find whether that duty has been done; Hunter *vs.*

Caldwell, 11 Jur. 770; 10 Ad. and El. 69; 11, M. and W. 817, and other cases cited by Greenleaf, note 1 to § 49, p. 70, 11th edition.

The law requiring of the defendants only ordinary care and diligence towards third persons not passengers, or connected with the defendants by contract, trust or confidence, there was no evience of gross negligence which would warrant the court to instruct the Jury, that if they should find such on the part of the agents of the defendants, they might allow punctive or exemplary damages. The prayer was, for this additional reason properly rejected.

The case being divested of all aggravating circumstances, the second instruction granted by the court enumerated all the elements of compensatory damages which properly belonged to it.

The infancy of the plaintiff does not change either the degree of care or diligence to be used by the defendants in the management of their cars and engines or enhance the measure of damages to be adopted by the Jury.

The rules regulating the rights and duties of persons natural and artificial to reach other must be uniform; they cannot vary according to the years or degree of intellect of natural persons, without producing an uncertainty in the law destructive of all principle. For this reason and others which might be suggested in the conflict of decisions, we think those of Hartfield *vs.* Roper, 21 Wend. 615, and Willetts *vs.* Buffalo and Rochester Railroad Co., 14 Barb., are to be preferred to Lynch *vs.* Nurdin, 1 Ad. and El. (N. S.) 29.

In Hartfield *vs.* Roper, 21 Wend. 615, the action was by an infant two years old. He was in the sleighpath alone, and was run over and injured. It was held that no action would lie, if the injury was not voluntary or from culpable neglect.

The rule of negligence was applied to the case, and the want of care on the part of the parents was regarded as a want of care on his part.

It results from what has been said, that the defendants were bound, in the management of the engine and trains, to use such diligence and care as prudent and discreet persons would use and exercise on such occasions, having due regard to the safety of property and persons, with such motive-power and trains; and if, owing to the absence of such diligence and care, the plaintiff was injured, he was entitled to recover, unless from his own negligence or want of reasonable care, he brought the injury upon himself.

The defendant's 1st, 2nd, 3rd, and 4th prayers are defective in not presenting this alternative distinctly to the Jury. They enumerate certain facts and specify a certain want of care in preventing the plaintiff from getting on the cars, but do not refer to the absence of ordinary care and diligence, in the general management of the engine and train on that occasion, as an element of the condition on which would necessarily depend the right of the plaintiff to recover.

The conclusion from the foregoing is, that the court below was correct in rejecting the evidence set out in the plaintiff's exception, and in rejecting the evidence set out in the plaintiff's and defendant's prayers; and also, in giving its second instruction; but that there was error in the first instruction granted by the court; hence the Judgment below must be reversed, and a *procedendo* awarded.

Stamp Tax on Brokers' Sales.

By the new law which went into operation on the 1st inst., Bankers and Brokers will be relieved of the duty of making their returns of sales of Stocks, Bonds and Gold to the Revenue Assessors under the old Tax Law. In lieu of such monthly returns, however, they will be required, on all sales, whether for their own account or the account of others, to pay a stamp tax of *one cent on the hundred dollars.* They will have to provide themselves with the stamps, and will have to accompany every sale *with a stamped bill or memorandum*, the stamps being made at least equal to one cent on the $100, and one cent additional on every fractional part of $100 *of the currency value of the sale.* In the case of stocks selling *below* par, the stamp tax is made equal to only the currency proceeds of the sale. In the case of stocks and gold selling above par, the stamp tax is raised to the currency value of the sale. For example, in the first instance, we take 100 shares of Erie. The old tax was $5 on the par value. The new tax is only 66 cents on the currency value, say of $6,600. If the value be $6,625, or 66¼ per cent., the fraction goes to the Government, and stamps to the value of 67 cents must be attached to the memorandum of sale. In the second instance we have Government 6 per cents of 1862. The old tax upon the sales of brokers and bankers, *not made for their own account*, was $5 on the par value of every $10,000. The new tax, upon *all* sales, is in the nature of a stamp upon every memorandum of sale, whether such sale be made on commission, or for account of the broker or banker, is at the rate of $1 08 on every $10,000 the sale being at 108 per cent. The words of the new act are as follows:

That there shall be paid on *all* sales made by brokers, banks or bankers, whether made for the benefit of others or on their own account, the following taxes, that is to say, upon all sales and contracts for the sale of stocks, bonds, gold and silver bullion or coin, promissory notes or other securities, a tax at the rate of one cent for every hundred dollars of the amount of such sales or contracts. * * * And on every sale or contract for sale, as aforesaid there shall be made and delivered *by the seller to the buyer a bill or memorandum of such sale or contract*, on which there shall be fixed a lawful stamp or stamps in value equal to the amount of tax on such sale. * * * And any person or persons liable to pay the tax as herein provided, or any one who acts the agent or broker of such person or persons, who shall make any such sale or contract, or who shall in pursuance of such sale or contract, deliver or receive any stocks, bonds, bullion, coin or promissory notes or other securities, *without a bill or memorandum as herein required*, or who shall deliver or receive such bill or memorandum, *without having the proper stamps affixed thereto*, shall forfeit and pay to the United States a penalty of $500 for each and every offence where the tax so evaded, or attempted to be evaded, does not exceed $100, and a penalty of $1,000 when such tax shall exceed $100, &c.

Union Pacific Railroad.

The Omaha *Herald*, speaking of the recent arrangement consummated between the Union Pacific and Chicago and Northwestern Railroads, which insures the completion of the latter to Council Bluffs by the first of April next, says:

Under this new arrangement between the two companies, the Union Pacific is to build and furnish 250 cars for transporting their own material over the Chicago and Northwestern. These cars are all to be manufactured in this city, in the extensive car shops of the company, where they are now constructing large numbers of superior platform and freight cars.

Louisville and Portland Canal.

For more than six years past the work of enlarging the canal around the Falls of the Ohio river, known as the Louisville and Portland Canal has been in operation. The change is made so as to admit of the passage of large steamers, and a committee of the Cincinnati Chamber of Commerce, a body very much interested in the success of the work, have just reported that $1,800,000 have already been expended upon the enlargement, and that $365,000, and at least two more years' labor, will be required to complete it.

Taunton Branch Railroad.

The earnings of this road for the year ending May 1, 1866, were $125,757 75, exclusive of toll paid to the Providence Railroad; expenses $96,509 37; net earnings $29,248 33. The new stone passenger house at Taunton has been completed, at a cost of $36,384 07, less $3,465, amount of insurance on the old one destroyed by fire; no large expenditures for depots will be required for a long time; the road and equipment are in good order; the rolling stock is valued at $77,475; capital stock $250,000; and there is on hand a reserve of $14,831 99; profits of six months $16,049 53.

Chippewa Falls and Mississippi Railroad.

This proposed railroad which was chartered by the last legislature is attracting the attention of capitalists. The idea that a railroad running alongside of a navigable river cannot be made profitable is exploded. Good railroad men who have examined this route, consider it one of the most important routes in the west; and when completed, the best paying road in the country, and which will make Chippewa Falls the largest city in Northwestern Wisconsin; and would answer Eau Claire as well as the Tomah and St. Croix road; and would also build up Durand—one of the best natural points and promising places on the Chippewa River—and open up the largest and best agricultural and lumber districts of the West. Its usefulness would not be confined to the Chippewa River—it would make Wabasha one of the most important points in Minnesota.—*Chippewa Times.*

☞ The Davenport *Gazette* in noticing the sale of the Mississippi and Missouri railroad at that place on the 9th ult., says: "The sale certainly gave the Chicago, Rock Island and Pacific Railroad a great bargain; but, as the road had to be sold, we suppose they had just as good a claim for that as any other party, and what is now wanted by the people of this country and Central Iowa is to complete the road, at least to Desmoines. This, we understand, will be done. Two corps of engineers are now selecting and deciding upon the route, and just as soon as estimates can be made the contracts for grading and bridging will be let. The iron can be had when wanted, and the new owners of the road have got the cash on hand to pay for the material and construction. The supposition is that within ten days the estimates will be ready, and the assurances now are that within six months the iron horse from Davenport will sound his arrival in the City of Desmoines."

☞ The Pittsburg and Connellsville Railroad Company have put three hundred hands to work on the Sand-patch tunnel. It is also supposed that the Turkey-foot division of this road will be put under contract within the next month.

Central Pacific Railroad.

A correspondent of the San Francisco *Bulletin*, writing of this road, says the work is progressing much more rapidly than the public generally are aware. The present terminus of the road, is four miles this side of Dutch Flat, but the intention is to run cars to Crystal Lake, twenty miles further on, by the 15th of September, and the company expect to reach the summit of the Sierras before winter sets in. Watson, who conducted the first train over the road, is sanguine of being able to run a passenger train into Virginia in eighteen months or two years from this date. The worst part of the entire route from Sacramento to Salt Lake—that portion between Colfax and Dutch Flat—is already built, and there are 11,000 Chinamen at work on the road between Colfax and the summit of the mountains. In no place would the grade be over 115 feet to the mile, nor that, only for a distance of four miles beyond Dutch Flat. The Baltimore and Ohio road has a grade of 116 feet to the mile, and the Central Pacific Company are allowed to reach the same grade and curvature as that road. The road can be built on the east side of the Sierras much easier than on this side. After descending to the Truckee river, 1,500 feet, the remainder of the route to Virginia is as easy of construction as from Sacramento to Newcastle, which is only 925 feet above the level of the sea. Between Colfax and Dutch Flat are several deep ravines that had to be crossed by bridges, but after getting beyond the latter place the mountains are larger, and by winding around them there are fewer bridges to be built and gulches to be filled, making the work much less expensive. One of the bridges between Colfax and Secrettown is a quarter of a mile in length and from 50 to 115 feet high. Another of about the same dimensions is just being completed between Secrettown and Dutch Flat. Almost the entire work of digging is done by Chinamen, and the Directors of the road say it would be impossible to build it at present without them. They are found to be equally as good as white men, and less inclined to quarrels and strikes. They are paid $30 per month and boarded, and a cook is allowed for every twelve men. They do not accomplish so much in a given time as Irish laborers, but they are willing to work more hours per day, and are content with their lot so long as they are promptly paid. If the work on this road continues to progress as fast as it has done during this season, there is little doubt that the cars will be running from Sacramento to Salt Lake inside of three years.

☞ The first section of eight miles of the Stockton and Copperopolis (Cal.) Railroad will be in running order by the first of September. A road from Stockton to "deep water," at "Venice," a distance of 15 miles, has been surveyed; and the road will be built between the points and in running order within a year.

☞ The Dalton *Georgian* says that several hundred able bodied freedmen have recently passed that place, who are to be put to work on the lower end of the Dalton and Jacksonville Railroad. We hope soon to learn that the work is in rapid progress of construction along the whole line.

☞ The June product of the Franklin mine was 105 tons and 175 pounds. The product of the Alany and Boston mine was 15 tons and 1,475 pounds.

Cape Cod Railroad.

The earnings of this road for the year ending May 31, 1866, were $186,154 82
Expenses 108,803 32

Net earnings 77,351 50
Interest paid 2,199 40

Balance $75,152 10

Which has been applied as follows:

Tax to State 1¾ per cent	$10,594 60
Tax on dividends to U. S. 5 per cent ..	2,028 70
Dividend January 1, 1866	18,642 00
Dividend payable July 2, 1866	20,000 00
Applied toward payment of debts	23,886 80
	$75,152 10

☞ The iron for a continuation of the St. Joseph Valley Railroad from Schoolcraft to Kalamazoo, Mich., was purchased recently of the Cleveland Rolling Mills. A part of it has been delivered on the line of the road, and the entire quantity is to be delivered by November 1st. Nine miles of the line is already located, and it is thought the road will be ready for trains by December 1st.

Newark and Paterson R. R.

We learn that the building of the Newark and Patterson Railroad is rapidly going on, contractors being at work on two points in the village of Bellville. It is expected that a connection will be made from that point with the New Jersey Railroad before the end of the year.

STREET RAILWAY CARS.

20 NEW CARS, BUILT FOR A FOREIGN market, of

BEST MATERIAL AND WORKMANSHIP, BY

JOHN STEPHENSON.

WM. P. KITTREDGE & CO.,

164 Water Street, New York.

MR. JOHN H. JACQUELIN withdraws this day from our firm, A. G. HEMINWAY & CO.

—o—

Mr. A. G. HEMINWAY will continue in the same business as heretofore at No. 10 Wall Street, New York, August 1, 1866.

—o—

We have this day formed a co-partnership for the transaction of a general STOCK, BOND and COMMISSION BUSINESS, under the name of

JACQUELIN & DE COPPET,

JOHN H. JACQUELIN,
Late of the firm of A. G. Heminway & Co.
HENRY DE COPPET,
Formerly with Western & Billier.

New York, August 1, 1866. Office No. 26 New-st. 4t31

CIVIL AND MINING ENGINEERING,

AT THE RENSSELAER POLYTECHNIC INSTITUTE, Troy, N.Y.

The next Annual Session begins SEPT. 12th. For the new ANNUAL REGISTER, containing full information, apply to

8t31 Prof. CHARLES DROWNE, Director, Troy, N. Y.

THE NEW YORK CENTRAL RAILROAD CO.,
TREASURER'S OFFICE, ALBANY, July, 27, 1866.

TWENTY-SIXTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Three Per Cent. on the Capital Stock thereof, free of the United States income tax, payable on the twentieth day of August next.

Dividends in New York will be paid at the office of Duncan, Sherman & Co.; in Albany, at the Albany City Bank.

The Transfer Books will be closed at the close of business on Tuesday, the thirty-first day of July instant, and be reopened on the morning of Thursday, the twenty-third day of August next.

8t31 E. D. WORCESTER, Treasurer.

SEVEN PER CENT.

First Mortgage Bonds

OF THE

North Missouri Railroad Company,

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and a safe and judicious investment.

The proceeds of these bonds ($6,000,000 in all) will be used in extending a road already completed one hundred and seventy miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa; and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri river, so that this mortgage of $6,000,000 will cover a complete and well stocked road of three hundred and eighty-nine miles in length, costing at least $16,000,000, with a net annual revenue after the first year of over $1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the Great Pacific Railroads.

To the first applicants we are prepared to sell $500,000 at the low rate of 80 cents, desiring to obtain a better price for the remainder. This will yield about 9 per cent. income, and adds 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

4t30 **JAY COOKE & CO.**

THE STEAM SYPHON PUMP

COMBINES the properties of a Lift and Force Pump, without valves or machinery of any kind.

It will not get out of order and cannot freeze up. A Locomotive can raise water to fill its tender in a few minutes, thus dispensing with tanks, pumping machinery and attendance. It can be used as a Fire Engine where steam power is employed, as at Machine Shops, Car Shops, &c. Address STEAM SYPHON COMPANY,

American Railroad Journal.

New York, Saturday, August 11, 1866.

Ely's Railroad Box and Lining Metal.

The attention of Railroad Companies, Steamboat Proprietors, Machinists, Engineers, and all parties using Anti-Friction Metal, is invited to the Advertisement of Messrs. A. L. HOVEY & Co., in another column.

The composition known as "ELY'S RAILROAD BOX AND LINING METAL," has achieved a success which warrants the manufacturers in commending it to the attention of all who have occasion to use Anti-friction Metal in any form.

Its superior advantages are claimed to be—

1st.—Durability and unequalled power to resist friction.

2.—Cheapness, both as regards first cost and the amount of service rendered.

3.—Capability of resisting heat and non-liability to fuse, except at a high degree of temperature.

4th.—It does not wear the journals like soft metals.

5th.—Smoothness and fineness of fibre, rendering it capable of a very high polish.

6th.—Not liable to corrode; making it very desirable for lock or ornamental work on ships, steamboats, &c.

The undersigned having greatly increased their facilities for its manufacture, respectfully solicit a continuance of the favors of former patrons, and invite all to give it a trial, feeling confident that one trial will satisfy the most skeptical.

That all may be suited, we have put the metal at the following low rates, viz., No. 1, 20 cents.; No. 2, 25 cents.; No. 3, 30 cents.: Railroad, and other solid Boxes cast in shape, 35 cents per pound.

No. 13 Spruce Street, June 11th, 1866.

Messrs. A. L. HOVEY & Co.

In reply to your enquiries as to how I liked your Box and Lining Metals, I would say that I have put it to a severe test, having made a pair of gibs for the slides of my engine, and a bearing for the main shaft, where this is now working to my entire satisfaction. H. W. GREENE.

Williamsburgh, L. I. June 11th, 1866.

This is to certify that we have used A. L. Hovey & Co's Anti-friction Metal in our Planing and Saw Mill for the past four months, and would recommend it to any party using the same, as it has given us entire satisfaction.

CROSS & AUSTIN.

Proprietors of the Wallabout Planing and Saw Mill, Kent Ave. foot of Morton Street, Brooklyn, E. D.

Williamsburgh, June, 11th, 1866.

A. L. HOVEY & Co.

Gents,—This is to certify, that I have put your Anti-friction Metal for Journal Boxes, to a severe test at the speed of 3,500 per minute, and by this I certify and recommend it as the best I have ever used for Journals. Its merits are recommendatory independent of its cheapness and durability over all other metals I have ever used.

LEONARD TILTON, Master Mechanic,
Machine Works, Williamsburgh, N. Y.

No. 15 Spruce St., N. Y., June 8th, 1866.

I have used A. L. Hovey & Co's Anti-friction Metal and find it as represented. It is the best I have ever used. I have used it in filling Journals and Boxes where friction takes place, and find it superior to all other metals used by me; would recommend it to all machinists.

CHARLES E. GARRET.

Brooklyn E. D. N. Y. June 19th 1866.

Gentlemen,—We take pleasure in contributing our testimonial of approbation to your Anti-friction Metal for journals of machinery, lately purchased by us, having had several kinds before, which have never accomplished what they have been recommended to do. We use your Metal in driving Circular Saws, Moulding and Planing Machine, Scroll Saw, Boring Machine, Tenon Machine, at speeds varying from 1,800 to 3,600 revolutions per minute. We recommend it cheerfully to all persons using Anti-friction Metal, as its merits are recommendable independent of its first cost, being cheaper than other metals in general use.

CLOSE & MILLER, Builders.
269 and 271 South 3d St.

New Jersey, July 21, 1866.

Gentlemen.—We have used A. L. Hovey & Co.'s Anti-friction Metal where it has been subjected to the most severe test, in that it has not had the lubricating attentions it deserves. It comes in contact constantly with soda water which is fatal to any lubricating substances. We have used it by the side of Harden Steel, Cast and Wrought Iron, and also Bronze, and find neither to stand the hard use which it is put to so well as the above Metal. I think it the best metal for like purposes that I have ever used, having had an experience of twenty-five years in the use of metal boring.

Continental Screw Company.
By H. P. HUNT, Supt.

Elizabeth, N. J. July 7, 1866.

Gentlemen.—I have used A. L. Hovey & Co.'s Anti-friction Metal, for boxes for running Emery wheels and belts, at a speed varying from one to two thousand revolutions per minute. I find it to be the most economical Box metal I have ever used, being cheaper and more durable than any other, and cheerfully recommend it to all machinists.

JOSHUA G. REYNOLDS.
Foreman for Stackpole Bit Brace Co.

Elizabethport, June 26, 1866.

Messrs. A. L. HOVEY & Co.

This is to certify that I have used A. L. Hovey & Co.'s Anti-friction Metal for Journal Boxes and find it as represented. It is the best we have used. We also found a great saving in oil which is recommendable in itself, combined with its cheapness and durability, we would recommend it to all parties using the same.

Elizabethport Steam Cordage Co., at Elizabethport, N. J. JAMES C. FAIRBANK, Agent.

The composition is made under the personal supervision of Mr. T. R. ELY, the inventor, and the only genuine has our trade mark stamped upon it.

A. L. HOVEY & CO.,
Cor. 2d and South 11th Streets,
Williamsburgh, L. I.

☞ The Monroe (La.) *Telegraph* says that one of the locomotives on the railroad will, in a week or ten days, be in running order. The road is in readiness for it as far as the Lafourche, which is not yet bridged, although the timbers are nearly ready. By October the cars will run to Delhi,

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the year ending April 30th, 1866, were:

From freight	$4,204,740 82
" passengers	1,757,387 99
" mails, etc.	213,424 54
	$6,175,553 35

The operating expenses were:

Repairs of track	$863,573 46	
" bridges	77,347 01	
" buildings	84,232 02	
" fences	8,580 79	
" locomotives.	347 358 52	
" cars	347,485 45	
Loss and damage	21,535 35	
Fuel consumed	251,965 90	
Oil and waste	81,924 74	
Train service	148,101 65	
Engine "	212,471 05

Leaving balance of Income Account May 1, 1866, as shown in General Account		$588,691 55

The following is a comparative statement of the earnings of the line, 400 miles in length, for the fiscal years ending April 30, 1865 and 1866:

	1865.	1866.
Freight	$3,919,859 83	$4,204,740 82
Passengers	1,508,234 25	1,757,387 99
Mails, etc	153,758 14	213,424 54
Totals	$5,581,852 22	$6,175,553 35

The earnings of the road, as stated above, have been $6,175,553 35; and the expenses including State and National taxes, $3,376,118 34—leaving of earnings above ordinary expenses and taxes $2,799,435 01. The report says:

We have paid during the year for additional equipment, consisting of locomotives, passenger and freight cars, $426,244 86, and for lands purchased at Chicago, Burlington, Peoria, and elsewhere along the line, new station houses, buildings, and other improvements, $275,373 50, and the usual dividends, interest, and all the accruing obligations of the company, amounting in the aggregate to $1,506,172 72, and have also paid into the sinking fund $129,000, according to the terms of the trust deed, securing the construction debt of the company. The track of the road, and the rolling stock has been well kept up and improved, and it is believed that the capacity of the road and equipment to meet the demands of business, and fully equal the requirements likely to be made upon them, was never greater than at the present time.

The increase of gross revenues over those of the year before was from passengers	$249,153 74
From freight	284,880 99
Miscellaneous	59,666 40
Total	$593,701 13

When it is considered that the gross earnings during the last year of the war were greater by $1,541,929 41 than had ever been realized, the earnings of the first year of peace will be deemed very satisfactory. The prices during the last year of the war reached their maximum for all the productions of the country. The Government was the greatest purchaser of them all, and many things combined to make that a year of immense activity, and yet the progress of the western world is so rapid that in the very first year of a comparatively healthy and normal state of affairs both the numbers of passengers and of tons of freight moved over the road have been larger than in any previous year, even during the war. The increase, however, has not been uniform in every species of business. The extreme high price of pork two years ago, combined with a short crop of corn, induced farmers to sell every hog that could be spared from the farm, and the large business of that year in this article was in a great degree at the expense of the succeeding year, and during the last year the number transported was less, by 220,950, than the year before. The low prices of last year, and the abundant crops, will probably produce the reverse result this year, and the trade in this item of our business may equal and surpass that of two years ago. Of sheep there were 36,000 less in number carried over the road last year than the year before. For several years the movement of sheep to Iowa has been very large. The State has become well supplied, and the movement in that direction falls off, and the eastward movement is commencing. In cattle, where the price and the crop of any one year has less effect upon the numbers than is the case with hogs, the increase from year to year is generally steady, running up in three years from 83,117 head, moved over the road in 1863, to 119,093, transported the last year. The expense of operating the road, if we leave out the large item of State and National taxation, has been 48.90 of the gross earnings, and including those items, 54.67. This must be deemed satisfactory, when it is considered that during the year the prices both of labor and material were maintained at their highest points. During the year there have been fifty-three miles of track re-laid with new and re-rolled iron, being about one-eighth of the whole track. There have been added about five miles of side track, also, during the year. For several years the road from Galesburg to Quincy was in the hands of trustees, and in litigation, and was not kept in as good a condition as it ought to have been. This will be remedied as rapidly as may be. About half of all the track re-laid during the year was upon that part of the road. Enlarged accommodations for passengers have become necessary at many points upon the line. Passenger houses once equal to the wants of the community, have become entirely inadequate to the present necessities. In some places freight houses also require to be enlarged or rebuilt. In some other respects improvements may be judiciously made. These wants will all be met as rapidly as may be expedient.

The siding of the road has not been lengthened fast enough to accommodate the increasing numbers of the trains, and during the current year it will be necessary to add at least five, and possibly ten miles, to them, at the points where the trains most frequently pass each other.

Further extensions, when required, will easily connect several stations, and make a continuous double track where it will be most required.

There have been added to the equipment during the year 6 locomotives, 8 passenger coaches, 2 elegant sleeping cars, and 131 box freight cars. There are now upon the road 111 locomotives, 54 passenger, and 25 baggage, mail, and express cars, 1,639 house freight, and cattle cars, 442 platform and coal cars, 36 drovers' cars, and other cars employed in the work of repairs.

Though the working equipment of the road is very effective, and, as is seen, tolerably large, it is still inadequate to the full demand made upon it, and must be still further enlarged.

The capital stock of the company now amounts to $10,193,010, and that of its funded and other outstanding liabilities, for construction, and for the purchase of the road from Galesburg to Quincy, including $270,000 money due on that purchase not called for, amounts altogether to $6,024,406.25. The whole aggregate amount of the capital stock and debt of the company is therefore $16,217,416.25. This amount will be diminished by $231,664.86 in the trustees' hands not yet invested in the liabilities of the company, and placed in the sinking fund. The property charged with this aggregate liability is four hundred miles of road, and depot grounds, and other property, earning in the past year, gross, $6,175,553.35, and above the ordinary expenses and taxes, $2,799,435.01.

By the statement of the Treasurer, it appears that there is a balance to the credit of Income account (after payment of dividend May 15, 1866, $509,650) of $79,041.55. To which should be added the amount paid into the sinking fund, and to the Trustees of that fund, $778,125.99, making a total of $857,167.54, which represents that portion of the income above the ordinary expenses of operating and maintaining the road which has not been distributed in any form among the Stockholders.

At the annual meeting in 1864, when the subject was properly before the Stockholders by a legal notice, they adopted a resolution authorizing the board to enter into a contract with the Burlington and Missouri Railroad Company, the effect of which should be to aid in extending that road about sixty miles further into the interior of Iowa. During the continuance of the war it was not deemed wise to act under that resolution, but with the return of peace it was deemed, not only judicious, but of very great importance to the interests of this company, to avail themselves of the authority thus vested in the board. Accordingly, in June last, a contract was made between the two companies, by which this company agreed to set apart fifty per cent. of the gross earnings upon its road on business to and from that road each year, to purchase the securities of that company convertable into a preferred stock, provided that the amount so set apart should not exceed $60,000 in any six months, for the period of five years. The effect of the contract is, that within five years this company will become the owner of $600,000 of the preferred stock of that company, and by so doing will have secured the extension of its road fifty-six miles further west, to a distance of 132 miles west of Burlington. That road extends into a country perhaps equal in richness and fertility to that through which your road runs. The business to and from it passes over our road alone, and therefore is of great importance to it. It is generally through business on our road from Burlington to Chicago, and is therefore a very valuable business.

The work of construction has been pushed with such energy that it will be completed in all this year, and to half the distance in about two months. It must command the business of a very large extent of country both south, north, and west of its line, it being beyond the reach of any competition when the extension is completed. The Board had no doubt of the expediency or wisdom of the contract, and deemed it to be an easy and cheap mode of aiding an enterprise whose business will, in all probability, produce a much greater revenue to this company than itself can earn. As the

stock which we shall acquire by this arrangement, that company will, it is believed, within the five years, be worth all it may have cost; it may, at the end of that time, or earlier, be sold, and the proceeds divided among the stockholders of this company, unless they shall prefer the distribution of the stock itself.

An allusion was made in the last annual report to an effort then making to secure the construction of Union Stock Yards, and the probable abandonment of the separate Yards, which had been partly constructed by this company. We are glad to be able to state that that effort has been completely successful. Under a charter for that purpose, all the railroad companies united in the effort, and Yards have been built upon a scale commensurate with the magnitude of the business.

The Union Stock Yard Company own 340 acres of land on the south border of Chicago, upon which the Yards are built, and union tracks, by which the trains of every road terminating at that city have easy access thereto. The result is that all this business is concentrated upon these grounds, not only to the very great advantage of that particular trade, but to the great benefit of the companies who transport the stock in being able to unload their trains with great rapidity, and at one place, instead of sending, or allowing their cars to go to several Yards, as formerly, thus avoiding delay, and enabling companies to always command their equipment set apart for this business.

This company sold its improvements to that association, receiving its pay in its stock. The enterprise is not only a success in its most important feature, viz., the facility and ease which it secures, in the transaction of an immense business, but it promises to be financially very profitable in itself. The stock which this company holds in it is $125,000.

The railway property of the company, which, in its original design, consisted of a road from the Junction of the Galena and Chicago Union Railroad, (then so called about thirty miles, from Chicago) to Galesburg, now consists of a continuous main line from Chicago to Quincy, about 265 miles, and which at Quincy connects with the Hannibal and St. Joseph Road, extending by its connections, nearly complete, to the Kansas branch of the Pacific Railroad, and which will command a very large share of the business of the northern portion of the United States, which may pass over that route to and from the western Territories and Pacific States; and of a branch to Burlington, equally part of a main line between Chicago and that city, where it connects with the Burlington and Missouri River Road, complete seventy-six miles and fast approaching completion fifty-six miles farther to near the centre of southern Iowa, destined also to be a great route across that State; and also of a road from Galesburg to Peoria, with a branch South from it of thirty miles, to Lewiston. The business of all these roads come upon the main trunk at Galesburg, and passes thence over its length, 165 miles to Chicago.

There is also the small part of the original line between Aurora and the junction with the Galena road, thirteen miles, not, however, of much value. But the two routes to Quincy and Burlington, destined as they are, to become great thoroughfares forth both business and travel, have great present, and greater prospective value, while every mile of road to Peoria and Lewiston also contributes much to the revenues of the company by reason of the business which they furnish, passing over the main line from Galesburg to Chicago.

While we may congratulate stockholders upon the success and value of their investment, we may remind them also that the ownership of a property like this carries with it duties to themselves and to the public. There is the duty to protect its value, and increase its ability for usefulness by completing those works which the property itself renders necessary, and which no other interest is capable of accomplishing. At present we allude to bridges across the river, to connect the roads on the east with those of the west side of it. They are becoming a near at hand necessity. They are of great importance to the country west of the river. That region is remote from market. The expense of transportation consumes two-thirds or three-fourths of the value of the productions of the farm to lay the other third or quarter down at the points where consumed, and every improvement which will remove a barrier, smooth down an obstacle, obviate the expense, delay and vexation of a ferry and trans-shipment, is of great value. The river is a great gulf, separating the East from the West, at all times inconvenient of passage, and expensive, and at certain periods of the year impassable for the purposes of business, subjecting the owners of property always to delay, and often, as in cases of livestock, to very great damage. The railways on both sides suffer also great losses of business, not only which they might do, but more, because these difficulties retard the progress, settlement and prosperity of the country upon which their own success and value depends.

The construction of these bridges need be no great charge upon this company. A small toll, much less than is now chargeable for ferriage, levied upon the property and passengers which may be transported across will raise a fund sufficiently large to enable bridge companies, if that shall be deemed the best way to build them, to command all the requisite money for their construction. It belongs, however, to the railway companies, which are so greatly interested, and so greatly to be benefitted, to devise the plans, and carry into effect the bridging of the river at all those points, where long roads approach it from the east and the west, making it necessary to transport across it the productions and the travel of a very large extent of country.

We are aware that there are interests along the river averse to improvements of this nature. Those interests, however, are small, compared with the great and increasing volume of business which now crosses it at many points. They may all be preserved, and yet the great paramount interests be subserved. And when Government has appropriated hundreds of millions in land and money to secure the construction of great routes across the continent, it cannot for a moment be supposed that this great obstacle is to continue unbridged, to the detriment of such great interests, and such large numbers of people.

According to the annexed statement, the payments on account of 400 miles of road have been $12,777,551 92; for equipment, $2,670,209 80—total, $15,447,761 72. The Capital Stock on the 30th of April was $10,193,010. The funded debt, exclusive of the bonds cancelled by the Sinking Fund, was as follows:

Chicago and Aurora and Central Military tract bonds	$ 151,000 00
Chicago, Burlington and Quincy trust mortgage sinking fund, 8 per cent. bonds convertible	356,000 00
The same class of bonds inconvertible	3,169,000 00
Chicago, Burlington and Quincy trust mortgage bonds, 7 per cent	680,000 00
Chicago, Burlington and Quincy 2d mortgage bonds, issued on account of Northern Cross Road, 4 and 4½ per cent	941,000 00
Chicago, Burlington and Quincy scrip of 21 semi-annual instalments of $21,781 25 each, on account of Northern Cross Road	457,406 25
Total bonds and scrip, average rate of interest 6.65 per cent	$5,754,406 25
Capital stock	10,193,010 00
Total stock, bonds and scrip	$15,947,415 25

Excess of stock and bonded debt over cost of road and equipment $499,654 53.

The number of passengers carried over the whole line during the year was 939,201; of these, 876,460 were way, and 62,741 were through. Of the through passengers, 35,186 were carried west, and 27,555 east. Of the way passengers 453,773 were carried west, and 422,687 east. Total carried east 450,242; do., west, 488,959. Total mileage of passengers 49,670,625—an increase over the previous year of 6,263,700.

The total number of tons moved over the whole line in 1865, was 737,611; in 1866, 821,883—an increase of 84,372. Total tonnage east in 1866 494,480; do., west, 327,403. Total number of tons moved one mile over the whole line in 1866, 113,766,959, an increase of 6,187,599.

The equipment of the road consists of 111 locomotives, 54 passenger coaches, 25 baggage, mail and express, 1 pay, 1,689 house, freight and cattle, 442 platform, 36 drovers, 40 gravel, 1 tool, 1 pile-driving, 44 rubble, and 122 hand cars, and 2 snow plows.

Number of miles run by locomotives with passenger trains, 597,984; with freight trains, 991,623; with miscellaneous trains 493,973—total miles run 2,083,580.

The directors chosen at the annual meeting June 22, 1866, are as follows:

President.—JAMES F. JOY.

Directors.—Erastus Corning, James F. Joy, Chauncey S. Colton, John C. Green, Nathaniel Thayer, John M. Forbes, Sidney Bartlett, John W. Brooks, Robert S. Watson, William Boott and John N. Denison.

Chairman of Board.—JOHN N. DENISON.

General Sup't.—ROBERT HARRIS.

Treasurer and Secretary.—AMOS T. HALL.

☞ The sale of the Mississippi and Missouri Railroad made on the 9th July last, by virtue of the decree of foreclosure and sale, has been confirmed by the Circuit Court of the United States, for Iowa.

Journal of Railroad Law.

NEGLIGENCE OF TRAVELER IN CROSSING RAILROAD TRACK.

The case of Emery Butterfield *vs.* Western Railroad Corporation decides that a traveler upon a highway which is crossed by a railroad on a level, who knows that he is near the crossing and yet does not look up to see if a train is coming, simply because there is a storm and the traveling is bad, is guilty of such negligence that he cannot recover damages for an injury sustained by him from a collision with a passing train, although the bell was not rung nor the whistle sounded.

The action was brought to recover damages for a personal injury received by the plaintiff by being run over by the defendants' locomotive engine. At the trial in the superior court, before Russell, J., a verdict was returned for the plaintiff with $1,500 damages upon facts which are sufficiently stated in the opinion; the Judge having declined on motion of the defendants, to rule as matter of law that the plaintiff had shown such carelessness as to deprive him of his right to recover. The defendants alleged exceptions. The opinion on the appeal was written by—

CHAPMAN, J.—This case does not come before us upon a motion to set aside the verdict because it was against the evidence or the weight of the evidence, but upon exception to the refusal of the presiding Judge to instruct the Jury that there was no legal and sufficient evidence to authorize them to find a verdict for the plaintiff.

It is admitted by the plaintiff's counsel that the burden was on him to prove that he used due care to avoid the collision by which he was injured.

By due care is meant reasonable care adapted to the circumstances of the case. The crossing of a place known to be so dangerous as a railroad track frequently is by reason of the passing train reasonably requires a high degree of watchfulness and attention. Before attempting to cross, a man should make a reasonable use of his sense of sight as well as of hearing, in order to ascertain whether he will expose himself to a collision. If he fails to use his senses without reasonable excuse, he fails to use reasonable care, Shaw *vs.* Boston and Worcester Railroad, 8 Gray, 73. Warren *vs.* Fitchburg Railroad, 8 Allen 227. Stevens *vs.* Oswego Railroad, 18 N. Y., 422.

In Toomey *vs.* London &c. Railroad, 3 C. B. N. S. 146, it is said there that a mere scintilla of evidence is not sufficient to authorize a Judge to submit the question of the defendants' negligence to a Jury; but there must be evidence upon which a Jury may reasonably and properly infer that there was negligence on his part. This rule of evidence is substantially the same with that laid down in Denny *vs.* Williamson, 5 Allen, 1, and applies with as much force to the plaintiff's proof of due care on his part as to the proof of negligence on the part of the defendant. See also Philadelphia Railroad *vs.* Hummell, 44 Penn. State R. 375; Wilds *vs.* Hudson River Railroad, 24 N. Y. 430.

All the evidence as to what the plaintiff did comes from his own testimony. He states, in substance, that on the 30th of January 1862, he started from the depot in Westfield to go on foot to his own house in a westerly direction. He was well acquainted with the highway and railroad. He attempted to cross the railroad without looking or intending to look to see whether a train was coming, and as he stepped upon the track he was struck by a train that was passing at that moment.

He admits that if he had looked he would have seen the train. It came from the west, and for a half a mile west of the highway the track was in plain sight. As he approached the crossing the highway was for a considerable distance near to the track, and nearly upon the same level with it, so that the approaching train would be directly before him. As the way turns to cross the track it rises a little. It was dark, but the engine had a head light, which he could not have failed to see if he had looked.

He also knew that a train was due from the west about that time, and that it had not passed, and he supposed it must be near.

He states his reasons for neglecting to look. It was a stormy night, raining, blowing hard from the northwest, and snowing some. He had his hand up, holding his hat on his head, and this prevented him from seeing the train. The traveling on the highway was very bad; considerable snow had fallen sometime before, and its surface was frozen; the road had been ploughed out to the crossing, and the crust had slipped back into the path. The ice did not fall over, but slid right back. He could not tell which furrow he walked in; sometimes one, and sometimes the other. He was listening for the cars; his attention was called to the subject, and he expected to hear the bell or the whistle blown.

From this statement it is to be inferred that he had occasion to use his eyes pretty constantly for the guidance of his own footsteps as he walked, and that he was under the necessity of obstructing his sight for the purpose of his preserving his hat from being blown away. Yet as he had the control of his own movements, and could stop or check his speed at pleasure it was in his power to look up frequently, and he might easily have seen the train. The noise of the wind and storm and the breaking of the snow crust as he walked must have made it more difficult than usual to hear the noise of the train, and furnished no excuse for trusting exclusively to his sense of hearing.

We must assume it to be true that neither the bell nor the whistle was sounded, and that the defendants violated their duty in this respect. A traveller has a right to expect that he will hear the noise. But this expectation does not excuse him from exercising reasonable care to ascertain by sight as well as by hearing whether there is a train coming immediately upon him as he attempts to cross the track. The negligence of the company does not authorize him to maintain an action, if he also is negligent. He states that he did not know when he came upon the track, although the snow was entirely removed from it. But he had known for a considerable time that he was coming near it; he knew of the rising ground, and the train had been in plain sight for a considerable time.

The plaintiff's neglect to use his eyes was palpable negligence, and he states no reasonable excuse for it. The Jury ought therefore to have been instructed that he had offered no evidence of due care on his part and was not entitled to a verdict.

Exceptions sustained.

Cincinnati, Hamilton and Dayton R. R.

The Stockholders of the Cincinnati, Hamilton and Dayton Railroad Company, held a special called meeting, on the 16th ult., at Cincinnati, to consider the question of increasing the capital stock of the company, rendered necessary by the increased amount of machinery required to equip their extended line of road. S. S. L'Hommedieu, Esq., President, read the following statement as to the condition of the company, and the necessity of adopting the measure, which was afterwards carried:

The Board of Directors, in accordance with the views presented to you at the annual meeting, and which by your vote were approved, have called you together to vote yea or nay on a proposition to increase the capital stock of this company five hundred thousand dollars, making the whole capital three and a half millions.

Since the notice was published calling this meeting, much diversity of opinion has arisen among the stockholders on the question of an increase of stock at this time in the manner proposed. All, however, seem to agree in the importance of paying off the floating debt of the company, which now amounts to over $400,000. This debt has been incurred the past year, as follows:

For additional machinery	$232,897
Permanent improvements on Dayton and Michigan Railroad	135,843
Eaton and Hamilton Railroad	61,727
Making	$430,467

During the latter portion of last year, the company were enabled to transport from Toledo to Cincinnati, with the machinery at their command, about forty car loads per day of through freight. At the same time about double the number of car loads per day could readily have been obtained had the company been able to furnish the cars.

Under such circumstances the Board of Directors deemed it best to order the additional machinery, which will be fully employed this year, although the means to pay for the same, over and above interest on bonds and dividends, were not in the treasury.

The advance made to the D. & M. Company seemed equally essential. It became necessary, in order to accommodate the business at Toledo received from the boats, to furnish dockage, platforms, and more shelter for merchandise. A very extensive addition to the warehouse was made, and additional dockage provided on the grounds of the company, which had previously been purchased for that purpose at a price not equal to one-fourth what the land would now sell for.

The New York Central R. R. Co. have recently transferred the line of passenger and freight propellers from Cleveland to Toledo, and now run them daily between Buffalo and Toledo. This will give to the D. & M. and C., H. & D. roads a large increased amount of freight, and it is expected will fully tax the capacity of the new depot facilities provided.

The trestle work on the D. & M. Road, which we had hoped by repairs would have lasted several years longer, began to show signs of decay; and it was deemed necessary to permanently improve these weak and dangerous points, by substantial masonry and earthwork. This has required a large advance beyond the present net income of that road.

Had it not have been made, the probabilities are, accidents would have occurred to persons and property involving more thousands than the company have advanced.

The next and last item of expenditure was that for the purchase of the Eaton and Hamilton road.

The reasons for this were so fully given at the recent meeting of the stockholders, that it hardly seems necessary to repeat them. The company have warded off a dangerous competition, and made a good bargain for its stockholders. There would be no difficulty in now parting with the in-

terest, and with it the control of the road, at an advance on what has been paid for the same.

The stockholders should bear in mind that the company have, within the past three years, added to the value of the road in laying an additional track, both on the main and side lines, from Cincinnati to Dayton, a sum equal to one million five hundred thousand dollars; and that although the road is only sixty (60) miles long, it has on it iron sufficient to lay about one hundred and eighty miles of single track. They should also bear in mind that to accomplish this, involving an outlay of so large a sum, there has only been an increase in their capital stock and bonds to the amount of $644,000.

They should also bear in mind, that in the meantime regular dividends have been earned and made, together with a stock dividend of 20 per cent.

This was only accomplished by using the bonus received from the Dayton and Michigan Road, and by the use of earnings made over the amount paid on expenses, interest and dividends.

It may also not be amiss to remark, that the company have now a property, in good condition, worth more than a million of dollars in excess of what it stands charged on the books.

They also have a road of established reputation—one of great strength of position—one with the strongest of connections to the East, to the North, and to the Northwest—one, as yet, comparatively in its infancy—one whose future business from the Dayton and Michigan, from the Atlantic and Great Western, and from other sources, it would be difficult, at the present time, to measure; and one also, that must necessarily continue to expend money to keep pace with the growth of its business.

The policy of the company in reference to such expenditures, however, for the next two or three years, will be to expend no more than will be necessary to keep up with the growth of business.

It will be their endeavor first to get out of debt, and next to lay up a surplus fund. But I come back to the question whether it is now judicious to dispose of $500,000 of additional stock, to the *present stockholders* of this company, say for $400,000, or at the rate of eighty cents on the dollar? If this be not done, then it follows that dividends must be suspended until the debt is paid.

In ordinary times, with the prices of transportation on a level with those of labor and supplies, and with our ordinary amount of business, I should not hesitate to say that, with the additional facilities supplied by the money which is now owing, the company could with ease pay ten per cent. on the three and a half millions of stock; but suppose only eight per cent. per annum should be declared free from Government tax, until the prices of transportation were advanced, or labor and material lowered, it should be satisfactory to the stockholders. This would not take so large a net earning by $20,000 per annum, as it has to make ten per cent. on the three millions of stock.

The company have to exchange, or purchase, by the first of January next, 367 one thousand dollar first mortgage bonds. The holders of these bonds, both in New York and Cincinnati, have already commenced exchanging the first for the second mortgage bonds, at a difference of five per cent., or $50 on a bond; and from advices recently received, we have reason to suppose that the greater portion of the holders abroad will make the exchange.

The value of our stock in the market will have much influence on the question; and it is, therefore, important that its credit be maintained, and that our stockholders disregard the saying of those among them who take occasion in the streets, in the newspapers, and elsewhere, to make false representations to injure the credit of the company, and to enable themselves and others to purchase, at a low price, or for some other unworthy motive. Already have parties avowed their determination to me to purchase largely of the stock, as a permanent investment, when it is thus run down, knowing full well that every share is *worth more than its par value, intrinsically.* It is my duty to warn our stockholders against sacrificing their stock. If at any time they have doubts as to the value of their property, as an investment, let them take trouble to come and examine the books, which are always cheerfully exhibited to a stockholder, who calls for that purpose.

The passing of dividends until the floating debt is paid will probably take a year and a half. This would undoubtedly have the effect to greatly lower the price of stock in the market. It would really make it no less valuable, and the rich stockholder could afford to hold his stock and purchase that of others, while men of moderate means, and widows and wards, would probably have to sell. And here I may mention that upwards of one hundred women are holders of stock, while a considerable amount is held by guardians for the education and support of their wards. Another considerable sum is held by estates. Pass the dividends, and you put down the market value of the stock, and enable the men of much money to make a good speculation as well as a good investment.

The subject of a consolidation of the C. H. & D. and D. & M. Companies, has been under consideration for a year past. The D. & M. Company proposes to put in their stock at 40 per cent., and have obtained nearly a unanimous vote of their stockholders to that effect. This would require an issue of a million of stock, making in all four millions of joint stock. The C. H. & D. Company are the holders of half of the present stock of the D. & M. Company, received as a bonus on the lease, and would be entitled to the benefit of half a million of the new stock. It has been suggested by stockholders, who favor the issue of the present C. H. & D. stock, to supply immediate necessities, that the half million of stock to be hereafter derived from the consolidation, *be cancelled.* Thus leaving the capital of the two roads, of two hundred miles, four millions of dollars.

This would answer the purpose, if our stockholders were ready to vote the consolidation. It is objected, however, by quite a large number of them, that it is permature to consolidate at this time.

While it is conceded by all that the D. & M. road, when fully developed, will earn her portion of a ten per cent. dividend annually, it is evident she cannot contribute anything for several years to come, needing all her net income to expend in permanent improvements on her road, and in furnishing equipments for the increase of business. The C. H. & D. Co., now owns a majority of the D. & M. stock and is virtually responsible for all her bonded debt, and will eventually consolidate. The two roads are now worked as one. Separate accounts are kept of the earnings of both companies on the books of the C. H. & D., as required by the lease; but the same officers manage the whole. No expense beyond the hire of one clerk and some stationery would be saved by consolidation.

It is urged in favor of immediate consolidation, that if postponed until that road earns a dividend, the stock must be taken at a higher figure than forty per cent. This may be the case, but the C. H. & D. stockholders should always be ready to agree that the net earnings applicable to the dividends, earned by the D. & M. Co., should fix the relative value of her stock, compared to those of the net earnings, C. H. & D. alike applicable to dividends.

The stockholders will pardon me for now speaking of matters somewhat personal to myself.

My connections with their road commenced in the early part of the year 1848. The rights of way were still to be obtained, and the capital secured to build the road. This was accomplished by me with the assistance of a Board of Directors. The iron was purchased on favorable terms, and the stock and first bond sold at par, without any employment of agents or expense of commissions. The road was opened for business to Dayton in September, 1851, and would have been at an earlier period but for the prevalence of cholera in the region through which it passed.

Nearly nineteen years of the best portion of my life have been devoted industriously to its interests. With me it has been like a first born child. Salary or money has been no object, compared to the success of the road.

I have been content to build up a road that would be beneficial to the city in which I have lived for more than half a century, and been an active participant in its business for forty years.

The financial credit of the company has never been impeached, for it never failed to meet an obligation, large or small, when due and properly audited.

The stockholders have received fair dividends (an average of 7 4-5 per cent. from the first excess), and there has been no failure to pay interest on bonds or necessity of capitalization. No protests were ever served on it for want of ability or promptness in paying notes of its own making. Its real business has grown from $321,793 to $1,361,566 47, and bids fair to go on increasing, if facilities are provided.

The stockholders have been fortunate year after year from the commencement of the work in having Boards of Directors who worked harmoniously. No schism ever occurred among them, nor have they had any object other than to promote the best interests of the stockholders. No "axes have been ground for them." But for their united support I would have long since disconnected myself with the work. To them belongs whatever of credit is due to the success of the enterprise. Many of them, and among the most useful, have gone to their final rest. The names of George Carlisle, John Woods, and John C. Wright will be long remembered and honored, in connection with the railroad up the Great Miami Valley.

Some of our stockholders occasionally express doubts as to the propriety of my remaining President of the Atlantic and Great Western Railway and at the same time of the Cincinnati, Hamilton and Dayton.

They fear that it is too much for one man to do justice to. The position as President of that road was not sought by me. On the contrary, it was declined when tendered, until the board unanimously recommended that I should take the place. It was believed that the interests of the roads would be best promoted by having one head to direct them.

I should resign the presidency of the A. & G. W. at an early period, if I though either was neglected by me.

With the assistance of Vice-Presidents on both roads, who take charge of most of the detail, the labor is no greater than I performed on our road for many years, with less experience.

After the reading of the President's statement, discussion was had on the affairs of the road, its management, &c., when it was

Resolved, That the Directors be instructed not to sell any of the stock authorized to be issued at less than par.

Alabama and Florida Railroad.

We understand that the President of the Alabama and Florida railroad of Florida is now at the North for the purpose of raising about two hundred thousand dollars in cash, with which to put that road in working order from the Gulf to the State line. This connects Pensacola with Northern lines by way of Montgomery, and also connects with Mobile and New Orleans. It is a very important route, the harbor being one of the finest in the South, and the commercial advantages of the line easily understood.

☞ The yield of the Portage Lake Mines in June was as follows: Franklin, 105 tons, 175 lbs.; Pewabic, 90 ton, 527 lbs.; Huron 60 tons, 1,016 lbs.; Isle Royale, 31 tons, 1,230 lbs.; Grand Portage, 24 tons, 875 lbs.; Albany and Boston, 15 tons, 475 lbs.; Sheldon-Columbian, 10 tons.

The yield of the National Copper Mine for June was 30 tons, 1,162 lbs.

American Railroad Journal.

Saturday, August 11, 1866.

Stock Exchange and Money Market.

The tendency of the money market, all through the week, has been to increased ease; from the accumulation of capital seeking reliable and remunerative temporary employment at this centre in the absence of anything like general activity in commercial circles. Speculation at the Stock Boards, though augmenting in volume as the season progresses, has not been equal to the absorption of the means available, at unusually low rates, to all first class borrowers. Lenders have been investing very freely in the public funds, for the sake of the liberal interest which they yield. The disposition to purchase the National Stocks, for such purposes, has been greatly strengthened by the last and decidedly most favorable official exhibit of the public debt, which showed that the aggregate of the debt had been reduced $37,189,091 in the two months ending with August 1, 1866, and $124,154,000 in the twelve months ending on the same day. The reduction, or, more correctly speaking, liquidation of the debt, since the 1st of last June, has been progressing at the rate of over eighteen and a half million dollars a month, or equal to nearly two hundred and twenty-five millions a year, at which rate, the whole debt would be cancelled in about eleven years, or four years before the maturity of the six per cent. bonds of 1881. At the average rate of liquidation for a year past—about ten and a half million dollars a month—the debt would all be paid off long before the maturity of the U. S. Six per cent. thirty year railroad aid bonds of 1865. The net aggregate of the debt was on the 1st inst., $2,633,099,273, against $2,670,288,368 June 1st, 1866, $2,689,689,843 on the 1st of May, 1866, and $2,757,689,571 on the 1st of September, 1865. The total of the gold bearing portion of the debt is now $1,242,628,442; and of the currency bearing portion, $1,079,668,960. The non-interest bearing part of the debt stands at $443,449,046, as against $452,031,603 on the 1st of June—showing a reduction in this item of $8,582,557 in two months. The cash on hand in the National Treasury on the 1st inst., was $137,317,333 ($61,322,127 in coin and $75,995,206 in currency), as against $129,691,083 on the 1st of June. The figures show a gain of $10,642,168 in the coin reserve, and a loss of $3,015,919 in the currency reserve of the Treasury Department, within the two months. Of the coin on hand on the 1st inst., (of which nearly forty-one millions were in the U. S. Sub-Treasury in this city) about forty-five millions belonged absolutely to the Government, as against only about twenty-eight millions thus owned on the 1st of June. The outstanding gold certificates on the 1st of August were $16,403,180, against $22,568,320 on the 1st of June, showing a wholesome reduction in this item of National obligation. The outstanding legal tender circulation on the 1st inst., was $566,373,868, against $564,140,458 June 1, 1866, and $684,138,950 on the 1st of September, 1865. Altogether the statement of the debt on the 1st inst., was very satisfactory and encouraging; and its favorable influence on the money and stock markets is being gradually and distinctly developed. Call loans are now quoted at 3@5, generally at 4 per cent.; and prime discounts at 5@6½, mainly 5½@6 per cent. per annum. The city banks, last week, increased their loans, $196,646, the legal tender reserve, $1,529,265, and their circulation, $66,568; while they lost $426,221 of their deposits, and $252,171 of their specie. Their legal tender reserve now amounts to $86,235,079, as against $79,541,638 at the close of the first week in July; and their specie reserve is $9,448,900, as against $9,865,266 July 7, 1866. They have been losing specie since July 14, when the aggregate on hand was $12,451,684. The Bank Exchanges at the Clearing House, through the past week, averaged $87,204,469 a day, against a daily average of $71,720,801 the preceding week; and $95,225,813 the week ending with July 21st. The daily exchanges are increasing as business revives.

The U. S. Sub-Treasury receipts, week ending with Aug. 4, were $18,578,526, including $2,794,658 from customs duties; payments, $22,015,195; balance at the close of the week, $82,467,634, against $85,904,263 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $1,873,025, and payments, $902,134; Tuesday, receipts, $1,296,244, and payments, $803,232. The balance at the close of business on Tuesday stood at $83,931,535, against $80,131,227 a week ago.

The gold speculation was quite weak in the forepart of the week, in the absence of any special influence favorable to buoyancy. The rates receded from 148⅛ on the 2d inst. to 147½ on Monday. Since that day, there has been a gradual rally in the market, the inflation having been most marked on Wednesday, when the prices rose to 148⅞@149, on a renewal of the demand, chiefly on speculative account. The customs drain is fair in amount, and is the main legitimate support of the market at present. Last week, the customs revenue at this port averaged $465,776 a day; thus far, this week, the daily average has been $384,500. There is no export inquiry, this week. Saturday's specie exports were only $114,516, largely in the form of silver bars. The foreign demand for silver is now more urgent than that for gold. Of the silver bars shipped on Saturday, $221,987 went to Hamburg, by the Borussia. The Sub-Treasury disbursements of coin interest, last week, were only $168,900, against $292,231 the preceding week. The specie exports from this port, thus far in the current calender year, have been $51,824,771, against $18,647,998 same time last year.

There has been a slight improvement in the foreign exchange market, towards the close of this week. Importers have been more disposed to purchase prime bills, apprehending a rise, rather than a fall, in the gold market, before the full resumption of the fall trade. Prices of bills, especially sterling, have stiffened a fraction, but they still rule considerably below the specie shipping point, thus precluding any immediate foreign drain on our coin supply. Prime bankers' sixty day bills on London, which were down to 107½, have been quoted up to 107¾@108, and on Paris to 5.25@5.18¾; sight bills on London to 108¾@109¼; and on Paris to 5.17½@5.15. The foreign demand for our public stocks continues active. Liberal shipments of 5-20s have been made, since our last. These have added to the available supply of prime bills, made chiefly by German houses. There have been fewer commercial bills offered, in view of the slight diminution of our produce exports. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,950,505, against $1,781,971 same week last year. The exports since January 1, have been to the value of $122,426,928, or about thirty million dollars in excess of the exports, same time last year.

In Government securities of all classes, the business of the week has been unusually extensive at steadily advancing prices. The investment demand has been very brisk for all the interest bearing obligations, particularly the 5-20s of the several issues, and the first and second series of the Seven Thirties. A heavy conversion business has been transacted at a profit of from 2@2¾ per cent. by the holders of the 5-20s of 1862 exchanging their bonds for bonds of the issue of last year. At the Sub-Treasury, and through the Government Loan Agency, likewise, large amounts of the 5-20s of 1865 have been issued in exchange for the 7-30s of August 1864, under the instructions, referred to in our last, limiting the privilege of converting the 7-30s into 5-20s of 1865, to the holders of the first series of the 7-30s, maturing in August, 1867. The U. S. Assistant Treasurer at this port has given notice that Schedules of thirty or more "7-30" Coupons, maturing on the 15th inst., will now be received for examination at the Interest Department of the U. S. Treasury.

The Treasurer also announces that he will be prepared on the 15th instant, to pay the coupon on the first series of 7-30 per cent. Treasury Notes of the United States. These notes are now convertible at the Treasury Office in New York or at Washington, free of expense to the holders, into the United States 5-20 gold bearing stock of 1865—registered or coupon. The exchange can be made before or after the 15th August coupon. If *before*, the holder will receive seventy-five days' interest from 15th February last to 1st May, at the rate of 7-30 per annum, or two cents per day, on each $100, in addition to the 5-20 stock at par, dating and carrying interest in gold at 6 per cent. from 1st May. If *after* the 15th August coupon shall have been collected, the holder will have to repay the back interest for 107 days from the 1st May last, so as to equalize the exchange of the Treasury notes for the 5-20 bonds. It should be distinctly understood that only the first of August series of the 7-30s are allowed the privilege of *immediate* conversion. Conversion *on the maturity* of all the notes is alone the absolute privilege of the holders of the notes.

Railway and miscellaneous property was in less urgent investment and speculative demand up to the close of business on Monday, and the market generally yielded, under liberal realizations. The favorable public debt statement, and the present and prospective ease in money have led to a revival of confidence in the buoyancy of stock values, and business has rapidly regained the wonted activity in nearly all the interests represented at the calls of the Stock Boards. The dealings of Wednesday were decidedly more comprehensive and on a strengthening market, the *bull* element having been aided by an universal combination of propitious influences. The leading railways make highly encouraging reports of their current earnings and a brisk fall traffic is anticipated. The good dividend paying stocks derive marked benefit from this source, which is more or less directly advantageous to all the share property dealt in at the Stock Boards. Cheap money is, however, the potential support of the present upward movement in the Stock Market.

In general business, there has been rather more animation, and toward the close, more buoyancy has been discernable. The rally in gold from the depression of the fore part of the week has tended to increase the demand for domestic produce, prices of which close rather in favor of sellers. The main exception has been cotton, which has been unfavorably affected by recent advices from Enland. The week's exports of cotton have been 2,855 bales from this port, and 7,500 bales from all the shipping ports, leaving an available supply of 120,000 bales here, and 275,000 bales at all the shipping ports. The total exports of cotton from the United States, since Sept. 1, 1865, have been 1,480,000 bales. In foreign merchandise there has been only an average summer trade, at drooping prices. The Dry Goods interest in all branches is suffering from the backwardness of buyers, on a market oppressed by accumulating supplies. The total imports of foreign dry goods, last week, were $2,738,730, and the total amount marketed $2,073,383. The value of foreign merchandise imported last week, was $2,424,784—making the grand total value of last week's imports of dry goods and merchandise, $5,163,514.

The quotations for American securities and consols on the London Stock Exchange were as under on the dates named:

	July 21.	July 28.	Aug. 6.
U. S. 5-20's	70½@71	69¼@69½	68½
Erie	44¼@44¾	41 @42	—
Consols	88⅜@88½	88¼@88⅜	87¾

The New York exports, exclusive of specie, for the week ending Aug. 7, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,781,971	$2,959,505
Prev. reported	90,552,365	119,467,423
Since January 1	$92,334,336	$122,426,928

The New York imports for the week compare as follows:

	1865.	1866.
Dry goods	$1,320,102	$2,738,730
Gen. merchandise	2,947,227	2,424,784
Total for the week	$4,267,829	$5,163,514
Prev. reported	92,210,649	187,241,148
Since January 1	$96,477,978	$192,404,662

The New Orleans Custom House receipts amounted in July to $360,484. The receipts in July 1865, were $107,748.

The balance in the Sub-Treasury on Wednesday was $85,447,289 43.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State 7s, Bounty Loan, 104¼; do., 6s, 1879, 97⅝; Tennessee 6s, ex-coupon, 69½; do., new, 66; North Carolina 6s, 84; do., ex-coupon, 62; do., new, 62; Ohio 6s, 1881, 100½; Virginia 6s, 66¼; Brooklyn 6s, Water Loan, 95; Peninsula R. R. 1st mort., 84; Mc Gregor Western, 20; do., 1st mort., 65; New Jersey Central R. R., 127; Milwaukee and St. Paul, pref., 71½; New Jersey R. R., 130; Catawissa, 79½; Chicago and Milwaukee, 70; New York and New Haven, 112; Stonington, 110; Boston Water Power Co., 30; Central Coal, 51; American Coal, 58; Mariposa pref., 27¾; Western Union Tel., 56½; do., Russian Extension, 108; Continental Bank, 100; 4th National Bank, 103¾; Bank of Commerce, 113; Central Bank, 110½; Am. Ex. Bank, 113¾; Bank of Commonwealth, 104½; Hanover Bank, 110; Corn Ex. Bank, 119; Bank of New York, 120½; Mechanics Banking Ass., 108; Bank State of New York, 109.

Philadelphia.—Allegheny County coupon 5s, 72; Pittsburg 7s, 70¼; New Jersey 6s, 96¼; Warran and Franklin 7s, 80; Philadelphia and Sunbury 7s, 92; Morris Canal Boat Loan, 90¼; 13th and 15th streets, 21½; Fulton Coal, 7; N. Y. and Middle Coal Fields, 5⅛; Big Mt. Coal, 5; Clinton Coal, ⅝; New Creek Coal, ⅝; Locust Mt., 47; Keystone Zinc, ⅞; Farmers' and Mechanics' Bank, 129; Commercial Bank, 54½; Bank of North America, 22¼; Caldwell Oil, ⅜; Ocean, 4⅜; Maple Shade, 1¾. The latest quotations are: City 6s, 94½@95; do., new, 98⅛@98½; State 5s, 93¼@93½; do., coupon, 93¾@94¼; do., 6s, W. The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	June 1, 1866.	Aug. 1, 1866.
Debt bearing int. in coin.	$1,195,825,191 80	$1,242,628,441 80
Debt bearing interest in currency..	1,147,222,226 28	1,079,668,959 96
Matured debt not presented.....	4,900,429 64	4,670,160 32
Debt bearing no interest.	452,031,603 04	443,449,046 91
Total.	$2,799,979,450 76	$2,770,416,608 99
Coin in Treasury.....	$50,679,957 72	$61,322,126 57
Currency ...	79,011,125 52	75,995,206 04
	$129,691,083 24	$137,317,332 61
Debt less cash in the Treasury.....	$2,670,288,367 25	$2,633,099,276 38

The total debt shows a decrease since the 1st of June of $29,562,841 77. The balance in the Treasury shows an increase, as compared June 1st of $7,626,249 37. Deducting the amount on hand from the aggregate debt, both on the 1st of June and the 1st of August, the decrease of debt would be $37,189,091 14. The total debt on the 31st of August last stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August 1865, and 1st of August, 1866, and the actual decrease in the Public Debt since that period has been $124,590,295 05.

Tunnel under Chicago River.

The city of Chicago is now prepared to construct a Tunnel under the South Branch of Chicago River according to plans and specifications now on file at the office of the Board of Public Works in that city. Last year an ordinance was passed for the same, which was conditioned on the raising by private subscription of $100,000. This did not succeed, and now the city will pay the whole expense, so that the work will go on without delay. The excavation will be clay probably. Proposals will be received until the 18th inst., and must be addressed to the Board of Public Works, Chicago, endorsed "Proposals for Washington Street Tunnel." The Tunnel will consist of three divisions, the outside ones for vehicles, to be eleven feet wide and fifteen feet high; the middle one for pedestrians, to be ten feet wide, the latter terminating in a stairway at each end, beyond which the two tunnels will converge into one. The covered portion of the tunnel will be about 1,000 feet in length.

Connecticut and Passumpsic Rivers R. R.

The annual meeting of this company was held at Newport, Vt., on the 31st ult. The old Board of Directors was re-elected with Hon. Henry Keyes, of Newbury, Vt., as President, under whose excellent management the road has doubled its business within the last three years; and, notwithstanding large outlays for engines and cars, its receipts the past year, as will be seen by the Report which we give elsewhere, have exceeded the expenditures by more than $175,000. A dividend on preferred stock of $6 in money and $10 in stock, for each share, has been paid. The managers have recently purchased a large track of land at Lyndon, where a machine shop will be speedily erected, to take the place of that burned at St. Johnsbury. It was voted to allow the old stock to become "preferred stock" by the payment of $50 per share, and the directors were authorized to increase the capital by creating 4,000 shares. This is for the purpose of extending the track to the Canada line (six miles beyond Newport) from which point the Massawippi Valley Railroad will be built, to unite with the Grand Trunk Railway. The local business upon this road is rapidly increasing, and with the increase of facilities of transportation it will continue to increase. A large amount of lumber is being got out for the market in the northern part of Vermont, and 3,000 tons of ore from the copper mines in Corinth were sent down the road last year.

Lexington and West Cambridge Railroad.

The Annual Meeting of this Company was held on the 1st inst. The report states that the total receipts for the year have been $33,025 25; and the expenditures, $20,959 95. The past year has been one of great prosperity to the company. Full power to lease or sell the road, was granted the directors. The following gentlemen were chosen directors for the ensuing year: R. D. Blinn, W. E. Parmenter, David Wood, Charles T. Crocker and Geo. Fay.

Memphis and Little Rock Railroad.

The St. Louis *Dispatch* says: "We learn that efforts are being made to complete the above road from Memphis to Duvall's Bluff. Mr. R. C. Brinckley and Mr. W. Greenlaw, on behalf of the road, obtained subscriptions in Memphis to the amount of $95,000. We hope the road will in a short time be pushed down to the Texas border, as was, we believe, contemplated by its originators. The completion through from Memphis will not, however, be without advantage to St. Louis."

Clinton and Port Hudson Railroad.

Work has been commenced upon this road, though with but few hands. The Clinton *Democrat* says: Geo. A. Neafus, the President of the company, has been to New Orleans, with the view of hiring labor and procuring the necessary tools and materials for the work. His success was not as complete as he expected. The managers, however, are confident that they will have it in running order for the fall trade. It is sincerely hoped that their expectations may be realized."

The Savannah and Memphis Road.

Much light has been thrown on the advantages of this road as a freight road by the recent discussions. As a freight route between Savannah and Louisville, Cincinnati, St. Louis, Cairo and Chicago, it can never have a show of competition. The direction from Savannah to Tuscumbia is from southeast to northwest, and comes as near being an air line as a railroad can be made. From Tuscumbia, the head of navigation on the Tennessee river, that stream runs a due north course to where it empties into the Ohio river, a short distance from the mouth of that stream. From the mouth of the Tennessee to where the Ohio river empties into the Mississippi, the course is northwest to Cairo, on the Mississippi. From Cairo to St. Louis the course of the Mississippi is from South to North. From Tuscumbia by the rivers, and the Illinois Central Railroad from Cairo to Chicago, Louisville, St. Louis and Chicago, are about equi-distant. The Tennessee river is navigable, as all Western men know, for first class boats all the year, to Colbert's Shoals, about seven miles below Tuscumbia; and on these shoals there is never less than three feet water. This brings the entire Western country in easy communication with Tuscumbia. From Tuscumbia to Opelika, by an air line, is 195 miles—but allowing for curves to avoid insurmountable obstructions, we put the road down at 220 miles. The links in the road from Opelika to Savannah are complete via Columbus and Macon—a distance of 319 miles—thus connecting the navigable waters of the great West with the Atlantic by rail at the short distance of 539 miles.

The only present practicable freight route by rail with the West, is *via* Chattanooga and Nashville to Johnsonville, on the Tennessee river. From Johnsonville to Savannah by rail, is 662 miles; Tuscumbia to Savannah 541—difference in favor of the Savannah and Memphis route, 121 miles. Johnsonville to Macon 471; Tuscumbia to Macon 350—difference in favor of Tuscumbia route, 121 miles. Johnsonville to Columbus, *via* West Point, (the shortest route, but which competes in freight rates only with the route by Macon 571) 506 miles. Tuscumbia to Columbus 250 miles—difference in favor of Tuscumbia, 256 miles. Johnsonville to Atlanta 367 miles; Tuscumbia to Atlanta *via* Opelika 331—difference in favor of Tuscumbia 35 miles. These are facts that can not be controverted, and is conclusive proof that the Savannah and Memphis road is bound to be the road for freight and travel between the Great West and the entire country composing Middle, Eastern, Western and Southern Alabama, Western, South-western, Middle and Southern Georgia, and East Florida; and by its connection with the Charleston and Memphis road at Tuscumbia, supersedes all other routes for the freight and travel between Savannah and Memphis.

The advantages to Montgomery and Selma, Alabama, of this road over their pet schemes, are of such a character, as would be folly in them to overlook. Near Elyton, about 120 miles from Montgomery, about the same distance from Selma, the Savannah and Memphis road crosses the track of the Alabama Central road, being built from Montevallo to Decatur. This will put them in communication by our road with the Great West at Tuscumbia, by water, at a distance from the initial point, about the same as that to Decatur—a saving in shipment by rail, of two hundred miles—the distance from Decatur to Johnsonville, where the route meets water communication. From Montevallo to Selma a railroad is already in operation. A road is being built from Montevallo to Montgomery. It is not to be expected that these rival cities will be in a hurry to abandon their favorite bantling to Decatur, but as interest generally rules in business matters with sagacious men, it is reasonable to presume they will not be slow to see that, with the Savannah and Memphis road built, there will be little necessity for the Alabama Central, beyond the junction of that road with the Savannah and Memphis; and that not only will the Central, beyond the initial point be abandoned, but that the capitalists of both cities will seek our road as a profitable investment.—*Columbus Sun.*

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Aug. 3d, 1866, were $58,963 95
Corresponding week of 1865 ..... 57,874 73

Decrease $3,910 78

The earnings of the Grand Trunk Railway of Canada for the week ending July 28th, 1866, were $124,474 00
Corresponding week of previous year.. 117,470 00

Increase..... $7,004 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in July, 1866 .. $31,008 00
Corresponding week previous year.... 36,338 67

Decrease $5,330 67

The earnings of the Western Union Railroad for the week ending July 31, 1866 .... $22,239 85
Corresponding week previous year.... 17,296 35

Increase..... $4,943 50

The earnings of the Chicago and Great Eastern Railway for 4th week in July were.... $27,374 17
Same period last year 25,288 54

Increase in 1866..... $2,085 63

The earnings of the Chicago and Northwestern Railway for the fourth week in July, 1866 were $213,186 00
Corresponding week of previous year.. 235,764 00

Decrease $22,578 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in July, 1866, were $50,911 00
Corresponding week of previous year.. 56,757 00

Decrease $5,846 00

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st July, inclusive, during the years 1865 and 1866, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1865..	282,500	2,958,900	3,595,900	159,500
1866..	108,300	1,372,000	8,999,400	105,000
Dec.	174,200	1,586,900	*5,403,500	54,500

* Increase.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 491,580 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1864.	1865.	1866.
Canal opened—	April 30.	May 1.	May 1
Flour, bbls	343,400	282,500	108,300
Wheat, bush	7,164,200	2,958,900	1,372,000
Corn, bush	2,557,800	3,505,900	8,999,400
Barley, bush	142,100	159,500	105,000
Oats, bush	3,128,400	4,386,800	3,679,900
Rye, bush	64,500	177,700	410,600
Malt, bush	.....	249,000	103,700
Beef, bbls	5,400	7,190	100
Pork, bbls	47,700	14,050	7
Bacon, lbs	559,300	1,231,900	.....
Butter, lbs	24,000	49,100	39,609

Do. dutiable	131,425	606,255
Specie and bullion	5,199,472	15,890,956
Total exports	$13,446,116	$26,153 374
Do. exclusive of specie..	8,246,644	10,262,418

The Exports from New York to Foreign Ports for six months from January 1, were:

	1865.	1866.
Domestic produce	$68,148,767	$104,254,136
Foreign free goods	634,896	458,794
Do. dutiable	2,143,022	3,025,987
Specie and bullion	17,915,759	45,782,430
Total exports	$88,842,444	$153,521,347
Do. exclusive of specie..	70,926,685	107,738,917

The Exports from New York to Foreign Ports for the fiscal year ending June 30, were:

	1864–'5.	1865–'6.
Domestic produce	$184,617,834	$210,352,823
Foreign free goods	2,419,689	762,633
Do. dutiable	15,835,262	4,323,375
Specie and bullion	39,589,259	57,870,354
Total exports	$242,462,044	$273,309,185
Do. exclusive of specie.	202,872,785	215,438,831

The Foreign Imports at New York for the month of June were:

	1865.	1866.
Entered for consumption.	$8,542,271	$10,682,723
Entered for warehousing.	7,123,792	10,957,050
Free goods	953,226	1,002,330
Specie and bullion	236,032	94,549
Total entered at port	$16,855,821	$22,736,652
Withdrawn from wareh'se	6,346,958	8,967,431

The Foreign Imports at New York for six months from January 1, were:

	1865.	1866.
Entered for consumpt'n.	$38,125,398	$88,759,762
Entered for warehous'ng	37,811,119	66,426,467
Free goods	5,023,712	7,036,616
Specie and bullion	1,051,823	1,180,186
Total entered at port	$82,012,052	$163,403,031
Withdrawn from wareh'e	41,626,821	49,993,854

The Foreign Imports at New York for the fiscal year ending June 30, were:

	1864–'5.	1865–'6.
Entered for consumpt'n	$67,079,520	$179,101,519
Entered for warehous'g.	82,206,122	112,356,494
Free goods	10,603,200	12,423,741
Specie and bullion	1,890,431	2,251,644
Total entered at port..	$161,779,273	$306,133,398
Withd'n from wareh'se.	76,267,862	88,891,375

The following is a description of Imports for the year ending June 30:

	1864–'5.	1865–'6.
Dry goods	$49,853,939	$137,055,834
General merchandise..	110,034,903	166,825,920
Specie and bullion	1,890,431	2,251,644
Total imports	$161,779,273	$306,133,398

Revenue from customs at New York:

	1865.	1866.
In June	$7,837,075 84	$9,559,898 38
Previous 5 months.	28,858,501 23	57,988,291 40
Total in 6 months.	$36,695,577 07	$67,548,189 78
Total fiscal year..	$61,169,479 80	$132,625,518 65

☞ The Albany Railway Company commenced running their cars to Kenwood on the 16th inst.

Philadelphia Passenger Railroad Dividends.

The following dividends have been declared by the Philadelphia Passenger Railroad Companies—most of them payable in July: The Spruce and Pine Streets Railroad Company, one dollar and fifty cents per share, and an extra of one dollar per share, free of tax. The Green and Coates Streets Railway Company, one dollar and twenty-five cents per share, free of tax. The Second and Third Street Passenger Railway Company, five per cent., free of taxes. The Philadelphia City Passenger Railway Company, three dollars per share, free of taxes. The Union Passenger Railway Company, one dollar and fifty cents per share, free of tax. The Girard College Passenger Railway Company, one dollar per share, clear of taxes. The West Philadelphia Passenger Railway Company, five per cent., clear of taxes. The Philadelphia and Gray's Ferry Passenger Railway Company, one dollar and fifty cents per share, and an extra dividend of one dollar per share, clear of taxes.

The Baltimore City Passenger Railway Company, also paid in July a dividend of 3 per cent., free of United States tax.

The Broadway and Seventh Avenue Railroad Company, New York, paid in July a dividend of five per cent.

Connecticut and Passumpsic Rivers R. R.

The receipts and expenses of this road for the years ending May 31, 1865 and 1866, have been as follows:

Receipts:	1865.	1866.
From passengers	$172,385 17	$174,501 44
" freight	240,975 67	290,724 28
" mails	10,600 00	10,600 00
" express	3,000 00	3,500 00
" rents	1,219 50	1,251 62
	$428,180 34	$480,577 34
Expenses, viz:		
Maintenance of road	$58,950 77	$76,690 70
Motive power	83,664 73	110,327 93
Fuel	28,961 92	32,921 26
Oil and waste	4,306 59	5,627 80
Passenger department	13,983 61	13,061 73
Freight department	19,498 67	22,038 09
Loss and damage	5,323 36	3,928 93
Repairs of buildings	5,071 70	8,726 97
Insurance	1,495 57	2,279 82
Miscellaneous expenses	22,453 18	28,980 86
	$243,710 10	$304,584 09
Net balance	$184,470 24	$175,993 25

The tracks, road-bed and rolling stock are in thorough repair—28,932 sleepers, 110 tons new iron, 101 tons re-rolled and 4,600 repaired rails have been laid. One freight locomotive, 2 passenger, 4 box and 22 platform cars have been added to the equipment. Two passenger, 9 box, 1 mail and 2 platform cars have been thoroughly repaired. Two platform, 6 box, 4 rack, 13 coal and 4 hand cars have been rebuilt. Wood sheds have been erected at white River Junction, and South Barton, and a temporary shop at St. Johnsbury.

On the 21st day of March last, the company's machine and car shop, with tools, machinery and supplies in shops, together with engine-house and two locomotives up for repairs, were burnt, from causes unknown. Loss estimated from $60,000 to $75,000; insured for $25,000.

The Directors have made arrangements for the erection of new shops, to be built of brick, to be completed at an early day, and have purchased some 350 acres of land in Lyndon for about $16,500, well adapted to the erection of buildings and yard room on a more extended scale than was originally required, leaving a surplus of land to be disposed of to employees or other parties.

The gross earnings of the road show a steady increase since the extension to Newport, and when northern connections, now contemplated, are made, the directors have reason to expect the road to compare favorably with any road in New England.

The Treasurer's trial balance will show that $32,800 of the bonded debt has been cancelled during the past year, leaving now outstanding, $605,700.

The iron to lay the track from Newport to the boundary line has been purchased, and will be laid down this season.

The equipment now consists of: 10 locomotives, 10 passenger, 6 baggage and mail, 114 box, 42 rack, 13 coal, 80 platform, 10 gravel, 26 hand, 10 wood and 1 drovers' cars, valued at $204,965. Value of materials on hand, $97,372 81. Miles run by locomotives, 172,500. Passengers carried, 107,774; do., carried one mile, 3,570,226. Troops transported, not included in above, 1,085. Tons of freight carried, 64,983; do., carried one mile, 3,543,262.

Trial Balance, July 18, 1866.

Construction	$2,890,663 17

President.—Henry Keyes.
Superintendent.—A. H. Perry.
Treasurer.—N. P. Lovering.

At Richmond, Va., on the 5th ult., Judge Chambers granted an injunction in the case of B. F. Ficklin, Superintendent of the National Express Company *vs.* the Virginia Central, Orange and Alexandria, Virginia and Tennessee, Petersburg and Weldon Railroads, restraining them from carrying out special transportation contracts with the Adams and Southern Express Companies. The motion of the defendants for an order suspending the operation of the injunction was overruled. This decision is considered very important, as deciding the rights of railroads and express companies, and has greatly elated all parties interested in the National Express.

Illinois Central Railroad.

The statement of this Company for the month ending July 31, 1866, is as follows:

Land Department.

Acres Construction Lands Sold	5,508.63 for	$61,831 00
Acres Int. Fund Lands sold	240.00 for	3,929 20
Acres Free Lands sold	1,091.77 for	12,536 22
Total sales during month of July, 1866	6,840.40 for	$78,296 42
To which add Town Lot Sales		4,014 25
Total of all		$82,310 67
Cash collected in July		$128,969 58

Traffic Department.

Receipts from	Passengers	$133,014 96
do.	Freight	273,742 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	50,000 00
Total Receipts in July, 1866		$467,115 29
Total Receipts in July, 1865		$527,908 00

Interest and Dividends.

The New York Central Railroad Company have declared a semi-annual dividend of three per cent., payable, free of U. S. Income Tax, on the 20th inst.

The Northern Central Railroad Company have declared a quarterly dividend of 2 per cent., clear of National and State taxes, payable on the 29th inst.

The Hazleton Railroad Company have declared a dividend of 4 per cent., payable on the 13th inst.

The Lykens Valley Railroad Company have declared a dividend of 4½ per cent., free of tax, payable on demand.

All the coupons of the Covington and Lexington Railroad Company guaranteed by the City of Covington, now due, will be paid on presentation at the office of the Treasurer of the City of Covington, with interest on same to the 1st day of July, 1866, and the coupons on same bonds maturing September 1, 1866, will be paid when due at the Bank of America, New York.

Alexandria and Fredericksburg Railroad.

We learn from the Alexandria *Gazette* that contracts have been awarded to Messrs. Studds & Pullman, Studds & Auld and Mason & Johnson, for the grading, bridging and masonry, and superstructure of the bridges, on seven sections of the Alexandria and Fredericksburg railroad, including the Mount Vernon Branch. The work will be commenced at once, and pushed forward vigorously. The contracts awarded amounted to upwards of $100,000. The remainder of the line, from the Occoquan to Brooke's Station, on the Fredericksburg and Aquia Creek railroad, will be ready for letting out the 20th instant, when, it is expected the whole road will be put under contract.

There are fifty men at work on the tunnel of the Albany and Susquehanna railroad, in Colesville, and fair progress is being made. Up to last week 350 feet full size had been excavated on the west end, and 250 feet more of "heading," and on the east end 600 feet full size, with wooden arch, and 300 feet of heading. As the entire length of the tunnel is but about 2,200 feet, the two headings have now approached within 700 feet of each other.

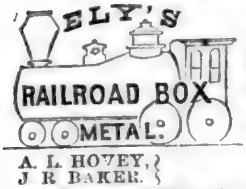
Spruce and Pine Streets Railroad.

The par value of the stock of this company has recently been changed from $25 to $50 per share. In January last a dividend of $1.50 per share was paid, and in July $2.50 per share. In other words, the company have paid this year dividends amounting to 16 per cent. upon their paid-up capital ($25). The July dividend alone amounted to 10 per cent. of the paid up capital, or 5 per cent. on the par value. The stock is now quoted at 38½. We learn from a reliable source that the company have now on hand money enough invested in U. S. 7-30s to pay their bonds, but cannot obtain possession of them.

Canal Tolls.

The gross tolls received on all the New York State Canals in May and June, 1866, were.$1,029,978
Received in May and June, 1865..... 802,064

Gain in 1866 over 1865..... $227,914
Appropriated for ordinary repairs and maintenance for the year ending September 30th, 1865 .....$1,941,565
Do. for the year ending September 30th, 1866 1,453,000



Less in 1866 than in 1865..... $488,565

This looks encouraging and as though the surplus revenues might be somewhat larger in 1866 than in 1865.

☞ The acknowledged debt of the State of Virginia is made up of six per cent. bonds, with coupons attached of July 1, 1861, and after; of six per cent. bonds, from which these coupons have been cut for funding, under the recent arrangement; and of new bonds dated on or since January 1, 1866. Of the latter some are coupon and some are registered, the former selling in preference. There is but little difference in price between the old bonds with the coupons cut off and the new bonds, the sales being at a price between forty and fifty. The bonds which are selling at a higher rate are the old issues, with the coupons still attached.

☞ The San Antonio (Texas) *Herald* learns that an agent of the Buffalo Bayou, Brazos and Colorado Railroad Company has been sent to Europe to purchase an iron railroad bridge of the most approved construction, to be placed across the Brazos River at Richmond. There is also a bridge to be built over Colorado at Columbus, and cars are to be run to the latter place in time for the fall trade.

Proposals for a Tunnel
UNDER CHICAGO RIVER.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, August 1st, 1866.

SEALED Proposals will be received by the Board of Public Works, at their Office, until 11 a. m. Saturday, August 18th, for the construction of a Tunnel under the South Branch of Chicago River, at Washington-st., according to plans and specifications which will be on file at said office and ready for examination on and after August 8th.

The Tunnel under the river is to consist of three passage ways, the outside ones to be each 11 feet wide and 15 feet high, and the middle one 10 feet wide and 15 feet high. The middle passage-way to terminate near the river on each side in stairways to the street. Between the stairways and the ends of the covered portion of the Tunnel, the three passage-ways are to be reduced to one, varying from 24 to 20 feet in width, and from 20½ feet to 17⅔ feet in height. The whole length of the covered portion of the Tunnel will be about 1,000 feet.

Proposals must be addressed to the Board of Public Works, endorsed "Proposals for Washing-ing-st. Tunnel," and be accompanied with the usual $200 bond, with sureties, to be approved by the Board.

The Board reserve the right to reject any bid not in accordance with the conditions of this advertisement, or to reject all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

J. G. GINDELE,
FRED. LETZ,
O. J. ROSE,

BEST MATERIAL AND WORKMANSHIP, BY

JOHN STEPHENSON.

FOR SALE AT A LARGE DISCOUNT

WM. P. KITTREDGE & CO.,

164 Water Street, New York.

MR. JOHN H. JACQUELIN withdraws this day from our firm, A. G. HEMINWAY & CO.

Mr. A. G. HEMINWAY will continue in the same business as heretofore at No. 10 Wall Street, New York, August 1, 1866.

We have this day formed a co-partnership for the transaction of a general STOCK, BOND and COMMISSION BUSINESS, under the name of

JACQUELIN & DE COPPET,

JOHN H. JACQUELIN,
Late of the firm of A. G. Heminway & Co.
HENRY DE COPPET,
Formerly with Western & Billier.

New York, August 1, 1866. Office No. 26 New-st. 4t31

THE NEW YORK CENTRAL RAILROAD CO.,
TREASURER'S OFFICE, ALBANY, July, 27, 1866.

TWENTY-SIXTH SEMI-ANNUAL DIVIDEND —The Directors of this Company have declared a Semi-Annual Dividend of Three Per Cent. on the Capital Stock thereof, free of the United States income tax, payable on the twentieth day of August next.

Dividends in New York will be paid at the office of Duncan, Sherman & Co.; in Albany, at the Albany City Bank.

The Transfer Books will be closed at the close of business on Tuesday, the thirty-first day of July instant, and be reopened on the morning of Thursday, the twenty-third day of August next.

3t31 E. D. WORCESTER, Treasurer.

SEVEN PER CENT.
First Mortgage Bonds
OF THE
North Missouri Railroad Company,

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and a safe and judicious investment.

The proceeds of these bonds ($6,000,000 in all) will be used in extending a road already completed one hundred and seventy miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa; and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri river, so that this mortgage of $6,000,000 will cover a complete and well stocked road of three hundred and eighty-nine miles in length, costing at least $16,000,000, with a net annual revenue after the first year of over $1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.

The railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the Great Pacific Railroads.

To the first applicants we are prepared to sell $500,000 at the low rate of 80 cents, desiring to obtain a better price for the remainder. This will yield about 9 per cent. income, and adds 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

4t30 **JAY COOKE & CO.**

THE STEAM SYPHON PUMP

COMBINES the properties of a Lift and Force Pump, without valves or machinery of any kind.

It will not get out of order and cannot freeze up. A Locomotive can raise water to fill its tender in a few minutes, thus dispensing with tanks, pumping-machinery and attendance. It can be used as a Fire Engine where steam power is employed, as at Machine Shops, Car Shops, &c. Address STEAM SYPHON COMPANY,

New York, Saturday, August 18, 1866.

Atlantic and Great Western Railway.

The total receipts of this road for the six months ending June 30, 1866, (as will appear by our Table of Monthly Earnings on page 785 of this week's issue,) have been $2,622,786; for the corresponding period of 1865, the receipts were $2,188,980; and for the first six months of 1864, $1,107,695. A progressive increase has thus been established of a most satisfactory character, amounting in the last half-year to $433,806, and for the corresponding half-year of 1865 to $81,285. The following is a statement of the earnings for the six months ending June 30, 1866:

	Miles Open.	Passengers, Mails, &c.	Freight.	Total.
Jan.	507	$123,664	$381,327	$504,991
Feb	507	95,859	313,005	408,864
March	507	131,544	256,936	388,480
April	507	133,510	261,023	394,533
May	507	131,661	319,816	451,477
June	507	126,253	348,188	474,441
		$742,491	$1,880,295	$2,622,786

The earnings for July, 1866, were $462,674; and for July, 1865, $472,483—showing a decrease of $9,809. The increase for seven months is thus reduced to $423,997.

Erie Railway.

The earnings of the Erie Railway and Buffalo Division for the month of July, 1866, were:

Erie Railway	$1,130,302 19	
Buffalo Division	73,160 27	$1,203,462 46
July, 1865—		
Erie Railway	$1,202,180 36	
Buffalo Division	72,377 44	1,274,557 80
Decrease on Erie Railway and Buffalo Division		$71,095 34

The earnings of the Erie Railway (including the Buffalo Division) for the first seven months of the fiscal years 1865 and 1866, have been as follows:

	1865.	1866.		
January	$1,070,890	$1,187,188	Inc.	$116,298
February	1,011,735	983,855	Dec.	27,880

Portage Lake Copper Mines.

We give below from the Portage Lake *Mining Gazette*, a statement of the amount of Copper produced by the mines in the Portage Lake District, for six months ending June 30, 1866, compared with the same period of 1865:

	1865.		1866.	
Mines.	tons.	lbs.	tons.	lbs.
Quincy	576	658	623	1,836
Franklin	389	566	496	129
Pewabic	406	1,195	440	1,614
Huron	279	997	265	424
Isle Royale	214	594	182	1,288
Hancock	9	—	170	265
Grand Portage	144	1,158	161	1,424
Albany and Boston	37	1,426	101	939
Shelden Columbian	22	731	55	303
Calumet	—	—	38	55
Total	2,089	1,125	2,535	277

By the above, it will be seen, that the mines of this District have made a handsome gain of 445 tons, 1,152 lbs. over the total product for the same period last year.

The July product of the Albany and Boston mine was 16 tons and 356 lbs.

The Hancock mine's product for July was 52 tons and 720 lbs.

Railway Fares in Europe.

The following table of Railway Fares on different parts of the Continent, was prepared at the request of the Royal Commission on Railways, London, by W. GALT, Esq., author of the work on "Railway Reform:"

AVERAGE FARES PER 100 MILES.

	Ordinary trains.			Express trains.	
	3d class.	2d class.	1st class.	2d class.	1st class.
	s. d.	s. d.	s. d.	s. d.	s. d.
Russia	3 0	10 10	14 5	.. ..	.. ..
Prussia	3 2	10 0	12 6	12 0	14 0

France	7 6	11 0	14 6	13 0	16 8
Great Britain & Ireland	8 0	13 4	18 6	16 8	21 8

It must, however, be borne in mind, that in those foreign countries where the railways do not belong to the State, the shareholders receive considerable Government assistance in consideration of their being obliged to adopt a low tariff.

Cotton at Sea for England.

According to official statistics published at Liverpool, it appears that the amount of cotton at sea from Bombay, was up to the 24th of July, 403,022 bales; from Madras, 19,240; from Trincomalee, 6,178; from Coconada, 5,988; from Rangoon, about 6,000; from Kurrachee, 11,891; from Calcutta, 129,683; from Tuticorin, 2,575; from Shanghae, 15,874 piculs; from New Orleans, 11,337 bales; from Mobile, 8,230; from Galveston, 2,694; from Apalachicola, one ship, cargo not stated; from Pensacola, ditto; from Charleston, 978; and two ships from New York and Savannah, also with unestimated cargoes. To London there are 22,766 bales at sea from Madras; from Calcutta, 31,223; from Bimlipatam, 369; from China, Cochin, and Tuticorin, 20,280; from Bombay and Kurrachee, 11,360; and from Japan, 310 bales.

Little Miami and Columbus and Xenia R.R.

The joint earnings of the Little Miami and Columbus and Xenia railroads (including the Dayton, Xenia and Belpre) for the year ending November 30, 1865, were as follows:

From passengers		$1,319,171 18
" freight		959,366 70
" mail and express		155,236 82
" rent of track and depots		65,939 00
		$2,499,713 70
Working expenses, viz.:		
Repairs of road	$343,179 84	
" bridges	25,170 40	
" depots, etc	25,422 73	
" locomotives	104,910 96	
" cars	171,328 98	
Passenger expenses	184,017 15	
Freight expenses	272,822 64	
Fuel	166,043 46	
Oil, tallow and waste	51,866 16	
Rents	8,303 47	
General expenses	75,693 22	
Loss and damage	31,629 38	
		1,460,388 39
Earnings less expenses		$1,039,325 31
Interest	$107,400 35	
Taxes, State & National	112,558 92	
		219,959 27

" " C. & X. "		65,768 42
" Nov., 1865 to L. M. "		188,021 05
" " C. & X. "		65,768 42
Undivided surplus, Nov. 30, 1865		710,365 65
		$1,248,287 12

The above dividends were each 5 5-19ths per cent. of the capital stock of the respective companies, which was not held by the companies severally and jointly. This makes the amount payable to stockholders, after withholding the government tax, 5 per cent. of their stock.

The gross earnings, before adjustment under contracts with other companies were $2,499,713 70; in 1864 they were $2,554,312 62—showing a decrease of $54,598 92. After adjustment the earnings of the year 1865 were $2,446,391; against in 1864, $2,433,286 61—showing an increase of $13,104 39.

The expenses for the same period, for operating the road, including repairs of track, bridges, station buildings and machinery, rents, taxes, etc., were $1,572,947 31, against $1,408,277 22 in 1864—an increase of $164,670 09. The report says:

It will be seen that the expense of the Dayton and Western Railroad has been for the twenty months preceding November 30, 1865, in excess of earnings during that period, $40,275 72. This has been owing principally to extra outlays in improving the condition of the road, bridges and equipment of that line.

We are glad to be able to state that the condition of the track, bridges and equipment of the roads is, as a whole, better than at any time since the organization of the company, and that we are in a situation to work them in the most economical manner consistent with their proper maintenance, having reference to the present high prices of labor and materials.

Our relations with connecting roads are of a friendly character, and we see no good reason to doubt that fair dealing and a community of interests will secure to us and to them a fair share of the trade of the country.

The connection track in Cincinnati is completed to the depot of the Indianapolis and Cincinnati Railroad, and arrangements are being made for the erection of a freight depot for the accommodation of the central and western part of the city. This gives us the ability to reach any part of the city open to other roads, with equal, if not superior facilities for the transaction of business.

The Marietta and Cincinnati Railroad Company have given the requisite notice for the termination of the contract existing between the Companies for the use of our track between Loveland and Cincinnati, to take effect February 1st, 1866.

The termination of the war and the construction of new lines are likely to bring about a large reduction in the earnings of roads generally, and especially of those whose increased earnings have been made in part by military transportation; and the impossibility of an immediate corresponding reduction in expenses growing out of the continued high price of labor and materials, will for the next year or two reduce the net earnings to the minimum amount. But the establishment of organized industry in the South and the natural and regular increase of population, and products to be sent to market, will furnish our road with a healthful and reasonably profitable trade.

The assets and liabilities of the joint company are as follows:

Surplus Nov. 30, 1865	$17,722 59

The equipment of the road consists of 45 locomotives, 40 passenger, 21 baggage, mail and express, 449 box, 95 rack, 107 platform and 10 lime cars.

The number of miles run by locomotives has been: with passenger trains 468,504; with freight trains, 462,911; with wood and construction train 57,652—total 1,039,067; a decrease from the previous year of 28,769.

The following statement exhibits a comparison of mileage and cost of repairs for nine years:

	Miles run.	Cost of repairs.	Cost per m.
1857	666,546	$65,479 46	9.82 cents.
1858	637,835	59,031 92	9.25 "
1859	732,924	54,507 41	7.43 "
1860	796,187	60,778 92	7.64 "
1861	814,908	55,469 20	6.80 "
1862	846,882	67,395 35	7.95 "
1863	1,002,647	96,713 78	9.64 "
1864	1,117,836	120,426 58	10.77 "
1865	1,089,067	98,389 89	9.03 "

The following is a comparative statment of the mileage and cost of repairs and renewals of passenger cars for the past and preceding years:

	Miles run.	Cost of repairs.	Cost per m.
1864	2,641,189	$63,854 49	2.4 cents.
1865	2,353,354	57,125 74	2.4 "
Decrease	287,835	$6,728 75	

The mileage and cost for repairs and renewals of freight cars during the same time have been as follows:

	Miles run.	Cost of repairs.	Cost per m.
1864	6,765,660	$79,799 37	1.17 cents.
1865	7,343,721	111,075 48	1.51 "
Increase	578,061	$31,276 11	0.34 "

The actual working expenses of the road, 58.42 per cent. of the gross earnings, are an increase of 6.82 per cent over those of last year.

The cost of repairs of road per mile run by locomotives and cars was 3.2 per cent. In 1864, it was 2.8 per cent. In 1863, 2.35. In 1862, 2.01.

The cost of renewal and repair of iron rail, renewal of cross-ties and chairs, opening of ditches, renewal and repair of culverts, cattle guards and other masonry, repairing fences surfacing track, etc., has been $348,011 47; against for last year, $300,176 13—an increase of $47,835 34.

The following materials have been used in renewals during the year; 2,236 tons new rails, 12,993 new chairs and joint fastenings, 157,767 pounds of spikes, 54,772 cross-ties and 2,500 iron rails repaired—the total cost of which has been $190,598 51.

The increase in cost of repairs of bridges has been $7,905 43; in station buildings $1,983 40; in water stations, $1,196 89; in shop machinery, $5,561 32 and a decrease in repairs and renewals of locomotives of $22,036 69.

There have been carried on the road during the year exclusive of commuters, 753,372 passengers of whom 280,286 were through, and 473,086 were local. Number of passengers carried one mile 46,543,196, of whom 29,528,248 were through and 17,014,948 were local.

The tonnage carried during the year amounts to 217,372 tons through freight, and 147,610 tons local.

The earnings and expenses of the Dayton and Western Railroad, leased and operated by this company, are not included in this report.

The officers and directors of the Little Miami Railroad Company, for 1866 are as follows:

President.—W. H. CLEMENT.

Directors.—Jos. C. Butler, Jos. Torrence, Nathaniel Wright, James Hicks, Jr., Larz. Anderson, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, Henry Hanna, John Bacon, Abraham Hivling, and Jos. R. Swan.

Secretary.—CHAS. H. KILGOUR.

Treasurer.—S. E. WRIGHT.

Auditor.—D. G. A. DAVENPORT.

Superintendent.—E. W. WOODWARD.

The officers and directors of the Columbus and Xenia Railroad Company for 1866 are as follows:

President.—JOS. R. SWAN.

Vice President.—W. H. CLEMENT.

Directors.—Wm. Dennison, Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, C. H. Kilgour, Henry Hanna, Abraham Hivling and Simon Gebhart.

Superintendent.—E. W. WOODWARD.

Secretary and Treasurer.—CYRUS FAY.

Texas and New Orleans Railroad.

As our readers are generally aware, measures have already been taken recently to place this great work of internal improvement—undoubtedly amongst the most important to the future commerce of New Orleans—on the high road to early and successful completion. On the 12th of July there was a meeting of Stockholders, at which the greater portion of the stock was represented; a re-organization of the Company was effected by the election of a Board of Directors, etc., and the officers subsequently chosen by the Board at once entered vigorously upon the discharge of their duties, and with the most flattering prospects of complete success.

The Texas division of the "Texas and New Orleans Railroad Company" has now in regular daily operation one hundred miles of good road between Houston and Orange, on the Sabine river. There remains to be completed, to make the connection perfect with New Orleans, 117 miles from the Sabine to New Iberia, on the Bayou Teche, the junction with the New Orleans, Opelousas and Great Western Railroad. To fill this gap, the Directory have made the surveys of location. A considerable amount of the construction has been done or provided for; and the great difficulty of Southern railroads—the iron—has been secured, as we unstand, payable in the stock of the road, an arrangement which reflects equal credit on the ability of the Directory, and the wisdom of those who furnish the iron. The first delivery of this iron is expected by the winter, and it is expected to arrive as the progress of the road may require. Under the arrangements made, the Directory expect to open the incomplete section within eighteen months.

For bringing about these great results—in doing so much in the face of difficulties that would have discouraged almost any other man—too much praise cannot be awarded Col. A. M. Gentry, of Texas, President of the company. He has been indefatigable, vigilant and able, and from the very brow of apparent disaster, has succeeded in plucking the flower of success. In this good work he has been ably seconded by Chas. M. Congreve, Esq., of the firm of Congreve & Son, New York, the financial agents of the corporation. Mr. C. is on his way to England, to complete the iron negotiations, and Col. Gentry has, doubtless, reached New York. We expect to hear cheering news from both these gentlemen in a short time.

And now that so much has been effected by the administration of this important connection with Texas and interior Mexico, what is New Orleans expected to do? Certainly it will meet the very moderate contributions required to pay the freights and import duty on the iron. A line of railroad which will, at Houston, connect with five hundred miles of rail, radiating into all Texas and interior Mexico, will place New Orleans within fifteen or twenty hours express time of a most valuable trade. The extension of these radial routes will, within a few years, bring the mines of Mexico to our doors.

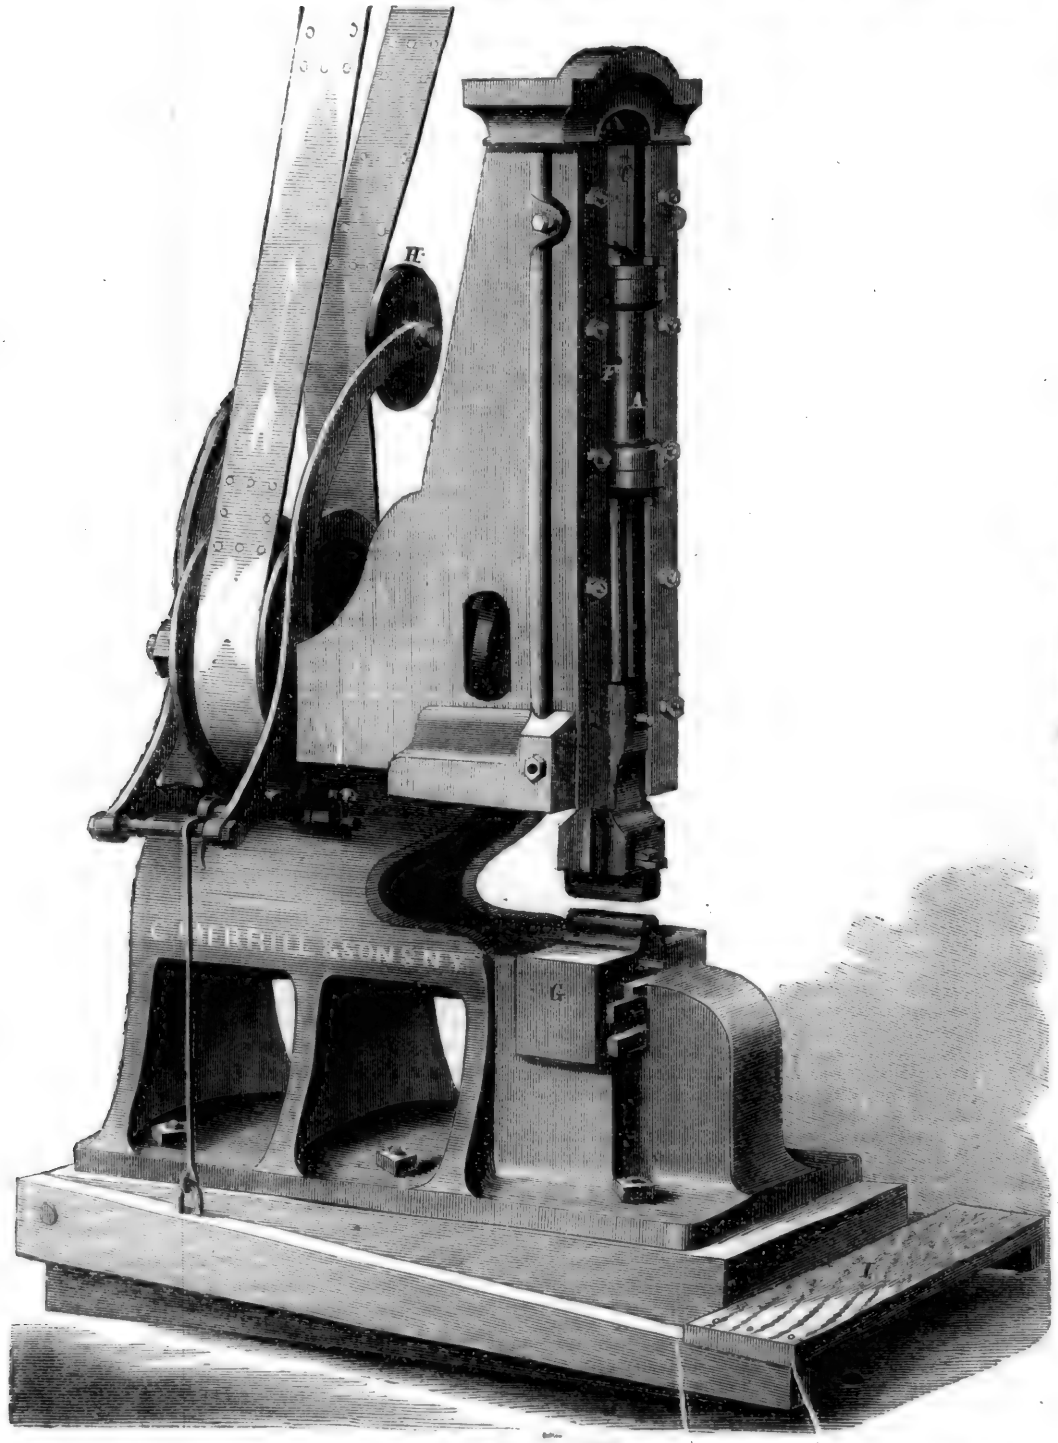
Every merchant and landlord in the city must see the immediate and incidental results of this work. It will repay them *now*—it will continue to increase the returns of a wise liberality. Once open to Houston, the work of our citizens will be completed, and they will reap the results of all the railroad constructed into interior Mexico.

The Directory which has done so much for the city, has certainly a right to expect the city to do this much for itself. We do not doubt the public spirit and common sense of the people will meet all such demands with alacrity.—*N. O. Commercial.*

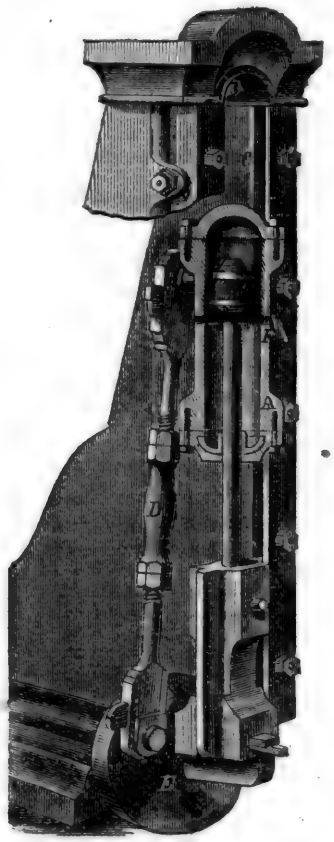
Western Maryland Railroad.

We are informed that the difference of opinion as to the route of this road existing between the board of directors and Mayor Chapman of Baltimore, has been informally submitted to the arbitrament of William Milnor Roberts, Esq., a disiinguished civil engineer of Philadelphia. It is expected that the tunnel question will be settled in a few days; in which event the road will probably be let on the 22d inst. Quite a number of gentlemen connected with the road visited our town this week.—*Hagerstown Mail.*

☞ The work of rebuilding the branch road on the Atlantic and Gulf Railroad, to Live Oak on the Pensacola and Georgia road, has been commenced, and the Quitman *Banner* is assured by Col. Screven, the superintendent of the road, that it will be carried through by the first of October. When completed, trains will run through from Savannah to St. Marks in about twelve hours. Col. Screven is now in New York, looking after the project of putting on a line of steamers between St. Marks and New Orleans.



☞ A Railroad Convention is to be held at Macon, Ga., on the 5th of September, to take into consideration the importance of the construction of the link in the Savannah and Memphis Railroad from Opelika to Tuscumbia. The Board of Trade of Savannah, Macon, Selma, Memphis, Cairo, St. Louis, Louisville and Cincinnati, are invited to send delegates.



☞ The New Orleans and Texas Railroad Company have opened an office in New Orleans for the purpose of receiving subscriptions, and giving general information in regard to the road. It is hoped that the aid required to put this road in running order to the Mexican boundary will be promptly furnished.

☞ The bridges over the Cumberland and Tennessee rivers, on the line of the Memphis, Clarksville and Louisville Railroad, were completed on the 10th inst., and daily trains are now running through from Louisville to Memphis. Time about 18 hours.

HOTCHKISS' PATENT FORGE HAMMER.

PATENTED JUNE 14, 1859.

Size	10 lbs.	30 lbs.	40 lbs.	60 lbs.	80 lbs.
Weight of Frame	700 "	2,300 "	3,800 "	5,500 "	7,000 "
Size of Base	14x28	22x46	28x56	28x56	30x77
Total Height	3 ft. 10 in.	6 ft.	7 ft. 8 in.	8 ft. 6 in.	9 ft. 6 in.
Will work Iron rapidly	¾ in.	1½ in	2 in.	4 in.	6 in.square.
Lift of Hammer	9 in.	12 in.	14 in.	18 in.	19 inches.
Adapted to work Iron from	⅛ in. to 1 in.	¼ to 2 in.	1 in. to 3 in.	1 in. to 4 in.	1½ to 6 in. square.
Diameter of Hammer Pulley	10 in.	14 in.	18 in.	20 in.	24 in.
Face of Pulley	3¾ in.	5½ in.	6 in.	7½ in.	9 in.
Speed per Minute	300	250	200	180	170
Estimated Power required	¼	1½	3	5	10 horse.
Price	$250	$530	$636	$848	$1,200

Delivered on board Boat or Cars in New York.

CAPACITY OF HAMMERS FOR DRAWING IRON.

Sizes	10 lbs.	30 lbs.	40 lbs.	60 lbs.	80 lbs.
Size of Iron to be drawn	¼ in.	1¼ in.	2 in.	3 in.	6 in. sq.
Length of Bar Heated	5 to 6 in.	7 to 8 in.	9 to 10 in.	10 in.	12 in.
Will Draw it	20 inches.	2 feet.	3 feet.	4 feet.	3 feet.

The Sizes are designated by the Weight of the Hammer, or Ram.

DESCRIPTION OF HAMMER.

The Hammer represented by the within Cuts is recommended for—

1st. Simplicity and Durability.

2d. Economy of Power and Space.

3d. For striking square, with a sharp and elastic blow.

They are run with little noise, and by the peculiar arrangement of the cylinder and piston, the hammer is driven by air springs, which saves the Machine from jar, other than the blow on the anvil or work, and can be used in any building without injuring the foundation or walls. Parties interested are invited to call and see them in practical operation.

The cylinder and hammer moving in vertical slides, each blow is square, exactly in the same place, and some kinds of die work can be forged as exact as under a drop, with greater rapidity; it is under the perfect control of the operator, can strike light or heavy, and give any number of blows in quick succession.

The hammer derives the increased force of its blows from the reaction of compressed air upon the piston. The air is compressed within a cylinder (A) by the piston (B) which fits the cylinder air-tight (See Fig. 2). The cylinder moves in the slides (C) by the action of the connecting rod (D) driven by the face-plate (E) by belting in the usual manner. The cylinder is air-tight at each end; there are two small holes (F) in the cylinder, through which the air passes freely in and out, which supplies any leakage and prevents a vacuum behind the piston as it passes beyond the air ports either way.

It will be noticed that the *Piston*, *Piston-rod* and *Hammer* are *entirely independent* of the cylinder, and can be moved up and down *without moving* the cylinder; also, that when the cylinder is moved either way, the piston passes the air ports (F) confining the air in either end of the Cylinder, which prevents the piston striking either head, and acts as a spring, lifting the hammer up, or accelerating its downward movement. The cylinder has a difinite motion, governed by the travel of the crank, but the hammer has more lift, owing to the compression of the air.

If the cylinder is moved up and down slowly, there is no blow given, as the weight of the hammer rests on the cushion of air, *under the piston* in the *bottom* of the cylinder. If the cylinder is moved up quickly, the air under the piston strikes and lifts the hammer as quickly, and the momentum of the hammer in its upward motion causes the piston to pass the air ports (F), and compresses the air, more or less, according to the speed, in the *upper* part of the cylinder; the elasticity of which, acting as a spring, accelerates the downward motion of the hammer, to which may be added the rapid downward motion of the cylinder following up, and crowding the air spring upon the piston adding to the force of the blow; thus, by a rapid reciprocating motion of the cylinder, quick and sharp blows are given.

The anvile block (G) can be removed and the hammer run, then the cushion of air in the bottom of the cylinder receives the entire blow; if the block is replaced, the anvil or work receives the blow instead of the air-cushion.

The blow can be controlled by the speed; the sharpest blow is given when run at high speed. To run rapid and light, raise the cylinder by lengthening the rod, which allows the bottom cushion to receive the bulk of the blow.

The speed of the hammer is regulated by the idler pulley (H), operated by the treadle (I).

The action of the Hammer is peculiar; it may be compared to a weight vibrated between air-springs, and should any slight leakage of air occur, it is renewable through the air-ports in centre of cylinder at every movement of the piston.

In practical operation the Hammer is lifted by the lower air-cushion lifting the piston, when the cylinder is lifted by the rotating crank.

If the cylinder is raised quickly, the Hammer is raised as quickly, and when the cylinder has arrived at its highest point, the Hammer, Rod and Piston has acquired a momentum which causes the piston to rise higher, and passing the air-ports, confines the air closely in the upper portion of the cylinder, the elasticity of which reacts upon the piston, driving it down.

In addition to this force, the crank brings the cylinder down with speed, forcing the upper cushion upon the piston, which, together with the reaction of the compressed air, drives the hammer down with great velocity. When run slow, the blow is correspondingly light. The Hammer, after being driven down, is instantly picked up by the ascending air-cushion without any shock or jar, and so long as the packings are tight, it can be run for years with little wear. These packings are as simple as a pump packing, durable and easily renewed.

By noticing the Cut, you will observe that there are but few moveable parts, all of sufficient strength, and so constructed as to combine *strength* and *durability* with *simplicity*. In reply to a question often asked—"How long will the packings last?" we say from three to eight months. Any one should repack the hammer in two hours time. An extra set of packings are sent with each hammer to show how they are made, a former for making the rod-packing. We will supply packings when requested. We are not prepared to say what the striking force of the hammer is, but we would refer you to the statement of *results* above.

Manufactured by

CHARLES MERRILL & SONS.

556 Grand St., New York.

Illustrated Circulars sent on application.

TESTIMONIALS.

The following are a few of the testimonials received:

Philadelphia, Pa., July 17th, 1865.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—In reply to your request for our opinion of the working of the Atmospheric Hammers purchased of you, we will say that, by comparison with other Tilt and Trip Hammers, (of which we have ten running of different kinds and about the same weight,) we consider yours far superior in all the demands of the Smith shop. For durability, certainty of action, adaptability to general smith work, the excellence of this Hammer is manifest, and we should be very unwilling to dispense with it for any we know.

Yours, respectfully,

MORRIS, TASKER & Co.

Etna Iron Works, New York, June 12th, 1866.

Messrs. CHAS, MERRILL & SONS:

Gentlemen—The 50 lbs. Hammer we purchased of you fourteen months ago, works to our entire satisfaction. It is most useful in swaging down and drawing out light work, and we have no hesitation in recommending it as a very valuable tool in a Blacksmith shop.

Yours respectfully,

JOHN ROACH & SON.

Office of the Allaire Works,

New York, June 8th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—In reply to your inquiry about the working of the 50 lbs. Atmospheric Hammer bought of you June 5th, 1865, I would say that it has been in constant use, and works to our entire satisfaction. It far excels any Hammer we have ever used for the work it is adapted for—say from 4 inches square down. It is easily managed, and has not cost one dollar for repairs since it has been in use. Yours, &c.,

T. F. SECOR, Manager.

Office of McKay & Aldus Iron Works, East Boston, Mass., May 15th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—We have used the 60 lbs. Atmospheric Forge Hammer purchased of you for the past six months, and would say that it works to our entire satisfaction. We would not be without it on any account.

Yours truly,

MCKAY & ALDUS.

Wilmington, Del., May 19th, 1865.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—In reply to your letter, I would say that we have tested the 40 lbs. Hammer purchased from you last November, and find it answers our purpose very well. Would cheerfully recommend it to parties in need of such an article.

Very respectfully yours,

HARLAN, HOLLINGSWORTH & Co.,

Iron Ship and Steam Engine Builders.

Office of Syracuse, Binghamton and New York R. R. Co., May 17th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—In reply to your enquiries as to how I like the 60 lbs. Hammer purchased from you for this company, I would say that it works to my entire satisfaction, both on large and small work. Can Work iron 6 inches square without any difficulty, and think it well adapted to our class of work.

Yours truly,

B. G. MERRILL, Master Mechanic.

Rochester, N. Y., May 17th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—We have had the 40 lbs. Atmospheric Hammer in use several months, and it performs to our entire satisfaction in all respects. We do all kinds of work required in our business under it, and find it does good execution on all sizes of iron up to 3½ inches square. To all appearance it is likely to last for years without any material expense for repairs.

Respectfully yours,

WOODBURY, BOOTH & Co.,

Steam Engine Builders.

Newark, N. J., October 13th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—The 50 lbs. Hammer bought of you has been in use some nine months, and we are pleased to say it works to our entire satisfaction.

Yours, very respectfully,

HEWES & PHILLIPS,

Machinists and Tool Makers.

Boston, July 21st, 1865.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—In reply to your enquiries as to how we are pleased with the Hotchkiss Forge Hammer we purchased of you, we take pleasure in stating that it greatly exceeded our expectations. We would not be without it for three times its cost.

Yours truly,

AMERICAN TOOL AND MACHINE Co.

GEO. H. FOX, President.

Cincinnati, Ohio, April 7th, 1866.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—We have given the 30 lbs. Atmospheric Forge Hammer purchased of you a thorough and severe trial on all classes and branches of our smith work, and we are happy to say it is giving complete satisfaction. We regard it as one of the most perfect tools in our establishment, and think it will not only save the labor of ten men, but will pay for itself on our work in less than three months. We have shown it to many, and shall take pleasure in showing it to any one in this section you may wish to refer to us.

Respectfully yours,

I. A. FAY & Co.

Manufacturers of Patent Working Machinery.

New York, December 20th, 1865.

Messrs. CHAS. MERRILL & SONS:

Gentlemen—We have used the 30 lbs. Hammer bought of you almost daily for the past seven months, and have much pleasure in saying that it has given perfect satisfaction, doing all that was required of it without needing the slightest repair.

Truly yours,

THE SINGER MANUFACTURING Co.,

A. F. DARLING, Secretary.

☞ A railway has been projected between Port Elizabeth and Neienhage, in the Natle Country, South Africa.

Saturday, August 18, 1866.

Stock Exchange and Money Market.

Money is offered in unusually large amounts on call at 3@4 per cent. to the large dealers in the public funds, and at 4@5 per cent. to the leading stock firms; but the demand for temporary accommodation is extremely moderate, as compared with the available supply of capital, and lenders experience much difficulty in placing ther balances advantageously. This difficulty promises to increase, rather than diminish, during the next twenty to thirty days, in view of the impending heavy disbursements of the Treasury Department, which on Wednesday, commenced paying the semi-annual interest (nearly eleven million dollars) on the first issue of the Seven Thirties, and which now announces that it is prepared to redeem, before August 26, all the outstanding certificates of deposit on account of the temporary loan, other than those issued to the banks of the principal cities for Clearing House purposes. The temporary loan is now $118,000,000, less $50,000,000 represented by Clearing House certificates, leaving the net redeemable amount of this loan about $68,000,000. This amount is to be paid off by August 26, when interest thereon will cease. The certificates are to be redeemed at the office of issue exclusively. These disbursements will add immensely to the available supply of money in the open market, and thus effectually guard against any serious stringency, in consequence of the fall movement of produce, and the revival in general business. They will also reduce the public indebtedness and increase popular confidence in the present management of the National finances—elements of great strength in the market value of the National funds. The increasing revenues and diminishing expenditures of the Government, tend to advance the same interests. Government received $7,159,013 from internal revenue exclusively last week; and on Monday of this week, $2,053,163, and on Tuesday near a million and a half; and from Customs its receipts last week were about three and a half million dollars in gold, equal to $5,250,000 in currency, with gold at 150, which would make the week's income of the National Treasury, nearly twelve and a half million dollars; while its total expenditures for the three principal executive departments, during the week, were only $1,711,957. The cash balance in the vaults of the National Treasury at Washington last Saturday was $11,145,515.

The U. S. Sub-Treasury receipts, week ending with Aug. 11, were $9,797,043, including $2,676,332 from customs duties; payments, $5,825,232; balance at the close of the week, $86,439,445, against $82,467,634 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Monday, receipts, $3,115,918, and payments, $2,723,620; Tuesday, receipts, $1,238,238, and payments, $520,690. The balance at the close of business on Tuesday stood at $87,549,292, against $83,931,535 a week ago.

The city banks, last week, increased their loans $1,454,346; circulation $216,973, and legal tender reserve $626,755; while losing $1,024,691 of their specie, and $75,558 of their deposits. The Bank Exchanges at the Clearing House, through the past week, averaged $82,468,496 a day, against a daily average of $87,204,469 the preceding week; and $71,720,801 the week ending with July 28th. The current week's exchanges average over $93,000,000 a day.

The gold speculation has been stimulated afresh by the reports from Europe of the refusal of Prussia to accede to the territorial demands of France, and by the steady obsorption of the floating supply by the demand for Custom House purposes. The price has advanced from 148⅞ to 151⅞, and the *bull* interest feel confident of its ability to work or engineer the rate much higher. Last week, the Customs inquiry at this port averaged $446,055 a day; thus far, this week, it has averaged about $300,000 a day. The export drain is unimportant. On Saturday, the shipments from the port were only $76,000, and on Wednesday, $51,000; making the total, since our last, only $121,000. The total exports of specie, hence since Jan. 1, have been $51,977,146, against $36,135,520 same time last year. Government will disburse something near four and a half million dollars in coin on Sept. 1, on interest account, chiefly on the 10-40s, and, thereafter, will have to make no interest payments before Nov. 1, when the interest claims of the 5-20 bondholders fall due. California advices by telegraph to August 10 re-

port $836,058 in treasure as *en route* for New York by the Colorado.

Foreign exchange is in large supply and very moderate request, at easier and irregular prices. The importers are making light remittances at present, anticipating a fall in gold, and a consequent cheapening of the (currency) rates of exchange. Prime bankers' sixty day bills on London have been quoted at 107½@107¾, and on Paris at 5.30@5.21¼; sight bills on London to 108¾@109; and on Paris to 5.21¼@5.18¾. The foreign inquiry for American stocks and produce is sufficiently active to prevent any important export demand for coin, and this circumstance operates against the gold speculation. The week's exports of domestic produce and miscellaneous goods have been to the currency value of $2,592,151, against $3,894,479 same week last year. The exports since January 1, have been to the value of $125,019,079, or about twenty-nine million dollars in excess of the exports, same time last year.

Government securities were less active in the early part of the week under review, in the absence of any decisive news from Europe, which checked the foreign call for the 5-20s, and indirectly affected the whole market adversely. Prices gradually yielded from ¼ to ½ of one per cent. On Tuesday, the demand revived, and on Wednesday there was a very marked rally, resulting from the execution of large investment orders for the Sixes of 1881, the 5-20s of the first (1862) and third (1865) issues, the first (August) and second (June) series of the Seven Thirties, and the 10-40s. This revival of trade led to a rise of ½@¾ of 1 per cent., leaving the market very sparingly supplied with the favorite Sixes of 1881, and the 5-20s, and with a strong upward tendency. The anticipated ease in money, from the extraordinary disbursements of the National Treasury, will lead to a further heavy absorption of the interest bearing public stocks, and doubtless to a further advance in prices. The foreign houses are buying old 5-20s with renewed eagerness. Telegraph advices are said to have been received, intimating that the 5-20s of 1865, will be presently called at the London Stock Exchange, the same as the earlier issue of this class of bonds. The effect of such foreign recognition of the new bonds would be advantageous to their market value. Conversions of Seven Thirties into new 5-20s through the U. S. Sub-Treasury at this port, since Aug. 1, reached nearly five million dollars.

In railway and miscellaneous property, there has been a less extensive business at the Stock Board and in the street; and the realizations of certain speculative holders have tended to depress prices. The ease in money, however, enabled the *bull* cliques to carry heavy loads of stock and thus keep the market comparatively steady for all the really desirably property. Toward the close of the week, there were symptoms of renewed speculative activity and a further and more marked inflation of values. The traffic of the leading railways, especially the Coal avenues, is unusually good, and this gives strength to the popular disposition to buy railway bonds and stocks, for investment, without reference to any speculative movement.

In general business, the current operations are increasing in volume. Breadstuffs and Provisions lead off in the way of domestic produce, finding a more active and buoyant market, with a rising tendency in prices. Cotton has been quiet and depressed. The week's exports of cotton have been 3,381 bales from this port, and 8,000 bales from all the shipping ports, leaving an available supply of 115,000 bales here, and 273,000 bales at all the shipping ports. The total exports of cotton from the United States, since Sept .1, 1865, have been 1,488,000 bales. In the way of foreign merchandise, we notice more doing in groceries, dry goods, hemp and wool, at irregular prices; but a tame traffic in other articles. The total imports of foreign dry goods, last week, were $2,267,108, and the total amount marketed $1,711,158. The value of foreign merchandise imported last week, was $2,291,031—making the grand total value of last week's imports of dry goods and merchandise, $4,558,139, and since January 1, $196,962,801, against $101,962,336 same time last year.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 6.	Aug. 13.	Aug. 15.

Hotchkiss' Patent Forge Hammer.

We present to our readers an illustration and description of an improved Forging Hammer, made by Charles Merrill & Sons in New York; and from personal observation in seeing it at work in their shop, and from the testimonials shown us, we feel justified in calling the careful attention of those needing such a tool to its description. The makers state that they have sold 94 hammers during the past two years, (the time they have been making them) and that all are giving entire satisfaction. The Harlem Railroad shops in New York, the New York, Binghamton and Syracuse Railroad shops in Syracuse, Cleveland, Columbus and Cincinnati Railroad shops in Cleveland, Toledo, Wabash and Western Railroad shops in Toledo, and many large machine shops have the hammers now in use.

Columbian Metal Works.

We invite attention to the advertisement of Messrs. M. M. Freeman & Co., Agents of the Columbian Metal Works, in another column, by reference to which it will be seen that they have for sale Seamless Rolled Brass and Copper Tubes for Locomotive Flues and other purposes; Tubes of true bore, for Pump Chambers and Oil Wells; Copper Tubes of all sizes and lengths suitable for all Locomotive Work; Suction Ingress Pipe, etc. Address M. M. Freeman & Co., Agents, 40 Broadway, New York.

☞ Messrs. Fowle & Co., 70 Broadway, New York, have for sale 40,000 lbs. of superior railroad spikes.

Union Pacific Railroad.

General J. H. Simpson, President of the Board of Government Commissioners, appointed to examine and report upon the Union Pacific Railroad, has submitted to the Secretary of the Interior the report of the Commissioners on the fifth section of thirty-five miles, commencing on the 126th and terminating at the 160th mile-post. The embankments and excavations are similar to those of the sections heretofore examined. The cross-ties number 2,451 to the mile, and if sawed, face not less than six inches, and are eight inches thick; if hewn, face not less than seven inches, and are of equal thickness. The rails weigh fifty pounds to the yard, and are of the best American manufacture, the chairs are also of American manufacture, similar to those used on other sections. Two permanent water tanks have been constructed on the section; one at Lone Tree, and the other at Grand Island Station, where a turn-table has also been built. The company propose to erect a passenger and freight depot at each of these stations, the one at Grand Island having already been framed. The telegraph wires extend along the entire section, and are connected with lines to the east. The alignment is reported excellent, the road is in a smooth condition, and the ditches are generally ample and continuous. With the understanding that the company will rectify a few unimportant deficiencies, the Commissioners have recommended the acceptance of the section.

New York and New Haven Railroad.

A meeting of the stockholders of this road was held at New Haven on the 8th inst., at which the directors were authorized to issue 10,000 shares of additional stock, to be disposed of at the discretion of the directors. A resolution was passed giving each person who, on the first day of September, shall be a stockholder, the privilege of taking at par, one share for every five owned by him. A resolution authorizing the directors to apply moneys received from the sale of the additional stock, to the payment of the $912,000 seven per cent. bonds, which mature in December next, was also unanimously adopted.

Southern Pacific Railroad.

On Saturday, July 28th, we were present when the last rails were laid which united Shreveport, La., with Marshall, Texas. For many long years we have looked forward to the completion of this connection as the first move westward, the initiatory step to a grand system of railroads diverging through Texas, with its centre at Marshall, and its outlet through Shreveport.

Col. Waskom, the President of the Southern Pacific railroad, has displayed decided financial ability, for he has succeeded in gaining the confidence and in procuring material aid from the stockholders in Louisville and other places, and has raised the funds with which to complete the road to Shreveport. The enterprise was languishing, indeed almost lifeless, until Col. Waskom, assisted by large capitalists who are interested in the road, reorganized the company, reduced the stock, and placed it upon a firm basis by excluding all that was bogus.

Hynson & Co., the contractors, have, by their indefatigable energy accomplished wonders, when we take into consideration the class of labor they were compelled to employ, and the embarrassments and even opposition which they met with from many quarters. All the antecedents of both roads were bad. There was no confidence in the public mind and failure was predicted. We congratulate these gentlemen upon their signal triumph over all obstacles, and wish them every success in their enterprise. The directors, and indeed all the officers connected with this road, have exhibited a corresponding zeal in the discharge of their respective duties. So long as they are actuated by such a commendable ambition the road will be steadily extended westward to the illimitable prairies of Texas.

The road-bed is undergoing repairs along the entire line, and in four weeks we will have a track which will compare favorably with any in the country. Additional rolling stock will be purchased at an early day, and the locomotives put in good running order, and then the road will be able to carry passengers and freight at schedule time.—*Shreveport Gazette.*

Great Western Railway of Canada.

The Directors of this Company have made a final call of £2 10s. upon the new shares, upon which £18 per share has been called up. The present call will make £20 10s. per share called up, which is the full sum; such call is payable at the London Joint-Stock Bank, Princes street, London, England, on or before the 10th September next, and interest at the rate of 6 per cent. per annum will be charged upon calls in arrear after that date.

Call letters were to have been forwarded to the holders of new shares on the 10th inst.

The New Cotton Crop.

The Memphis *Bulletin* says that the most careful calculations and investigations estimate the new cotton crop at two million seven hundred thousand bales, or just about half the crop of 1860, which was the largest ever raised in the South. The estimated production for Arkansas, one hundred and fifty thousand bales; Tennessee, one hundred and twenty-five thousand bales; and Alabama, four hundred and eighty thousand bales. Considerable cotton will be grown in Western Kentucky and Southern Illinois. The crop of Illinois may safely be estimated at fifteen thousand bales, and that of Kentucky at ten thousand, which, added to the above, makes a total of two millions seven hundred and fifteen thousand bales. Calling the bale four hundred and twenty-five pounds, and reckoning the price that will be realized for the crop at thirty cents in currency, New York quotations, and we have this result: Pounds of cotton, 1,153,875,000; value at thirty cents, $345,161,500. The Government tax under the new internal revenue bill, is three cents per pound, and the above amount of cotton would yield the sum of $34,616,159.

☞ The extensive repair shop of the Boston and Maine Railroad Company at Lawrence, was destroyed by fire on the 12th inst. Four or five cars loaded with valuable machinery, standing in the yard, were also burned. The Superintendent's office contained many valuable records, drawings, patterns, etc., which cannot be replaced. Loss $100,000, on which there is insurance for $25,000.

☞ The car-house, the building containing the stationary engine used for pumping water and sawing wood, and the sheds covering 250 cords of wood, belonging to the Old Colony and Newport Railroad Company, near the station at Bridgewater, were totally destroyed by fire on the night of the 12th inst.

☞ A company, with a capital of $15,000, has been formed at Lenox for the purpose of manufacturing fuel from peat.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending Aug. 10th, 1866, were $52,028 38
Corresponding week of 1865 ..... 60,835 56

Decrease $8,807 18

The earnings of the Grand Trunk Railway of Canada for the week ending Aug. 4th, 1866, were $128,091 00
Corresponding week of previous year.. 127,067 00

Increase $1,024 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in Aug., 1866 .. $23,165 00
Corresponding week previous year.... 25,026 70

Decrease $1,861 70

The earnings of the Western Union Railroad for the week ending Aug. 7, 1866 ..... $11,655 79
Corresponding week previous year.... 13,013 93

Decrease $1,358 14

The earnings of the Chicago and Great Eastern Railway for 1st week in Aug. were.... $24,081 77
Same period last year 22,213 45

Increase in 1866. ..... $1,868 32

The earnings of the Chicago and Northwestern Railway for the first week in Aug., 1866 were $150,444 00
Corresponding week of previous year.. 143,568 00

Increase $6,876 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in Aug., 1866, were $52,986 00
Corresponding week of previous year.. 61,131 00

Decrease $8,145 00

The earnings of the Michigan Central Railroad for the 1st week in Aug., 1866, were .. $66,647 00
Corresponding week of previous year.. 85,309 00

Decrease $18,662 00

The earnings of the Detroit and Milwaukee Railroad for the first week in Aug., 1866, were $28,639 00
Corresponding week of 1865..... 35,693 00

Decrease $7,054 00

The earnings of the Chicago and Alton Railroad for the first week in Aug., 1866, were $76,354 00
Corresponding period previous year.. 81,155 00

Decrease $4,801 00

Interest and Dividends.

The Chicago and Alton Railroad Company have declared a dividend of five per cent., free of government tax, out of the earnings for the last six months, upon the preferred and common stock of the Company, payable at the office of M. K. Jesup & Co., No. 84 Broadway, New York, on the 1st of September next, to the holders of said stock who may be registered as such at the close of business hours on the 20th of August, at which time the Transfer Books will be closed, and reopened on the 3d of September next for transfers.

The Oswego and Syracuse Railroad Company will pay a semi-annual dividend of four per cent. on its capital stock, free of Government tax, on the 20th day of August inst.

The Delaware Division Canal Company have declared a dividend of three per cent. clear of tax, payable on the 15th inst.

Journal of Railroad Law.

OUR CITY RAILROADS—JUDGMENT IN THIER FAVOR —THEY MAY CHARGE AND COLLECT SIX CENTS.

The case of Moneypenny *vs.* The Sixth-avenue Railroad Company just decided in the Supreme Court of this city, holds that the statute of this State imposing a penalty on railroads for charging more than two cents per mile for passenger's fare does not apply to city railroad companies. The opinion of the court was delivered by McCunn, J.

By the Court.—The first question is whether the penal act of 1857 applies to City Railroads, incorporated under the general act of 1850, but whose fare for the transportation of passengers was fixed or regulated by contract with the City authorities who bestowed the grant, and which contract has been confirmed by the Legislature of 1854. I am opinion it does not.

The act of 1857 refers by its very term only to companies other than city companies.

In Chase *vs.* N. Y., Cent. R. R. Co., 26 N. Y. R. 526, the Court say "that the statute of 1857 has reference to the statute in which the rate for carrying passengers is fixed and allowed not to exceed two cents per mile, and it has no reference whatever to city railroads

Moreover, the language of the act shows that it could not have been intended to refer to companies whose fare was fixed at a sum certain for any distance great or small.

The penalty is prescribed against any company which shall ask and receive a greater rate of fare than that allowed by law, to wit, two cents per mile, and declares that it shall be lawful to take the legal statutory fare for one mile for any fractional distance less than a mile.

Unless, therefore, the fare of the defendants in the present action is to be governed by the mile, and not by their contract with the city, under which they have always received their fare, but by the General Railroad Act it is manifest the act of 1857 has no application.

Indeed, the act in question was never intended to apply to a City Railroad Company who are carriers of passengers only; and this is manifest from the language of the statute, which provides that every corporation formed under it shall have power "to regulate the time and manner in which passengers and property shall be transported, and the compensation to be paid therefor, but such compensation for any passenger and his ordinary baggage shall not exceed three cents per mile." It would therefore be impossible to apply it to a City Railroad.

The railroads of the interior have stations at fixed points, from and to which the fare is computable, and at which passengers get in and out of the cars. With our city roads a person gets on and off at all points. He pays his six cents and rides to where he pleases. Again, if the act of '57 had any application to city roads, these defendants may use steam (Sect. 7, 528,) and may demand an extra of five cents from passengers not purchasing tickets, (Sec. 87,) and the companies are also obliged to erect fences along their entire route, (Sec. 56,) and may also take all the real property they require for the purposes of their business, (a depot, for instance,) and acquire the legal title against the will of the owner (Sec. 13, 14 and 32). It is clear, therefore, that the general Railroad act is not to be stretched beyond its reasonable applications. But in addition to all this the act of 1854 takes the whole subject of fare out of the operation of Sec. 28 of the general act.

The act of 1854 applies exclusively to city railroads, which commence and end in the city, it authorizes the Common Council to grant the right to construct and establish railroads upon such terms, conditions and stipulations, in relation thereto, as such Common Council may see fit to prescribe.

Now these defendants had been actually incorporated nearly three years at the time of the passage of this act, and had in part constructed their roads. They, therefore, came within its provisions; and by its very terms, they were placed in the position in which they would have been, had they obtained their license from the Common Council after the passage of the act, and in strict compliance with its terms.

But while the act of 1854 ratified and sanctioned the agreement made between these defendants and the Common Council, and thus took the subject of fare out of the General Statute of 1850, it did not make the fare fixed by that agreement a matter of statutory enactment; it did not make the fare "allowed by law" in the language of the penal act of 1857; it was still a fare regulated by contract. The act confirming the contract says nothing about fare; it leaves that as found and provided for in the resolutions and contract between the city and the company. It made valid, if you please, a voidable contract, and gave legislative sanction to all its provisions, that of fare included.

It follows, from what has been said, that the fare of these defendants is regulated, not by the act of 1850, as claimed by the complaint in this action, but by the agreement with the city corporation, and it equally follows that the act of 1857 has no application to these defendants; therefore the penalties claimed in this action cannot be enforced. There is an exception taken by the defendants to the complaint, in this: "That in no Court does it allege that the plaintiff informed the conductor on entering the car how far he was going, or that he objected to pay the six cents." This exception is well taken, but after what I have said above, it is not necessary to discuss the proposition. The demurrer to the defendants' answer must therefore be overruled with costs.

Grain Trade of Chicago.

The following figures from the tables published by the Secretary of the Board of Trade at Chicago, show the receipts at that place of flour, wheat and oats for the past eight years, from Aug. 1, 1858, to Aug. 4, 1866. We give the receipts from the first week in August, it being the best dividing line between the crops.

	Flour bbls.	Wheat, bu.	Oats, bu.
1858–'9.....	441,445	5,087,896	632,002
1859–'60....	711,302	8,942,461	1,583,894
1860–'1....	1,000,625	17,495,875	1,540,264
1861–'2....	1,680,169	17,829,318	2,246,269

☞ The bridge over the Big Black, on the line of the Southern (Miss.) Railroad, has been finished, and trains are now running through from Vicksburg to Meridian.

Philadelphia and Baltimore Central Railroad.

The engineer of this road, Mr. J. M. Hood, has made a report of the various routes surveyed, south of the Susquehanna river, and lays down the following as the most practicable, and of which he says:

"We crossed the river and ran into the mouth of Deer creek. This crossing we found to be very favorable as a bridge site, and particularly desirable, as it enabled us to quit the river and commence at once a long and easy ascent of the Summit ridge, or divide between the waters of Deer creek and Bush river."

The report then describes several others routes, one south of Belair, and another by the way of Waters' Mill; but on all difficulties were encountered which caused the abandonment of each of these lines. The report then proceeds:

"So the route settled upon, and the only feasible one the country will afford, leaves the Deer creek summit and crossing Bynum's run at Moore's mill, passes about one-third of a mile to the north of Belair, where it strikes the head of Stony branch, which is followed to Archer's dam, on Winter's run. The run can here be crossed by trestle work fifty-five feet high and five hundred feet long, on a straight line and level grade, which is very favorable for the locality."

After describing very minutely some other routes which were found impracticable on account of high grades, deep gorges, etc., and all of them abandoned, the report says:

"As the general direction of the ridge itself was good, I next determined on a summit line to Stockton. This was found well suited for the purposes of a location, and is altogether the most favorable that could be had. The line then proceeds in the direction of Kellville, passing about half a mile to the left of Jerusalem mills, and crosses the falls about midway between Franklinville and Jericho factories. The bridge at this point will be fifty-seven feet high and four hundred feet long. The line then bears gradually to the right, and following a branch heading near Kingsville, crosses the summit between the two Gunpowders, at that point where it is broken by two large branches elbowing in the direction of each other, on opposite sides. The road then takes a course almost in a direct line to Stemmer's run, and strikes the Great Gunpowder at a bridging point near the mouth of Broad run. At this crossing high trestle work is required, which will be about five hundred feet long. The line then passes to White Marsh run which it crosses at Fenby's mill, and passes a little to the left of the burnt dwelling of Mrs. Ridgely, on the White Marsh farm, when it curves slightly to the right and crosses the Philadelphia and Baltimore turnpike, passes through Buck's Gap, to its intersection with the Philadelphia, Wilmington and Baltimore railroad, at a point near Stemmer's run station, and about eight miles from the city of Baltimore."

By this route, the distance from the Susquehanna river to the intersection with the Wilmington road near Stemmer's run is 35 miles.

Anthracite Coal Trade.

The anthracite coal tonnage is again, for last week, an increase on that of the previous week. The Reading Railroad brought down for week 96,654 tons, and the canal 36,391 tons—making a total for the week of 133,045 tons, against 101,881 for corresponding week last year. The tonnage of the week, as reported by the principal carrying companies, is 323,482 tons, against 207,192 tons in corresponding week last year—showing an increase of 116,290 tons. The aggregate tonnage of the season, as far as reported, is 7,321,210 tons, against 4,890,180 tons to same time last year—showing an increase of 2,431,030 tons.—*Philadelphia Ledger, Aug.* 15.

The Connecting Railroad.

This road is designed to connect all the great railroads centering in Philadelphia, by a circuit around the city on its northern and western sides. It branches out from the Trenton Railroad between Frankford and Richmond, and crosses the city on a line nearly due west, and for a considerable distance nearly parallel with Tioga street. Declining to the southward, however, it strikes the Schuylkill just north of the Girard avenue bridge. At this point, a bridge for the accommodation of the road is to be built, some of the piers of which are considerably advanced. The rails are laid as far west as the crossing of the Reading Railroad, which at this point is about Ninth street. Beyond this the grading is nearly completed to Broad street. Some work is also going on beyond Broad street. The Connecting road crosses the North Pennsylvania road at grade, and it also crosses Sixth street at grade. It is to be carried across both the Reading Railroad and the Germantown Passenger road by substantial bridges. The bridge at the Reading Railroad crossing is already pretty far advanced.

Railroad in Maryland.

We learn from the Centreville *Observer* that another railroad project is on foot in Queen Anne's county, Md. A map has been issued containing two lines—one from Galena, on the proposed Kent County road, through Crumpton, direct to Centreville, and the other from Massey's X Roads, in Kent county, through Millington, to the same town. The distance by the former line is about 20 miles; and by the latter, 23 miles.

The estimated cost of building the road is $270,000, of which the State appropriates $112,000, which, with the county appropriation of $50,000, should it be carried at the next election, will leave but about $118,000 to be taken by subscription, of which amount the first district claims to be able to take $50,000, leaving but $68,000 to be taken by the other four districts.

☞ The Commissioner of Internal Revenue has decided that the act of March 3, 1865, amended July 13, 1866, imposing a tax of 10 per cent. upon banks and banking associations for paying out the notes of said banks, does not apply to private bankers doing business without a charter. If, however, a private banker receives and pays out the notes of State banks as the agent of a National Banking Association, State Bank or Banking Association, the statute of liability is created.

☞ In October last, according to the monthly statement of the Secretary of the Treasury, the amount of legal tender notes in circulation was $678,126,940. On the 1st inst., this item had been reduced to $566,373,868—showing a reduction from the amount outstanding in October, 1865, of $111,753,072. In October of last year, the National Bank notes issued amounted to only $104,182,630, and on the 11th inst., had increased to $287,048,950—showing an increase of $182,866,320. We thus have an actual increase in these two classes of currency of $71,113,248.

☞ The earnings of the Virginia and Tennessee Railroad for the first week of August were $11,066, an increase of $5,341 on same week last year. Total for the fiscal year, commencing the 1st of July, 1866, $51,091, an increase of $38,304 on the same time 1865.

Production of Gold and Silver.

Official returns are published showing the amount of tax collected on bullion by the United States during the past twenty months. From these it appears that the value of the gold and silver on which such tax has been levied during this time, ending with 31st May, 1866, is $169,762,302, or an annual production of £101,857,381. The collection made at San Francisco is by far the largest, amounting to £92,062,090 for the twenty months. The tax is one-half per cent., payable on bullion in lump, ingot, bar or otherwise, and the exportation, sale or use of unstamped or native gold or silver is prohibited; hence it is concluded that the above represents the production of the United States with tolerable accuracy.

The Railway over Mont Cenis.

A Florence letter in the *Moniteur* says:

An interesting experiment has lately been made on Mont Cenis in presence of M. Behic, French Minister of Public Works, accompanied by several engineers. The portion of the railway already completed on the slopes along the carriage road of the mountain was gone over by a train consisting of several carriages at a rate of eleven miles an hour in ascending, and nine and a half in coming down. The incline sometimes attains 8½ feet in the 100, and some of the turnings have a radius of only 40 metres (133 feet). The works of the Italian side are to be completed by the end of October next, so that there is reason to hope that, by the month of November next, Italy and France may be united by an uninterrupted line of railway. The system, as you are aware, is that of Mr. Fell.

Delaware Division Canal.

At a meeting of the Board of Managers held in Philadelphia on the 8th inst., it was "Resolved, That a meeting of the Stockholders of this company be called to meet on the 20th day of August 1866, to consider and vote upon the ratification of the lease of the Canal belong to this company, to the Lehigh Coal and Navigation Company."

In conformity with this resolution, a meeting of the Stockholders of this company is called to meet at the office of the company, on Monday Aug. 20th at 12 o'clock, M.

☞ A telegram to the Associated Press, dated London, August 15, noon, says: "It is announced to-day that the plans for the confederation of the British provinces of North America have been definitely arranged by the government.

"The statement is also made that the terms for a loan from the government for the building of an inter-colonial railroad from Halifax, Nova Scotia, to a point of connection with the Canadian Grand Trunk Railway, have been settled."

Warren and Franklin Railroad.

This road has been completed to Oleopolis, 42 miles from Irvine, on the Philadelphia and Erie Railroad; and having purchased 9 miles of road between Oleopolis and Oil City, now own and operate 51 miles of road.

☞ A dispatch from St. Paul says: "The Minnesota Valley Railroad Company has just purchased 1,600 tons of American iron, at Philadelphia, which will finish their road to Bell Paine, giving them a continuous line from St. Paul 48 miles up the Minnesota valley."

☞ The Charleston and Savannah railroad has been opened to the Saltkahatchie, and the bridge over that river repaired.

Baltimore and Aquia Railroad.

We learn from Washington that Col. J. W. Forney and associates have signed the final contract for constructing the Baltimore and Aquia railroad, and the work is to be commenced at once, at or near Millersville, on the Annapolis road. Five miles of the road are to be graded within three months, and the main road between Millersville and Upper Marlboro', and the branch road to Washington city, are to be completed within two years. The bill authorizing the completion of that portion of the branch road within the District of Columbia was defeated in the Senate.

Concord Railroad.

At a meeting of the Directors of the Concord Railroad last Saturday, Hon. Josiah Minot was elected a Director of the road, in place of Josiah Stickney resigned, and afterwards President of the road; Hon. Joseph A. Gilmore was dismissed from the Superintendency of the same. This completes an entire revolution in the management of the road since last May. An investigation is going on into the past management of the road.—*Manchester Mirror.*

☞ We are informed on reliable authority that the accident at the depot of the Michigan Central Railroad Company at Detroit has been greatly exaggerated, and that it extended only to the falling of several iron rafters which were being put in their places for the new roof. Loss estimated at not over $1,000, which falls upon the contractors. The company will only be inconvenienced by the delay of a week or two in the finishing of the building.

☞ The Virginia Central Railroad Company have determined, after the 13th of August, to reduce their freight charges five cents per 100 lbs. on all goods coming from the Orange and Alexandria Railroad, and from two to eight cents, according to class, on all freight transferred from the Central to the Orange and Alexandria Railroad.

☞ The citizens of Buffalo have voted a loan of $200,000 to the Buffalo and Washington Railroad Co.

40,000
RAILROAD SPIKES

NEW YORK.

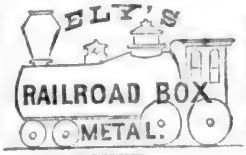
SIDNEY W. HOPKINS. CHARLES FOCKE.

SEVEN PER CENT.
First Mortgage Bonds
OF THE
North Missouri Railroad Company.

We offer for sale the Seven Per Cent. First Mortgage Bonds of the North Missouri Railroad Company, having thirty years to run. Coupons payable in New York on January 1 and July 1, in each year.

Before accepting the agency for sale of these bonds, we made careful inquiry into the condition and prospects of the road, which was examined by Mr. Wm. Milnor Roberts and others, on our behalf, and their highly satisfactory report enables us to recommend the bonds as first-class securities, and a safe and judicious investment.

The proceeds of these bonds ($6,000,000 in all) will be used in extending a road already completed one hundred and seventy miles into North Missouri, to the Iowa State line, where it is to connect with the railroads of Iowa; and also westward to the junction with the Pacific Railroad (at Leavenworth) and other railroads leading up the Missouri river, so that this mortgage of $6,000,000 will cover a complete and well stocked road of three hundred and eighty-nine miles in length, costing at least $16,000,000, with a net annual revenue after the first year of over $1,500,000, or a sum nearly four times beyond the amount needed to pay the interest on these bonds, the income of the road of course increasing every year.



The railroad connects the great City of St. Louis with its 200,000 inhabitants, not only with the richest portions of Missouri, but with the States of Kansas and Iowa and the Great Pacific Railroads.

To the first applicants we are prepared to sell $500,000 at the low rate of 80 cents, desiring to obtain a better price for the remainder. This will yield about 9 per cent. income, and adds 20 per cent. to principal at maturity.

Any further inquiries will be answered at our office.

4t30 **JAY COOKE & CO.**

Proposals for a Tunnel
UNDER CHICAGO RIVER.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, August 1st, 1866.

SEALED Proposals will be received by the Board of Public Works, at their Office, until 11 a. m. Saturday, August 18th, for the construction of a Tunnel under the South Branch of Chicago River, at Washington-st., according to plans and specifications which will be on file at said office and ready for examination on and after August 8th.

The Tunnel under the river is to consist of three passage ways, the outside ones to be each 11 feet wide and 15 feet high, and the middle one 10 feet wide and 15 feet high. The middle passage-way to terminate near the river on each side in stairways to the street. Between the stairways and the ends of the covered portion of the Tunnel, the three passage-ways are to be reduced to one, varying from 24 to 20 feet in width, and from 20½ feet to 17⅔ feet in height. The whole length of the covered portion of the Tunnel will be about 1,000 feet.

Proposals must be addressed to the Board of Public Works, endorsed "Proposals for Washing-st. Tunnel," and be accompanied with the usual $200 bond, with sureties, to be approved by the Board.

The Board reserve the right to reject any bid not in accordance with the conditions of this advertisement, or to reject all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

J. G. GINDELE,
FRED. LETZ,
O. J. ROSE,

Our Great Cornfield—What it will Produce.

The great cornfield of the West is now in its bloom and beauty. If nothing happens very extraordinary between this and October, there will be the greatest and best crop of corn ever grown in the United States. No one corn crop anywhere in the world can compete with it. Maize, corn, is so common a plant with us—so much a matter of course—that we do not put half its true value on it. There is no plant on earth equal to it, in the countries where it is produced. It is the wealth of the Ohio valley, whose thickening population gather from it gold and silver faster and easier than any mines can produce them. There is one consideration which makes the value of Indian corn much beyond any common estimate. This is the variety of its uses. Let us take a few samples. The cities of New York, Boston, Philadelphia and Baltimore, as well as other cities, derive all their animal food from the West; but every one of the millions of cattle and hogs are fattened on Indian corn. So, too, those millions of people, both negroes and whites, who eat only corn bread. So, too, there are millions of people who use whisky, directly or indirectly; but whisky is made of Indian corn. Then there are millions of animals supported in winter both by the grain and the fodder of corn. If it were necessary we could make all our molasses from corn. In one word, there is no plant which can be put to as many uses as corn. Then there is no plant really more beautiful. Its deep green, its drooping leaves, its falling tassels, its graceful waving in the wind, make it one of the most beautiful objects of the vegetable world. Suppose some decree of Providence were to deprive the Ohio valley of corn; what should we do? The glory of the country would be gone; half the value of its lands would be destroyed. Think of the Ohio valley being reduced to no more than the crops of Sweden or Norway. It is by such a comparison that we can imagine what the deprivation of corn would be to us. If again, we turn to the positive side of the account, statistics will give us some idea of what Indian corn is. The people of Ohio raise an average of thirty bushels to each living person, small and great, annually. Now, imagine the two hundred and thirty thousand people in Cincinnati, each one with thirty bushels of corn. A bushel of corn contains sixty pounds of solid grain. Now suppose the crop eighty millions of bushels (and this year it will be more), and you have as the season's crop four thousand eight hundred millions of pounds of grain; besides as much weight in fodder. It is almost inconceivable in magnitude just for the State of Ohio. If you reflect that wheat averages but little more than one-third as much to the acre, and contains no more pounds to the bushel, you see that it falls far short of corn in its positive utilitarian value. It is true that by the very fact of its less production it is higher in price, but when you come to bring wheat down to every day uses it is inferior in variety and value to corn. It may be distilled. It may be fed to cattle, but the inferiority *of its production per acre* is in this climate decided. In a high northern latitude the advantage might be in favor of wheat. Let us now turn to the corn statistics of the United States, and see how we are advancing in this wonderful plant. The statistics of the production of corn in the United States for the last twenty-five years are as follows, viz:

	Bushels.
In 1840, total crop.....	377,531,875
In 1850, total crop.....	592,671,104
In 1860, total crop.....	830,451,707
In 1866, total crop (estimated).....	1,039,000,000

The increase being at the rate of 4 per cent. per annum, the aggregate crop of 1866 will be over *one thousand millions of bushels!* Estimate this at sixty cents per bushel, and conceive, if you can, the *feeding power of this enormous quantity of Indian corn.* Three or four years ago corn was so abundant in Illinois that it was used for fuel. The chief use of corn is the production of carbon in the animal stomach, and this production can be carried on in the stomach of almost all animals, from the feathered biped to the unfeathered biped, man. As we see, however, daily, before us, it is chiefly applied to cattle, hogs and horses, and certainly we must consider this is a wonderfully luxurious country, where our domestic animals command food fit for the daintiest man.

Let us next consider the portions of the United States where Indian corn is *the* staple, in comparison with other grains:

New England, New York and New Jersey, 38,948,890 bushels.

Pennsylvania, Maryland, Delaware, Virginia, North Carolina and South Caroline, 128,998,249 bushels.

Georgia, Florida, Alabama, Mississippi, Louisiana, Arkansas and Texas, 147,425,726 bushels.

Ohio, Indiana, Illinois, Kentucky, Tennessee, Missouri, Michigan, Wisconsin, Minnesota, Iowa and Kansas, 550,627,943 bushels.

The enormous preponderance of Indian corn in the central West is here obvious. But we should remark that the States of Michigar, Wisconsin, Minnesota and Kansas have produced but a very small portion of this; and that, in fact, half the immense crop of Indian corn grown in the United States is produced in the valley of the Ohio and Missouri. No doubt the main cause of this is climatic, but does not depend on the most southern climate. It depends on a combination of warmth, humidity and limestone, which is nowhere found in such a combination as in the Ohio Valley. Indian corn is grown in France, Italy, the West Coast, parts of Asia, &c., &c., but nowhere is their a climate adapted to it so good as that of the valley of the Ohio.

We should remark here, that *maize* (Indian corn) is an American plant, and it would almost seem from the historical and collateral evidence to be a native of this very region of country. Dr. Pickering in his "Races of Man," a most valuable work, says "that the plant most widely cultivated in aboriginal America is the *maize*, or Indian corn. If it shall prove foreign, there is but one route open to its introduction, that of Japan. It is further manifest from the local absence of the plant, that North California was not the point of dissemination to other parts of America." In fact, there is no evidence that corn originated in any other country, and all evidence possible is the imperfect history of the abriginals, that it orginated here. The maize was found in the ruins of the ancient Indian towns of Peru. But maize was not introduced into Egypt till the sixteenth century; nor into Italy till 1530. We find it in all other countries an introduced or immigrant plant; but in America it was cultivated everywhere by the aboriginals and found on the ruins of its ancient monument. Maize then is American, and we may here say that if America had nothing but its own plants, it would have not only all that was necessary to good living, but nearly all that is luxurious and beautiful in the productions of the earth.

In regard to the positive production of corn in proportion to soil and climate, the State of Ohio affords the best and most accurate examples. For fifteen years we have had in Ohio perfect and reliable statistics of our annual crops. We have, therefore, the average not only of one locality or class of soil, but of all soils, and of a long series of years. This establishes, in the most perfect manner, a unit for the average production of all soils and all seasons. Here we may remark that there is no plant so little effected by the change of season as Indian corn. The wheat crop, even the oats crop, is sometimes struck down, so that the product is not more than 30 or 40 per cent. of what it should be; but, for twenty years, the corn crop of Ohio has never been reduced below 60 per cent. of what it ought to be. One year it was reduced to about two-thirds by drought. In another year it was injured by a severe frost when ripening; and in another by such heavy rains in May and June, that much less than usual was planted; but in no one year was it reduced as low as sixty per cent. Corn in the Ohio Valley may be regarded as a permanent crop, which nothing but an extraordinary change in the course of nature can seriously reduce.

We shall now give the average of production in the State of Ohio, furnished in the annual report of the Commission of Statistics. In the annual report on statistics for 1860 the following summary is given up to that period. The number of acres in corn has increased from 1850 to 1860 nine hundred thousand acres:

Year.	Crop. Bushels.	Average per acre. Bushels.
1839, (U. S.)	33,668,144	....
1849, (U. S.)	59,078,695	....
1850, (State)	56,619,608	36.8
1851 "	61,171,282	36.7
1852 "	58,165,517	33.6
1853 "	73,436,090	40.0
1854 "	52,171,551	26.0
1855 "	87,587,434	39.7
1856 "	57,802,515	27.7
1857 "	82,555,186	36.6
1858 "	50,863,582	27.7
1859 "	68,730,846	29.5

From this table the following inferences may be drawn:

1. The crop of Indian corn has increased from 1840 to 1850, 25,410,551—76 per cent.; from 1850 to 1860, 9,652,151—16½ per cent.; from 1840 to 1850, 35,062,702—107 per cent.

2. If we divide the last nine years into three periods, we shall find there has been a steady and nearly equable increase of the crop of Indian corn. Average of the crops of 1851, 1852 and 1853, 64,257,629 bushels. Average of the crops of 1854, 1855 and 1856, 65,852,999 bushels. Average of the crops of 1857, 1858 and 1859, 67,-169,872 bushels. This is a slow but certain increase.

The annual production of the next five years was:

	Acres.	Bushels.	Per acre.
1860	2,397,639	91,588,704	38.0
1861	2,266,129	74,858,878	33.0
1862	2,120,544	62,764,887	30.0
1863	2,027,811	54,614,617	27.0
1864	1,938,616	54,053,491	27.0

The average of these five years is 67,500,000, but little above the production of the three previous years.

The production of 1865 was greater, and the production of this year will be much greater. If we suppose the number of acres planted to be 2,-400,000 (and it was more than that one year), and the average production, that of 1860 (38 bushels), we shall have 82,000,000 of bushels; but, as we do not know the number of acres planted, we cannot speak with certainty. We have had three crops (see the above table) of eighty-seven, eighty-two, and ninety-one million of bushels. Unless there is some unforeseen accident to the crop, the probability is, we shall have nearly ninety million this year. The average per acre, in twenty years crops, is not materially different from thirty-three bushels per acre; and this may be taken as a unit of measure for all soils and in all seasons. An acre of land in Ohio has produced 180 bushels of corn, but who can get that in one hundred acres? If it were possible to produce 60 bushels of corn per acre, the land would be worth two hundred dollars per acre, estimated by the income. There are some counties such as Butler, Monroe, Ross and Pickaway, where the quantity of alluvial land is so great that the averages per acre reach in most years, above forty bushels per acre. To form an idea of the value of such lands, it is not only necessary to consider that Butler county has produced once three millions of bushels of corn in a year, which is equal to one hundred and eighty millions of pounds of nutritious grain, which will support in bread and meat comfortably, one hundred and fifty thousand people. Joel Barlow celebrated in a poem the praises of "Hasty Pudding." A better subject now is the praises of the beautiful maize, as it greens and grows in this beautiful valley.

Morrow, Ohio, August, 1866. E. D. M.

Bellefontaine Railway Company.

This road is 206 miles in length, extending from Indianapolis, Ind., to Crestline, Ohio. The following is a comparative statement of the earnings and expenses of the line for the years ending December 31, 1864 and 1865:

Earnings:	1864.	1865.
From passengers	$653,563 45	$828,367 27
" freight	1,045,013 15	777,438 60
" mail	28,475 00	28,475 00
" express	21,592 73	40,884 09
	$1,748,644 33	$1,675,164 96
Expenses, viz:		
Repairs of engines	$100,413 87	$101,909 61
" cars	92,919 18	133,756 18
" track	352,682 68	317,397 25

—which with the receipts from sales of real estates has been absorbed in the sinking fund for the redemption of Indianapolis, Pittsburg and Cleveland Railroad 1st mortgage bonds.

During the past year 22 miles of re-rolled and 15 miles of repaired iron, 18,000 chairs, 1,300 kegs of spikes, and 80,000 cross ties have been used in repairs of track, at a total cost of $168,-200. Of this amount $32,000 is estimated as extraordinary expenditure.

Twenty-six miles of track have been raised, ballasted, and put in good condition. A number of side tracks have been extended, raised and ballasted. The expenditure under this head has been $144,000, of which $34,000 is estimated as extraordinary.

The new bridge framed last season for the White River crossing near Winchester, has been raised, covered and painted. A new bridge has been put up over Heaston's Branch, near Winchester. The White River bridge at Muncie, and the Fall Creek Bridge, have been covered and painted.

Stone abutments for a new iron bridge over Lick Creek, near Alfont, and for the Scioto Bridge, near Marion, and three arch culverts of ten feet span, have been constructed. Ninety-three wooden cattle guards, and a number of wooden sluices have been put in.

The expenditure in this department amounts to $15,400, $9,000 of which is regarded as extraordinary. The expenses under this head in future, will be comparatively small.

Foundations for a new local freight depot at Indianapolis, have been laid. A new station house at Yorktown, a new water station at Winchester, and six boarding houses for track men, have been built. The new station house at Versailles has been completed. The station houses at Marion, Bellefontaine and Sidney, have been put in good repair. Considerable repairs have been put upon the shop buildings at Galion, and an office for the Assistant Superintendent has been put up at that point.

The expenditure for buildings has been $36,700, of which $12,000 is estimated as extraordinary.

Thirty-seven miles of new fence have been built, and 26 miles have been repaired and put in good condition, at an expense of $23,400, of which $17,000 is estimated as extraordinary.

Wood purchased during the year, 46,500 cords. Consumed 37,000 cords. Total expenditure for wood and wood lands was $156,000. $25,000 was in excess of current use.

Two new locomotives have been built at a cost of $32,000. Material repairs have been made to all the locomotives of the company. Previous to the burning of the engine houses at Galion and Muncie, on the 5th and 6th of January, by which nine engines were injured to the extent of $15,-000, all of the engines, 36 in number, were in complete order for service.

The extraordinary expenditure for the year in this department is estimated at $94,000.

There have been built at the car shops at Galion and Indianapolis, during the year: 3 first class passenger coaches, 5 caboose cars for live stock trains, 21 stock cars, 6 box freight cars, 8 flats, 23 hand cars for trackmen, and 1 laborers' sleeping car for working train.

Two first class passenger coaches, one first class sleeping car and 46 box freight cars, have been overhauled and put in good order.

Twenty-five new stock cars were purchased during the year.

The extraordinary expenditure in the car department, is estimated at $62,000, exclusive of the cost of 25 new stock cars purchased.

The number of passengers carried was 337,362, of which 40,802 were through, 209,419 local, and 87,141 military. The total number of tons of freight carried was 205,210; of which, 106,468 went eastward, 59,912 westward, and 38,830 local. The number of locomotives owned by the company is 36. The number of miles run by locomotives with passenger trains during the year, was 319,180; with freight trains, 459,562; with wood

trains, 52,093, and with gravel trains, 58,061—total miles run, 888,896.

Minnesota Railroads.

The steady progress of railroads in this State affords the most gratifying evidence of our prosperity, and indicates a brilliant future for Minnesota. There are now (including main lines and branches) twelve land grant railroads in this State, extending in the aggregate over two thousand miles. They comprise the

	Miles.
Minnesota Central	115
Minnesota Valley	170
St. Paul and Pacific, 1st division	80
St. Paul and Pacific, Main line	180
St. Paul and Pacific, Branch from St. Paul to Stillwater	18
St. Paul and Pacific, Branch from Watab to Pembina	332
St. Paul and Pacific, Branch from St. Cloud to Lake Superior	120
Lake Superior and Mississippi	140
St. Paul and Winona	100
Winona and St. Peter	275
From Hastings to Western Boundary	200
Southern Minnesota	275
Total length	2,005

The land grants render the completion of these lines simply a question of time, and indeed on five of them, viz: Minnesota Central, Minnesota Valley, St. Paul and Pacific—first division, Winona and St. Peter, and Southern Minnesota, track laying is now in progress.

The St. Paul and Pacific Company, First Division, are track laying between Big Lake and St. Cloud, and will continue to work without interruption until the latter place is reached.

The Minnesota Valley Company are steadily pushing forward the work between St. Paul and Mendota, and a few weeks will see it completed.

The Minnesota Central is laying track rapidly between Fairbault and Owatonna, which latter point will be reached about the first of September.

The Winona and St. Peter Company are vigorously at work putting down iron between Kasson and Owatonna, and expect to reach that place simultaneously with the Central.

The Southern Minnesota is extending towards the Winona and St. Peter road, and will have the cars running to Rushford, a distance of twenty miles, this season.

The amount completed early this fall will be as follows:

	Miles.
St. Paul and Pacific (St. Paul to St. Cloud)	80
Minnesota Valley (St. Paul to Shakopee)	25
Minnesota Central (St. Paul to Owatonna)	80
Winona and St. Peter (Winona to Owatonna)	80
Southern Minnesota (Hokah to Rushford)	20
Total	285

In addition to the above the following roads are partially graded:

	Miles.
Lake Superior and Mississippi	30
St. Paul and Pacific (main line projected west from Minneapolis to Big Stone Lake)	30
St. Paul and Winona	10
Minnesota Valley (from Shakopee to Belle Plaine)	15
Total	85

By the terms of a bill which passed Congress a few days since, the time for the completion of all these roads has been extended to seven years from last spring. We are confident, however, that the men engaged in the prosecution of these public works will take as little of the extension as possible, and we expect to see all the roads completed some time before the seven years expire.

Though all these roads reach St. Paul in some manner, seven terminate here directly. There are besides two Wisconsin Land Grant roads which will terminate here. They are the road from Hudson to Bayfield on Lake Superior, and the line from Hudson to Tomah, a point on the railroad between La Crosse and Milwaukee. This will give us nine roads terminating directly here, as follows:

Minnesota Central, Minnesota Valley, St. Paul and Pacific, First Division, St. Paul and Pacific, Branch to Stillwater, St. Paul and Pacific, Main line, St. Paul and Winona, Lake Superior and Mississippi, Hudson and Bayfield, Tomah.

The person who questions the idea of St. Paul being the commercial centre of Minnesota should study these facts.—*St. Paul Pioneer.*

Schenectady and Ogdensburg Railroad.

We learn from the Albany *Argus* that the survey of this proposed railroad is progressing satisfactorily. A route has been "engineered" from a point near the junction of the Schenectady and Saratoga with the New York Central Railroad, on the westerly side of the Mohawk river, at Schenectady, through the towns of Glenville, Charlton, Galway and Providence, to a point on the Sacandaga river, in Northampton, near the Fish House, and from thence up said river to the village of Wells, in the county of Hamilton. The distance already made is about forty miles. So far, everything is satisfactory. From Wells, the route will continue up the Sacandaga, and passing within two or three miles of the head of Lake Pleasant, which, by the present highway, is ten miles northerly above Wells.

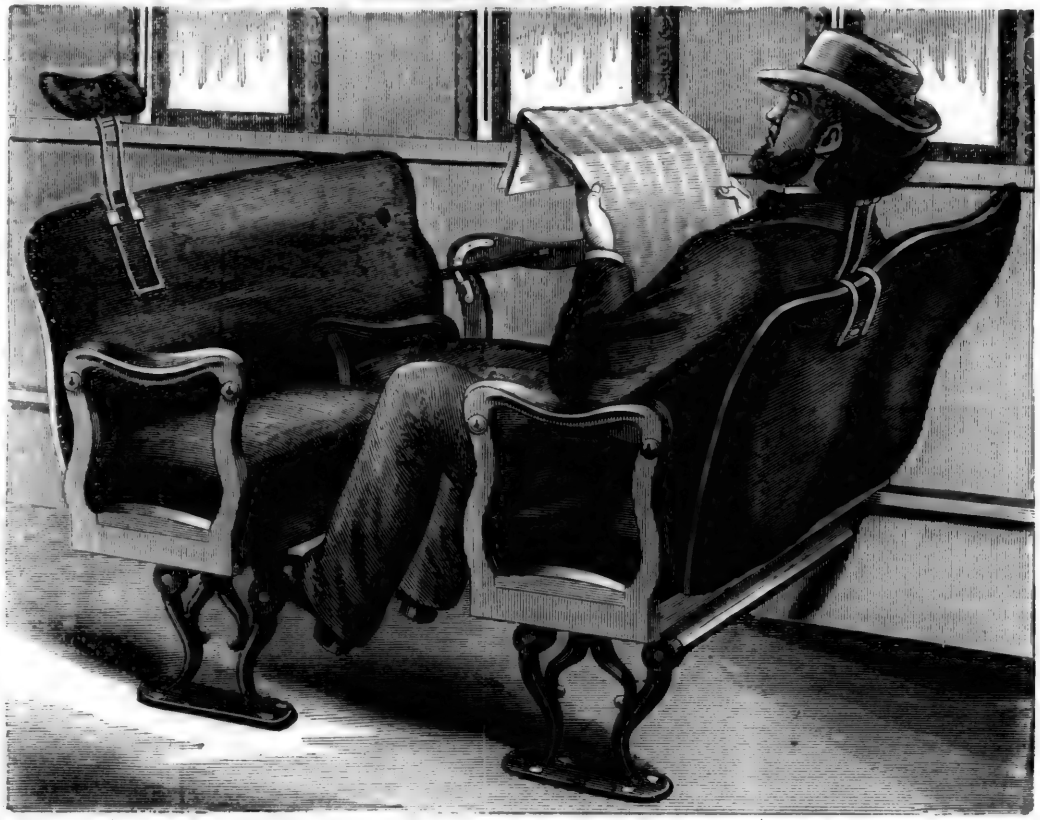
The next forty miles, it is anticipated, will severely tax the ingenuity of the engineers to find an eligible route over and through the Adirondack Mountains. The elevation to be overcome is great; and the face of the country rough and broken, and chiefly covered with a dense forest. But it is believed that an eligible route will be found.

Should this railroad ever be built, it will open up this long benighted part of the State, with its mineral and forest wealth, to the use of mankind. It would also shorten the distance from Ogdensburg, on the St. Lawrence, to Albany, on the Hudson, more than fifty miles, and would traverse one of the most picturesque portions of the State, with its towering mountains, beautiful lakes, and almost primitive forests.

Interesting to Travelers.

We learn that arrangements have recently been entered into between the Georgia and South Carolina Railroads, and the Wilmington and Manchester Railroad of North Carolina, by which through passenger trains will be run daily between Atlanta and Wilmington. Passengers, baggage and mails will be carried daily between these points without change of cars. The most luxurious sleeping cars, built expressly for this line, are on these trains. The cars are both day and night cars, and passengers need not change their seats from Atlanta to Wilmington, and have no trouble about baggage or transfers. Passengers going North, and taking this route and going up the Chesapeake Bay, do not lose any nights' rest from Atlanta to New York, or even Boston. Through tickets are sold at Atlanta, Augusta or any other point on the route. The arrangement commenced August 4th, and is a step forward in railroad enterprise which we are much gratified to notice. We hope this effort on the part of these old and favorite roads, to add to the comfort of the traveling public, will result in a fair share of travel on the line. The connections on this line are sure and reliable, the different companies having recently added the best and most improved rolling stock to their equipment.—*Augusta Chronicle.*

Baltimore and Potomac Railroad.



The annual meeting of the stockholders of this company was held at Upper Marlboro', Md., on the 15th inst. From the Report of the President, Col. Oden Bowie, an abstract of which is given elsewhere, we learn that the whole road from Baltimore to the Potomac River has been put under contract to responsible parties. Col. Oden Bowie, Hon. Daniel Clarke, Col. William D. Bowie, E. G. W. Hall, of Prince George's County, Samuel Cox, of Charles County, Basil D. Hall, of Anne Arundel County, Hon. John Lee Chapman and Alford Mace, of Baltimore City, were elected directors for the ensuing year. Col. Oden Bowie was re-elected President. A meeting of the directors was to have been held in Baltimore on the 20th inst., and arrangements made for the location of the road, when work would immediately commence.

Washington County Railroad.

A letter to the Baltimore *Sun*, dated Hagerstown, Md., Aug. 13, 1866, says: "The president and directors of the Washington County railroad held their monthly meeting here on the 8th, and, as I have been informed by the president, the work is progressing entirely satisfactory; except, perhaps, one or two sections, which the chief engineer has the power to put additional force on, and will do so, in order that the road may be opened for trade and travel at as early a day as possible. There is a feature in the letting of this road that is not generally known, which is important as insuring the early completion of the work. It is this, that the contractors for the entire line receive the amount of their estimates in cash, not any portion in stock or bonds of the company, or both, as is generally the case on works of this kind."

GREAT RAILWAY LUXURY.

THE PORTABLE HEAD-REST

OR POCKET BERTH.

From the Scientific American.

IMPROVED HEAD-REST.—Riding upon the rail is very fatiguing, especially if the traveler has to take a long journey. With the "Portable Head-Rest or Pocket Berth," which may easily be carried in one's satchel or valise, the railroad traveler may sleep at his pleasure day or night, and ride a week or longer in an ordinary car without experiencing fatigue. A distinguished individual of literary tastes and luxurious habits, is represented in the above engraving as enjoying both with great satisfaction. When it is considered that one of these "Portable Rests" will last a traveler a life-time, used with care, and that the joltings and concussions which he is compelled to undergo ordinarily is reduced to real comfort and pleasure by their use, the "Portable Rest" will be esteemed and approved of by the public generally.

From the New York Journal of Commerce.

A PUBLIC BENEFACTION.—Mr. J. R. Hoole, 124 Nassau street, New York, advertises for agents to sell a Patent Head-Rest to be used by railway travelers. By this ingenious invention, which may be carried in the pocket, a weary traveler may sleep in an ordinary car without fatigue, and "take up his bed and walk" at the close of his journey. It provides a great amount of comfort at a very small cost.

From the New York Times.

A PORTABLE HEAD-REST FOR RAILWAY TRAVELERS.—An advertisement in another column calls attention to a Pocket Head-Rest, or as it might almost be called, a portable berth, for the use of railway travelers. It is so arranged that it can be fitted to the back of any seat in an ordinary car, and can be adjusted to any desired height. Those compelled to travel much by rail will find it a convenience, luxury, and almost a necessity.

From the New York World.

A POCKET BERTH.—We have seen an ingenious invention designed expressly to relieve the tedium of traveling in railroad cars. It is called the Portable Head-Rest, or Pocket Berth, which railway travelers cannot fail to appreciate. It is extremely light and handsomely got up. With it the traveller may sleep by day or by night, in any ordinary car, and ride a week without experiencing the usual fatigue.

From the New York Evening Post.

USEFUL INVENTION.—The Portable Head-Rest for railway travelers is an ingenious contrivance. Its weight is but one pound. It may be carried in the pocket, and it furnishes a comfortable resting place.

From the New York Express.

PORTABLE RAILROAD BERTH.—A gentleman of this city, who has an eye to the public good, has provided the railroad traveler with just the article long since needed. It is a simple yet ingenious contrivance to enable one to ride in any ordinary railway car a week or longer, enjoying rest and sleep at pleasure, either by day or by night. It really seems to us to be just what every railroad traveler should have. It is called the Pocket Berth, or Head-Rest, and can be attached to any ordinary car seat-back instantly.

From the New York Commercial Advertiser.

RAILWAY HEAD-REST.—We have seen an ingenious invention which to us seems a public benefaction. It is called "The Portable Pocket Berth, or Railway Head-Rest," which railroad travelers will be sure to appreciate. It may be attached to or detached from any ordinary car seat in a moment, and by many persons it will be considered superior to a sleeping car, as with it sleep may be enjoyed either by day or by night.

From the New York Independent.

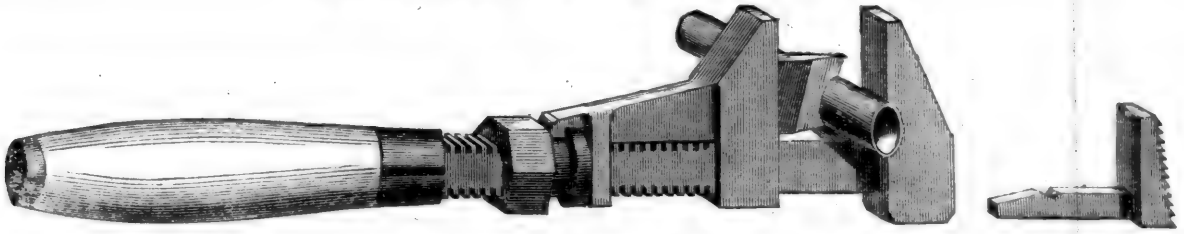
A PORTABLE POCKET BERTH.—The railway traveling public will be indebted to the patentee of an ingenious device for sleeping comfortably in an ordinary car, called the "Portable Head-Rest, or Pocket Berth," which is not only very handsomely made, but is really useful, as well as compact, enabling the traveler to carry it with him from car to car, or city to city. Railroad travelers who object to a sleeping-car, for various reasons, will find this invention precisely adapted to their wants, as with it sleep may be enjoyed either day or night. We consider it a pleasure to commend this contrivance, as it tends to relieve the fatigue of traveling by rail greatly—a very great desideratum.

From Le Messager Franco-Americain.

A NEW INVENTION.—Among the thousand inventions which the fertile genius of the American produces every day, there is one which merits special mention on account of its convenience and usefulness. It is a very small piece of furniture, so small that it can be easily carried in the pocket. But adjust it upon the back of a car seat, and you will have just at the height of your head a most comfortable support, which will permit you to ride at your ease without fatigue, and to sleep if you have the desire. The oscillations so fatiguing to the head may thus be prevented, and so you may travel days or nights in an ordinary car, dispensing with a sleeping berth, which is but indifferent pleasure.

For sale by

JOHN R. HOOLE,
No. 124 Nassau street, New York,
General Agent for United States.



Price $6.

N. B.—A liberal discount to Railroad Companies, Railroad Agents, Ticket Agencies, Conductors, Hotel Proprietors, and dealers generally.

Virginia Enterprise.

$1,000,000 have been subscribed for the construction of a railroad from Richmond to Newport News: distance seventy miles, E. C. Hambin of Cincinnati is President of the company, and the work will commence on the 25th inst. There are said to be thirty feet of water at the Newport terminus, affording a very favorable site for a city. The expectation of the projectors of the work is, that Newport News will become the great shipping point of Virginia, and that the back country will find its outlet through Virginia as soon as proper lines of transit are opened.

WEBSTER'S PATENT WRENCH.

This is an invention which, though perfectly simple in itself, is of great merit, and cannot fail to recommend itself favorably to the attention of all machinists and engineers. By its use a great saving is effected of labor, time and money; and its simplicity and strength, together with the wide range of uses to which it can be put, make it a tool necessary to all well appointed machine shops, and invaluable to all steam or gas fitters, engineers and mechanics generally.

It is intended for cutting off and screwing up all kinds of iron or brass pipe, steam, water or gas pipe, bolts, round rods, nuts, &c., and is, at the same time, the strongest and most perfect monkey wrench in use. A cutting tool is adjusted between the jaws so as to be securely held in place while in use, and easily removable; when the wrench can be applied to any of the uses of wrenches generally. An equivalent tool for clasping or griping pipe, rods, bolts, &c., to screw or unscrew them, is attached and detachable in the same manner as the cutting tool. To cut pipe or rods, insert the cutter, secure the pipe in a vice or otherwise, set the wrench as shown in the cut, feed up the nut on the bar of the wrench with the accompanying six square key, (not shown in the engraving,) and turn the wrench entirely around the pipe, passing under it and away from you. Feed up the nut again and continue; a very few turns will suffice to cut off the pipe or rod cleanly and beautifully. The cutter does not leave a burr, or jam or disfigure the pipe in any way, but makes a clear even cut the entire thickness of the pipe. To screw or unscrew pipe, &c., insert the clasp and use as an ordinary wrench, turning in the same direction as above. There is no danger of smashing or splitting the pipe, as so often happens when using the common pipe tongs. The wrench serves the purpose of tools costing from four to six times its price, and will do the same work more thoroughly and to better satisfaction than the expensive pipe tongs and cutters. The cutter and clasp are of small size, and can be carried in the vest pocket, obviating the burden of the great weight of tongs, &c., to be carried and used in putting up or repairing work. The tools are made of the best steel, and the wrench itself is excellently well made of the best quality wrought iron with bar and head solid; all case hardened. Each wrench is adapted to various sizes of pipe. The smallest size wrench (12 inch) cutting and screwing pipe from ⅛ inch to ¾ inch diameter, and the largest (21 inch) wrench; pipe from ⅛ inch to 2½ inches diameter. A special gold medal was awarded to the patentees by the American Institute at the Fair of that Society, September, 1865.

Patented by Wm. Webster, Feb. 9th, 1864.

Manufactured and for sale by WEBSTER & CO., No. 17 Dey street, New York.

Baltimore and Potomac Railroad.

The annual report made by Colonel Oden Bowie, president, to the stockholders of the Baltimore and Potomac Railroad Company, at their meeting in Upper Marlboro, Prince George's county, last week, embraces various interesting facts relative to the project. If the construction of the road can be accomplished, it will of course be of vast advantage to that part of the State, enhancing the value of the lands, besides affording additional needed facilities for reaching the markets of Baltimore and Washington, and eventually supplying a link in a second line of travel between North and South. The report announces that the board of directors the previous week signed and sealed a contract with Col. John W. Forney and associates to build and equip the entire road from Baltimore to the Potomac river, and the branch to Washington. The charter for this branch road into the District of Columbia has, however, not yet been obtained from Congress. The bill passed the House at the last session, but failed in the Senate, or rather was postponed until December. This the president charges was owing to the influence of adverse Maryland interests, and says the branch to Washington would have secured the building of the whole road. The branch line from the junction near Collington has been surveyed, finding the distance over a country most practicable for the cheap and speedy construction of a road several miles shorter than the present road to Washington. The report says of the contract for construction:

For the purpose of putting us in immediate connection with Baltimore, the contract requires that the road shall be commenced on the south side of the Annapolis road; that five miles shall be graded within six months from the signing of the contract; that the road to Marlborough shall be completed within two years, and the entire road within the time specified by the charter. Arrangements are being perfected for proceeding immediately with the location of the road, and I am assured by the contractors that immediately upon such being made the grading will be commenced, and, as an earnest of their sincerity and zeal, that the first five miles will be completed before the winter's frost shall have put an embergo upon further progress. The contractors are obligated to take the stock of such subscribers who have paid the two installments called in, by the payment to them of the six dollars per share paid in.

After the signing of the contract the board directed the president to call in all unpaid installments upon the stock to the amount of $6 per share, and if this is not complied with in accordance with section 3d of the charter, he is to take proper steps for its forfeiture to the company. The president adds the rather discouraging fact, however, that whilst many failed to pay the first call of $5 per share, the last, of $1, has been comparatively neglected, but he urges that none should now hesitate when the contract is made, and they can instantly dispose of their stock. The fact is cited that that section of the State, having no work of internal improvement, has been grievously taxed for the railroads and canals that permeate every county except those on the peninsula interested in the Baltimore and Potomac road. The "great expectations," ultimately, which are indulged in regard to the road are thus set forth by the president:

Another branch from Alexandria, joining that from Washington, or tapping the main line at Upper Marlborough, would effect a direct connection with the Orange and Alexandria and Virginia Central roads, and as the latter will soon be completed to the Ohio river, would catch their through travel, and would not only secure a second route to the Ohio, located widely apart from the present one by the Baltimore and Ohio road, but would have access by rail to the heart of Virginia and to the most fertile and wealthy sections of Tennessee and Kentucky.

The advantages in this connection and that with the Richmond, Fredericksburg and Alexandria road at or below Aquia creek, by which communication between Richmond and the North is shortened five hours, and escapes the water travel on the Potomac, always unpleasant and often entirely stopped by ice; the extension of another branch to Leonardtown or Point Lookout, which, for the benefit of our friends in St. Mary's county, I hope and expect to see built immediately after the main stem, and which would accomplish all the desires of the friends of the Washington and Point Lookout road; the shortening of the distance between Washington and Baltimore, and the exemption from the capitation tax; the placing of Annapolis within half the distance by rail it now is to Baltimore; the opening of another and much shorter route between the national capital and that of our own State, where the Naval School and other important public institutions are being permanently established by the federal government, and the immense amount of local business this road would do, are advantages so great possessed by our road, that I was satisfied that capitalists must be attracted by it before the close of summer, and it was with this view that the annual meeting, appointed for June, was postponed until to day, in the hope that I might be able to announce the letting of the contract and the speedy commencement of the road.

It appears that there were 680 shares of stock represented at the meeting of stockholders, and the alleged contractors were present. They are to take the bonds of the company in payment, and, as above indicated, the forfeited stock also, refunding installments already paid in, eventually. The proceedings of the stockholders' meeting are given in another column.

☞ The Connecticut River Railroad Company have almost finished the grading of the second track between Springfield and Chicopee, a distance of four miles. This track will probably be in operation before next winter, and next season may possibly be extended to Holyoke, four miles beyond. The whole length of the road is fifty miles, and has been operated hitherto without a single mile of double track.
